# TABLE OF CONTENTS

The Role of Hybridization in Cattail (TYPHA SPP.) Invasions of Freshwater Wetlands in Great Lakes National Parks ......................................................... 1  
S.J. Travis, J.E. Marburger, S.K. Windels

Variation in Soil Biofeedbacks Associated with Microstegium Vimineum ........................................... 2  
J.R. Klass, S.J. Meiners

Native and Exotic Species Exhibit Similar Population Dynamics in Secondary Succession ................................................................. 3  
S.J. Meiners, J.R. Klass, T.A. Rye

Invasive Plant Management: Benefits of a Multidisciplinary Risk Analysis Approach .................................................. 4  
M.A. Tucker, D. Doohan, N. Hooker, J. LeJeune

Invasive Management Strategies at Peninsula State Park ............................................................. 5  
K.A. Harris

New Invaders Watch Program: an Early Detection and Rapid Response Network to Limit the Spread of New Invasive Exotic Species in the Chicago Wilderness Region .......................................................... 6  
D. Maurer, R.E. DeWalt

Survival of Creeping Bentgrass and Kentucky Bluegrass on Defunct Golf Courses ......................................................... 7  
J.C. Stier, J.N. Rogers, T. VanLoo, A. Kowalewski

Biological Control of Invasive Plants in Minnesota ............................................................................. 8  
M.A. Chandler, L.C. Skinner

Impacts of the Invasive Annual Grass Microstegium Vimineum (Japanese Stiltgrass) on Native Trees and Herbaceous Species: Some Preliminary Results ....................................................... 9  
L. Flory, K. Clay

The Role of Weed Management on a Multi-parcel Prairie Restoration Site Within an Urban Setting ........................................................................ 10  
H. Zajack, M. Oetzman, B.J. Brezinski

NCWSS Weed Contest 2006 .............................................................................................................. 11  
J.J. Spotanski

Impact of Chlorpyrifos Application Timing on Herbicide Response in Sts Vs Non-STS Soybeans ........................................................................ 12  
M.J. Martin, M.F. Holm, G.R. Armel

Seed Quality Dynamics of Soybean Under Competition .................................................................... 13  
K.D. Millar, B.G. Young, D.J. Gibson, A.J. Wood

Tribenuron-tolerant Sunflower Production: Seed and Herbicide System Update ...................................... 14  
L.S. Tapia, J.D. Harbour, C. Alford

Response of Corn Treated at Two Growth Stages with Foliar Applied Herbicides .................................. 15  
J.R. Martin, C.R. Tutt

Control of Cocklebur in Soybean ................................................................................................... 16  
N. Soltani, C. Kramer, J. Vyn, P.H. Sikkema
Clopyralid Tolerance of Cuphea
S. Papiernik, F. Forcella, R. Gesch, G. Amundson

Performance of a Nicosulfuron Plus Thifensulfuron Premix in Field Corn
S.K. Rick, H.A. Flanigan, G.R. Armel

Effect of Integrated Herbicide Management Strategies on Soybean Yield

Economic Benefits of Preplant Herbicide Applications in Corn and Soybean
G.L. Marik, G.R. Armel

Comparisons of Residual and Non-residual Herbicide Programs for Weed Control and Crop Yield
D.E. Nordby, A.G. Hager

Adsorption and Degradation of Mesotrione in Four Soils
D. Shaner, G. Brunk, S. Nissen, P. Westra

Preemergence Herbicides to Manage Early-season Weed Competition in Corn
T.L. Trower, C.M. Boerboom, J.D. Bollman

Light Quality Effects on Corn Growth, Development, and Yield
M.K. Markham, D.E. Stoltenberg

Herbicide Efficacy and Forage Quality of Spring-seeded Glyphosate-resistant Alfalfa
D.K. Tiedemann, B.G. Young, R.F. Krausz, J.L. Mathews

Herbicide and Insect Resistant Traits in Michigan Corn
K. Schirmacher, J.J. Kells, C.D. DiFonzo

Tolerance of Six Classes of Dry Edible Bean and Adzuki Bean to Preand Post Applications of Halosulfuron
G.E. Powell, C.L. Sprague

Corn Inbred Response to BAS 799 and Other Growth Regulator Herbicides Applied Postemergence
M.D.K. Owen, J.F. Lux, D.D. Franzenburg

Accuracy of Weedsoft for Predicting Early-season Competitive Loads Following Residual Herbicides in Glyphosate-resistant Corn
D. Schnitker, B.G. Young, W.G. Johnson, M.M. Loux

Various Aspects of Glyphosate Resistant Alfalfa Management
B.L. Fochs, G.K. Dahl, J.V. Gednalske, E.P. Spandl, R. Schoper, D. Gehler

High Clearance Sprayer for Weed Control Plots
J.G. Tank, G.K. Dahl, J.V. Gednalske, E.P. Spandl

Sensitivity of TEFF (Eragrostis TEF) to Various Herbicides
S. Feldt, C.L. Schuster, B.L.S. Olson, J. A. Dille

Control of Downy Brome in Winter Wheat with Propoxycarbazone and Mesosulfuron
S.R. King, K.B. Thorsness

Dose Response Curves for KIH-485 Irrigated Corn with Herbicides
S.Z. Knezevic, J.E. Scott, P. Porpiglia

Utilizing R Software Package for Dose Response Studies: the Concept and Data Analysis
S.Z. Knezevic, J.C. Streibig, C. Ritz
Changes in Weed Communities During Transition to Organic Production ................................................................. 59
I. Rosa, J. Masiunas

Effects of a Sulfometuron-methyl and Hexazinone Blend on Weed Control in Eastern Christmas Tree Production .................................................................................................................. 60
M.J. Martin, S.K. Rick, R.G. Turner

Tolerance of Sweet Corn to Topramazone .................................................................................................................. 61

Tolerance of Four Popcorn Hybrids to BAS 799 H ................................................................................................. 62
T.T. Bauman, M.D. White

Using Spectral Vegetation Indices for Weed Detection in Mint ............................................................................... 63
M.S. Gumz, S.C. Weller

Full- and Split-rates of S-metolachlor and Dimethenamid-P for Lay-by Applications in Sugarbeet ........................................... 64
S.L. Bollman, C.L. Sprague

Effect of Late-season Glyphosate Drift to Seed Potato ............................................................................................. 65
H.M. Hatterman-Valenti, C.P. Auwarter, P.G. Mayland

Integrated Swamp Dodder Management in Carrot Production ................................................................................ 66
C.M. Konieczka, J.B. Colquhoun

Juneberry Growth As Affected by Weed Control Methods .................................................................................... 67
D.A. Willard, H.M. Hatterman-Valenti

Fall and Spring Development of Soybean Cyst Nematode on Winter Annual Weeds ....................................................... 68

The Relationship of Soybean Cyst Nematode and Purple Deadnettle Management in Microplots ................................. 69
J.S. Webb, B.G. Young, J.P. Bond

Investigation of Weed Suppression Potential of Polymer-induced Soil Crusting .......................................................... 70
J.D. Valletta, E.C. Luschei, C.M. Boerboom

Weed Community Composition Over Eight Years of Continuous Glyphosate Use in a Corn-soybean Annual Rotation ........................................................................................................ 71
M.R. Jeschke, D.E. Stoltenberg

Biomass Allocation Patterns of Field-grown Common Lambsquarters and Giant Foxtail As Affected by Early-season Variation in Light Quality .................................................................................. 72
G.G. Gramig, D.E. Stoltenberg

Experimental Cylinder Comparisons for Monitoring Seedling Emergence ............................................................... 73
K. Spokas, F. Forcella, D. Archer, D. Peterson

Glyphosate-resistant Horseweed Population Dynamics Are Influenced by Integrated Weed Management Practices in No-till Crops .................................................................................................. 74

Influence of Henbit and Purple Deadnettle Density on Plant Biomass and Soybean Cyst Nematode Reproduction .................................................................................................................. 75
V.A. Mock, J.E. Creech, W.G. Johnson

Time of Tillage Effects on Weed Communities in Continuous Soybeans ...................................................................... 76
J. Cardina, C.P. Herms

Survey of Weeds and Weed Management in Sweet Corn Grown for Processing .......................................................... 77
M.M. Williams II, T.L. Rabaey, C.M. Boerboom, A.S. Davis
Differential Effects of Photoperiod on Development of Solanaceous Weed Species .......................................................... 78
A. Kamboj, D. Doohan, J. Felix

Functional Trait Ecology in a Successional System: a Comparison of Native and Exotic Species .......................................................... 79
T.A. Rye, S.J. Meiners

Yellow Nutsedge Control in Pinot Gris Grapes Using Halosulfuron .......................................................... 80
T.A. Koch, D. Doohan

The Biology and Fecundity of Selected Common Lambsquarters Biotypes .......................................................... 81

Susceptibility of Common Lambsquarters to Glyphosate is Influenced by Parental Exposure .......................................................... 82
A.R. Kniss, S.D. Miller, P.H. Westra, R.G. Wilson

Mathematical Simulation of Soil Microclimate Conditions for Weed Seed Germination .......................................................... 83
K. Spokas, F. Forcella

Competition and Management of Annual Morningglory (Ipomoea spp.) in Corn and Soybean .......................................................... 84
P.J. Parrish, D.E. Nordby, E.D. Nafziger

Tolerance of Various Market Classes of Dry Beans to Clomazone .......................................................... 85
N. Soltani, C. Shropshire, P.H. Sikkema

Grass and Broadleaf Weed Density Interaction with Herbicide Dose .......................................................... 86
A.M. Ndou, J.A. Dille

Wild Proso Millet Demography in Snap Beans Following Three Different Sweet Corn Hybrids .......................................................... 87
A.S. Davis, M.M. Williams II

An Overview of Glyphosate Mode of Action: Why is it Such a Great Herbicide .......................................................... 88
D. Shaner

Evaluating an Altered Target Site Variant of EPSPS for Glyphosate Resistance .......................................................... 90
R.D. Sammons, M. Alibhai, A. Boland, S. Flasinski, C. Kavanaugh, Y. Qi, J. You, S. Reiser

Physiological Aspects of Glyphosate-resistant Palmer Amaranth .......................................................... 91
W.K. Vencill, J.B. Haider, T.L. Grey, A.S. Culpepper

Common Ragweed: Glyphosate Resistance with an Attitude .......................................................... 92
R.J. Smeda, J.M. Pollard

Glyphosate Resistance in Lolium Rigidum: Selection, Mechanisms and Inheritance .......................................................... 93
C. Preston, A. Wakelin

Potential Molecular Mechanisms of Glyphosate Resistance in Conyza Canadensis .......................................................... 94
C.N. Stewart Jr., L.L. Good, M.D. Halfhill, M.R. Rao

What We Know (and Don’t Know) About Glyphosate Resistance in Waterhemp .......................................................... 95
P.J. Tranel, R.M. Lee, M.S. Bell, S. Singh, J.R. Walter, K.W. Bradley

Response of One and Two Gene Imidazolinone-tolerant Winter Wheat to Imazamox&MCPA and Imazamox Alone .......................................................... 96
P.W. Stahlman, P.W. Geier

Revisiting Triallate Use in North Dakota .......................................................... 97
A.J. Kazmierczak, K.A. Howatt
Imazamox&MCPA Compared to Standard Herbicides in Wheat .......................................................... 98
  P.W. Geier, P.W. Stahlman

Organic Weed Management in Small Grain Crops ........................................................................ 99
  S.J. Shirtliffe, E.N. Johnson, Y.E. Lawley, J.M. Baird

Performance of Cereal Grass Herbicides in Tank-mix Combinations with Fluroxypyr, Clopyralid, Aminopyralid, Bromoxynil, and MCP .................................................. 100
  M.R. Weimer, B. Oemichen, R. Gast

Varietal Response to Pinoxaden and Antagonism of Wild Oat Control by Broadleaf Herbicides ...................................................................................................................... 101
  K.A. Howatt

A New Selective Herbicide for Grass Control in Wheat ................................................................. 102

Assessment of the Economic and Related Benefits of Phenoxy Herbicides to Canada ................................................................. 103
  L.F. Hammond

Weed Management in Dry Beans with Dimethenamid and Reduced Rates of Imazethapyr Preplant-incorporated ................................................................. 104
  P.H. Sikkema, N. Soltani, C. Shropshire, R. Vyn, L.L. Van Eerd

Interference of Broadleaf Weeds in Sugarbeets ........................................................................ 105
  D.C. Odero, A. Mesbah, S.D. Miller

Lumax (S-Metolachlor & Atrazine & Mesotrione) Performance in Grain Sorghum .......................... 106

Grain Sorghum Response to Soil Applied Mesotrione ................................................................ 107
  A.J. Schelegel, J.M. Lee

Farm-level Profitability of Weed and Insect Management Strategies in Transgenic and Nontransgenic Corn ................................................................................................. 108
  K. Schirmacher, S.M. Swinton, J.J. Kells, C.D. DiFonzo

Comparing Mesotrione, Tembotrione, and Topramezone .......................................................... 109
  R. Zollinger, J.L. Ries

Interaction of Herbicides and Adjuvants with AE 0172747 on Postemergence Grass Control ................................................................. 110
  M.A. Waddington, B.G. Young

Influence of Residual Herbicide Rate and Timing on Weed Management in Glyphosate-resistant Corn ................................................................................................. 111
  D.D. Schnitker, B.G. Young, W.G. Johnson, M.M. Loux

Benefits of Triazine Herbicides in Reducing Erosion and Fuel Use in U.S. Corn Production ................................................................................................. 112
  R.S. Fawcett

Influence of Fall and Early Spring Herbicide Applications on Soil Conditions and Insect Injury in No-till Corn ................................................................................................. 117
  N.H. Monnig, T.R. Legleiter, K.W. Bradley

Weed Control Programs with Tembotrione in Corn ..................................................................... 118
  D. Lamore, G. Simkins, K. Watteyne, J. Allen

Effect of Atrazine and Adjuvants on Weed Control with Tembotrione in Corn ............................... 119
  G. Simkins, D. Miller, J. Allen

New Herbicide Mixture for Foundation Weed Control in Glyphosate Tolerant Corn ................... 120
  B.E. Maddy, M.E. Schultz, D.C. Ruen, J.M. Edwards
STATUS® (DIFLUENZOPYR + DICAMBA + ISOXADIFEN-ETHYL): A New Broadleaf Herbicide for Corn

D.E. Westberg, C.A. Judge, N.T. Fassler, T.D. Klingaman, L.D. Charvat
