</table>
PART 3: EDUCATION IN NANO AND VACUUM BASED SCIENCE

Nano-education from a European Perspective ................................................................. 188
I Malsch

Teaching Nanoscience Across Scientific and Geographical Borders – A European
Master Programme in Nanoscience and Nanotechnology ........................................... 195
A Chesneau, G Groeseneken, P Heremans, D Rep, P Rudquist, P Schwijs, B Sluijter, G
Wendin

PART 4: ELECTRONIC MATERIALS AND PROCESSING

Effects of a Compliant Layer in Solid Parallel-plate UV-based Nanoimprint
Lithography .................................................................................................................. 199
I Bergmair, M Mühlberger, M Gusenbauer, R Schöftner, T Glnsner, K Hingerl

Electrical and Material Characterization of Atomic-layer-deposited Al₂O₃ Gate
Dielectric on Ammonium Sulfide Treated GaAs Substrates ............................................. 203
C-C Cheng, C-H Chien, G-L Luo, C-C Chang, C-C Kei, C-H Yang, C-N Hsiao, T-P Perng,
C-Y Chang

Fabrication and Characterization of Nickel Silicide Ohmic Contacts to n-type 4H
Silicon Carbide ............................................................................................................. 207
A Kuchuk, V Kladko, M Guziewicz, A Piotrowska, R Minikayev, A Stonert, R Ratajczak

Deep Level Transient Spectroscopy Characterization of Defects Introduced in
p-Si by Electron Beam Deposition and Proton Irradiation ........................................... 212
C Nyamhere, A G M Das, F D Auret, M Hayes C

RBS Investigation of Annealed Thin Gold Layers on Crystalline Germanium .................. 216
M Hayes, F Schremm, S M M Coelho, F D Auret, J M Nel, W Wesch

Structural, Electronics and Optical Properties of CaO .................................................. 220
E L Albuquerque, M S Vasconcelos

Strong Photoacoustic Pulses Generated in TlGaSe₂ Layered Crystals ............................. 224
V Grivickas, V Bikbajevas, V Gavryushin, J Linnros

Two-photon Indirect Absorption in GaSe ........................................................................ 228
V Grivickas, V Bikbajevas, K Allakhverdiev, J Linnros

Efficient Electroabsorption for Mid-infrared Wavelengths Using Intersubband
Transitions .................................................................................................................... 232
P Holmström, P Jänes, U Ekenberg, L Thylén

Influence of Er and O Concentrations on the Microstructure and Luminescence of
Si:Er/O LEDs ............................................................................................................. 236
A Karim, G V Hansson, M K Linnersson

Study of Low Power Deposition of ITO for Top Emission OLED with Facing Target
and RF Sputtering Systems ........................................................................................ 241
S Dangtip, Y Hoshi, Y Kasahara, Y Onai, T Osotchan, Y Sawada, T Uchida

Study of the Secondary Ion Emission by Electrons from Microchannel Plates
(MCP) ........................................................................................................................... 247
R Nevshupa, E Roman, J L de Segovia, P Konovalov, L Ballasny

Crystallinity of CoSi₂ Nanolayer Grown by Refractory Metal Interlayer and Cap
Layer Methods .......................................................................................................... 251
O Akhavan, A Z Moshfegh
Optimisation of a Smooth Multilayer Nickel Silicide Surface for ALN Growth ................................. 255
D M Martin, J Enlund, V Yantchev, J Olsson, I Katardjiev

Effect of Deposition Conditions on the Structure, Phase Composition and
Electrical Properties of the Chromium Silicide Films ................................................................. 259
V I Trofimov, J Kim, S Bae

Aligned Defects Behaviour of β-FeSi2 Thin Film on Si(100) Substrate Prepared by
Ion Beam Sputter Deposition ........................................................................................................ 263
M Sasase, K Yamaguchi, H Yamamoto, S Shamoto, K Hojou

InAs Film Grown on Si(111) by Metal Organic Vapor Phase Epitaxy ............................ 267
P Caroff, M Jeppsson, D Wheeler, M Keplinger, B Mandl, J Stangl, A Seabaugh, G Bauer,
L-E Wernersson

Epitaxial Growth of ZnMgTe with a Wide Composition Range on ZnTe Substrate
by Molecular Beam Epitaxy ......................................................................................................... 271
T Tanaka, K Saito, M Nishio, Q Guo, H Ogawa

Improvement of MOVPE Grown ZnTe:P Layers by Annealing Treatment .......... 275
K Saito, K Fujimoto, K Yamaguchi, T Tanaka, M Nishio, Q X Guo, H Ogawa

Characterisation of High-temperature Annealing Effects on α—Al2O3(0001)
Substrates ........................................................................................................................................ 279
B Qi, B Agnarsson, K Jonsson, S Olafsson, H P Gislason

Energy Gaps in Fractional Quantum Hall States ................................................................. 284
S Sasaki

Movement of Diagonal Resistivity in Fractional Quantum Hall Effect Via Periodic
Modulation of Magnetic Field Strength ......................................................................................... 288
S Sasaki

Quantum Hall Effect in a High-mobility Two-dimensional Electron Gas on a
Cylindrical Surface ......................................................................................................................... 292
K-J Friedl, R Hey, H Kostial, A Riedel, D Maude

Excitation Density Dependence of the Photoluminescence from Cd,Hg1-x,Te
Multiple Quantum Wells ............................................................................................................. 296
C R Tonheim, E Selvig, S Nicolas, A E Gunnaes, M Breivik, R Haakenaesen

Ferromagnetism and Magnetotransport in GaAs Structures with InAs Quantum
Dot Layer Or In0.53Ga0.47As Quantum Well Delta-doped with Mn and C ..................................... 301
V A Kulbachinskii, P V Gurin, Ov Vikhrova, Y A Danilov, B N Zvonkov

Cracks in GaN/AlN Multiple Quantum Well Structures Grown by MBE ................................ 305
X Y Liu, T Aggerstam, P Holmstrom, S Lourdudoss, T G Andersson

Size-selection of Nanoclusters in Transition from 2D to 3D Growth in Ion Beam
Assisted Deposition ......................................................................................................................... 309
K A Nevalainen, I T Koponen

Growth of Undoped ZnMgTe Layers by Metalorganic Vapour Phase Epitaxy .................... 313
K Saito, D Kouno, T Tanaka, M Nishio, Q X Guo, H Ogawa

SiGe Quantum Wells for Uncooled Long Wavelength Infra-red Radiation (LWIR)
Sensors ........................................................................................................................................ 317
S G E Wissmar, H H Radamsson, Y Yamamoto, B Tillack, C Vieider, J Y Andersson

Study on the Low Leakage Current of an MIS Structure Fabricated by ICP-CVD ............... 322
S-Y Tsai, Y-M Lu, M-H Hon
### Structural, Electrical and Optical Properties of ZnO/Si Structures Prepared by Sputtering Or Pulsed Laser Deposition
J Škriniarová, J Kovác, D Haško, A Vincze, J Jakabovic, L Jánoš, M Veselý, I Novotný, J Bruncko

### Electron Paramagnetic Resonance Study on N-type Electron-irradiated 3C-SiC
P Carlsson, K Rabia, N T Son, T Ohshima, N Morishita, H Itoh, J Isoya, E Janzén

### Corrected Electron Inelastic Mean Free Paths (IMFPs) for Selected Wide Band Semiconductors
M Krawczyk

### Defect Induced Ferromagnetism in Co-doped ZnO Thin Films
M Fonín, G Mayer, E Biegger, N Janšen, M Beyer, T Thomay, R Bratschitsch, Y S Dedkov, U Rüdiger

### Comparative Study on Stress in AlGaN/GaN HEMT Structures Grown on 6H-SiC, Si and on Composite Substrates of the 6H-SiC/poly-SiC and Si/poly-SiC
M Guziewicz, E Kaminska, A Piotrowska, K Golaszewska, J Z Domagala, M-A Poisson, H Lahreche, R Langer, P Bove

### High Dose Fe Implantation of GaN: Damage Build-up and Dopant Redistribution
A Y Azarov, A Hallén, J Jensen, T Aggerstam, S Lourdudoss

### Fabrication of Low Resistivity P-type ZnO Thin Films by Implanting N⁺ Ions
S-Y Tsai, Y-M Lu, M-H Hon

### Electronic Properties of Shallow Level Defects in ZnO Grown by Pulsed Laser Deposition
F D Auret, W E Meyer, P J J van Rensburg, M Hayes, J M Nel, H von Wenckstern, H Hochmuth, G Biehne, M Lorenz, M Grundmann

### Carbonization Process and SiC Formation at C₆₀/Si(111) Interface Studied by SRPES
Y Y Wu, J F Liu, B Sun, Z L Liu, P S Xu

### Effect of Si/C Flux Ratio on the Growth of 3C-SiC on Si(111) by SSMBE
Z L Liu, J F Liu, P Ren, P S Xu

### Photoluminescence from CdₓHg₁₋ₓTe
M Breivik, E Selvig, C R Tonheim, E Brendhagen, T Brudevolt, A D van Rheenen, H Steen, S Nicolas, T Lorentzen, R Haakenaansen

### Structural and Electrical Characterization of AgInSe₂ Crystals Grown by Hot-press Method
K Yoshino, A Kinoshita, Y Shirahata, M Oshima, K Nomoto, T Yoshitake, S Ozaki, T Ikari

### Heterogeneous Integration of InAs on W/GaAs by MOVPE
G Astromskas, L E Wernersson

### X-ray Absorption Spectroscopy Study on Oxygen-deficient Hafnium Oxide Film
D-Y Cho, C-H Min, J-Y Kim, J-H Park, S-J Oh, C S Hwang

### Impact of Charge Trapping Effect on Negative Bias Temperature Instability in P-MOSFETs with HfO₂/SiON Gate Stack
S-C Chen, C-H Chien, J-C Lou

### Growth and Characterisation of Thin MgO Layers on Si(100) Surfaces
P Casey, G Hughes, E O’Connor, R D Long, P K Hurley

### Photoemission Studies of the Interface Formation of Ultrathin MgO Dielectric Layers on the Oxidised Si(111) Surface
B Brennan, S McDonnell, G Hughes
PART 5: NANOSCIENCE

Epitaxial Growth of Cubic Gd$_2$O$_3$ Thin Films on Ge Substrates .................................................. 396
A Molle, C Wiemer, M D N K Bhuiyan, G Tallarida, M Fanciulli

Low Temperature (LN$_2$) and UHV Mechanically Controllable Break Junction Setup to Study Quantum Electrical Transport of Atomic-size Metal Nanowire ................................................. 400
V Rodrigues, M Lagos, D Ugarte

A Parabolic Quantum Well on a Single Dimer Row of the Si(001) Surface Studied by Scanning Tunneling Spectroscopy ................................................................................................................ 407
K Sagisaka, D Fujita

Observation of Local Barrier Height and Electronic Structure on Cuprate Superconductor by STM/STS ........................................................................................................ 411
A Sugimoto, T Ekino, H Eisaki

Electrical Characteristics of Ferritin Cores Investigated by Kelvin Probe Force Microscopy ................................................................. 415

Characterization of Small-scale Batch-fabricated Carbon Nanofiber Probes ........................................... 419
M Kitazawa, R Ohta, Y Sugita, J Tanaka, M Tanemura

Local Conductance Measurement of Few-layer Graphene on SiC Substrate Using an Integrated Nanogap Probe ........................................................................................................ 424
M Nagase, H Hibino, H Kageshima, H Yamaguchi

SSRM Characterisation of FIB Induced Damage in Silicon ........................................................................ 428
S Beuer, V Yanev, M Rommel, A J Bauer, H Ryssel

Controlled Manipulation of Thiol-functionalised Gold Nanoparticles on Si (100) by Dynamic Force Microscopy ............................................................................................................. 432
G Paolicelli, K Mougin, A Vanossi, S Valeri

Mechanical Detection and Mode Shape Imaging of Vibrational Modes of Micro and Nanomechanical Resonators by Dynamic Force Microscopy ......................................................................... 436
A S Paulo, J Black, D Garcia-Sanchez, M J Esplandiu, A Aguasca, J Bokor, F Perez-Murano, A Bachtold

Apertureless Near-field Optics on Commercial AFM: Tip to Sample Gap Control .................................... 441
A A Milner, K Zhang, M Karpovski, Y Prior

Cell Based Ultra High Vacuum Scanning Probe Microscope with an External Scanning Unit Having Gas Or Liquid Processing Capabilities ................................................................. 445
E H Bjarnason, U B Arnalds, S Olafsson

Scanning Thermal Microscopy Probe Capable of Simultaneous Electrical Imaging and the Addition of Diamond Tip ........................................................................................................... 449
E Brown, L Hao, D C Cox, J C Gallop

Atomic Force Microscopy Manipulation with Ultrasonic Excitation ......................................................... 454
M T Cuberes

Nanoscale Ultrasound in Liquid Environment ............................................................................................. 458
M T Cuberes

Trapping and Manipulation of Nanoparticles by Using Jointly Dielectrophoresis and AC Electroosmosis .......................................................................................................................... 462
N G Loucaides, A Ramos, G E Georgiou
Formation of Nanoscale Platinum and Iron Oxide Structures Using Electron Beam Induced Deposition Techniques ................................................................. 467
M Shimojo, M Takeguchi, K Mitsuishi, M Tanaka, K Furuya

Fabrication and Characterization of Zinc Oxide Nanoparticles by DC Arc Plasma ................................................................. 471
M Z Shoushtari, S Farhooede, M Farbod

Nanoscale Molecular Patterning on Artificially Fabricated Nanoscale Structured Al Surfaces ........................................................................................................... 475
H Kato, S Takemura, S Kimura, T Okumura, D Kobayakawa, Y Watanabe, T Sugiyama, T Hiramatsu, N Nanba, O Nishikawa, M Taniguchi

Structural Bistability of the Oxygen-adsorbed Graphene Sheet ................................................................. 479
J Nakamura, J Ito, A Natori

Nanoscale Patterning of Si Surface Using SPM Scratching ......................................................................................................................... 483
T Ogino, S Nishimura, J Shirakashi

Tapping Mode SPM Local Oxidation Nanolithography with Sub-10 Nm Resolution ................................................................. 487
S Nishimura, T Ogino, Y Takemura, J Shirakashi

Wide-range Control of Tunnel Resistance on Metallic Nanogaps Using Migration ................................................................................................. 491
S Kayashima, K Takahashi, M Motoyama, J Shirakashi

Atomistic Modelling of the Interface Structure of Si Nanocrystals in Silica ......................................................................................................................... 495
F Djurabekova, C Bjorkas, K Nordlund

Large Area μm and Sub-μm Structuring of Gold Layers with Microcontact Printing Using 4” and 1” PDMS Stamps ............................................................................. 499
E Lausecker, W Schwinger, I Bergmair, M Mühberger, R Schöffner

Fabrication and Nanostructure Study of Ultra Thin Electroplating Constantan Film on GaAs As a Thermopower Sensor ........................................................................ 503
I Kazeminezhad, E Khoshbakht, M Farbod

Nanoscale Characterization of Crystallinity in DSA® Coating ......................................................................................................................... 507
C Malmgren, M Hummelgård, J Bäckström, A Cornell, H Olin

Synthesis and Characterization of a Self-assembled Nanostructured Silicon/metal Composite ......................................................................................................................... 511
P Granitzer, K Rumpf, P Poelt, Š Simić, H Krenn

Characterization of Boron Doped Nanocrystalline Diamonds ......................................................................................................................... 515
A C Peterlevitz, G M Manne, M A Sampaio, J C R Quispe, M P Pasquetto, R F Iannini, H J Ceragioli, V Baranauskas

Synthesis and Characterization of Boron-doped Carbon Nanotubes ......................................................................................................................... 519
H J Ceragioli, A C Peterlevitz, J C R Quispe, A Larena, M P Pasquetto, M A Sampaio, V Baranauskas

Project of International Science-education Center and Integration Problems of Nano Science Education in Far Eastern Region of Asia ........................................................................ 523
N I Plusnin, G I Lazarev

Mass Measurements Based on Nanomechanical Devices: Differential Measurements ......................................................................................................................... 527
J Arcamone, G Rius, J Llobet, X Borrisé, F Pérez-Murano

High-density Data Storage Using Diamond Probe Technique ......................................................................................................................... 531
O Lysenko, N Novikov, V Grushko, A Shcherbakov, A Katusha, S Ivakhnenko

Frequency Modulation Torsional Resonance Mode AFM on Chlorite (001) ......................................................................................................................... 535
A Yurtsever, A M Gigler, R W Stark
A Closer Look at the Complex Hydrophilic/hydrophobic Interactions Forces at the Human Hair Surface ................................................................. 539
   N Baghdadi, G S Luengo, L Recherche

Apoptosis Study of the Macrophage Via Near-field Scanning Optical Microscope .......................................................... 543

Light Transmittance Through a Thin Conducting Film with Various Correlation Between Interface Profiles .................................. 546
   A V Korovin, N L Dmitruk

Light Scattering and Plasmon Resonances in a Metal Film with Sub-wavelength Nano-holes ................................................. 550
   N Anttu, H Q Xu

Probing the Local Field of Nanoantennas Using Single Particle Luminescence .......................................................... 554
   A L Lereu, G Sanchez-Mosteiro, P Ghenuche, A Passian, R Quindt, M Garcia-Parajo, N F van Hulst

A Catalytic Surface for Amyloid Fibril Formation .................................................................................................................. 559
   P Hammarström, M M Ali, R Mishra, S Svensson, P Tengvall, L Lundström

Localization of Membrane-bond OPN Using Force Spectroscopy Analysis .......................................................... 563
   A Ron, R R Singh, N Fishelson, R Socher, D Benayahu, Y Shacham-Diamand

Analysis of Cytoskeletal Features in Dried and Living Cells and Slow Dynamic Experiments Using Atomic Force Microscopy .......................................................... 567
   G S Watson, J A Watson

Sensitivity of Silicon Nanowires in Biosensor Applications ........................................................................................................ 571
   N Elfström, J Linnros

Polymer-metal Nanocomposites with 2-dimensional Au Nanoparticle Arrays for Sensoric Applications ................................................. 575
   C Hanisch, A Kulkarni, V Zaporotchenko, F Faupel

Interdigitated Microelectrode Based Impedance Biosensor for Detection of Salmonella Enteritidis in Food Samples .......................................................... 579
   G Kim, M Morgan, B K Hahm, A Bhunia, J H Mun, A S Om

Characterisation of Nano-interdigitated Electrodes .................................................................................................................. 583
   L H D Skjolding, C Spiegel, A Ribayrol, J Emnéus, L Montelius

Development of Microvalves for Gas Flow Control in Micronozzles Using PVDF Piezoelectric Polymer .......................................................... 587
   R S Wiederkehr, M C Salvadori, F T Degasperi, M Cattani

A Microfabricated Platform for Chromosome Separation and Analysis .......................................................................................... 591
   M Dimaki, C H Clausen, J Lange, P Shah, L B Jensen, W Svendsen

Thermo-tuning and Energy Redistribution in Microcavity Solid-state Dye Lasers .......................................................... 595
   S Ricciardi, S Popov, A T Friberg, S Sergeyev

Fabrication of Ordered Arrays of Quantum Wires Through Hole Patterning .................................................................................. 599
   X Cartoixà, R Rurali, I Fernández-Cuesta, F Pérez-Murano, J Sune

Second Harmonic Spectroscopy of Copper Nanowire Arrays on the (110) Faceted Faces of NaCl Crystals .......................................................... 603
   K Locharoenrat, H Sano, G Mizutani

AFM-based Manipulation of InAs Nanowires .................................................................................................................. 607
   G Conache, S Gray, M Bordag, A Ribayrol, L E Fröberg, L Samuelson, H Pettersson, L Montelius
