# TABLE OF CONTENTS

## Volume 1

### APPLICATION OF MATERIALS SCIENCE TO MILITARY SYSTEMS

- **Implementation of UT Hardness Tester for Titanium Fabrication** ................................................. 1  
  M. Kaffenbarger and P. Hoyt

- **Silicon Carbide Ceramics for Aerospace Applications- Processing, Microstructure, and Property Assessments** ................................................................. 6  
  D.M. Deason, G. Hilmas, A. Buchheit, and W. Fahrenholtz

- **Can Software Help Materials Engineers Work Smarter?** ................................................................. 15  
  W. Marsden

- **The Application of Laser Powder Deposition for Repair and Manufacturing of DOD Components** ................................................................. 22  
  A. Costello, S. Miller, J. Roalstad, and J. Sears

- **Progress in Imaging & Visualization of Impact Damage in Armor Ceramics with XCT** ............... 30  
  J.M. Wells

- **Single-Melt Pam Processed Forged Ti-6Al-4V Bell**  
  M. Guclu, I. Ucok, H. Dong, and C. Hatch

- **Understanding Damage Accumulation Upon AA7075-T651 Used in Airframes from a Microstructural Point of View** ................................................................. 54  
  N. Birbilis1, M.K. Cavanaugh1, R.G. Buchheit1, D.G. Harlow2, R.P. Wei

### AUTOMATION & CONTROL/ADVANCED ONLINE METALLURGICAL MODELS/SENSORS

- **Inline Measurement of Texture and Recrystallization of Aluminum Alloys** ....................................... 65  
  A. Moreau, C. Bescond, S. Bolognini, M. Lord, S. Kruger, and C.-S. Man

- **An Intelligent Control System for Die Thermal Management** ................................................................. 73  
  T. Yang, H. Hu, X. Chen, Y.-I. Chu, and P. Cheng

- **Studies on Development of Real-Time Adaptive-Model-Based Feedback Control for Resistance Spot Welding** ................................................................................. 83  
  J.Z. Chen, and D.F. Farson

- **Model of Radiative Heat Transfer Phenomena in Solid Mold Flux Phase During Continuous Casting** ...................................................................................... 94  
  W. Wang, and A.W. Cramb

- **Thermodynamic Study on the Behavior of Phosphorus and X-Ray Observation of Phosphorus Vaporization from Slag** ................................................................. 106  

- **State Estimation in Advanced Control of Solidification** ................................................................. 114  
  B. Furenes, and B. Lie
COATINGS 2005

Multi-Scaled Textured Coatings for Bioimplant Applications ......................................................... 124
   A. Kurella, and N.B. Dahotre

Collagen Fibrillogenesis on Ti-6Al-4V-ELI .................................................................................... 128
   M. Gerritsen, J.M. Hampikian, W.B. Knowlton, J.T. Oxford, L.R. Warner, D. Araujo, and Z. Clark

Carbide Layers Produced on Steel Surface in Vacuum Chromizing Process ........................................ 132
   E. Kasprzycka, J. Senatorski, A. Nakonieczny, T. Babul, and B. Bogdanski

Composite Layers Produced on Steel Surface in Vacuum Titanizing Process
Combined with the Electrolytic Deposition of Cobalt ........................................................................ 136
   E. Kasprzycka, and A. Nakonieczny

Wear Behavior of a Liquid Nitrided Cold Work (Cr-Mo-V) Tool Steel ........................................ 140
   G. Pantazopoulos, D. Kanakis, S. Antoniou, and J. Sideris

Surface Modification of Resistance Welding Electrodes by Electro-Spark Deposited Coatings .............. 144
   Z. Chen, N. Scotchmer, and N. Zhou

Kinetic Metallization™ a Field Repair Process for IVD Aluminum Coatings on High Strength Steels ................................................................. 148
   R.M. Tapphorn, and J.A. Henness

The Role of Particle Size and Shape in the Fracture Resistance of Anti-Corrosion Coatings for Steels ................................................................. 152
   S. Bianculli, and J. Beuth

Resistive Switching Properties of Electrode-SrZrO3-SrRuO3 Heterostructures with Different Electrodes ........................................................................ 156
   S. Choi, H.-S. Lee, P. Salvador, and J. Bain

Compositional Stresses and Diffusion in Nonstoichiometric Oxide Films ........................................ 161
   B.W. Sheldon

Damage Occurring During Low Cycle Fatigue of a Coated Single Crystal Nickel-Base Superalloy SCB ................................................................. 167
   S. Stekovic

Investigation of Coatability on Powder Metallurgy Parts by PVD Technique .................................. 173
   A. Kurt, and M. Kanlidag

AB Initio Studies of Cubic Boron Nitride Bulk and Surface Properties ........................................ 177
   N. Ooi, Y. Catherine, and J.B. Adams

Thermal Spraying of Polymer and Metal Particles: Comparison of Particle Deformation and Cooling Upon Impact with a Flat Steel Substrate ................................................................. 181
   R.A. Cairncross, M. Ivosevic, and R. Knight

A New Aluminum Plating Technology for Fasteners ........................................................................ 187
   D.C. Goss, and F.J. Gomez

Improvement of Thermal Conductivity of Plasma-Sprayed Al Matrix Composites by Hot Pressing ........................................................................ 191
   K. Euh, and S.B. Kang

Kinetic Metallization™ of Tungsten Carbide - Cobalt (WC-Co) Coatings ........................................ 195
   R.M. Tapphorn, H. Gabel, and J.A. Henness

Use of Indentation Fracture Tests to Investigate Toughness Loss Mechanisms in Thermal Barrier Coating System ........................................................................ 199
   Q. Ma, J. Beuth, F. Pettit, G. Meier, and M. Stiger

Oxidation Resistance of Multilayered Cu-Cr Coatings Produced by Ion-Beam Assisted Deposition ........................................................................ 203
   K.T. Chiang, J.H. Arps, and R. Wei

Creep Behavior of Cryomilled Al-7.5% Mg Alloy ................................................................. 443
    B.Q. Han, and E.J. Lavernia

Effect of Stress State on Primary Creep Behavior of PM Al-Mg-Sc-Zr-SiC(p) Composite ...... 453
    S.P. Deshmukh, and R.S. Mishra

Present Status of Future Prospect of NIMS Creep Data Sheet .................................................. 461
    K. Kimura

Development of a Framework for Presentation and Design Analysis of Creep Rupture Data Using the CES Materials Selection Software ................................................................. 471
    D. Woodford, and A. Miller

Research and Development of Advanced Ferritic Steels for Thick Section Boiler Components in USC Power Plant at 650 C .......................................................... 481
    F. Abe

Alloy Additions for Improved Creep-Rupture Properties of a Cast Austenitic Alloy .......... 493
    J.P. Shingledecker, P.J. Maziasz, N.D. Evans, and M.J. Pollard

Mechanism of Type IV Failure in Weldment of a Mod.9Cr-1Mo Steel ........................................ 503
    J.S. Lee, K. Maruyama, I. Nonaka, and T. Ito

Finite Element Simulation of the Creep Behaviour of 9% Chromium Steels Based on Micromechanical Considerations .......................................................... 513
    N. Bock, and F. Kager

Creep Behaviour and Microstructural Evolution in the Reduced Evolution in the Reduced Activation Ferritic-Martensitic 9Cr1WVTa Eurofer’97 Steel ........................................ 523
    P. Fernandez, A.M. Lancha, and J. Lapena

Mechanical Properties of Ir-15Hf-xZr Ternaries with Two-Phase fcc/L1(2) or L1(2)/L1(2) Structure at Room and High Temperatures .......................................................... 533
    J.B. Sha, Y. Yamabe-Mitarai, and H. Harada

Non-Contact Creep-Resistance Measurement for Ultra-High-Temperature Materials .......... 543
    J. Lee, R.C. Bradshaw, J.R. Rogers, T.J. Rathz, J.J. Wall, H. Choo, R.W. Hyers, and P.K. Liaw

The Small Punch (SP) Creep Testing of Low Alloy Steels .......................................................... 552
    G.C. Stratford, K. Kobayashi, and J. Klaput

Volume 2

Tensile Creep Fracture of Polycrystalline Near-Stoichiometric NiAl ........................................ 562
    S.V. Raj

Internal Stress Evolution in a [001] Oriented Directionally Solidified Superalloy During Creep ........................................................................................................ 571
    S. Ma, D. Brown, B. Clausen, V. Seetharaman, and B.S. Majumdar

Influence of High Temperatur Creep Damage on Low Cycle Fatigue of CMSX-4 ................. 588
    A. Epishin, T. Link, U. Bruckner, H. Klingelhofer, and P.D. Portella

Hold-Time Effect on the Elevated-Temperature Crack Growth Behavior of HAYNES® 230 and HASTELLOY®X .......................................................... 597

Oxidation Assisted Crack Growth of Ni-Based Superalloys .................................................... 610
    J.L. Evans, and A. Saxena

Dopant Effect on High Temperature Plasticity in Oxide Ceramics: Grain Boundary Chemistry-Related Phenomena .......................................................... 622

Effects of Silt Particles on the Creep of Granular Ice ............................................................. 630
    M. Song, I. Baker, and D.M. Cole
An Analysis of Creep Mechanisms in Superplastic Yttria-Stabilized Zirconia
N. Balasubramanian, and T.G. Langdon

Tensile Creep Behavior of a Potential Ceramic Oxygen Separation Material
K.N. Hutchings, D.L. Shelleman, and R.E. Tressler

CURRENT TOPICS IN ELECTRONIC PACKAGING: PB FREE SOLDERS, THERMAL MANAGEMENT

Manufacture of High Thermal Conductivity (+750W/mK) Cu-Graphite Composite Using Particulate Additions and In-Situ Carbide Formation to Improve Wetting
G. Sundberg, and S. Mallim

Thermal and Mechanical Performance of a Proposed High Performance Thermal Stack

DEFECT FORMATION, DETECTION, AND ELIMINATION DURING CASTING, WELDING, AND SOLIDIFICATION

Modeling of Reoxidation Inclusion Formation During Filling of Steel Castings
K.D. Carlson, and C. Beckermann

Development of a Hot Tear Indicator for Steel Castings
C. Monroe, and C. Beckermann

Ultrasonic Degassing in Aluminum Alloys
H. Xu, T.T. Meek, and Q. Han

Thermodynamic Study of the Effects of CaF(2) on ESR (Electro-Slag Remelting) Slag

Utilizing NDE Methods for Steel Casting Performance
D. Poweleit, R. Monroe, and V. Richards

Visual Assessment of Casting Surface Quality
G. (Mike) Daricilar, F. Peters, and M. Blair

Quantitative Fractography of 17-4PH Stainless Steel Investment Castings
D.F. Susan, A.C. Kilgo, T. Crenshaw, R.P. Grant, and R.D. Wright

DEVELOPMENTS IN FERROUS LONG AND FORGED PRODUCTS

Hot Ductility Behavior in the Peritectic Steel After Reheating and After In Situ Melting
A. Rezaeian, F. Zarandi, D.Q. Bai, and S. Yue

The Mathematical Model of Formation of the Cross-Sectional Wall Thickness Non-Uniformity During Longitudinal Plugless Tube Rolling

Influence of the Die Reduction Section Generatrix Profile Upon Plugless Tube Drawing Parameters

Recent Developments in Process Simulation of Long Products
D. Lambert, J. Yang, A. Samant, and Y. Yin

Refinement of Ferrite Grain Size Through Particle Stimulated Nucleation (PSN) Mechanism and Heavy Steel Sections
K.F. Al Hajeri, C.I. Garcia, M. Hua, and A.J. DeArdo

Some Physical Metallurgy Aspects of Niobium- and Vanadium-Microalloyed Steels for Structural Beams
4340 Steel Fatigue Initiation and Performance in Rotating Bending Fatigue as a Function of Surface Finish and Melt Practice
E. Buddy Damm

Visualization of Austenite Formation During Heating in Alloy Steels
E. Schmidt, and S. Seetharaman

Understanding Strength-Toughness Combinations of Microalloyed Steels Processed for Large Structural Applications Through Stereological Analysis

Design of High Strength Microstructures in Carbon Steel by Thermo Mechanical Treatment
C.M. Kamma, and K.K. Alaneme

Study of Precipitation of Niobium Carbide in Low Carbon Steel Using Fe-SEM
A.M. Elwazri, R. Varano, F. Siciliano, D. Bai, nd S. Yue

Influence of Induction Tempering on Microstructural Evolution and Mechanical Behavior of a Low Alloy Steel
L. Mendizabal, and J.M. Rodriguez-Ibabe

On the Relationship Between Microstructural Changes Induced During High Strain Amplitude Fatigue Loading and Fatigue Softening in Multiphase Medium Carbon Microalloyed Steel
S. Shanmugam, K.A. Padmanabhan, and R.D.K. Misra

DEVELOPMENTS IN SHEET PRODUCTS FOR AUTOMOTIVE APPLICATIONS

Beneficial Effect of Nb Addition on 590 MPa Zn-Coated DP Steel Sheets
S. Hashimoto

Effect of Cool Deformation in Low Carbon Microalloyed Steels
A.M. Elwazri, D. Bai, F. Siciliano, and S. Yue

The Development of a New Fe-Mn-C Austenitic Steel for Automotive Applications
C. Scott, N. Guetlon, S. Allain, and M. Faral

Niobium Alloxed High Strength Steels for Automotive Applications
H. Mohrbacher

A Research Study on the Production of Advanced High Strength Steels (ULSAB-VAC) in Mobarakeh Steel Company (MSC), Applied in Auto Structural Parts for the Optimization of Auto Fuel Performance
S.H. Pourmostadam

Role of Niobium on the Segregation Behavior of Phosphorus and Manganese in High Strength IF Sheet Steels for Automotive Use
T.-R. Chen, M. Hua, C.I. Garcia, and A.J. DeArdo

Effect of Manganese Content on the Development of (111) Transformation Texture in 0.03% Ti-Bearing Extra-Low Carbon Steel Sheets
M. Sudo, M. Okuno, S. Wakikawa, and I. Tsukatani

Aluminum and Vanadium Competition for Nitrogen in CSP Sheet Steels
J.A. Garrison, J.G. Speer, S.W. Thompson, R.J. Glodowski, and K.P. Williams

The Zn-Rich Corner of the Zn-Al-Fe Phase Diagram for Use in Continuous Galvanizing
M.H. Kaye, W.T. Thompson, and J.R. McDermid

Fundamental Study of the Austenite Formation and Decomposition in High Strength Low-Si, Al Added Nb-Mo TRIP Steels
J.E. Garcia-Gonzalez, C.J. Garcia, M. Hua, and A.J. DeArdo

Ultra High-Strength C-Si-Mn-Nb-Mo TRIP-Aided Sheet Steels
The Effect of Continuous Galvanizing Thermal Cycle on the Microstructure and Mechanical Properties of Two Multiphase TRIP-Assisted Steels .................................................. 1008
A. Mertens, and J.R. McDermid

The Recrystallization Behavior and the Kinetics of Bainite Formation in TRIP Steel During Isothermal Holding ........................................................................................................ 1019
S. Han, C.I. Garcia, A.J. DeArdo, and K. Chin

New Steel Chemistry Design for TRIP and Dual-Phase Structures ........................................ 1029
A.K. Lis, B. Gajda, and A.J. DeArdo

Super Short Interval Multi-Pass Rolling Technology for Manufacturing Ultrafine-Grained Steel Sheet ...................................................................................................................... 1035

Influence of Al Additions on Austenite Decomposition in Continuously Annealed Dual-Phase Steels .................................................................................................................... 1045
O.A. Girina, and N.M. Fonstein

Development of High Strength, Low-Carbon, Nb-Bearing Dual Phase Steels for Production on Continuous Galvanizing Lines .................................................................................... 1057

Rapid Heat Treatment of Dual Phase Steels .............................................................................. 1067
M. Westphal, J.R. McDermid, J.D. Boyd, and J.D. Embury

Effect of C, Mn, Si, and Al Additions on the Mechanical Properties of 980MPa Tensile Strength, Cold Rolled, Advanced High Strength Steel ............................................................. 1077
N. Pottore, N. Fonstein, I. Gupta, and D. Bhattacharya

ELECTROMAGNETICS IN MATERIALS PROCESSING

Pasty Welds & Deformation Analysis on Welded Tube Using Eddy Currents ......................... 1085
J.P. Wallace, and R.M. Siegfried

Spectral-Normal Emissivity of Electromagnetically Heated Ni at High Temperature .............. 1092
G. Teodorescu, P.D. Jones, R.A. Overfelt, and B. Guo

Comparison of Microwave and Conventional Processing of Ni-Fe Manganites .................. 1100
J. Aguilar, Z. Valdez, M. Hinojosa, B. Durand, and S. Guillemet

Phase Tranformation and Diffusion in Fe-C Alloys in a High Magnetic Field ......................... 1109
X. Hao, and H. Ohtsuka

Volume 3

Experimental Results on the Fluid Flow in an Electromagnetically Driven Metallic Melt ..... 1117
A. Cramer, K. Varshney, and C. Zhang

On the Intensification of Electromagnetic Stirring in Continuous Casting Facilities .......... 1129
I. Dardik, H. Branover, E. Golbraikh, A. Kapusta, M. Khavkin, S. Lesin, B. Mikhailovich, and R. Thompson

Fluid Flow Effects in Electromagnetically Levitated Droplets ............................................. 1135
R.W. Hyers

Application of EM Levitation Processing: Fundamental Studies of Steel Rapid Solidification ................................................................. 1146
J.M. Burke, A.J. Mueller, D.J. Fair, and D.M. Matson

Uncertainty Effects in Modulated Power Specific Heat Measurements of Electromagnetically Heated Samples ................................................................. 1154
B. Guo, G. Teodorescu, D. Wang, R.A. Overfelt, and P.D. Jones

Electromagnetic Formation Products from Composite Polymeric Materials ......................... 1164
I.E. Benevolenski
Electromagnetic Control of Liquid Metal Free Surfaces ........................................................... 117
J. Etay

Challenging Topics of Electromagnetic Processing of Materials ............................................. 118
S. Asai

Computational Modeling of Multiscale Phenomena in Magnetically-Stirred Solidifying Melts .................................................................................................................. 119
B.Q. Li

ENVIRONMENTAL DEGRADATION OF NON-METALLIC MATERIALS

Accelerated Life Testing of Polymer Potting Compounds with Application to Heavy-Duty Motor Vehicles .................................................................................................................. 120
J.K. Shebuski, and T.L. Hoeller

FAILURE ANALYSIS

Effects of Temperature on Failure Modes for a Nickel-Base Disk Superalloy ............................. 122
T.P. Gabb, J. Telesman, P.T. Kantzos, and A. Garg

Failure Analysis on a Burst Steam Tube ..................................................................................... 123
H.S. Tuncel

Effect of Elemental Redistribution on the Failure of Centrifugally Cast HK40 Alloys .............. 124
P.G. Caceres-Valencia, and I.J. Baiges

A Workability Criterion for the Transformed Adiabatic Shear Band Phenomena During Cold Heading of 1038 Steel .............................................................................................. 125
A. Sabih, A.M. Elwazri, J.A. Nemes, and S. Yue

Correlation Between Silica and Chloride Water Monitoring and Relative Boiler Remaining Life for Steam Power Plant .................................................................................................. 126
A. Reani, and M. Tusli

The Comet Fatigue Failures of 1953-1954: A Historical Review ............................................ 127
J. Raphael

Apollo 1 Fire and Its Effect on the Space Industry .................................................................... 128
D.P. Dennies

Kansas City Hyatt Hotel Skyway Collapse ............................................................................... 129
C.R. Morin, and C.R. Fischer

Fire Investigations - An Overview of the Process Utilizing Case Studies .................................. 130
I.W. Lee Pack

Materials Examination of the Vertical Stabilizer from American Airlines Flight 587 ................ 131
M.R. Fox, C.R. Schultheisz, J.R. Reeder, and B.J. Jensen

Engineering Forensics at Youngstown State University .......................................................... 132
R.A. McCoy

Failure Analysis of Braze Interfaces in Vacuum Devices ........................................................... 133
J.D. Leber, and I. Molodetsky

Application of Hazard and Operability Studies (HAZOP) to Failure Analysis ...................... 134
M. Bailey

The Interaction of Test Methods and Failure Criteria ............................................................... 135
M. Fox, D. Levinson, and R. Hastings

Performance of Automotive Side Glazing in Rollover Collisions ........................................... 136
S.A. Batzer
Microbially Influenced Corrosion, Victaulic Couplings, Water Treatment and DNA Studies .......................................................... 1383
D.L. Gibbon, and M. Zamanzadeh

FERROUS PHYSICAL METALLURGY OF HIGHLY ALLOYED STEELS

A Discussion of the Effects of Gettering Sulfure as Particles of Carbosulfides on the Toughness of Ultra-High Strength Steels .......................................................... 1400
W.M. Garrison, Jr., and T. Nakashima

Development of Eglin Steel -- A New, Ultrahigh-Strength Steel of Armament and Aerospace Applications .......................................................... 1410
J.R. Paules, M.F. Dilmore, and K.J. Handerhan

Shear Punch Testing of Welded Pipeline Steel ........................................... 1421
G.R. Stewart, A.M. Elwazri, R. Varano, N. Pokutylowicz, S. Yue, and J.J. Jonas

Metallurgical Considerations in Diffusion-Alloying by Aluminum in Ferrous Alloys .......................................................... 1432
L. Chen

Influence of the Thermomechanical Treatments on the Mechanical Properties and the Microstructure of Lean Chemistry HSLA-100 Steel Plates ........................................... 1440
S.K. Dhua

The Influence of Process Parameters on the Mechanical Properties of Hot Rolling Dual Phase Heavy Steel Plate .......................................................... 1449
L. Yao, and K.M. Wu

Three-Dimensional Morphology of Acicular Ferrite in a Low Carbon Steel Weld .......................................................... 1466
K.M. Wu, and M. Enomoto

Metal Dusting Induced Pitting in Alloy 800 .................................................. 1476
A. Putrevu, Z. Zeng, K. Natesan, S.K. Varma, and W.G. Durrer

Effect of Mo and Mn Additions on Tensile and Corrosion Behaviors of CD4MCU Cast Duplex Stainless Steels .......................................................... 1482
Y. Jang, S. Kim, J. Lee, K. Kim, and J. Lee

FRACTURES OF MULTICOMPONENT SYSTEMS

Characterization of Mechanical and Fracture Properties of Zirconium Alloys Small Punch Test and Ball Indentation Test .......................................................... 1493
B.N. Rath, R. Shriwastaw, V.P. Jathar, E. Ramadasan, and K.C. Sahoo

Modeling Void Coalescence During Ductile Fracture ................................... 1500
J.P. Bandstra, and D.A. Koss

Elevated Temperature Cyclic Fatigue of High Performance Al(2)O(3) Fibers .......................................................... 1507
N. Chawla, and M. Kerr

Effect of Particle Clustering on the Fatigue Behavior of SiC Particle Reinforced Al Matrix Composites .......................................................... 1511

Analysis of Nano Scale Ligament Microstructural Design of Carbon Foam for Optimal Stiffness and Multifunctionality .......................................................... 1515

The Effect of High Temperature Exposure in Reducing or Oxidizing Atmosphere on
Ceramic Joints Brazed with Silver-Copper Oxide ........................................................................... 1657
J.Y. Kim, K.S. Weil, and J.S. Hardy

Room Temperature Hermetic Sealing of Microelectronic Packages with Nanoscale
Multilayer Reactive Foils .................................................................................................................. 1665

Examination of the Process Efficiency During Hybrid Laser-Arc Welding ........................................ 1673

Volume 4

The Mechanism of Flux Assisted Arc Welding in Austenitic Stainless Steel Welds ...................... 1681
S.-W. Shyu, H.-Y. Huang, K.-H. Tseng, and C.-P. Chou
Effect of Interfacial Microstructure on Strength of Dissimilar Joint of Aluminum Alloys and Steels of Light-Weight Auto Body
H. Imaeda, M. Kondo, A. Hirose, and K.F. Kobayashi

Tracing Material Flow Paths in Friction Stir Welds
J. Sanders, J. Schneider, and A. Nunes, Jr.

Experimental & Numerical Studies on Orbital Friction Welding of High Carbon Steel
M. Maalekian, H.P. Brantner, Y. Ghanimi, and H. Cerjak

Weld Failure Often Stem from the Violation of Simple Design Principles
O.W. Blodgett

MATERIAL LIGHTWEIGHTS OR ULTRALIGHTS

Syntheses, Structure, Properties, and Prospective Application of Gas-Eutectic Porous Materials
V.I. Shapovalov

MATERIALS AND LIFE MANAGEMENT ISSUES

Weight Reduction in Aircrafts by Means of New Magnesium Castings
G. Arruebarrena, I. Hurtado, A. Wendt, and B. Bronfin

Evaluation of a 17-4 PH Stainless Steel Sandwiched Fan Blade Design Concept
L.J. Ghosn, S.V. Raj, B.A. Lerch, and M.G. Hebsur

Materials Trends in Electronics - Life Cycle Implications

Toxic Use Reduction Act: Policy Recommendation for California
H.-Y. Kang, O. Ogunseitan, J.-D.M. Saphores, A.A. Shapiro, and J.M. Schoenung

Life Cycle Assessment (LCA) of WC-Co Cermet Fabrication
Y. Xiong, K. Lau, X. Zhou, and J.M. Schoenung

Evaluation of Lead-Free Solders by Integrating Environmental Impact, Cost, Reliability, and Customer Preferences
X. Zhou, K. Shimohashi, and J.M. Schoenung

Environmentally Benign Materials for Electronics; A Review of Current Developments and Emerging Technologies
J.D. Lincoln, O.A. Ogunseitan, J.-D. M. Saphores, J.M. Schoenung, H. Nixon, and A.A. Shapiro

MATERIALS FOR THE HYDROGEN ECONOMY

Performance of Polymer Electolyte Membrane Fuel Cell Stack with Corrugated Sheet Metal Bipolar/End Plates
V.V. Niakm, and R.G. Reddy

S. Dionne, W. Zheng, B. Cheadle, and F. Liang

Stainless Steel Biopolar Plates for Direct Methanol Fuel Cells (DMFC)
B.R. Padhy, and R.G. Reddy

Metallic Alloy Interconnects for Solid Oxide Fuel Cells - Issues Regarding Chromium Oxide Volatility
J.M. Rakowski

Corfer 22APU Alloy Development for Interconnect Applications in Solid Oxide Fuel Cells (SOFC)
R. Hojda, and L. Paul

MODELING AND SIMULATION OF TITANIUM TECHNOLOGY: THEORY AND PRACTICES

Microstructure, Tensile Deformation and Fracture Behaviors of Ti(2)AlNb Alloys ............. 1964
Y. Mao, M. Hagiwara, and S. Li

Mathematical Modeling of the Reduction of Pellets of Titanium Dioxide During the FFC Process .......................................................... 1973
P. Kar, S.S. Edussuriya, and J.W. Evans

Deformation Processing and Microstructural Evolution in a Near-Alpha Titanium Alloy ..... 1985
P. Wanjara, H. Monajati, M. Jahazi, L. Germain, P. Bocher, and J.-P. Immarigeon

Production TiCl(4) Using Combined Fluidized Bed by Titanium Slag Containing High-Level CaO and MgO ................................................................. 1997
Z. Yuan, Y. Pan, C. Xu, and J. Li

Modeling of Microstructures and Mechanical Properties of alpha + beta Ti Based Alloys .......................................................... 2009
J. Guo, and M.T. Samonds

3D Modeling Study of Recrystallization and Grain Growth in Inhomogeneously Strained Polycrystallines ........................................................................ 2019
O.M. Ivasishin, S.V. Shevchenko, N.L. Vasiliev, and S.L. Semiatin
Modelling of the Transformation Kinetics of the beta -> alpha + beta Transformation in Ti-4.5Fe-6.8Mo-1.5Al Based on Dilatometric Results and the Morphology of the alpha Plates

S.M.C. van Bohemen, V. van der Laars, J. Sietsma, and S. van der Zwaag

NANOMATERIALS

A Study of Grain Growth During Sintering of Monolithic Nanosized Tungsten Carbide

X. Wang, Z.Z. Fang, and H.Y. Sohn

Improved Optical Clarity of Melt Intercalated Polymer Nanocomposites

A. Muduliar, R. Hadal, H. Nathani, and D.K. Misra

Integration of Carbon Nanotubes with MEMS Through Standard Photolithographic Techniques

C.M. McCarter, D.F. Bahr, R.F. Richards, C.D. Richards, D. McClain, and J. Jiao

Fabrication of Nanostructured NiTi Shape Memory Alloys by the Cold Rolling Technique

P. Maheshwari, V. Singh, K.J. Ganesh, and A. Suresh

Development of Ultra High Strength and Nanocrystalline Materials by Accumulative Roll Bonding

H. Sharma, R. Chauhan, and V.C. Srivastava

The Magnetic Behavior of Nanocrystalline Nickel Ferrites: The Effect of Surface Roughness and Aspect Ratio on Anisotropy

H. Nathani, J.S. Rawat, and D.K. Misra

Development of a Novel Aqueous Sol-Gel Techniques for Synthesis of Nanostructured Ceramic Powders

N.N. Ghosh

Simulation of Heat Transfer Enhancement in Nanoparticle Suspensions

X. Wu, and R. Kumar

NEAR-NET-SHAPE TECHNOLOGIES

Counter-Gravity Investment Casting of Ni-Base Superalloys Using Inert Atmosphere

S. Shendye, B. King, and P. McQuay

The Effect of EMBR on Metallurgical Behavior in CSP Mold

G. Liu, B. Zhen, G. Jiao, K. Deng, Z. Ren, and K.M. Wu

Comparison Study of H13 Tool Steel Microstructures Produced by Laser Cladding and Laser Consolidation

J. Chen, and L. Xue

Y. Xiong, B. Zheng, J.E. Smugeresky, L. Ajdelsztajn, and J.M. Schoenung

Metal Printing Process: A Rapid Manufacturing Process Based on Xerography Using Metal Powders

C. van der Eijk, O. Åsebø, T. Mugaas, R. Karlsen, R. Skjevdal, and K. Boivie

Materials Development for ProMetal

J. Liu, and H.A. Kuhn

PROCESS HEATING/ REHEATING

Reconsideration of Natural-Gas Immersion Burners to Melt Recycled Aluminum

J.A. Clark, III, A. Thekdi, S. Ningileri, and Q. Han
Energy Savings Through Accurate Temperature Measurement .................................................. 2169
