2008 International Zurich Seminar on Communications

March 12-14, 2008
Zurich, Switzerland

IEEE

PROCEEDINGS
Table of Contents

Keynote Talks

Wednesday 9:00 – 10:00
Ezio Biglieri, Univ. Pompeu Fabra, Barcelona
Applications of Random-Set Theory to Wireless Communications

Thursday 9:00 – 10:00
Michael Steele, Wharton Univ. of Pennsylvania
How a False Probability Model Changed the World: Birth, Death, and Reincarnation of Black-Scholes

Friday 9:00 – 10:00
John Tsitsiklis, MIT
Decentralized Detection over a Tree of Sensors

Session 1     Wed 10:30 – 12:10
Invited session organizers: Lizhong Zheng and Behnaam Aazhang

*Energy-Delay Trade-offs in Wireless Networks ........................................... 10
  Randall Berry

*Opportunistic and Cooperative Wireless Networks ................................. 11
  Behnaam Aazhang, Ashutosh Sabharwal

*Communicating Bursty and Delay-sensitive Information over Outage Limited Channels. 12
  Somsak Kittipiyakul, Petros Elia, Tara Javidi

*Euclidean Information Theory .......................................................... 14
  Shashi Borade, Lizhong Zheng

*Repetition Protocols and Channel State Information in Block-fading Channels ........ 18
  Daniela Tuninetti

Session 2     Wed 14:00 – 15:40
Invited session organizer: Matthias Grossglauser

*Wireless Social Community Networks: A Game-Theoretic Analysis ..................... 22
  Mohammad Hossein Manshaei, Julien Freudiger, Mark Félegyházi, Peter Marbach, Jean-Pierre Hubaux

*On Mobile User Behaviour Patterns ..................................................... 26
  Milan Vojnović

*Phase Transition in Opportunistic Mobile Networks .................................. 30
  Augustin Chaaintreau, Laurent Massoulié

*Invited papers are marked by an asterisk.
*Fairness vs. Spatial Reuse in Wireless 802.11 Networks .................................................. 34
Mathilde Durry, Olivier Dousse, Patrick Thiran

*Routing in Mobile Wireless Networks ................................................................. 38
Dominique Tschopp, Suhas Diggavi, Matthias Grossglauser

Session 3  Wed 16:10 – 17:50

Peak-to-Average Power Ratio Reduction in OFDM using ReedSolomon Codes ............ 40
Robert F. H. Fischer, Christian Siegl

Client-Server Architecture Design based on Wiretap Codes ........................................ 44
Matthieu Bloch, Rajesh Narasimha, Steven W. McLaughlin

Electronic Equalization of Fiber Optic Links ......................................................... 48
Andrew C. Singer, Naresh R. Shanbhag, Hyeon-Min Bae

Solving the Interaction Problem of Timing Synchronization and Equalization ............ 52
Dirk Daecke, Heinrich Schenk

Signal Reconstruction in Multidimensional Sensor Fields ...................................... 56
Alessandro Nordio, Carla-Fabiana Chiasserini, Emanuele Viterbo

Session 4  Thu 10:30 – 12:10

Axiomatic Characterization of Resource Allocation and Social Welfare Orderings for Centralized Wireless Communication ......................................................... 60
Holger Boche, Siddharth Naik

Finite-Length Scaling of Repeat-Accumulate Codes on the BEC ................................ 64
Iryna Andriyanova

Nonbinary Decoding of Structured LDPC Codes ....................................................... 68
Daniele Capirone, Giacomo Como, Fabio Fagnani, Federica Garin

Information Indivisibility Results .............................................................................. 72
Josy Sayir, Ingmar Land, Alex Grant

Generalized Modulation and Iterative Demodulation .............................................. 76
Christian Schlegel, Dmitri Truhachev

Session 5  Thu 14:00 – 15:40

Invited session organizer: Greg Wornell

*Lossy Source Coding via Markov Chain Monte Carlo .............................................. 80
Shirin Jalali, Tsachy Weissman

*Iterative Linear-Programming-Based Route Optimization for Cooperative Networks .... 84
Stark C. Draper, Lingjie Liu, Andreas F. Molisch, Jonathan S. Yedidia

*An Efficient ARQ Scheme with SNR Feedback .................................................... 88
Uri Erez, Mitchell Trott, Gregory Wornell
Session 6  Thu 16:10 – 17:50
Invited session organizer: Michael Gastpar

Guillermo Barrenechea, Francois Ingelrest, Gunnar Schaefer, Martin Vetterli

*Achievable Distortion/Rate Tradeoff in a Decentralized Gaussian Parameter Estimation Problem 102
Anna Scaglione, Mehmet E. Yildiz, Tuncer C. Aysal

*Sentry Selection in Sensor Networks: A Sufficient Condition for k Single Covers 106
Paul Balister, Béla Bollobás, Martin Haenggi, Animesh Sarkar, Mark Walters

*On the Multiple-Access Channel with Common Rate-Limited Feedback 108
Dor Shaerov, Yossif Steinberg

*Structured Random Codes and Sensor Network Coding Theorems 112
Bobak Nazer, Michael Gastpar

Session 7  Fri 10:30 – 12:10

On Fast-Decodable Space-Time Block Codes 116
Ezio Biglieri, Yi Hong, Emanuele Viterbo

Convex Precoding for Vector Channels in High Dimensions 120
Rodrigo de Miguel, Ralf R. Müller

UEP Exploitation in MIMO-OFDM with Beamforming and Channel-Correlation Feedback 124
Khaled Hassan, Werner Henkel

On the Impact of TDM in Estimation of MIMO Channel Capacity from Phase-Noise Impaired Measurements 128
Troels Pedersen, Attagphongse Taparugssanangorn, Juha Ylitalo, Bernard H. Fleury

Distributed Space-Time Block Codes for the Non-Cooperative Multiple Access Channel 132
Maya Badr, Jean-Claude Belfiore

Session 8  Fri 14:00 – 15:40

Rate-Delay Tradeoffs for Communicating a Bursty Source over an Erasure Channel with Feedback 136
Brian P. Dunn, Nicholas J. Laneman

Diversity-Multiplexing Tradeoff for the Slow Fading Interference Channel 140
Ekine Akuiyibo, Lévéque Olivier
