</table>
The Structure Changes in Al$_{0.88}$Si$_{0.12}$ Eutectic Melt Upon Addition of Ni
S Mudry, A Korolyshyn, I Shtablavyi

Formation and Soft Magnetic Properties of Co (-Fe)-Si-B-Nb Bulk Metallic Glasses in Relation to Clusters
Q Wang, C L Zhu, C Dong, J B Qiang, W Zhang, A Inoue

Composition Design for Laves Phase-related BCC-V Solid Solution Alloys with Large Hydrogen Storage Capacities
H B Wang, Q Wang, C Dong, L Yuan, F Xu, L X Sun

Void Distributions in Liquid BiBr$_3$
K Maruyama, H Endo, H Hoshino, Y Kawakita, S Kohara, M Itou

Chemical Thermodynamics and Elements of Structure in Oxide Melts
V K Novikov, M A Spiridonov, I S Sangalova

Static Structure of Superionic Conducting Glass of Ag-Ge-Se System
R Suenaga, Y Kawakita, S Nakashima, S Tahara, S Kohara, S Takeda

Structure of Mn$_{40}$Zn$_{60}$ Liquid Alloy
D Es Sbihi, B Grosdidier, J G Gasser

Structural Changes and Barkhausen Effect Parameters of Amorphous-nanocrystalline Alloys After Various Heat Treatments
A G Lavrent'ev, N I Noskova, A P Potapov, G S Korzunin

Pressure Dependence of the Structure of Liquid Na
A Yamane, F Shimojo, K Hoshino

Presentation of Penrose Tiling As Set of Overlapping Pentagonal Stars
A A Polyakov

Quasiperiodic and Frank-Kasper Phases Formation During Primary Crystallization of Fe-base Amorphous Alloys
I V Lyasotskyi, N B Dyakonova, D L Dyakonov, V S Kraposhin

Structural Features, Strength and Mechanisms of Deformation of Nanocrystalline Materials
N Noskova

Structural Fluctuations in Expanded Fluid Se Accompanying the Semiconductor-metal Transition
M Inui, K Matsuda, D Ishikawa, Y Kajihara, K Tamura

The Liquid Structure of Sn-based Lead-free Solders and the Correlative Effect in Liquid-solid Interfacial Reaction
Ning Zhao, Xuemin Pan, Haitao Ma, Chuang Dong, Shuhong Guo, Wen Lu, Lai Wang

Local Crystal Stability Evaluation by Using Average Electron-proton Binding Energy
Elmira I Yuryeva

Dynamical Structure in Liquid Te Using Inelastic X-ray Scattering: from Semiconductor-metal Transition to Metallic Regime
Y Kajihara, M Inui, S Hosokawa, K Matsuda, A Q R Baron

Single and Collective Particle Dynamics in Liquid Rb$_{80}$(RbBr)$_{20}$
S Jahn, J Dupuy-Philon, J-F Jal, J-B Suck

Influence of Microaliquot of Liquid Borosilicate Sodium on Stationary Polarization of Nickel
A I Mikhailov, A I Sotnikov, N D Vatolina, D A Nikitenko, A N Vatolin
Collective Dynamics of Liquid Fe
S Hosokawa, M Inui, K Matsuda, D Ishikawa, A Q R Baron

Atomic Dynamics of Liquid Lithium and Lithium-hydrogen Melt Investigated by Inelastic Neutron Scattering
N M Blagoveschenskiy, A S Kolokoi, A G Novikov, M A Pashnev, D V Savostin, V V Savostin, A L Shimkevich

The Influence of Magnetic Field on the Inertial Deposition of a Particle on a Rotating Disk
P O Tsatsin, V P Beskachko

Investigation of the Critical Region in Monotectic Systems by Viscosity Measurements
Yu Plevachuk, V Sklyarchuk, O Alekhin, L Bulavin, O Bilous

The Theory of the Oscillating Cup Viscometer Filled with Two Immiscible Conductive Liquids and Placed in the Magnetic Field
V P Beskachko, A M Somov

Inelastic Neutron Scattering in Superionic Conducting Glass Ag$_2$GeSe$_3$
Y Kawakita, K Shibata, T Kamiyama, S Takeda

The Study of High-frequency Dynamics in Liquid Magnesium by Memory-function Formalism and Computer Simulation Molecular Dynamics
R M Khusnutdinov, R M Yulmetyev, V Yu Shurygin

Software for Oscillating-cup Viscometry: Verification of Data Reasonableness and Parametric Identification of Rheological Model
I Elyukhina, G Vyatkin

Investigation of Structural Changes Near the Critical Point in Liquid Ga-Pb Alloys Using an Acoustic Method
V V Filippov

Mathematical Model of a Stratification of Metal Melts in Capillaries
N P Uglev, I V Gavrilin

Investigations of Diffusion Processes in Liquid Lithium and Lithium-hydrogen Melt by Quasielastic Neutron Scattering
N M Blagoveschenskii, N I Loginov, V A Morozov, A G Novikov, M A Pashnev, V V Savostin, A L Shimkevich

Equation of States and Melting Temperatures of Diamond Cubic and Zincblende Semiconductors: Pressure Dependence
V V Hung, K Masuda-Jindo, P T M Hanh, N T Hai

Thermodynamic and Physico-chemical Study of High-temperature Melts - the Efficient Way to Construct Amorphous and Quasicrystalline Materials
A I Zaitsev

Thermodynamic Study and Modelling of Iron-based Melts for Adequate Prediction of Modern Ladle Metallurgy Processes
A I Zaitsev, I G Rodionova, N G Shaposhnikov, O A Zemlyanko, N A Karamisheva

Isothermal Compressibility in Binary Platinum Based Melts
I G Kosnureva, M A Spiridonov, M M Mitko, V P Chentsov

Nonisothermal Reduction of Oxides in Carbon-saturated Melts
K V Grigorovich

Entropy of Formaton for Ag$_x$In$_{1-x}$ Liquid Binary Alloys
Md Saiful Alam, G M Bhuiyan, A Z Ziauddin Ahmed, R I M A Rashid
Elaborating and Applying a New Method of Gibbs Energy Determination for Multicomponent Alkali-metal Coolants .......................................................... 23
D N Kagan, G A Krechetova, E E Shpilrain

Synthesis of Compounds of Impurities with Chemically Active Additives in Liquid Aluminum and Gallium .......................................................... 241
S P Yatsenko, N A Sabirzyanov

Electrochemical Control Over Disintegration of Solid Solutions of Mg in Al .......... 247
V A Lebedev, M Ch Akhmedov

Application of Double Modulation for Measurement of the Thermal Expansion Coefficient of Liquid Metals .................................................. 251
L A Blagonravov, O O Karchevskiy, P V Ivannikov, A V Soboleva

Experimental Investigation and Joint Description of the Thermodynamic Properties of Ni-Cr-Al Melts .......................................................... 255
K V Grigorovich, A S Krylov

Solubility of Oxygen in Iron-silicon Melts .................................................. 259
S S Shibaev, K V Grigorovich

Investigation of Thermodynamic Properties of Sodium-lead System ................. 264
A D Efanov, N I Loginov, V A Morozov, A V Morozov, A S Mikheyev

Thermodynamic Modelling of Phase Equilibria in Melts of Fe-Ca-Al-Si-Mn-V-Nb-Ni-Mo-P-C-O System .......................................................... 268
N M Tanklevskaya, L A Chernova, G G Mikhailov

Melts Microheterogeneity in Binary Metallic Systems Having Eutectic and Monotectic Transformations .................................................. 272
L A Zhukova, O P Aksyonova, A A Zhukov

Method for the Description of Thermodynamic Characteristics of Liquid Metal Alloys .......................................................... 276
E A Trofimov

Thermodynamic Properties of Liquid Sc-Al Alloys: Model Calculations and Experimental Data .......................................................... 280
A B Shubin, K Yu Shunyaev

Thermodynamic Analysis of the Elements Interaction in Liquid Copper Melts ........ 284
O V Samoylova, E A Trofimov, G G Mikhailov

L A Bolshov, V I Bogdanov, V A Gorbunov

Determination of Oxygen and Sulfur Thermodynamic Activity in Molten Metals .......... 291
L N Shibanova

The Model for Thermodynamic Description of Metalloid Solution Processes in Molten Metals and Oxide - Sulfide Melts .......................................................... 295
L N Shibanova, S A Shibanov

V Ya Dashevskii, K V Grigorovich

Equations of State for Two Alkali Metals at High Temperatures ................................ 305
K V Khishchenko

Molecular Dynamics Simulation Study of the Interdiffusion Properties of Liquid Na-K Alloys .......................................................... 309
J-F Wax, N Jakse
LMTO Method for Electronic Structure Calculation of Expanded Liquid Metals ........................................ 313
A G Vorontsov, A A Mirzoev

Demixion in Simple Liquid Metals Alloys Comparative Investigation of Non Local and Local Pseudopotentials: Example of LiNa .................................................................................................................. 317
A Takhloukh, B Grosdidier, S Hellal, C Regnaut

Ab Initio Molecular-dynamics Study of Structural and Electronic Properties of Liquid SrGeO3 Under Pressure .................................................................................................................................................. 321
Takayuki Sugahara, Fuyuki Shimojo, Masaru Aniya

Statistical Polyhedral Geometry Analysis of the Short Range Order Transformations in Disordered and Nanostructured Metallic Phases Using MD-simulation Results and Diffraction Data ........................................................................................................ 325
V A Polukhin, L K Rigmant, N A Vatolin

Polarization Effects on the Dielectric Properties of Molten AgI ........................................................................ 329
V Bitrián, J Trullàs

Computer Simulation of Atomic Structure of Rhenium-based Amorphous Alloys ........................................ 334
A V Bondarev, I L Bataronov, V V Ozheryeyev, Yu V Barmin, E V Lebedinskaya

The Ionic Structure of Liquid Sodium Obtained by Numerical Simulation from 'first Principles' and Ab Initio 'norm-conserving' Pseudopotentials .................................................................................................................. 338
N Harchaoui, S Hellal, B Grosdidier, J G Gasser

Frenckel Pairs and Their Role in Phase Transformations Crystal-melt .................................................................. 345
M D Starostenkov, O V Pozhidaeva, N N Medvedev

Structure of Liquid Tin Under High Pressure by Ab Initio Molecular-dynamics Simulation ........................................ 349
Shuji Munejiri, Fuyuki Shimojo, Kozo Hoshino, Andrea Di Cicco

The Research of the Structure of Amorphous Metals by Molecular Dynamics Method .......................................................... 353
G M Poletaev, V Yu Krasnov, M D Starostenkov, N N Medvedev

Ab Initio Molecular-dynamics Study of Pressure-induced Structural Change in Liquid Cadmium Telluride .............................................................................................................................................. 357
Y Miyata, F Shimojo, T Sugahara, M Aniya

Analysis of Atomic Structure of Amorphous Metals in the Frame of Percolation Theory .......................................................... 361
A V Bondarev, Yu V Barmin, I L Bataronov, D V Urazov

Structural and Electronic Properties of Liquid Carbon: Ab Initio Molecular-dynamics Simulation .............................................................. 365
A Harada, F Shimojo, K Hoshino

Application of Embedded Atom Model to the Liquid Metals .............................................................................. 369
D K Belashchenko, B R Gelchinski

Structural and Electronic Properties of Liquid InAs Under Pressure .................................................................................... 373
F Shimojo, Y Miyata, T Sugahara, T Hattori, K Tsuji

Mathematical Modeling for Solidification of Multi-component Iron-based Melt with Application of System's State Diagrams .................................................................................................................. 377
V N Selivanov, E V Dyuldina

A Molecular Dynamics Study of Density Profiles at the Free Surface of Liquid Mercury .......................................................... 381
J-M Bomont, J-L Bretonnet
The Microdopant Effects of Surfactant Elements on Structure-phase Transitions During the Rapid Quenched Crystallization of Fe-C-based Melts ......................................................... 386
V A Polukhin, R M Belyakova, L K Rigmant

Computer Simulation of Liquid Cesium Using Embedded Atom Model ........................................ 391
D K Belashchenko, N Yu Nikitin

On Composition Converting Liquid Metal Alloys ........................................................................ 395
A S Kolokol, A L Shimkevich, I Yu Shimkevich

Computer Simulation of Magnetic Properties of Re-Tb Amorphous Alloys ................................. 400
A V Bondarev, I L Bataronov, V V Ozherelyev, Yu V Barmin

Simulation of Liquid Rb by the Methods of Classical and First-principle Molecular Dynamics and Statistical Geometrical Analysis of the Atomic Structure Models
Using the Voronoi-Delaunay Method ......................................................................................... 404
A G Vorontsov, A A Mirzoev, D Kuts, B R Gelchinski, A A Mirzoev Jr

Anelastic Relaxation in Non-crystalline Metals: Geometrical Aspects ........................................ 408
Yu V Barmin, I L Bataronov, A V Bondarev, V V Ozherelyev

Simulation of Melting and Vaporization of Metals at Hypervelocity Impact ............................... 411
M E Povarnitsyn, K V Khishchenko, P R Levashov

Molecular Dynamic Simulation of the Melting Process in Ni3Al Alloy ........................................ 415
Yu Mitrokhin, Ju Kovneristy, V Shudegov

The Rise of Liquid Metals Nanostructure at Melting of Metallic Crystals ................................... 419
A S Basin

Phase Formation in Contact of Dissimilar Metals ........................................................................ 425
V S Savvin, Yu A Kazachkova, A A Povzner

Driving Forces of Redistribution of Elements During Quasicrystalline Phase Formation Under Heating of Mechanically Alloyed Al$_{55}$Cu$_{23}$Fe$_{12}$ Powder ................................................................. 436
V V Tcherdyntsev, S D Kaloshkin, E V Shelekhov, G Principi, A O Rodin

The Role of the Melt Properties in the Formation of Supersaturated Nanostructured Solid Solutions of Transition Metals in Aluminum .................................................... 447
I G Brodova

Analysis of Acoustic Emission Effect Accompanying Metal Crystallization .............................. 451
V B Vorontsov, V V Katalnikov

Growth Kinetics and Structure of Nanocrystals in Al$_{87}$Ni$_{5}$Y$_{5}$ Amorphous Alloy .................. 457
S Mudry, Yu Kulyk

Nucleation and Growth of Crystalline Phases in FeBZrMoTiTa Glass Forming Melt During Superheating ................................................................................................................. 461
T A M Aboki

Distinctive Features of a Crystal, Crystal-like Properties of a Liquid and Atomic Quantum Effects .............................................................................................................................. 466
V V Pavlov

The Modeling of Crystallization Kinetic of Fe-C Alloy ................................................................. 470
E E Baryshev, B A Baum, L G Savina, G V Tyagunov

Predicting the Gas-liquid Transition of Mercury from Interatomic Many-body Interaction ............ 473
Hikaru Kitamura
Crystallization of Glassy Fe$_{40}$Ni$_{40}$P$_{14}$B$_6$ Alloy on Heating and the Melt Amorphization During Melt-spinning Processing ......................................................... 477
  V I Tkatch, S G Rassolov, V V Popov, S A Kostyrya

Kinetics and Mechanisms of Two-stage Crystallization of Fe$_{85}$B$_{15}$ Amorphous Alloy ........................................................................................................ 482
  V I Tkatch, T N Moiseeva, S G Rassolov, V V Popov, V V Maksimov

The Effect of Melt Temperature on the Crystallization Process of the Rapidly Quenched Fe$_{74}$B$_{16}$Si$_9$Ni$_1$ Alloy ........................................ 487
  V I Lad'yanyov, V V Muhgalin, M A Eremina

On Features in Viscosity Polytherms of Fe-B Hypereutectic Melts and Their Development in Crystallization Kinetics of Rapidly Quenched Ribbons .................................................................................. 493
  V I Lad'yanyov, A A Suslov, A L Bel'tyukov, A I Shishmarin, M A Eremina, V A Volkov

Conductivity of Liquid Al, Na, Pb and Mn Calculated from First Principles ........................................ 498
  Fatima Knider, Joseph Hugel, A V Postnikov

Electrical Resistivity of High Melting Metals Up Into the Liquid Phase (V, Nb, Ta, Mo, W) .................................................................................. 502
  T Hüpf, C Cagran, G Lohöfer, G Pottlacher

Semiconductor-metal Transition in Semiconductor Melts with 3d Metal Admixtures .................................................................................................. 506
  V Sklyarchuk, Yu Plevachuk, S Mudry, I Shtablavyi, B Sokolovskii

Experimental Study of Surface Domain Structure Effects on Off-diagonal Magnetoimpedance in Glass-coated Co-based Microwires .................................................................................. 510
  V V Samsonova, A S Antonov, N A Buznikov, A A Rakhmanov, A P Zhukov

Temperature Influence on Field Dependences of Impedance of Amorphous CoFeNbSib Wires ........................................................................ 514
  A V Semirov, A A Gavriliuk, V O Kudryavtsev, A A Moiseev, D A Bukreev

Electronic Structure of Al$_6$Mg$_4$Cu Quasicrystals ........................................ 517
  Yu Mitrokhin, Ju Kovneristy, V Shudegov

The Influence of Dielectric Permittivity of the Medium on Magneto-optical Properties of the Magnetite Ultrafine Structures ........................................ 521
  L G Kalandadze

Electrical Conductivity of Liquid Sn-Ti-Zr Alloys ........................................ 525
  V Sklyarchuk, Yu Plevachuk, S Mudry, A Yakymovych, U E Klotz, C Liu

On the Thermopower of Liquid Antimony .................................................................................. 529
  S Mhiaoui, J G Gasser, A Ben Abdellah

The Influence of Cr, Mo and Mn on Structural Changes and Magnetic Properties of Co$_{75.3}$Fe$_{4.3}$Si$_6$B$_{14}$ Amorphous Alloy .................................................................................. 538
  L Bednarska, B Kotur, S Mudry, M Koval, G Haneczok, M Karolus

Structural State and Magnetic Properties of Nd$_2$Fe$_{14}$B-type Rapidly Quenched Alloys .................................................................................. 542

Optical Properties of Al-8 At.% Ce Alloy in Liquid, Amorphous and Crystal States .................................................................................. 551
  L A Akashev, V I Kononenko, V E Sidorov, P Svec, D Janickovic

Effect of Nanocrystallization Conditions on the Structure and Magnetic Properties of Amorphous Alloys .................................................................................. 555
  N Noskova, V Shulika, A Potapov
The Influence of Small Impurity Additions and Direct Electric Current on the Kinetics of Contact Melting in Metals
A A Ahkubekov, S N Ahkubekova, O L Enaldieva, T A Orkvasov, V A Sozaev

Dissolution Rates and Solubility of Some Metals in Liquid Gallium and Aluminum
S P Yatsenko, N A Sabirzyanov, A S Yatsenko

The Electrical Conductivity, Density and Surface Tension of Molten Salts Containing Zirconium Fluoride
S F Katyshev, L M Teslyuk, N V Eltsova

Effect of Strain State on the Linear Expansion Coefficient of Zr-Nb-Cu-Fe Amorphous Alloys
N L Fedotova, V A Ermishkin, I A Korms, N A Minina

Properties of Ni-based Amorphous Ribbons Consolidated by High Pressure Torsion
T Czeppe, G F Korznikova, P Ochin, A V Korznikov, N Q Chinh, A Sypień

Theoretical and Experimental Study of the Thermal Expansion Coefficient of the Ni₃Al Alloy
Yu Mitrokhin, V P Belash, N N Stepanova, V Shudegov

Magnetic Properties of Dilute Al-REM Alloys in Liquid and Amorphous States
V Sidorov, V Bykov, S Uporov, V Shevchenko, V Kononenko, K Shunyaev, N Ilinykh, P Svec, D Janickovic

Magnetic Susceptibility of Glass-forming Al-Co-Ce Alloys at High Temperatures
S Uporov, N Fomina, V Sidorov, K Shunyaev

Rheological Properties of Amorphous Alloys and Their Description on the Base of Linear Viscoelastic Theory
N O Gonchukova, S L Ratushniak

Damping Capacity of Nanoquasicrystalline Al-Cu-Fe Materials
A I Ustinov, S S Polishchuk, V S Skorodzievskii, V V Bliznuk

Stresses in Chalcogenide Glasses on Elastic and Viscoelastic Substrates
S L Ratushniak

Corrosion Creep of Metals
Ya B Unigovski, E M Gutman, Z Koren, T Poryadkov, H Rosenson

The Effect of Directional Flow of Metallic Melt on the Mechanical Properties of Cast Metal
R A Apakashev, V V Pavlov, N V Shirokova

New Soft Magnetic Amorphous Cobalt Based Alloys with High Hysteresis Loop Linearity
V K Nosenko, V V Maslov, A P Kochkubey, V V Kirilchuk

The Influence of Melt Atomic Structure on Structure and Properties of Amorphous Fe-based Alloys
V V Maslov, V I Lad'yanov, A G Ilinsky, V K Nosenko

Lithium in Nuclear and Thermonuclear Power Engineering
N I Loginov, A D Efanov, M N Arnoldov, V A Morozov

The Calculational Modeling of Impurity Mass Transfer in NPP Circuits with Liquid Metal Coolant
V Alexeev, P Kozlov, V Kumaev, E Orlova, Yu Klimanova, I Torbenkova
