# TABLE OF CONTENTS

Polyurea: Characterization, Modeling, and Dynamic Performance Evaluation ........................................ 1  
  S. Nemat-Nasser

Applicability of the Time-Temperature Superposition Principle in Modeling Dynamic Response of a Polyurea .................................................................................................................. 4  
  J. Zhao, W. G. Knauss, G. Ravichandran

Dynamic Analysis of Climbing Ropes .......................................................................................................... 8  
  A. Niukonov, U. Florjancic, B. Zupancic, I. Emri

Effect of Functionalization of Carbon Nanotubes on Glass Transition and Enthalpy Relaxation ......................................................................................................................................................... 11  
  A. Flory, T. Ramanathan, L. C. Brinson

Study of Enhancement Mechanism and Synergistic Effects of Polymer/Clay Nanocomposite ........................................ 14  
  Yaning Li, Amit K. Kaushik, Anthony M. Waas, Paul Podsidiolo, Nicholas A. Kotov, Ellen M. Arruda

Temperature Dependent Bending and Buckling of Glass/Ionomer Laminates ............................................. 18  
  J. Belis, J. Vander Beken, D. Callewaert, R. Van Impe

Modeling Failure of Heterogeneous Viscoelastic Solids Under Dynamic/Impact Loading Due to Multiple Evolving Cracks using a Multiscale Model ...................................................... 21  
  Flavio V. Souza, David H. Allen

Modeling and Characterization of Viscoelastic Polymer Composites Containing Damage ........................................ 24  
  Ramesh Talreja

Development of a Viscoelastic Continuum Damage Model for Cyclic Loading ........................................... 27  
  R. W. Sullivan

On the Pressure Dependence of Neat and Particle Filled Polypropylene Compounds ........................................ 30  
  M. Jerabek, Z. Major, K. Ravi-Chandar

Compressive Behavior of Isocyanate-crosslinked Vanadium Oxide Aerogels ............................................. 33  
  H. Lu, H. Luo, G. Churu, Nicholas Leventis

A Micromechanical Model for Thermo-Viscoelastic Analyses of Particle Reinforced Composites ................................. 36  
  Anastasia H. Muliana, Kamran A. Khan, Jeong Sik Kim

Study on the Micromechanics Modeling for Predicting the Viscoelastic Behavior of Poly(ethylene)terephtalates (PET) Reinforced by Spherical Glass Beads ......................................................... 39  
  J. Diani, C. A. Cruz, G. Regnier
A Study of Evaluation about Stress Intensity Factor of the Material for a Cylinder of Small Output Engine of Having Crack, Circle-hole or an Inclusion Under Tensile Load

Shuutei Sasaki, Tsutomu Ezumi

Viscoelastic Response of Ultrathin Polymer Films and Surfaces: Is There A Liquid Layer?

Paul A. O’Connell, Stephen A. Hutcheson, Gregory B. McKenna

Tensile Properties of Latex Paints: Time, Temperature and Moisture Content

E. Hagan, M. Charalambides, C. Young, T. Learner, S. Hackney

Viscoelastic Models Involving Fractional Derivatives of Different Orders

Yury A. Rossikhin, Marina V. Shitikova

Analysis of Time-dependent Deformation for CFRP Mirror Under Hot and Humid Environment

Y. Arao, J. Koyanagi, S. Utsunomiya, S. Takeda, H. Kawada

Prediction of Long-term Creep Life for Unidirectional CFRP

M. Nakada, K. Yoshioka, Y. Miyano

Biphasic Poroviscoelastic Finite Element Indentation Simulation of Hydrogels

K. Kiu, T. C. Ovaert

Prediction of Long-Term Fatigue Strength of Quasi-isotropic CFRP Laminates with a Hole Under Compressive Loading

Hongneng Cai, Yashushi Miyano, Masayuki Nakada, Takara Maeda

International Opportunities in Materials Research Through the Air Force Office of Scientific Research

K. C. Goretta

Stochastic Constitutive Model of Amorphous Polymers

J. M. Caruthers, G. A. Medvedev

Modeling Strategies to Predict the Viscoelastic Behaviour of Amorphous Glassy Polymers

A. D’Amore, L. Grassia

Effect of Thermomechanical Properties on the Deformation During Cooling from the Rubbery to Glassy States in a Non-crystalline Polymer

J. L. Abot, F. Wang

On the Development and Parameter Identification of Schapery-type Constitutive Theories

Martin Lévesque, Katell Derrien, Didler Baptiste, Michael D. Gilchrist

Time-dependent, Nanoscale Contact Plasticity

M. J. Cordill, Douglas D. Stauffer, W. W. Gerberich

Durability of Dynamically Loaded Polymeric Products

Measurement of Young’s Modulus of Human Tympanic Membrane at High Strain Rates Using a Miniature Split Hopkinson Tension Bar

H. Lu, H. Luo, Rong Z. Gan

Mechanical Performance of Thermoplastic Polymers at High Strain Rates

Bernhard Möginger, Sven-Robert Raisch

Viscoelastic Rate-Sensitive Plastic Constitutive Law for Fiber-reinforced Composites

Taejoon Park, Hansun Ryou, Kwansoo Chung

On the Macro to Micro Insight in Megastructure Structural Behavior in One Simulation Framework Without Submodeling ................................................................. 148
  Dubravka Mijuca

Development of Biodegradable Material ............................................................................................................. 151
  Rakesh Sagar, M. Soni, Rakesh Sagar

A Novel Mathematical Tool for Characterizing Petroleum Fluid Rheology Within Porous Media .................................................................................................................. 154
  M. Enamul Hossain, S. Hossein Mousavizadegan, M. Rafiquel Islam

Change in Dynamic Parameters and Safety Assessment of Civil Structures ...................................................... 157
  R. Ceravolo, A. De Stefano, M. Pescatore

Viscoplastic Constitutive Models for Numerical Analyses of Geotechnical Problems ........................................ 160
  T. Tanaka, K. Okajima

Modeling of Cold Fusion as Damped Electromagnetic Material Resonance ............................................................ 163
  Frank Stenger

Change of Type of Vorticity and the Physics of Heat Transfer Enhancement in Non-Circular Tube Flow of Viscoelastic Fluids ............................................................................ 166
  Dennis A. Siginer

Rheology of Extreme Materials: Phase Transformations, Composites Stiffer than Diamond, and Thermo – Rheological Complexity .................................................................. 169
  R. Lakes

Some Outstanding Problems in Rubber Mechanics .............................................................................................. 170
  A. N. Gent

Generalized Viscoelastic Designer Functionally Graded Auxetic Materials Engineered/Tailored for Specific Task Performances .................................................................................. 173
  Harry H. Hilton, Daniel H. Lee, Rahman A. El Fouly

Poisson’s Ratio of Polypropylene in Relaxation, Creep and Constant Rate of Strain Tests ........................................ 176
  Daniel T. Tscharnuter, Michael Jerabnek, Zoltan Major

Interference Effect on Strain-Concentration factor of Cylindrical Bars with Double Circumferential U-notches Under Static Tension ........................................................................ 179
  Hitham M. Tlilan, Ahmad S. Al Shyyab, Ali M. Jawarneh

Aging and Structural Recovery in Plasticizing Environments .............................................................................. 182
  Gregory B. McKenna

Rheological Behaviour and Physical Properties of Controlled-Release Protein-based Bioplastics ................................................................. 185
  D. Gómez-Martínez, P. Partal, I. Martínez, C. Gallegos

WAVET, a Custom Device Able to Measure Viscoelastic Properties of Wood Under Water-saturated Conditions up to 140ºC ................................................................................... 188
  Vincent Placet, Patrick Perré

An Anisotropic Nonlinear Viscoelastic Model for Soft Fiber-reinforced Composites ........................................... 191
  Thao D. Nguyen

Thermo-viscoplastic Deformation of Metal Alloys ................................................................................................. 194
  Farid Abed, George Voyiadjis

A Viscoplastic Constitutive Model for Active Braze Alloys ................................................................................. 197
  M. K. Neilsen, J. J. Stephens
Measuring the Complex Modulus of Viscoelastic Solids Using Nanoindentation

E. G. Herbert, W. C. Oliver, G. M. Pharr

Effect of Crosslinking on Nano-indentation of Polyamides

Suresh K. Ahuj

A Novel Class of Bio-inspired Mechanoactive Materials

H. J. Sidler, E. J. Anderson, A. Ganapathi, R. Steck, M. L. Knothe Tate

Time-dependent and Moisture Mechanisms in Paper Fracture

Henry W. Haslach

Finitely Deforming Thermoelastic Solid-fluid Mixture with Anisotropic Reaction Rate

R. B. Hall, K. R. Rajagopal

A Novel Fluid Flow Model with Memory for Porous Media Applications

M. Enamul Hossain, S. Hossein Mousavizadegan, M. Rafiqul Islam

Development of Early Age Shrinkage Stresses in Reinforced Concrete Bridge Decks

Samir N. Shoukry, Gergis W. William, Mourad Y. Riad

Dynamic Inflation of Elastomeric Spherical Membranes Undergoing Chemorheological Changes in Microstructure

Alan Wineman

Modeling the Viscoelastic Properties of an Adhesive During Cure

J. de Vreugd, K.M.B. Jansen, L. J. Ernst, J.A.C.M. Pijnenburg

Modeling and Simulation of the Hot-embossing Process on Amorphous Polymers

N. M. Ames, L. Anand

Shear Strength and Shear Failure, Overview on Testing and Behavior

L. W. Meyer, T. Halle

High Rate Material Behaviour at Hot Forming Conditions

L. W. Meyer, C. Kruprin, T. Halle

Dynamic Tensile Tests and Material Constitutive Equations at the Intermediate Strain Rate

Jiho Lim, Hoon Huh

Experimental Characterization and Constitutive Modeling of Polycarbonate Under Large Strains and Rapid Loads

M. Negahban, A. Goel, K. Strabala, J. Vogeler, R. Feng

A Thermoviscoelastic Model for Amorphous Shape Memory Polymers: Incorporating Structural and Stress Relaxation

Thao D. Nguyen

Constitutive Modeling of Epoxy Using the Mulliken-Boyce Model for Glassy Polymers

Jason R. Foley, Jennifer L. Jordan, Clive R. Siviour

Spalling of Hard Engineering Alloys – Approach by Meso-scale

Janusz R. Klepaczko

Deformation and Ductile Fracture of High Strength Low Alloyed Steels Under High Strain Rate Loading

Lothar W. Meyer, Shawky Abdel-Malek

Dynamic Damage and Failure: Shear Bands and Voids

T. W. Wright
Effect of Heat Treatment Conditions on the Dynamic Strength and Failure Behavior of Titanium Alloy Ti-6Al-4V

L. W. Meyer, L. Krüger, K Sommer, T. Halle, M. Hockaut

Mechanisms for Tertiary Creep of Single Crystal Superalloy

Alexander Staroselsky, Brice Cassenti

Time-dependency in Modeling Patellofemoral Joint Mechanics

Jeffrey E. Bischoff, Justin S. Hertzler

Dynamic, Transient, Mode I Crack Propagation with a Nonlinear, Viscoelastic Cohesive Zone

Yuliya Gorb, Tanya L. Leise, Jay R. Walton

Multistage Fatigue Model on Viscoelastic Materials at Elevated Temperatures

Hold-time Effects on Elevated-temperature Low-cycle-fatigue Behavior of Solid-solution-strengthened Superalloys

Structure Formation far away from Thermodynamic Equilibrium

Bernd von Bernstorff, Igor Emri, Rostislav Simonyants
