SESSION 1: SALT TECTONICS OF DIVERGENT MARGINS

2D Computational Salt Tectonics: Passive Margins ................................................................. 414
P. Ruffo, S. Campobasso, D. Fragola, P. Massimi, G. Scrofani, G Spadini

Analog Modeling of Salt-Related Structures in the South Atlantic ........................................ 435
M.C. Guerra, P. Szatmari, M. Pequena

Tectonics of the South Atlantic Brazilian Salt Basins ............................................................... 468
I. Davison

Salt Distribution and Morphology in the Offshore Algarve Basin ........................................... 481
H. Matias, W. Mohriak, P. Menezes, F. Sandnes, V. Barbosa, L. Matias, F. Santos

Salt Tectonics Comparisons Near Three Continent-Ocean Boundary Escarpments ............... 510
R. Fainstein, A/ Krueger

Evolution of Allochthonous Salt Systems During Development of a Divergent Margin: The Adelaide Geosyncline of South Australia ................................................................. 541
I. Dyson

Turtle Structures Created by Extension in a Low-Salt or Non-Salt Setting ............................... 574
J.C. Turner

SESSION 3: SEDIMENTATION OON DIVERGENT MARGINS

Relay Ramps and Lateral Ramps—Active Sediment Fairways During the Passive Margin Stage of Development of the Gulf of Mexico Basin ............................................................... 587
S.L. Palmes

Does the Frio Really Prograde in South Texas? ....................................................................... 588
I. Cibaj, P. Zaugg

Volume 2

Cenozoic Evolution of the Northern Gulf of Mexico Continental Margin ............................. 613
W. Galloway

The Tectonics of Tranquitas: A Field Study of Rift through Passive Margin Development and Laramide Deformation in Triassic and Jurassic Strata of the Sierra Madre Oriental, NE Mexico ............................................................... 634
M. Davis, R.K. Goldhammer

Formation of Submarine Unconformities in Halotectonic Mini-basins During Passive Margin Development of the Adelaide Geosyncline, South Australia ............................... 679
I. Dyson

SESSION 4: PETROLEUM SYSTEMS OF DIVERGENT MARGINS

Petroleum Prospectivity of the Camamu-Almada Margin, Brazil: Insights from an Integrated Basin Analysis and Modeling Study ................................................................. 722

Divergent Continental Margin Basins - The Habitat of Australian Petroleum Systems ............ 742
M. Bradshaw

Petroleum Systems Related to the Equatorial Transform Margin: Brazilian and West African Conjugate Basins ............................................................... 750
R. Darros de Matos
### Petroleum System and Miocene Sequence Stratigraphy: Central Sumatra Basin, Indonesia

W. Dawson, W. Almon, J. Sangree

---

### Basin Analysis in Brazilian and West African Conjugates: Combining Disciplines to Deconstruct Petroleum Systems

W. Dickson, C. Schiefelbein, J. Zumberge, M. Odegard

---

### Deformation Induced Pathways for Hydrocarbon Migration Through the Aptian Salt Level in the Angolan Margin

X. Fort, J.P. Brun

---

### New Insights from CongoSpan Pre-stack Depth Migrated Imaging in Angola-Congo-Gabon: Petroleum Systems and Plays

S. Henry, A. Danforth, S. Venkatraman

---

### Exploration Using a Linked System Approach to the Rift and Drift Sections in Brazil

F.R. Love, D.J. Stewart

---

### Exploration in Rifted Atlantic Margin Basins: New Challenges and New Ideas—Or Just Business as Usual?

B. Rasmussen, T. Dreyer, O. Martinsen

---

### Systems of the Otway Basin, Southern Australia: Oil and Gas in a Complex Multi-Phase Rift Basin

D. Ryan, C. Boreham, A. Krassay, I. Deighton, D. Cathro

---

### Laminated Lime Mudstone of the Early Oxfordian Smackover Formation of the Northern Gulf of Mexico Rim: Significance to Environments of Deposition of Carbonate Source Rocks in Rifted Basins

R. Sassen, P. Post, W. Jung, D. DeFreitas, E. McDade

---

### The Divergent Continental Margins of the Jurassic Proto-Pannonian Basin: Implications for the Petroleum Systems of the Vienna Basin and the Moesian Platform

G. Tari

---

### Analysis of Pore Pressure Compartments in Extensional Basins

K. Williams, A. Madatov

---

### SESSION 5: CRUSTAL ARCHITECTURE OF THE GULF OF MEXICO

---

### Oceanic Crust in the Gulf of Mexico - A Combination of Rift Propagation and Slow Spreading

S. Calvert, M. Cowgill

---

### The Mesozoic Opening of the Gulf of Mexico: Part 1, Evidence for Oceanic Accretion During and After Salt Deposition

P. Imbert

---

### The Mesozoic Opening of the Gulf of Mexico: Part 2, Integrating Seismic and Magnetic Data into a General Opening Model

P. Imbert, Y. Philippe

---

### An Interpretation of the Crustal Framework and Continent-Oceanic Boundary in U.S. OCS of the Gulf of Mexico, Based on Gravity and Refraction Data Analysis

E. Johnson, M. Kacewicz, J. Blickwede, H. Huston

---

### Passive Margin Development in the Atlantic and Gulf of Mexico with a Special Emphasis on Proto-Oceanic Crust

M. Odegard
Constraints on the Interpretation of the Origin and Early Development of the Gulf of Mexico Basin.............................................................................................................................. 1143
  P. Post

Regional Geologic and Geophysical Observations Basinward of the Sigsbee Escarpment and Mississippi Fan Fold Belt, Central Deepwater Gulf of Mexico: Hydrocarbon Prospectivity and Play Types........................................................................................................................ 1189
  M. Roberts, C. Hollister, H. Yarger, R. Welch

POSTERS

Progradation and Retrogradation of the Libyan Shelf and Slope, North African Continental Margin........................................................................................................................ 1199

The Importance of Glacio-Hydro-Isostasy Within the Late Quaternary/Holocene Sea-Level History of the Gulf of Mexico: Lessons for Stratigraphic Correlation............. 1201
  A. Simms
