# TABLE OF CONTENTS

Technical Breakthrough in PCPs’ Scaling Issue of ASP Flooding in Daqing Oil Field ................................................................. 1  
C. Gang, L. He, S. Guochen, W. Guoqing, X. Zhongwen, R. Huaiwen, Z. Ying  

World’s First Metal PCP SAGD Field Test Shows Promising Artificial-Lift Technology for Heavy-Oil Hot Production: Joslyn Field Case ......................................................... 6  
J. L. Beauquin, F. Ndinemenu, G. Chalier, L. Lemay, L. Seince, A. Damnjanovic  

Slip Calculation of Rotational Speed of Electrical Submersible Progressive Cavity Pumps .............................................................................................................................................. 12  
D. Zhou, H. Yuan  

The Development of PCP Wells Troubleshooting Technique in Daqing Oilfield ................................................................. 21  
L. He, B. Yong, S. Guochen, W. Zhongguo, L. Chaoyong, J. Zhaoping  

The Mechanism of PCP Wells’ Tubing and Rod Wear Issue in Polymer Flooding in Daqing Oil Field ................................................................. 27  
L. He, P. Xiaohan, P. Baiqi, H. Yu, W. Yumei, W. Guoqing  

The Successful Application of PCPs’ Personalized Design in Hailar Oilfield ................................................................. 31  
C. Gang, H. Linghui, C. Zhaomei, Z. Xuecheng, W. Qingbo, C. Mingzhan  

Design of Progressive Cavity Pump Wells ................................................................................................................................ 36  
D. Zhou  

Computational Modeling of the Three-Dimensional Flow in a Metallic Stator Progressive Cavity Pump ................................................................. 48  
E. E. Paladino, J. A. Lima, R. F. C. Almeida, B. W. Assmann  

Comparative Analysis of Production Method with PCP Systems at Rubiales Oil Field (Colombia) ................................................................. 57  
C. A. Rubio, P. A Agudelo, J. E Peñaloza  

Standardizing the PCP Industry Through the Revised ISO 15136-1 ................................................................. 69  
S. G. Noonan  

Value of Real-Time Data From Automated and Integrated Well Moitoring Systems in a Venezuelan Heavy Oil Project ................................................................. 91  
I. Prado, L. Zabel  

Field Testing of an Automated Well Tester in a Heavy Oil Application ............................................................................................. 119  
R. Bastardo, J. Scoglio, A. Imam
