Contents

Technical Sessions

Session 1

Defect List Compression ................................................................. 3
  Giovanni Motta, Erik Ordentlich*, and Marcelo J. Weinberger*
  Hewlett-Packard, Personal Systems Group, *Hewlett-Packard Laboratories
Table Compression by Record Intersections .................................. 13
  Alberto Apostolico, Fabio Cunial, and Vineith Kaul
  Georgia Institute of Technology
Compressed Index for Dictionary Matching ...................................... 23
  Wing-Kai Hon, Tak-Wah Lam*, Rahul Shah*, Siu-Lung Tam*,
  and Jeffrey Scott Vitter*
  National Tsing Hua University, *University of Hong Kong, *Louisiana State University,
  *Purdue University
An Approach to Graph and Netlist Compression .............................. 33
  Jeehong Yang, Serap A. Savari*, and Oskar Mencer*
  University of Michigan, *Texas A&M University, *Imperial College, London
Design and Implementation of a High-Performance Microprocessor
Cache Compression Algorithm ......................................................... 43
  Xi Chen, Lei Yang, Haris Lekatsas*, Robert P. Dick, and Li Shang*
  Northwestern University, *Princeton, *University of Colorado

Session 2

Rate-Distortion Functions for Nonstationary Gaussian Autoregressive Processes ........ 53
  Robert M. Gray and Takeshi Hashimoto*
  Stanford University, *University of Electro-Communications
The Rate-Distortion Function of a Poisson Process with a Queueing
Distortion Measure ........................................................................ 63
  Todd P. Coleman, Negar Kiyavash, and Vijay G. Subramanian*
  UIUC, *National University of Ireland at Maynooth
The Quadratic Gaussian Rate-Distortion Function for Source
Uncorrelated Distortions ............................................................... 73
  Milan S. Derpich, Jan Østergaard, and Graham C. Goodwin
  The University of Newcastle
Session 3

Compressive-Projection Principal Component Analysis for the Compression of Hyperspectral Signatures
James E. Fowler
Mississippi State University

Compression of Hyperspectral Images with LVQ-SPECK
Alessandro J. S. Dutra, William A. Pearlman, and Eduardo A. B. da Silva
Rensselaer Polytechnic Institute, Universidade Federal do Rio de Janeiro

Hyperspectral Image Coding Using 3D Transform and the Recommendation CCSDS-122-B-1
Fernando García-Vílchez, Joan Serra-Sagristà, Joan Bartrina Rapesta, and Francesc Aulí Llinàs
Universitat Autònoma Barcelona

Session 4

High-Resolution Functional Quantization
Vinith Misra, Vivek K. Goyal, and Lav R. Varshney
Massachusetts Institute of Technology

Image Compression by Visual Pattern Vector Quantization (VPVQ)
Feng Wu and Xiaoyan Sun
Microsoft Research Asia

Object-Based Regions of Interest for Image Compression
Sunhyoung Han and Nuno Vasconcelos
University of California, San Diego

Directional Lapped Transforms for Image Coding
Jizheng Xu, Feng Wu, Jie Liang, and Wenjun Zhang
Microsoft Research Asia, Shanghai Jiao Tong University, Simon Fraser University

Coding Overcomplete Representations of Audio Using the MCLT
Byung-Jun Yoon and Henrique S. Malvar
California Institute of Technology, Microsoft Research

Session 5

Word-Based Statistical Compressors as Natural Language Compression Boosters
Antonio Fariña, Gonzalo Navarro, and José R. Paramá
University of A Coruña, University of Chile

On Non-sequential Context Modeling with Application to Executable Data Compression
Wenrui Dai, Hongkai Xiong, and Li Song
Shanghai Jiao Tong University

IPzip: A Stream-Aware IP Compression Algorithm
Su Chen, Supranamaya Ranjan, and Antonio Nucci
Rutgers University, Narus, Inc

Lossless Compression of Hexahedral Meshes
Peter Lindstrom and Martin Isenburg
Lawrence Livermore National Laboratory
Session 6

Wireless Video Transmission: A Distortion-Optimal Approach ................................................................. 202
  Negar Nejati, Homayoun Yousefi'zadeh, and Hamid Jafarkhani
  University of California, Irvine

Drift Characterization of Intra Prediction and Quantization in H.264 ................................................. 212
  Athanasios Leontaris and Alexis M. Tourapis
  Dolby Laboratories, Inc.

An Estimation-Theoretic Interpretation of Video Rate Distortion
Optimization with Lagrangian Formulation ......................................................................................... 222
  Zhen Li and Alexis Michael Tourapis
  Dolby Laboratories

A Novel Partial Prediction Algorithm for Fast 4x4 Intra Prediction
Mode Decision in H.264/AVC ........................................................................................................... 232
  Y. N. Sairam†, Nan Ma†, and Neelu Sinha†,‡
  ATC Labs, †Fairleigh Dickinson University

A Reliable Chunkless Peer-to-Peer Architecture for Multimedia Streaming ........................................ 242
  R. Bernardini, R. Rinaldo, and A. Vitali†
  University of Udine, †ST microelectronics

Session 7

Geometric Burrows-Wheeler Transform: Linking Range Searching
and Text Indexing .............................................................................................................................. 252
  Yu-Feng Chien, Wing-Kai Hon, Rahul Shah†, and Jeffrey Scott Vitter‡
  National Tsing Hua University, †Louisiana State University, ‡Purdue University

Shared Descriptions Fusion Coding for Storage and Selective Retrieval
of Correlated Sources ......................................................................................................................... 262
  Sharadh Ramaswamy and Kenneth Rose
  University of California, Santa Barbara

Practical Entropy-Bounded Schemes for O(1)-Range Minimum Queries .............................................. 272
  Johannes Fischer, Volker Heun, and Horst Martin Stühler
  Ludwig-Maximilians-Universität München Amalienstr

Session 8

Intra Prediction via Edge-Based Inpainting .............................................................................................. 282
  Dong Liu, Xiaoyan Sun†, and Feng Wu†
  University of Science and Technology of China, †Microsoft Research Asia

JPEG2000 Arbitrary ROI Coding through Rate-Distortion Optimization Techniques..................... 292
  Joan Bartrina-Rapesta, Francesc Aulí-Llinàs, Joan Serra-Sagristà,
  and Jose Lino Monteagudo-Pereira
  Universitat Autònoma Barcelona

Can Lower Resolution Be Better? ........................................................................................................... 302
  Xiangjun Zhang and Xiaolin Wu
  McMaster University
Session 9

Distributed Multi-stage Coding of Correlated Sources .......................................................... 312
Ankur Saxena and Kenneth Rose
University of California Santa Barbara

Distributed Compression of Correlated Signals Using Random Projections ......................... 322
Iñaki Esnaola and Javier Garcia-Frias
University of Delaware

Dimension Reduction and Expansion: Distributed Source Coding in a Noisy Environment
........................................................................................................................................... 332
Anna N. Kim and Fredrik Hekland
Norwegian University of Science and Technology, 'ABB Corporate Research Centre

Sublinear Recovery of Sparse Wavelet Signals ....................................................................... 342
R. Maleh and A. C. Gilbert
University of Michigan

Rate Bounds on SSIM Index of Quantized Image DCT Coefficients .................................. 352
Sumohana S. Channappayya, Alan C. Bovik, Robert W. Heath Jr., and Constantine Caramanis
The University of Texas at Austin

---

Session 10

Noise-Shaped Predictive Coding for Multiple Descriptions of a Colored Gaussian Source .................................................................................................................. 362
Yuval Kochman, Jan Østergaard, and Ram Zamir
Tel Aviv University, 'University of Newcastle

Server Placement in Multiple-Description-Based Media Streaming ................................... 372
Satyajeet Ahuja and Marwan Krunz
University of Arizona

Speed-Up of Encoder Optimization Step in Multiple Description Scalar Quantizer Design .................................................................................................................. 382
Sorina Dumitrescu
McMaster University

Filter Banks for Prediction-Compensated Multiple Description Coding ............................. 392
Jing Wang and Jie Liang
Simon Fraser University

On the Symmetric Gaussian Multiple Description Rate-Distortion Function ..................... 402
Chao Tian, Soheil Mohajer, and Suhas Diggavi
AT&T Labs Research, 'Swiss Federal Institute of Technology

Asymmetric Multi-level Diversity Coding .............................................................................. 412
Soheil Mohajer, Chao Tian, and Suhas N. Diggavi
École Polytechnique Fédérale de Lausanne, 'AT&T Labs Research
Session 11

On Self-Indexing Images — Image Compression with Added Value ......................................................... 422
  Veli Mäkinen and Gonzalo Navarro†
  University of Helsinki, †University of Chile
VQ Based Image Retrieval Using Color and Position Features ................................................................. 432
  Ajay H. Daptardar and James A. Storer
  Brandeis University
Lifting-Based View Compensated Compression of Volume Rendered Images for Efficient Remote Visualization ............................................................................................................ 442
  Hariharan G. Lalgudi, Michael W. Marcellin, Ali Bilgin, and Mariappan S. Nadar†
  University of Arizona, Tucson, †Siemens Corporate Research
Multiresolution Rotation-Invariant Texture Classification Using Feature Extraction in the Frequency Domain and Vector Quantization ................................................................. 452
  Antonella Di Lillo, Giovanni Motta†, and James A. Storer
  Brandeis University, †Qualcomm Inc.

Session 12

Guaranteed Synchronization of Huffman Codes ...................................................................................... 462
  Marek Tomasz Biskup
  Warsaw University
Using Fibonacci Compression Codes as Alternatives to Dense Codes ..................................................... 472
  Shmuel T. Klein and Miri Kopel Ben-Nissan
  Bar Ilan University
A Simple Algorithm for Computing the Lempel–Ziv Factorization......................................................... 482
  Maxime Crochemore†, Lucian Ilie‡, and W. F. Smyth∗
  †King’s College London and Université Paris-Est, ‡University of Western Ontario,
  ∗McMaster University and Curtin University of Technology
A Lower Bound on the Redundancy of Arithmetic-Type Delay Constrained Coding ........................................ 489
  Eado Meron, Ofer Shayevitz, Meir Feder, and Ram Zamir
  Tel Aviv University
Poster Session
(listed alphabetically by first author)

A Lossless Wavelet–Based Predictive Multispectral Image Compressor ......................... 501
Daniel Acevedo and Ana Ruedin
Universidad de Buenos Aires

Suffix Sorting via Shannon-Fano-Elias Codes................................................................. 502
Don Adjeroh and Fei Nan
West Virginia University

Interactive Distributed Source Coding in Asymmetric Communication Scenarios........... 503
Samar Agnihotri, H. S. Jamadagni, and Pavan Nuggehalli†
Indian Institute of Science, †Vanu, Inc.

Priority Encoding Transmission Based Multiple Description Video Coding over Packet Loss Network.......................................................... 504
Huihui Bai, Yao Zhao, and Ce Zhu†
Beijing Jiaotong University, †Nanyang Technological University

Sequence of Hashes Compression in Data De-duplication............................................. 505
Subashini Balachandran and Cornel Constantinescu
IBM Almaden Research Center

Text Pre-processing for Lossless Compression ............................................................... 506
Luis Batista and Luís A. Alexandre
University Beira Interior and Networks and Multimedia Group, Covilhã

Data Compression and Linear Modeling ..................................................................... 507
Soosan Beheshti
Ryerson University

A New Object-Based System for Fractal Video Sequences Compression....................... 508
Kamel Belloulata and Shiping Zhu†
Université Djillali Liabès de Sidi Bel Abbès, †University of Sherbrooke

A Model Conditioned Data Compression Based Similarity Measure .......................... 509
D. Cerra†, ‡, and M. Datcu†, ‡
†German Aerospace Center (DLR), ‡Remote Sensing Institute (IMF), †Télécom Paris

A Three Dimensional Combinative Lifting Algorithm for Wavelet Transform Using 9/7 Filter .............................................................. 510
Lu Dai, Li Zhang, and Xiaolin Zhao
Tsinghua University

European and American Audio-Visual Speech Recognition, Using SVM in Portuguese Language .............................................................. 511
Adriano de Andrade Bresolin, Diamantino Rui da Silva Freitas†,
Adrião Duarte Dória Neto†, and Pablo Javier Alsina‡
Technological Federal University of the Paraná, †University of Porto, ‡Federal University of the Rio Grande do Norte

List Update Algorithms for Data Compression ............................................................. 512
Reza Dorrigiv, Alejandro López-Ortiz, and J. Ian Munro
University of Waterloo

All-Match LZ77 Bit Recycling ...................................................................................... 513
Danny Dubé and Vincent Beaudoin
Université Laval, Canada
Improved Multiple Description Framework Based on Successively Refinable Quantization and Uneven Erasure Protection .......................................................... 514
  Sorina Dumitrescu and Ting Zheng
  McMaster University

A Novel Multiple Description Video Codec Based on Slepian-Wolf Coding .......................................................... 515
  Yuhua Fan, Jia Wang, Jun Sun, Peng Wang, and Songyu Yu
  Shanghai Jiao Tong University and Shanghai Key Laboratory of Digital Media Processing and Transmission

DCA Using Suffix Arrays .......................................................... 516
  Martin Fiala and Jan Holub
  Czech Technical University

A Novel Multiple Description Video Codec Based on Slepian-Wolf Coding .......................................................... 515
  Yuhua Fan, Jia Wang, Jun Sun, Peng Wang, and Songyu Yu
  Shanghai Jiao Tong University and Shanghai Key Laboratory of Digital Media Processing and Transmission

Distributed Source Coding Using Raptor Codes for Hidden Markov Sources .......................................................... 517
  M. Fesia, L. Vandendorpe', and H. V. Poor
  Princeton University, 'Université Catholique de Louvain

Spectral Information Recovery for Compressed Image Restoration .......................................................... 518
  Jingjing Fu, Feng Wu, and Bing Zeng
  The Hong Kong University of Science and Technology

Adaptive Compression of Graph Structured Text .......................................................... 519
  John Gilbert and David M. Abrahamson
  Trinity College Dublin

Effective Compression of Monotone and Quasi-Monotone Sequences of Integers .......................................................... 520
  Daniel S. Hirschberg and Pierre Baldi
  University of California, Irvine

Trellis-Based Joint Huffman and Convolutional Soft-Decision Priority-First Decoding .......................................................... 521
  Yuh-Ming Huang and Yunghsiang S. Han'
  National Chi Nan University, 'National Taipei University

Simple Joint Source-Channel Coding Schemes for Colored Gaussian Sources .......................................................... 522
  Amir Ingber
  Tel Aviv University

Fast Partial Distortion Elimination Algorithm for Lossless and Lossy Motion Estimation Using Hadamard Transform and Probability Model .......................................................... 523
  Soonjong Jin, Hyuk Lee, and Jechang Jeong
  Hanyang University

A Theoretical Analysis of Data Reduction Using the Weber Quantizer .......................................................... 524
  Julius Kammerl, Peter Hinterseer, Subhasis Chaudhuri', and Eckehard Steinbach
  Technische Universität München, 'Indian Institute of Technology in Bombay

Optimal Audio Transmission over Wireless Tandem Channels .......................................................... 525
  Ala' Khaliifeh and Homayoun Yousefi'zadeh
  University of California, Irvine

Huffman Coding with Non-sorted Frequencies .......................................................... 526
  Shmuel T. Klein and Dana Shapira'
  Bar Ilan University, 'Ashkelon Academic College

Multistream Compression .......................................................... 527
  Jiří Kochánek, Jan Lánský', Petr Uzel', and Michal Žemlička'
  UniControls, 'Charles University

Multi-dimensional Compression Using JPEG2000 .......................................................... 528
  Hariharan G. Lalgudi, Ali Bilgin, Michael W. Marcellin, and Mariappan S. Nadar'
  University of Arizona, 'Siemens Corporate Research
A Peer-to-Peer Architecture Based on Scalable Video Coding .......................... 529
  Xuguang Lan, Nanning Zheng, Jianru Xue, Weike Chen, Bin Wang, Wen Ma, and Songlin Zhao
  Xi’an Jiaotong University

Improved Wavelet-Based Embedded Image Coding Using a Dynamic Index Reordering Vector Quantizer ........................................ 530
  Jungwon Lee, Teahyung Lee, and David V. Anderson
  Georgia Institute of Technology

Performance Analysis of Dual Frame Motion Compensation ...................... 531
  Da Liu†, Xiangyang Ji‡, Debin Zhao†, Xiaobin Zhu*, Zhi Bian*, and Wen Gao‡
  †Harbin Institute of Technology, ‡Peking University, *USC

Composition of DCT and Wavelet Transform for Image Compression .......... 532
  Xiteng Liu
  University of South Carolina

Maximally Robust Redundant System with Minimal Coherence .................. 533
  Xiteng Liu
  University of South Carolina

Complexity Based Image Artifact Detection .............................................. 534
  Alexandre Mallet†, Lionel Gueguen†, and Mihai Datcu‡
  †GET/Télécom Paris, ‡German Aerospace Center DLR

Maximum Likelihood Rate Estimation: With Applications in Image and Video Compression ......................................................... 535
  Koohyar Minoo and Truong Nguyen
  University of California, San Diego

New Bidirectional Motion Estimation Using Mesh-Based Frame Interpolation for Videoconferencing Applications ......................... 536
  V. Muñoz-Jiménez, A. Zergaïnoh-Mokraoui, and J.-P. Astruc
  Institut Galilée, Université Paris

Re-pair Achieves High-Order Entropy ...................................................... 537
  Gonzalo Navarro and Luís Russo†
  University of Chile, †University of Lisbon

Very Low Cost Algorithms for Predicting the File Size of JPEG Images Subject to Changes of Quality Factor and Scaling ...................... 538
  Steven Pigeon and Stéphane Coulombe
  Université du Québec

On Precision-Redundancy Relation in the Design of Source Coding Algorithms ............................ 539
  Yuriy A. Reznik
  Qualcomm Inc.

Effective Visual Masking Techniques in JPEG2000 .................................. 540
  Thomas Richter
  University of Stuttgart

Subjective and Objective Assessment of Visual Image Quality Metrics and Still Image Coders ...................................................... 541
  Thomas Richter and Chaker Larabi†
  University of Stuttgart, †SIC/University of Poitiers
