2007 8th International Conference on Electronics Packaging Technology

Shanghai, China
August 14th – 17th, 2007
CONTENTS

Invited Keynote Speeches

The Development of Semiconductor Packaging & Testing Industry of China ........................................... Keyun Bi (1)
11th Five Year Plan and IC Industry Development in China ................................................................. Shichang Zou (4)
SiP - Catalyst for Innovation .................................................................................................................. William Chen (5)
Solutions to the Technological Issues of a Global Packaging Industry ................................................. Mike Ehlert (6)
Emerging Trends of Micro/Nanopackaging Technologies .................................................................. Rao Tummala (7)
Predicting the Reliability of Electronic Products ................................................................................ Michael Pecht (8)
Reliability Aspects in Heterogenous System Integration Technology .................................................. Herbert Reichl (16)
The International Roadmap for Semiconductors ..................................................................................... Bill Bottoms (17)
System in Packaging – the Key Innovation Enabler. ........................................................................... Eef Bagerman (18)
More Than Moore - 3D, TSV, MEMS, and Photonic Packaging ......................................................... John Hon-Shing Lau (19)
Customer-focused and Product-oriented R&D ..................................................................................... Tom Chung (20)
Current Status of Lead-Free Soldering and Its Future ........................................................................ K. Suganuma (21)
The Technique Research on FBP .......................................................................................................... Zhizhong Liang (22)
Packaging and Microelectromechanical Systems (MEMS) ................................................................ Y. C. Lee (23)
Nano Technology and Nano-composites for Nano Eelectronic Packaging ........................................ C. P. Wong (28)
LED Lighting and LED Packaging ......................................................................................................... Sheng Liu (29)
Technology Trend & Challenges in High Power Semiconductor Laser Packaging .............................. Victor Liu (30)
Electromigration in Flip Chip Pb-free Solder Joints ............................................................................. King-Ning Tu (31)
Design of Experiment (DoE) Study on Effects of Various Geometric Parameters or Copper Diffusion in Through Silicon Vias (TSVs) .......................................................... S. W. Ricky Lee (32)
Chip Package Interaction in Ultra Low-K/Copper Interconnect Technology ...................................... Xiaohu Liu (38)
Effect of Under Bump Metallization (UBM) Quality on Long Term Reliability ................................. Richard Rao (40)
**Session A: Advanced Packaging & System Packaging**

Vibration Characteristics of Ultrasonic Transducer in Thermosonic Flip Chip Bonding

Zhili Long, Yunxin Wu, Lei Han, Jue Zhong (47)

Experimental and Numerical Simulation Study on Uniformity of Temperature and Flow Field in an Advanced Packaging Electroplating Cell

Dongsheng Zhu, Changhong Wang, Xuan Zhou, Shandong Tu (53)

Advanced Packaging Technologies for Automotive Electronics

Man-Lung Sham, Ziyan Gao, Lydia Lap-Wai Leung, Yu-Chih Chen, Tom Chung (59)

Technology Research on Automatic Alignment of BGA Ball Mounting Machine Based on Visual Servo

Lian Xia, Jiang Han, Jianqiang Guo, Han Zhao (63)

Microstructure of Ag-Sn Bonding for MEMS Packaging

Xiaogang Li, Jian Cai, YoonChul Sohn, Qian Wang, Woonbae Kim, Shuidi Wang (67)

Feasibility of Solid State Bonding for Sn-Ag-Cu Solder Bumps in Ambient Air

Yinghui Wang, Tadatomo Suga (72)

Particle on Bump (POB) Technique for Ultra-Fine Pitch Chip on Glass (COG) Applications

Lei Jia, Zhiping Wang, Zhenhua Xiong, Xinjun Sheng, Han Ding (77)

Chip-To-Chip Interconnection by Mechanical Caulking Using Reflowed Sn Bumps

Ju-Heon Yang, Young-Ho Kim, Jae-Seung Moon, Won-Jong Lee (81)

Research Progress on Electrochemical Deposition in Electronic Packaging

Dongsheng Zhu, Junxi Lei, Changhong Wang, Hanying Hu (83)

3-D Large-Scale IC/MEMS Co-Integration Using Liquid Solder for Flip-Chip Assembly

Y. A. Chapuis, A. Debray, H. Fujita (88)

The Effect of Cavities and Channels on the Strength of LTCC Substrate

Yangfei Zhang, Min Miao, Shulin Bai, Yufeng Jin (93)

New Sensor Packaging Concept for Avionic Application

Local Melting and Formation Steps of Solder Bumps via Induction Heating Reflow

Hongbo Xu, Mingyu Li, Gang Cheng, Jongmyung Kim, Daewon Kim (101)

**Session B: High Density Substrate & SMT**

Electromigration Study on Micro-vias of Multi-layer Anodic Alumina Substrate with a Thermal Compensated on-line Measurement Scheme

Dapeng Zhu, Junrong Guo, Le Luo (105)

Fine Line Photolithography and Ultra High Density Package Substrate for Next Generation System-on-Package (SOP)

Fuhan Liu, Venky Sundaram, Boyd Wiedenman, Rao Tummala (109)

The Components Layout Optimization of Circuit Module Based on the Artificial Nerve Network

Hongyan Huang, Dejian Zhou, Zhaohua Wu (114)

Multilayer Hybrid Circuit Technology

Stefan Flick, Qingsheng Luo, Randy Klein (116)
Study on Interconnect Test Generation of MCM based on Particle Swarm Optimization Algorithm and Genetic Algorithm ................................................... Lei Chen (121)
A Hybrid Optimization Approach of Max-Min Ant System and Adaptive Genetic Algorithm for MCM Interconnect Test Generation ............................................. Lei Chen (125)

Session C: Packaging Design & Modeling

The Thermal Analysis of QFP Components Geared to the Needs of the Application of Encapsulation Design and Assembly .............. Dejian Zhou, Hongyan Huang, Kaiqiang Peng (129)
Research of 3D Routing System of Electronic Equipment ................................. Zhaohua Wu, Dejian Zhou, Yinfeng Wu (134)
Development of Multi Chip Module BGA Package for High Power Application ........ Y. Y. Ma (138)
Die Bonding Process Research for SOI Membrane Pressure Sensor ................ Rongfeng Guan (145)
Analysis on the Effects of Packaging Materials on Structural Thermal Stress in Stacked Chip Scale Package .............................. XiuLan Cheng, Feng Qian (146)
Modeling Automation System for Electronic Package Thermal Analysis using Excel Spreadsheet ....................................................... Yuanxiang Zhang, Lihua Liang, Yangjian Xia, Yong Liu, Scott Irving, Timwah Luk (147)
Thermal Numerical Simulation and Corelation for a Power Package ................ Zhongfa Yuan, Yong Liu, Scott Irving, Timwah Luk, Jiangyuan Zhang (151)
Wafer Level Micropackaging for Distributed MEMS Phase Shifters ................ Xunjun He, Qin Wu, Yue Wang, Mingxin Song, Jinghua Yin (159)
The Study for Thermal Analysis Technology of Three-Dimension SRAM Component .................................................. Yusheng Cao, Tong Jiang, Jun Liu, Binhao Lian (163)
Optimization of Electronics Assemblies towards Robust Design under Fracture, Delamination and Fatigue Aspects ................................. Auersperg, Juergen, Matthias Klein, Bernd Michel (167)
High Power CSP Thermal Solutions .............. Mingzong Wang, Eason Chen, Jeng Yuan Lai, Yupo Wang (174)
Fracture Simulation of Solder Joints By a Lattice Model ...................... Tong An, Fei Qin(183)
Dynamic Stress of Solder Joints Under Board-Level Drop/Impact ........... Jie Bai, Fei Qin, Tong An (187)
A Smoothing Algorithm for Strain Measurement by Digital Image Correlation Method .............................................................. Na Chen, Fei Qin, Jianyou Wei (192)
Influence of PCB Vibration Modal on Peeling Stress of Solder Joints in Board-Level Package under Drop/Impact .............................. Jie Bai, Fei Qin, Tong An, Na Chen (196)
Lead Profile Optimization and Stress Analysis for Hermetic Metal Package ........................................ Lin Xue, Shuaidi Wang, Songliang Jia, Jian Cai (197)
The Design of New Ultrasonic Transducers for Wire Bonding Devices ................................................................. Yimin Wu, Jian Chen, Xingyu Zhao, Fujun Wang (201)
A Modelling Approach For Coupling Numerical Analytical Techniques Applied in Microsystems .................................. Xiangdong Xue, Hua Lu, Chris Bailey (204)
Thermal Analysis of LEDs for Liquid Crystal Display's Backlighting .............................................................. C. Yin, Y. Lee, C. Bailey, S. Riches, C. Cartwright, R. Sharpe, H. Orr (212)
Reducing SSN by Mismatching Technique .............................................................. Huifen Huang, Qingxin Chu, Jiankang Xiao (217)
An Innovative Active Liquid Heat Sink Technology for CPU Cooling System ................................................................. Song-hao Wang, Guang-yi Lee, Wei-zhi Wang, Zhi-yu Wang, Chyi-shyan Tsai (224)
Thermal Management of High-power White LED Package .................................................................................... Qian Cheng (230)
Cu Low k Device Wire Bonding Process Modeling .................................................................................................. Zhijie Wang, Vito Huang, Suying Yao, Zhi Li He, Y.W. Jiang, C.L. Zhang, Peline Cao (234)
Electrical Characterization of the High Speed I/O Data Bus Using Cross Correlation Method ................................ Huang, Jimmy Huat since, Ahmad Zuri Shaameri, Teong Guan Yew (240)

**Session D: Packaging Materials & Processes**

Mechanical Properties of Cu6Sn5, Cu3Sn, and Ni3Sn4 Intermetallic Compounds Measured by Nanoindentation ........................................................... Pingfeng Yang, Yishao Lai, Shengrui Jian, Jiunn Chen (244)
Creep Characterization of Lead Free 80Au-20Sn Solder ................. Fei Su, Jun Wei, Jin Wah Tew (249)
Effect of Copper Oxide Layer on Solder Wetting Temperature Under a Reduced Atmosphere ................................................. Lei Zhang, Guangwei Sun, Li Li, J. K. Shang (250)
Characteristics of Tin Whisker Growth on Matte Tin Surface Finishes by Acceleration Conditions ........................................................ Pei Zhao, Qian Wang, Taekoo Lee (254)
Electromigration in Lead-Free Sn3.8Ag0.7Cu Solder Reaction Couple ...................................................................... Hongwen He, Guangchen Xu, Hu Hao, Fu Guo (258)
Cure Shrinkage Analysis of Green Epoxy Molding Compound with Application to Warpage Analysis in a Plastic IC Package ................................................. Guojun Hu, Spencer Chew, Bawa Singh (262)
Effects of Packaging Materials on the Reliability of System in Package ........................................................................ Shan Gao, Jupyo Hong, Jinsu Kim, Seogmoon Choi, Sung Yi (266)
Effect of Thermal-Shearing Induced Microstructural Coarsening on SnAgCu Microelectronic Solder ................. Lihua Qi, Jihua Huang, Xingke Zhao, Hua Zhang (271)
Effect of Ni on Performances of Sn2.5Ag0.7Cu0.1RE Solder Alloy and Its Creep Properties of the Solder Joints for SMT ...................................................................... Keke Zhang, Yanli Fan, Yaoli Wang, Yaomin Zhu, Xin Zhang, Yanfu Yan (276)
Physical Properties of the Sn-Ag-Cu-In-X (Zn,Bi) Solder alloys ........................................................................ Delin Peng, Yanfang Liu (277)
The Synthesis of Liquid Crystalline Epoxy Resin and Its Application in Large-scale Integrated Circuits Packaging

Mingshan Yang, Jie He, Linkai Li, Wenyu Xu (282)

Effect of Post-Mold Curing of Epoxy Molding Compound on Wirebond Reliability in a MOSFET

Rohit T. Nayak, Toufique Ahmed, Arvind Krishna, Ken Hollis (286)

Observation of Ultrasonic Al-Si Wire Wedge Bond Interface Using High Resolution Transmission Electron Microscope

Hongjun Ji, Mingyu Li, Younggak Kweon, Woongseong Chang, Chunqing Wang (291)

The Effect of SnxAgCu and SnAgCuX on the Mechanical Drop Performance in Lead Free CSP Package

Jeffrey C. B. Lee (295)

Thin Film Interface Fracture Properties at Scales Relevant to Microelectronics

Effect of Cerium Addition on Board Level Reliability of Sn-Ag-Cu Solder Joint

Le Liang, Qian Wang, Zhenqing Zhao (305)

Anand Parameter Test for Pb-Free Material SnAgCu and Life Prediction for a CSP

Qiang Wang, Yuanxiang Zhang, Lihua Liang (309)

Wettability and Reliability Evaluation of Sn-9Zn solder on Cu Substrates Using Three Novel Soldering Fluxes

Dongxia Xu, Yongping Lei, Lei Zhu, Zhidong Xia, Fu Guo, Yaowu Shi (318)

Thermodynamic Calculation of Phase Equilibria and Its Applications in the Sn-Ag-Cu-Ni-Au System

F. Gao, C. P. Wang, X. J. Liu, K. Ishida (324)

Melting Temperature and Physical Properties of Sn-Ag-Cu-Mg Lead-Free Solders Based on Uniform Design

Sheng Lu, Baohua Wang, Chenggang Wei, Jing Chen, Weijun Wang (328)

The Effect of the Different Teflon Film on Anisotropic Conductive Adhesive Film (ACF) Bonding

Jun Zhang, Xu Chen (331)

Design of Solder Joint for Self-Alignment in Optical Fiber Attachment Soldering

Wei Zhang, Chunqing Wang, Yanhong Tian (333)

Thermal Profiling to Overcome Flux Residue Formation in a No-clean Solder Paste for Lead-free Surface Mount Technology

Leah Buenaflor, Sheila Liza Dal, Ian Estinozo (338)

Evaluation of Wettability of Composite Solder Alloy Reinforced with Silver and Copper Particles

Bing An, Chi-man Lawrence Wu (342)

Evolution of Cu/Al Intermetallic Compounds in the Copper Bump bonds during Aging Process

Yanhong Tian, Chunjin Hang, Chunqing Wang, Y. Zhou (347)

Thermal Conductivity and Interfacial Thermal Barrier Resistance of the Particle Reinforced Metal Matrix Composites

Yujuan Zhang, Zhuoshen Shen, Zhengsong Tong (352)

Aluminum/Diamond Composites and Their Applications in Electronic Packaging

Zhensong Tong, Zhuoshen Shen, Yujuan Zhang (356)

The Improvement Guidelines of BGA Warpage within SMT Temperature Profile Using Shadow Moiré Technique

Freedman Yen, Eason Chen, Jeng Yuan Lai, Yupo Wang (363)

Aluminum Ribbon Bonding Technology in a New Package of High Power and Thermal Performance

Huiliang Zhang, Hongbo Yang, Ming Zhou, Anthony C. Tsui (367)
Effect of Dopant on Microstructure and Mechanical Properties of Pb-Free Solder Joints

G. Y. Li (370)

Sagging Phenomenon of Micro-Solder Joints Fabricated by Laser Reflow Process

Wei Liu, Chunqing Wang, Yanhong Tian, Lingchao Kong (375)

Characterization and Modeling of Moisture Absorption of Underfill for IC Packaging

Xiaosong Ma, K. M. B. Jansen, L. J. Ernst, W. D. van Driel, O. van der Sluis, G. Q. Zhang (380)

The Growth and Influencing Factors of Voids in SnAg Solder Bump and their Impact on Interfacial Bond Strength

Xiaoqin Lin, Le Luo (385)

Unstable Void Growth in Thermohyperelastic Plastic IC Packaging Material due to Thermal Load and Vapor Pressure

Zhigang Li, Xiaoyan Niu, Xuefeng Shu (390)

Experimental Studies on the Dynamic Compressive Properties of Lead-Free Solder

Xiaoyan Niu, Zhigang Li, Guozheng Yuan, Xuefeng Shu (393)

Elastic Property of Cu3Sn Determined by a First-Principles Calculation on the Basis of its Crystal Substructure

R. An, C. Q. Wang, Y. H. Tian (397)

Synthesis and Characterization of Novel Multiaromatic Epoxy Resin for Advanced Microelectronic Packaging Applications

Zhigang Hao, Jiapei Ding, Haixia Yang, Lin Fan, Shiyong Yang (402)

Aromatic Polymide Resins for High Density Packaging Substrates

Hongyan Xu, Haixia Yang, Jingang Liu, Zhigang Tao, Lin Fan, Shiyong Yang (405)

Effects of Cu Addition on Growth of Au-Sn Intermetallics at Sn-xCu/Au Interface during Aging Process

Yanhong Tian, Chunqiong Wang, Wei Liu, Yarong Chen (409)

Interfacial Reactions in Ni-doped SAC105 and SAC405 Solders on Ni-Au Finish during Multiple Reflows

Toh C. H., Liu Hao, Tu C. T., Chen T. D., Jessica Yeo (410)

Electroless NiMoP Thin Film Deposition on Si/SiO2

Qiang Ling, Jian Cai, Shuidi Wang, Huyou Zhao (416)

Temperature Dependent Dielectric Properties of Polycrystalline Aluminum Oxide Substrates with Various Impurities

Liangyu Chen (421)

Optimal Design of SnAgCu-CNT Solder Lap-shear Specimen under Thermal Cycles with FEM

Yongdian Han, Hongyang Jing, Lianyong Xu, Jun Wei (422)

The Void-free Reflow Soldering of BGA with Vacuum

Weicheng Lin (427)

The Application of a Type of Electric Pastern in the Bonding Technique of the Microcircuit Board

Zhiping Zhao, Lixin Cao (432)

A Computational Model of a Molten Solder Droplet Spreading on Orthogonal Pads

Dewen Tian, Chunqiong Wang, Yanhong Tian (435)

Effect of Cr Content on the Microstructure and Properties of Sn-9Zn Base Lead-free Solder

Xi Chen, Anmin Hu, Ming Li, Dali Mao (443)

Effect of Aging on the Interfacial Reaction between Sn-9Zn-xCr Solder and Cu Substrate

Xi Chen, Anmin Hu, Ming Li, Dali Mao (448)

Preparation and Properties of Sn-9Zn-3Bi-Cr Based Lead-free Solder

Qi Li, Anmin Hu, Ming Li, Dali Mao (452)
Preparation of Microcones Array Material for Microelectronic Package

Kailin Liu, Ming Li, Dali Mao (456)

Oxidation Behavior and Intermetallic Compounds Growth of Sn-Ag-Bi-Cr Lead-free Solder

Huan Wang, Anmin Hu, Chengkang Chang, Ming Li, Dali Mao (459)

Factors Influencing the Electroless Gold Plating for Ceramic Packaging

Jie Zhang, Sheng-Qian Liu, Qiao-Ming Liu (463)

Session E: Advanced Manufacturing Technology

Simulation of a Novel Copper Heat Sink Using Copper Pipe and AM Method for CPU Group Heat Removing in Power Transformer’s Cabinet

Kourosh Mousavi Takmai, Jafar Mahmoudi (466)

Ultrasonic Applied in Super Precision polishing of Magnetic Recording Heads

Rulin Shen, Jue Zhong (474)

Design and simulation of the Positioning System Using Computer Vision for IC Packaging

Junlan Li, Yizhong Wang, Dawei Zhang, Xingyu Zhao (478)

Optimization Design of High Frequency Piezoelectric Ultrasonic Transducer for IC Packaging

Fujun Wang, Xingyu Zhao, Dawei Zhang, Yimin Wu (482)

Green Policy in an International Power Management Manufacturing Services Provider in China

Wangsheng Fang, Hongbo Yang, Ming Zhou, Anthony C. Tsui (488)

The Multi-Motion-Overlap Strategy to Minimize Time between Continuous Exposure Scans for Wafer Stage

Haihong Pan, Xiaqing Li, Yunfei Zhou (492)

The Structure Design and Control of Precision Positioning System Driven by Rotary VCA

Fujun Wang, Dawei Zhang, Xingyu Zhao, Yimin Wu (499)

Study of Nano-grinding for GMR Magnetic Recording Head

Rulin Shen, Cijun Shuai, Jue Zhong (504)

Session F: Emerging Technologies

Enhancing Signal Quality of Evanescent-Wave Multimode Fiber Optic Sensor Using Diffuse Excitation Light

Jianjun Ma, Wojtek J. Bock (508)

The Determinations of Pb, Cd, Hg, Cr6+, PBBs/PBDEs to Comply with RoHS Directive

L. Hua, Y. P. Wu, B. An, Y. C. Chan, B. Y. Wu, F. S. Wu (513)

Study the Effects of the Doped-B Atom on Silicon Nanodot

Z. O. Wang, L. F. Mao (518)

Simulation the Effect of the Defect on the Conductance of Nanowire

L. F. Mao, Z. O. Wang (521)

Direct Copper Bonded Ceramic Substrates for Use with Power Leds

Alfred Dehmel, Jürgen Schulz-Harder, Alexander Roth, Ingo Baumeister (524)

Design of MEMS filter for Wimax systems

Defang Wei, Yingliang Li, Jide Zhao (529)

High Performance Molding FCBGA Packaging Development

Ho-Yi Tsai, Jeff Huang, Steve Chiu, C. S. Hsiao (532)
A Novel Electro-Optical Magnetic Microsensor with Reducing Interference Packaging

Hsing-Cheng Chang, San-Shan Hung, Chingfu Tsou, Wen-Fung Liu, Chi-Chih Lai, Ching-Shang Jian (536)

High Efficiency Liquid-type Cooling and Packaging Technology for a Miscellaneous Application of Microprocessors

San-Shan Hung, Hsing-Cheng Chang, You-Lun Chen, Ming-Hua Liu (540)

Surface Tension Powered MEMS Self-Assembly Model Reconstruction and Microstructure Thermal Distortion Analysis

Yilin Yan, Kailin Pan, Ni Li, Yexiang Ning, Peng Li (544)

Direct Chip Attachment (DCA) Packaging of a 2-D Thermal Flow Sensor

Guangping Shen, Jian Wu, Hua Zhang, Ming Qin, Qing'an Huang (549)

Room Temperature Si/Si Wafer Direct Bonding in Air

Chenxi Wang, Eiji Higurashi, Tatatomo Suga (552)

Research on Wiring Technology of Electronic Complete Machine Interconnection

Zhenyu Liu (558)

A Real Time Precision Measurement Technique for Low Loss Optical Polymeric Waveguide

Fengtao Wang, Fuhan Liu, Gee-Kung Chang, Mathew Q. Yao, Ali Adibi, Rao Tummala (559)

An Edge-View-Photodetector for Simplification of Optical Packaging

Zhihua Li, Huajun Shen, Chengyue Yang, Baoxiao Li, Lixi Wan (563)

Modeling of the Mechanical Stiffness of the Gap/Gaas Nanowires With Point Defects/Stacking Faults

Alex W. Dowotola, Cadmus A. Yuan, Willem D. van Driel, G. Q. Kouchi Zhang, Erik P. A. M. Bakkers (566)

Electrodeposition of Palladium Film on Electroless Ni-P Coatings Supported by Si Substrate

Xiang Gao, Dongyan Ding, Zhi Chen, Ming Li, Dali Mao (571)

Field Emission Properties of Ni Nanocones Arrays Fabricated by Electrodeposition

Hong Li, Huiqin Ling, Ming Li, Dali Mao (575)

Design and Modeling of Micromachined Thermal Convective Gyroscope with Bidirectional Jets

Ye Ai, Xiaobing Luo, Sheng Liu (579)

A Sensor Integrated Ultra-long Span LED Street Lamp System

Kai Wang, Sheng Liu (583)

Session G: Quality & Reliability

Improving the Component Level Reliability of a Flip-Chip Ball-Grid-Array (FCBGA) Package using Numerical Modeling Method

Quan Qi (586)

Application of C-mode Scanning Acoustic Microscopy in Packaging

Lili Ma, Shengxiang Bao, Dechun Liu, Zhibo Du, Shilan Li (591)

Packaging Failure Isolation with Time-Domain Reflectometry (TDR) for Advanced BGA Packages

Weiliang Yuan, Wenhui Zhu, Palei Win, C. K. Wang, H. B. Tan, Anthony Y. S. Sun (597)

Numerical Study on the Effects of Bond Parameters on Thermo sonic Bond Strength

Jun He, Yongjin Guo, Zhongqin Lin (601)

Insulation Degradation and Bias Acceleration Effect Study under THB Test

Jianwei Zhou, Wei Zheng, Minyi Lou, Taekoo Lee (613)
Effects of Element Partition on the Fatigue Life Predictions of Lead-Free Solder Joints

Wen-Ren Jong, Hsin-Chun Tsai, Ching-Tzu Huang (617)

The Influences of ACF with Bonding Processes on COF under Thermal Cyclic Loading

Wen-Ren Jong, Shu-Hui Peng (619)

Die Attach Process Monitoring through Multivariate Statistical Process Control Technique

Jian Gao, Changhong Liu, Haixiang Deng, Xin Chen, GuoLi Lin (621)

Effects of Thermo-Mechanical Stress in Solder Joints under High Current Stressing

Jinsong Zhang, Yiping Wu, Hongjia Xi, Bing An, Fengshun Wu (627)

The Study on the Interaction of Interfacial Reactions Between UBM/Solder and Solder/Pad in Miniature Joints

Hui Liu, Fengshun Wu, Mingmin He, Jinsong Zhang, Yang Yu, Yiping Wu, Bing An (632)

Mechanism and Fracturing Modes of Solder Joints Subjected to High-speed Shearing Forces

Chang-Lin Yeh, Yi-Shao Lai (636)

A New In-process Measurement Method for Wafer Surface Roughness

Ruipeng Guo, Zhengsu Tao (637)

Application of Robust Design on the Optimal Process Design of Thermo-mechanical Reliability of PBGA Solder Joint

Xiaoqing Xiao, Jicheng Zhou, Yunfei En, Ni Chen (641)

Parameter Sensitivity Analysis for Thermosonic Bonding Process by Finite Element Method

Jun He, Ping Zhu (646)

Effect of Carbon Inclusion in the Ni-P Coating on Shearing Behavior of Sn4Ag0.5Cu Ball Grid Array Solder Joints

X. Gu, Y. C. Chan, B. Y. Wu, D. Yang (653)

Independent intellectual property product LIP Package of Huatian Technology

Xiaowei Guo (658)

Electromigration Time to Failure Simulation for Solder Bumps of a Chip Scale Package

Shinan Wang, Lihua Liang, Yuanxiang Zhang, Yong Liu, Scott Irving, Timwah Luk (661)

The Effect of Aging on Microstructures Evolution and Shear Behaviors in Lead-free Solder Joint

Minghui Yang, Fangjuan Qi, Yaping Ding, Deliang Ren, Changling Xu (671)

Evaluation of the Potential Toxicity of Metals in Discarded Electronics: A Case Study of Mobile Phones in P. R. China

H. W. Zhong, X. Gu, Y. C. Chan, B. Y. Wu (674)

Board Level Drop Test Simulation for an Advanced MLP

Yumin Liu, Yong Liu, Scott Irving (680)

A New Approach for the Evaluation of Interfacial Reliability in Micro-scale

Qingsheng Zhu, Zhefeng Zhang, Jiankuo Shang, Zhongguang Wang (685)

Effect of Vacuum Environments on Performance and Reliability of Electronic Components and Packages for Space Applications

Ashok Sharma, Alexander Teverovsky (688)

Study on Failure Mechanism of BGA Solder Joints Crack during Wave Soldering

Wenli Wang, Yongsheng Liang (690)

Electromigration In Cu/Sn-58Bi/Cu Interconnects

Q. L. Yang, J. D. Guo, J. K. Shang (691)

Effect of Electromigration on Intermetallic Compound Formation in Sn-92Zn Solder Interconnect

X. F. Zhang, J. D. Guo, J. K. Shang (694)
Board Level Thermal Cycle Reliability of BGA for a New Type of Pad Structure with OSP Surface Finish .......... Hai Liu, Jing Zhang, Song Chen, Maohua Du, Nufeng Feng, Qian Wang, Taekoo Lee (698)
Warpage and Reliability of Three-dimensional Multi-chip Module with High Density Embedded Substrate ........................................ Gaowei Xu, Jian Zhou, Le Luo (701)
Automatic Focus Algorithm for IC Wafer Image Sampling by Adaptive Lifting Scheme Denoising
......................... Yaohua Deng, Guixiong Liu, Liming Wu, Yingmin Zhang, Guifang Wang (708)
Evaluation of the Thermal Resistance of CSOP24 Ceramic Package
.......................... Xiao Peng, Shuidi Wang, Songliang Jia, Jian Cai, Qiang Huang, Rongzheng Ding (712)
Reliability Evaluation on Flexible RFID Tag Inlay Packaged by Anisotropic Conductive Adhesive
............................ Xionghui Cai, Bing An, Xiaowei Lai, Yiping Wu, Fengshun Wu (716)
The Impact of Defect formed in Hot-cutting Process on Reliability of Ceramic Packaging and A Novel Structure Design Concept ........ Chao Zeng, Chunqing Wang, Yanhong Tian, Lingchao Kong (720)
Bending and Reliability Test of Chip-on-flex (COF) Assembly Using Anisotropic Conductive Films (ACFs) .............. Ming-Chuen Yip, Chien-Yuan Huang, Chien-Liang Chen, Su-Tsai Lu (726)
Effect of Vacuum Package on the Stiction Force of Micro-structure
......................... Junwen Liu, Jing Song, Qinan Huang, Jiaying Tang (729)
Testing Solder Interconnect Reliability Under Drop Impact Loading Conditions
.............................. J. J. M. Zaal, W. D. van Driel, H. P. Hochstenbach, G. Q. Zhang (734)
The Prediction of Sn-Ag Solder Properties Based on BP Algorithm of Artificial Neutral Network
.............................. Li Sun, Fangjuan Qi, Zheze Hou, Yuehua Xiao (740)
Deformation Measurements used for Design Optimization and Verification during Industrial Electronic Board (Product) Manufacturing ........................................ Bernd Schwarz (743)
Fatigue Behavior of BGA Soldering under Board Level Drop Test
......................... Bo Qi, Pingyue Fan, Jiaji Wang (748)
Mixed Mode Fracture Toughness Test of Bimaterial Interface in Different Humidity Conditions
........................................ AnLin Ye, LianCheng Qin (752)
Effect of Solder Volume on Shear Strength between Sn-3.0Ag-0.5Cu Solder and Cu Metallization
.............................. Yang Shihua, Lin Pengrong, Tian Yanhong, Wang Chunqing, Liang Le, Wang Qian (756)
Test and Health Monitoring of Microelectronics using RFID
........................................ T. Keinhorst, P. Tsikourakos, M. A. Yaqoob, W. D. van Driel, G. Q. Zhang (759)
TEM Study of Bi Segregation in the Interconnect of Eutectic Tin-Bismuth Solder and Copper
........................................ P. J. Shang, Z. Q. Liu, L. Zhang, D. X. Li, J. K. Shang (765)
Reliability Assessment of Sn-Pb and Pb-free Solder Joints under the Cyclic Bend and Shear Tests
Experimental Study of Dye Penetration in Plastic Encapsulated Microcircuit
...................................... Hongxing Gai, Jing Wang, Shixin Chen, Xiang Ren, Li Gao (774)
Study on Leak Rate Formula and Criterion for Helium Mass Spectrometer Fine Leak Test
...................................... Genglin Wang, Liyan Wang, Lijun Dong, Zheng Huang (777)
Reliability Analysis of Lead-free Flip Chip Solder Joint .......... Dong Wang, Xiaosong Ma, Dan Guo (787)
Backside IR Photon Emission Microscopy (IR-PEM) Observation in Failure Analysis of the Packaged Devices ................................... Jianlei Tao, Peiyuan Fang, Jiaji Wang (792)

Image Inspecting System of Positioning Accuracy of the Die Bonder
.......................................................... Xiangxiu Huang, Ketian Li, Ji'an Liu, Jianqi Liu, Jizhao Weng (796)

The Influences of Solder Composition and Pad Finish on the Reliability of Fine Pitch BGA Solder Joints ...................................... Thenqing Zhao, Lei Wang, Xiaqiang Xie, Qian Wang, Taekoo Lee (800)

FEM Analysis of Moisture Distribution in Stacked Die Package
........................................................................ Z K Hua, C Y Li, Y X Luo, L Q Cao, J H Zhang (805)

Predicting the Reliability of Power Electronic Modules ..................... C. Bailey, H. Lu, T. Tilford (809)

Properties and Reliability of Sn-Pb and Lead-free Mixed Soldering
...................................................... Huan Wang, Anmin Hu, Lihong Wang, Li Zhao, Ping Zhu, Chengkang Chang, Ming Li (814)

Oxidation failure of Lead Frame Copper alloys with Surface Electroplated Pure Cu
................................................................. Xi Chen, Anmin Hu, Ming Li, Hong Shen, Dali Mao (818)

University Education Curriculum and Lab Construction on Microelectronics Packaging and Assembly ........................................ Xiaosong Ma, Daoguo Yang, G. Q. Zhang (822)
