# TABLE OF CONTENTS

Moiré Methods for the Protection of Documents and Products: a Short Survey

I Amidror, S Chosson, R D Hersch ................................. 1

Laser Deep Marking of Metals and Polymers: Potential Interest for Information Coding

B Dusser, Z Sagan, D Bruneel, M Jourlin, E Audouard .......................... 11

A Multiresolution Independent Component Analysis for Textile Images

D Coltuc, T Fournel, J M Becker, M Jourlin .................................. 17

Some Security Strategies for Smart Cards

F Ros, R Harba ............................................................................ 28

Towards Distortion-free Robust Image Authentication

D Coltuc .................................................................................. 35

About Machine-readable Travel Documents

S Vaudenay, M Vuagnoux ............................................................. 42

Self-encryption for Paper Document Authentication

T Fournel, J M Becker, Y Boutant .................................................. 51

Encryption and Validation of Multiple Signals for Optical Identification Systems

E Pérez-Cabré, M S Millán, B Javidi ................................................. 58

Optical Identification System of Three-dimensional Random Phase Object by Use of Speckle Patterns in Propagation Distances

O Matoba, T Sawasaki, K Nakajima, K Nitta ........................................ 65
