## Keynote

- Computing with Cells: Membrane Systems  
  *Oscar H. Ibarra*
  
- SIP-Based Cross-Domain Proxy Handoff for Mobile Streaming Services  
  *Chung-Ming Huang, Chao-Hsien Lee, Jun-Hao Zhuang, Tsung-Yi Tsai, and Chi-Chang Liu*
  
- The Visible Cell™ Project: Changing the Way We Think about Cells  
  *Mark Ragan and Brad Marsh*

## Session 1A: Programming Multicore and Queue Computers

- Task Parallelism for Object Oriented Programs  
  *Nasser Giacaman and Oliver Sinnen*
  
- A Taxonomy of Data Prefetching Mechanisms  
  *Surendra Byna, Yong Chen, and Xian-He Sun*
  
- Quantitative Evaluation of Common Subexpression Elimination on Queue Machines  
  *Arquimedes Canedo, Masahiro Sowa, and Ben A. Abderazek*
  
- Memory and Thread Placement Effects as a Function of Cache Usage: A Study of the Gaussian Chemistry Code on the SunFire X4600 M2  
  *R. Yang, J. Antony, P. P. Janes, and A. P. Rendell*

## Session 1B: Mobile, Ad-hoc, and Peer Networks

- Enhancing Route Recovery for QAODV Routing in Mobile Ad Hoc Networks  
  *Nityananda Sarma, Sukumar Nandi, and Rakesh Tripathi*
  
- Handoff Performance Comparison of Mobile IP, Fast Handoff and mSCTP in Mobile Wireless Networks  
  *Ken C.K. Tsang, Cho-Li Wang, and Francis C.M. Lau*
  
- K-Tree Trunk and a Distributed Algorithm for Effective Overlay Multicast on Mobile Ad Hoc Networks  
  *Yamin Li, Shietung Peng, and Wanming Chu*
  
- M-Ring: A Distributed, Self-Organized, Load-Balanced Communication Method on Super Peer Network  
  *Tsung-Han Lin, Tsung-Hsuan Ho, Yu-Wei Chan, and Yeh-Ching Chung*
Session 2A: Sensor Networks

Sensor Deployment and Source Localization.................................................................67
Sartaj Sahni

Session 2B: Cube Interconnection Networks

On the Longest Fault-Free Paths in Hypercubes with More Faulty Nodes .........................71
Tz-Liang Kueng, Tyne Liang, Jimmy J. M. Tan, and Lih-Hsing Hsu

Node-to-Set Disjoint Paths Routing in Dual-Cube..........................................................77
Keiichi Kaneko and Shietung Peng

Resource Placement in Cube-Connected Cycles.............................................................83
Paria Moinzadeh, Hamid Sarbazi-Azad, and Nasser Yazdani

Session 3A: Sensor Networks

Study of Cluster-Based Data Forwarding in Sensor Networks with Limited High-Power Mobile Nodes .................................................................93
Yen-Wen Chen, Hwa-Chun Ma, I-Hsuan Peng, and Ta-En Chang

Barrier Coverage with Mobile Sensors...........................................................................99
Changxiang Shen, Weifang Cheng, Xiangke Liao, and Shaoliang Peng

An Energy-Efficient Geographic Routing with Location Errors in Wireless Sensor Networks .................................................................105
Julien Champ and Clément Saad

Two New Push-Pull Balanced Data Dissemination Algorithms for Any-Type Queries in Large-Scale Wireless Sensor Networks .................................................................111
Zi-Jin Tao, Zheng-Hu Gong, Zhen-Zheng OuYang, and Jin-Yi Xu

Session 3B: Scheduling

Study of Scheduling for Processing Real-Time Communication Signals on Heterogeneous Clusters .................................................................121
Xiaomin Zhu and Peizhong Lu

On Non-Approximability of Coarse-Grained Workflow Grid Scheduling .................................................................127
Noriyuki Fujimoto

An Evaluation of In-Advance Bandwidth Scheduling Algorithms for Connection-Oriented Networks .................................................................133
Eun-Sung Jung, Yan Li, Sanjay Ranka, and Sartaj Sahni

Workshop on Graphs and Networks

Session 4A: Graph and Networks

Product Line Sigraphs .....................................................................................................141
Daniela Ferrero

Wide Diameter of Cayley Digraphs of Finite Cyclic Groups ..............................................146
Xingde Jia

Mutually Independent Hamiltonianicity of Pancake Graphs and Star Graphs .................................................................151
Cheng-Kuan Lin, Jimmy J. M. Tan, Hua-Min Huang, D. Frank Hsu, and Lih-Hsing Hsu
Privacy Preserving Mobility Control Protocols in Wireless Sensor Networks ......................................................... 159
Qijun Gu and Xiao Chen

Session 4B: Algorithms

Growing Hierarchical Self-Organizing Map for Filtering Intrusion Detection Alarms ......................................................... 167
Maya Shehab, Nashat Mansour, and Ahmad Faour

On the Partial-Terminal Steiner Tree Problem ........................................................................................................... 173
Sun-Yuan Hsieh and Wen-Hao Pi

Improved Bounds on the Feedforward Design of Optical Multiplexers ........................................................................ 178
Xiaoliang Wang, Xiaohong Jiang, and Susumu Horiguchi

On the Relationships among Various Diversity Measures in Multiple Classifier Systems ............................................. 184
Yun-Sheng Chung, D. Frank Hsu, and Chuan Yi Tang

A Novel Congestion Control Scheme in Network-on-Chip Based on Best Effort Delay-Sum Optimization ........... 191
Fahimeh Jafari, Mohammad Sadegh Talebi, Ahmad Khonsari, and Mohammad Hossein Yaghmaee

Workshop on Distributed and Mobile Systems I

Session 5A: Distributed and Mobile Systems

An Expedite State Dissemination Mechanism for MMOGs ........................................................................................................... 199
Dewan Tanvir Ahmed and Shervin Shirmohammadi

Management of Ambient Media Preferences in Distributed Environments for Service Personalization .............. 204
M. Anwar Hossain, Pradeep K. Atrey, and Abdulmotaleb El Saddik

A Haptic Enabled DNA Model ........................................................................................................................................... 210
Dan Martin, Mohamad Eid, and Abdulmotaleb El Saddik

Bio-inspired Algorithms for Mobility Management ............................................................................................................. 216
Javid Taheri and Albert Y. Zomaya

Session 5B: Mesh and Optical Interconnection Networks

One-to-one and One-to-many node-disjoint Routing Algorithms for WK-Recursive networks ........................................... 227
Saeedeh Bakhshi and Hamid Sarbazi-Azad

A Probabilistic Characterization of Fault Rings in Adaptively-Routed Mesh Interconnection Networks ............ 233
Farshad Safaei, Ahmad Khonsari, Aresh Dadlani, and Mohamed Ould-Khaoua

Reliable Opto-Electronic Hybrid Interconnection Network ................................................................................................ 239
Liquan Xiao and Kefei Wang

Workshop on Distributed and Mobile Systems II

Session 6A: Wireless and Mobile Systems

A Taxonomy of Cluster-Based Routing Protocols for Wireless Sensor Networks .................................................. 247
Anahit Martirosyan, Azzedine Boukerche, and Richard Pazzi
Performance Analysis of an Energy Efficient MAC Protocol for Sensor Networks ..................................................254
Jun Zhang, Farid Nait-Abdesselam, and Brahim Bensaou

A Measurement-Assisted, Model-Based Admission Control Algorithm for IEEE 802.11e............................................260
Brahim Bensaou, Zhen Ning Kong, and Danny H.K. Tsang

Detection and Identification of Anomalies in Wireless Mesh Networks Using Principal Component
Analysis (PCA)..........................................................................................................................................................266
Sara Hakami, Zainab Zaidi, Bjorn Landfeldt, and Tim Moors

Session 6B: Interconnection Network Layout and Models

The Shuffle-Exchange Mesh Topology for 3D NoCs .................................................................................................275
Akbar Sharifi, Reza Sabbaghi-Nadooshan, and Hamid Sarbazi-Azad

Three-Dimensional Layout of On-Chip Tree-Based Networks....................................................................................281
Hiroki Matsutani, Michihiro Koibuchi, D. Frank Hsu, and Hideharu Amano

Using an MDE Approach for Modeling of Interconnection Networks.......................................................................289
Imran Rafiq Quadri, Pierre Boulet, Sanni Meftali, and Jean-Luc Dekeyser

Author Index..............................................................................................................................................................295
