General Conference Director PCIM Europe
Prof. Alfred Rufer, EPFL, Switzerland

Directors Power Electronics
Prof. Leo Lorenz, Infineon Technologies China, China
Dr. Uwe Scheuermann, Semikron Elektronik, Germany

Directors Intelligent Motion
Prof. Helmut Knöll, University of Applied Sciences Würzburg-Schweinfurt, Germany
Prof. Jose Mario Pacas, University Siegen, Germany

Directors Power Quality/Energy Management
Jean-Paul Beaudet, APC-MGE, France
Prof. Johann Walter Kolar, ETH Zürich, Switzerland

# TABLE OF CONTENTS

## KEYNOTE PAPERS

**Higher Junction Temperature in Power Modules - A Demand from Hybrid Cars, a Potential for the Next Step Increase of Power Density for Various Variable Speed Drives**
Reinhold Bayerer

**Higher Frequencies Power Transformers Designs**
Jacques Laeuffe

**Technologies for Practical Motor Drive System with Matrix Converter**
Ikuya Sato, Akihiro Odaka, Yasuhiro Tamai, Hironori Mine

**Mega-Speed Drive Systems: Pushing Beyond 1 Million RPM**
Christof Zwyssig, Johann Walter Kolar, Simon Round

## HIGH VOLTAGE DEVICES

**6.5kV IGBT and FWD with Trench and VLD Technology for Reduced Losses and High Dynamic Ruggedness**
Thomas Duetemeyer, Josef-Georg Bauer, Elmar Falck, Carsten Schaeffer, G. Schmidt

**6500V SPT+ HiPak Modules Rated at 750A**
Arnost Kopta, Munaf Rahimo, Ulrich Schlapbach, A. Baschnagel, Jörg Berner

**Robustness Improvement of High-Voltage IGBT by Gate Control**
Tao Hong, F. Pfirsch, Markus Thoben, Reinhold Bayerer

**Test Procedure to Ensure Quality of 4.5kV Very High Current Press-Pack IGBTs**
Gangru Li, Frank Wakeman, J. Whitby, Qasim Al‘Akayshee

**CIBH Diode with Superior Soft Switching Behavior in 3.3kV Modules for Fast Switching Applications**
Jürgen Biermann, Manfred Pfaffenhleiner, Hans Peter Fesl, Thomas Gutt, Holger Schulze

## AUTOMOTIVE SYSTEMS

**Choosing a 3-phase PWM Method for Automotive Applications**
Dusan Graovac, Benno Köppl, Michael Scheffer, Marco Pörschel, Andreas Kiep

**Fuel Cell and Battery Hybridization for Automotive Application**
Daniel Chatroux

**Power Electronic Converter for Hybrid-Drive Systems**
Folker Renken

**Analysis and Control of Multiphase DC/DC-Converters for Dual-Voltage Automotive Power-Nets**
Tomas Reiter, Dieter Polenov, Hartmut Pröbstle, Hans-Georg Herzog,
HIGH FREQUENCY CONVERTER

Comparative Study of Different Three-Stage DC-DC Converter Solutions in the Power Range up to 3kW ................................................................. 81
Ulf Schwalbe, Marko Scherf, Tobias Reimann, Gerald Deboy

Two-phase Boost Converter for 14V/42V Automotive Applications Using Coupled Tapped Inductors ................................................................. 87
Michael Stadler, Johannes Pför

A Novel Fixed-Frequency Dimming Scheme with Ultra-Wide, High-Frequency Dimming Range................................................................. 93
Sameh Sarhan

Modular Voltage Inverter for Induction Heating .......................................................................................................................... 97
Maciej A. Dzięniakowski, Jan Fabianowski, Robert Ibach

Lifetime Prediction and Design for Reliability of a Smart Power IC Specified for Automotive Applications ................................................................. 102
Romeo Letor, Sebastiano Russo, Roberto Crisafulli

POWER QUALITY PROBLEMS AND SOLUTIONS

Consumer Power Electronic Development and Influence on Neutral Overloading in Office Buildings ................................................................. 108
Guenther Brauner

A New, Ultra-Low-Cost Power Quality and Energy Measurement Technology ..................................................................................................... 113
Andreas Eberhard, Alexander McEachern

Advanced Topologies and Controls for High Efficiency UPS ........................................................................................................ 117
Fulvio Boattini

Design and Application of a Hybrid Active Power Filter with Supply Side Harmonics Isolation ........................................................................................................ 118
Onur Ucak, Alper Tercıyanlı, İlker Kocabas

Additional System Services with Fuel Cell Based Decentralized Energy Generators .......... 124
Igor Merfert, Andreas Lindemann, Otto-von-Guericke

POSTER/DIALOGUE SESSION

The First Commercial 200-V TMBS® (Trench MOS Barrier Schottky) Rectifier vs. Traditional Rectifiers in Telecom Application ................................................................. 130
Max Chen, Henry Kuo, L.C. Kao

New 5A-35A/1200V Transfer Mold IPM with Heat Dissipating Insulation Sheet ........................................................................................................ 135
Hisashi Kawafuji, Toshiya Nakano, Toru Iwagami, Kazuhiro Kuriaki, Marco Honsberg

Innovative Solutions for Reduction in Heat Sink Weight ........................................................................................................ 140
Ugo Barucca

Thermal Modelling of Power Electronic Systems Using Model Order Reduction of large Scale Finite Elemente Models ........................................................................ 145
Uwe Franke, Thomas Ellinger, Jürgen Petzold,

Dual Stage Feedback Technique for Single-Pole Feedback Compensation ........................................................................................................ 150
Joseph Aguilar

A Single-Phase Grid Connected Inverter with a Mixed Topology Combining MOSFETs and IGBTs ........................................................................................................ 156
S. Jaehnert, Jan Mehlich, Heiko Mehlich, Stefan König
# A Novel Control Method for Line Frequency Power Factor Correction
Cesare Bocchiola

# Conventional and Sparse Matrix Converters. Comparison of Simulation – Analytic Calculation - Measurements
Bernard Walther, Jean-Michel Kissling, Mauro Carpita

# Three Phase PFC Front-End for Variable Frequency Networks
Holger Groke, Timo Christ, Bernd Orlik, Holger Raffel, Christian Thal, Andre Tenhagen

# Equivalent EMI Noise Source Modeling in Power Converters
Maxime Moreau, Arnaud Videt, Nadir Idir, Jean Jacques Franchaud, P. Le Moigne

# MOSFETs, Thyristors and Diode Matrixes for High Voltage and Pulse Power
Daniel Chatroux

# Investigation of Load Profiles for Power Electronic Converters in Cars with Fuel Cell-Based Auxiliary Power Units
Christian Teichert, Andreas Lindemann

# Performance and Estimation of Crack-Repair by Piezoelectric Actuators
Thomas Jin-Chee Liu

# Finite Element Simulations of the Cracked Piezoelectric Plate
Huang-Chieh Wu, Thomas Jin-Chee Liu

# Design and Analysis of a Permanent Magnet Synchronous Motor for Fault Tolerant Electrical Power Steering Systems
Claudiu Oprea, Claudia Martis

# A Modular Approach for High Speed Production Testing of Power Semiconductors
Gérard Cuénoud

# A Cage Induction Machine in Sensorless Wind Turbine Drive and Effects of Machine Parameters Variation
Boris Dumnic, Dejan Reljic, Vladimir Katic, Veran Vasic

# Simulation of a Battery Powered Air Conditioning System with Modelica
Johannes Vinzenz Gragger, Dragan Simic, Franz Pirker, Felix Himmelstoss

# Power Loss Consideration of SMPS Transformers for Hybrid Vehicles
Christian Faust, Hans-Georg Herzog, Martin Kutschker

# Current Peaking and Energy-Storage in Gapped Ferrite Core Magnetic Circuits with DC Bias used in SMPS
Probal Mukherjee

# Quality Engineering Aspects of Series Resonant Induction Heating Power Supply with Wide Coil Range
Arun Kumar Paul, Sandanand Singh, Sandeep Chinoy

# Reliability of an Induction Heating Installation in Relation to Production Schedule
Mintcho Simeonov, Prodan Prodanov, Dobroslav Dankov

# Predicting the EMC Behavior of a Boundary Conduction Mode PFC Boost Converter
Daniel Kübrich, Klaus Mühlbauer, Thomas Dürrbaum

# Simple Extension to the State-Plane Analysis Approach for the Series Resonant Converter to Include Conduction Losses
Alexander Bucher, Thomas Dürrbaum, Daniel Kübrich

## MODULE RELIABILITY

# Investigations on Ageing of IGBT Transistors under Repetitive Short Circuit Operations
Stéphane Lefebvre, Mohand Arab, Zoubir Khatir, Serge Bontemps
Reliability of PressFIT Connections .............................................................. 268
    Thilo Stolze, Markus Thoben, M. Koch, Robert Severin

Ultrasonic Metal Welding as Contact Technology for State-of-the-Art Power Modules ........ 274
    Roman Tschirbs, Georg Borghoff, Thomas Nübel, Wilhelm Rusche, Giudo Strotmann

Power Cycling of IGBT Modules with Superimposed Thermal Cycles .......................... 280
    Marco Feller

FAST SWITCHING DEVICES

SiC Power Devices Market and Forecasts ...................................................... 284
    Philippe Roussel

Investigation of Surge Current Capability of SiC MPS Diodes .............................. 286
    Matthias Neumeister, Birk Heinze, Josef Lutz

1200V SiC SBD Chip Evaluation at Ultra High Current Density ............................ 292
    Katsumi Satoh, Gourab Majumdar

New 900 V Voltage Class for Superjunction Devices - A New Horizon for SMPS and Renewable Energy Applications .................................................. 298
    Markus Schmitt, Holger Kapels, Uwe Kirchner, Giuliano Rocco Aloise, Fanny Björk

ENERGY SYSTEMS

2 New Topologies for Transformerless Grid Connected PV-Systems with Minimum Switch Number .................................................................................. 302
    Peter Zacharias, Lucas Maciel Menezes, Jens Fribe

Energy Harvesting for Low Power Microprocessors ............................................. 308
    Scot Lester

Replacement and Emulation of a Lead-Acid Battery with Supercapacitors for a UPS Application ......................................................................................... 314
    Philippe Barrade, Yannick Louvrier, Alfred Rufer

Survey of Power Management Strategies for Generator-Set with Energy Storage ........ 320
    Pavol Bauer, Freek J. F. Baalbergen

MOTORS AND ACTUATORS

Small Permanent Magnet Synchronous Motor Technology - An Overview .................. 326
    Dorin Iles-Klumpner

Features of Two Multi-Motor Drive Schemes Supplied from Five-Phase/Five-Leg Voltage Source Inverters ............................................................................. 338
    Drazen Dujic, Martin Jones, Emil Levi

Fault Tolerant Switched Reluctance Machine Study .............................................. 344
    Mircea Ruba, Markus Anders

MECHATRONIC SYSTEMS

System Integration for Electromechanic Actuators in Automobiles .......................... 350
    Johann Maier

Comparison of Auto Tuning Algorithms for the Velocity Loop of Servo Drives .......... 354
    Heiko Schmirgel, Jens Onno Krah, Holger Goergen
Contactless Power Transmission with Secondary A.C./A.C. Converter .............................................. 360
Rudolf Mecke, Matthias Dockhorn, Daniel Kürschner

Remote Configuration of Embedded Controllers for Industrial Control Applications Using Automatic Code Generation .......................................................... 364
Yuri de Carvalho Gomes, Antonio Lima

ADVANCED POWER MANAGEMENT

A New Family of Enhanced Ripple Regulators for Power-Management Applications ........ 370
Richard Redl, Tod Schiff

Generalized Predictive Control Applied to DC/DC Converters .................................................. 377
Simon Effler, Mark Halton, Anthony Kelly, Karl Rinne

Power Factor Correction Controllers Based on Current Rebuilding Technique Implemented on FPGA ................................................................. 383
Francisco Javier Azcondo, Ángel de Castro

Accurate Voltage and Current Regulation with Only Primary-Side Sensing in Flyback Power Supplies ................................................................. 389
David Garner, David R. Coulson, Johan Piper, John Miller, B. Thomas,

POSTER/DIALOGUE SESSION

Power MOSFET in Linear Zone Working as Amplifier ................................................................. 395
Giuseppe Consentino, Giovanni Ardita, Roberto Conti

Cost Optimized Measurement of Voltages with High Frequency Response at PWM-Inverters, DC-Links, Pulsed-Voltage Transmission Lines, and Motors .......................... 401
Helmut Weiss

A New Compact Power Modules Range for Efficient Solar Inverters ................................ 407
Serge Bontemps, Pierre-Laurent Doumergue

A Single-Chip Quad High-Side Switch with Minimized Power Dissipation .............................. 413
Giuseppe Di Stefano, Michelangelo Marchese

Numerical Investigation on Thermal Crosstalk of Silicon Dies in High Voltage IGBT Modules ...................................................................................... 417
Thomas Hunger, Oliver Schilling

Key Parameters for New High Temperature Triacs ................................................................... 423
Laurent Gonthier, Antoine Passal, Sylvain Mercier

New Space-Vector PWM Technique for Dual Three-Phase AC Machine ................................. 429
Dragan Milicevic, Evgenije Adzic, Veran Vasic

Different Control Methods of Bidirectional DC-DC Converters for Fuel Cell Power Systems .................................................................................... 436
Yuriy Bessarab, Igor Merfert, Wolfgang Fischer, Andreas Lindemann, Otto-von-Guericke

Automated Test Set-Up for Efficiency Measurements of Switch Mode Power Supplies ........ 441
Alexander Bucher, Thomas Dürbaum, Daniel Kübrich

Comparison of Different PWM Converter Small Signal Models ............................................... 447
Alexander Bucher, Markus Schmid, Lukas Bendowski, Thomas Dürbaum

Magnetic and Thermal Modeling in SPICE, with Emphasis on Current Transducers .............. 453
Dominik Schlaefli, Wolfram Schleppan

Analysis of an Actively Clamped Forward Converter Including the Leakage Inductance ...... 459
Daniel Kübrich, Thomas Dürbaum
Resonant Power Supplies with Energy Dosing and PLL Control System
Nikolay D. Madzharov, Miroslav S. Gardevski, Darin N. Madzharov

Generation of Arbitrary Impedances By Use of Switched Power Converters
Joerg Krupar, Christoph Valerius

Highly Dynamic Modulation System for Multi-Cell Converters
Timo Christ, Bernd Ortik

A New Bipolar Power Supply for Elettra Booster Pre-Injection Correctors
Denis Molaro, Marco Cautero

IGBT Driver Circuit in Inductive Adder Technology for Pulsed Power Applications
Olaf Dressler, Carsten Rediess, Volker Pickert

Modular Tubular Switched Reluctance Motor
Larisa Strete, Ioan Adrian Viorel

Efficiency and Lifetime Optimising Energy Management for Mobile and Portable Fuel Cell Battery Hybrid Systems
Wolf-Jürgen Trompke, Thilo Bocklisch, Steffen Bocklisch

Design of an Electromagnetic Gripper
Stephane Duchesne, Bertrand Cassoret, Emmanuel Matéo, Mohammed Nabili

Low Power Wave Energy Converters for Sheltered Seas
Lorand Szabo, Clement Festila, Éva Dulf, Claudiu Oprea

Magnetic Material Influence on the Performances of a Claw-Pole Synchronous Generator for Wind Systems
Florin-Nicolae Jurca, Claudia Martis, Karoly Biro

The Investigation of the Silicon Resistor Operation in Power Electric Fields and Pulsed Modes
Evgeny Geyfman, V.V. Chibirkin, P.U. Batyaev

Evaluation of Fault Tolerant Multilevel Inductorless DC/DC Converters
Volker Pickert, Khalid Ambusaidi, Bashar Zahawi, Bing Ji

Very High Speed Motor Design for Magnetically Levitated Spindles
Aleksandar Borisavljevic, Henk Polinder, M. Kimman, H. Langen, J.A. Ferreira

Identification of Failure Risks of Power Electronics Due to Temperature Cycling Between -60°C and +300°C
Michael Hertl, Diane Weidmann, Jean-Claude Lecomte

Instantaneous Reactive Power Based Sensorless Control of Sinusoidally Wound Surface Mount PM Motors
Shehab Ahmed, Haitham Abu-Rub

NEW PACKAGING CONCEPTS

Integration of a New SOI Driver Into a Medium Power IGBT Module Package
Thomas Grasshoff, Lars Reusser

Extending the Power Capacity of IGBT Modules - Integration of Chip and Package Technologies
Masahito Otsuki, Osamu Ikawa, Hideaki Kakiki, Tadashi Miyasaka

Designing an IGBT Module Packaging for High Quality and Reliable Operation
Daniel Schneider, Lydia Feller, Dominik Trüssel, Samuel Hartmann, Sven Klaka

A New 3D Module Packaging Technology Without Bondwires
Christian Göbl, Peter Beckedahl
PROTECTION STRATEGIES

Temperature Prediction in High-Current and High-Power Applications ........................................ 567  
Johannes Adam

Cooling System Optimization for High Power UPSS ............................................................................. 573  
Marco Piemontesi

A Progressive Way to Integrate Current Measurement Into Modern Power Electronic Systems .................................................. 574  
Martin Schulz

A Series IGBT Connection and Gate Control for Auxiliary Converters in Railway Applications ................................................. 579  
Benoit Michaud, Bernard Hennevin, Didier Frougier

CONTROL TECHNIQUES IN INTELLIGENT MOTION SYSTEMS

Computed Torque Control for Direct-Driven Machine Tools ........................................................................ 585  
Oliver Zirn, Christian Jaeger

Methods for Path Decomposition of Redundant CNC-Axes ................................................................................. 589  
Marco Bock, Wolfgang Papiernik, Tomas Sauer

Simple Friction Compensation for a Robust PI-Cascade Position Control of a Multi-Mass System .................................................. 595  
Matthias Joost, Bernd Orlik, Jochen Schütttler

FPGA Based Field Oriented Current Controller for High Performance Servo Drives ............................ 601  
Jens Onno Krah, Christoph Klarenbach

AUTOMOTIVE POWER

Semiconductors in Hybrid Drives Applications – A Survey Lecture ........................................................................ 608  
Ingo Graf, Markus Nils Münzer

Resonant Motor Drive Topology with Standard Modules for Electric Vehicles ........................................... 614  
Michael Frisch

From Vehicle Drive Cycle to Reliability Testing of Power Modules for Hybrid Vehicle Inverter ............................................. 620  
Markus Thoben, Krzysztof Mainka, Reinhold Bayerer, Ingo Graf, Mark Nils Münzer

Thermal Management in Automotive / HEV and Outlook on Energy Storage ........................................... 626  
Claus Peter Kluge

ADVANCED IGBT TECHNOLOGY

Short Circuit Design Criteria of Trench FS-IGBTs .................................................................................. 627  
Hayato Nakano, Masahito Otsuki, Yuichi Onozawa, Osamu Ikawa, Tadashi Miyasaka

600V Reverse Conducting Trench Field-Stop IGBT for Drives Applications in Thin Wafer Technology ........................................................................... 632  
Holger Rüthing, Wolfgang Frank, Frank Hille, Franz-Josef Niedernostheide, Hans-Joachim Schulze, Peter Türkes

ESBT Technology in Industrial Converters: the Best Way to Cut Your Losses ............................................. 636  
Simone Buonomo, Gianni Vitale, Massimo Nania, Rosario Scollo

New Chip Design Technology for Next Generation Power Module ....................................................... 642  
Yoshino Manabu, Katsumi Satoh, Tetsuo Takahashi, Hindenori Fujii, John F. Donlon
HIGH EFFICIENCY

A Novel High Efficiency Approach to Input Bridges ................................................................. 648
   Davide Giacomini

An Asymmetric Half-Bridge Converter with Current Doubler Using a New Self-Driven Synchronous Rectifier ........................................................ 654
   Jin-Tae Kim, Gwan-Bon Koo

Low Losses Modulation Algorithm for Dual Cascaded Inverters ........................................... 660
   Giuseppe Tomasso, Ciro Attaianese, M. Di Monaco, Vito Nardi

Modeling and Analysis of Five-Phase Coupled Buck Converter Using Intercell Transformers .......................................................... 666
   Nadia Bouhalli, Emmanuel Sarraute, Thierry Meynard, Marc Cousineau, Guillaume Gateau

POWER FACTOR CORRECTION AND COMPENSATION

High Efficiency Adapter Using Dual Switch PFC-Flyback Single Stage .................................. 672
   Bogdan T. Bucheru, Ionel Dan Jitaru

2nd Generation FL-Ballast Controller Saves System Costs and Energy .................................. 678
   Michael Herfurth, Martin Feldtkeller, Antoine Fery, Dieter Zipprick

Line-Conducted EMI-Behaviour of a High Efficient PFC-Stage Without Input Rectification .......................................................... 684
   Manfred Reddig, Manfred Schlenk

3 MVAR Single Phase STATCOM Based on AC Chopper Topology ...................................... 689
   Luc Lowinsky, Philippe Ladoux, Yvon Chéron, Silverio Alvarez
