| Program Committee | xi |
| Steering Committee | xii |
| External Reviewers | xiii |

### Keynote Panel: Future Challenges to Dependable and Secure Computing

**Moderator**  
Algirdas Avižienis, Vytautas Magnus University, Kaunas, Lithuania

**Panellists:**  
Marc Dacier, Institut Eurecom, Sophia Antipolis, France  
Michael Harrison, University of Newcastle upon Tyne, United Kingdom  
Jean-Claude Laprie, LAAS-CNRS, Toulouse, France

### Session 1A: Fault Injection, Assessment and Diagnosis

- Injecting Inconsistent Values Caused by Interaction Faults for Experimental Dependability Evaluation .................................................. 3  
  Bogdan Tomoyuki Nassu, Kiyonobu Uehara, and Takashi Nanya

- Metrics for Object-Oriented Software Reliability Assessment – Application to a Flight Manager .......... 13  
  Stéphanie Gaudan, Gilles Motet, and Guillaume Auriol

- Software Faults Diagnosis in Complex OTS Based Safety Critical Systems ................................. 25  
  G. Carrozza, D. Cotroneo, and S. Russo

### Session 1B: Fast Abstracts I

### Session 2A: Group Communication and Availability

- On the Specification of Partitionable Group Membership .......................................................... 37  
  Stefan Pleisch, Olivier Rütti, and André Schiper

- A Distributed Approach to Autonomous Fault Treatment in Spread ........................................ 46  
  Hein Meling and Joakim L. Gilje

- Deriving Highly Available Quorum Systems from Structural Failure Models........................... 56  
  Christian Storm and Timo Warns

### Session 2B: Fast Abstracts II
**Session 3A: Practical Experience Reports**

Targeted Distribution of Resource Allocation for Backup LSP Computation .............................................. 69  
*Mohand Yazid Saidi, Bernard Cousin, and Jean-Louis le Roux*

Dependability Assessment for the Selection of Embedded Cores ................................................................. 79  
*David de Andrés, Juan-Carlos Ruiz, Daniel Gil, and Pedro Gil*

The ADAPT Tool: From AADL Architectural Models to Stochastic Petri Nets through Model Transformation .................................................................................................................. 85  
*Ana-Elena Rugina, Karama Kanoun, and Mohamed Kaâniche*

Practical Setup Time Violation Attacks on AES ........................................................................................................... 91  
*Nidhal Selmane, Sylvain Guilley, and Jean-Luc Danger*

**Session 3B: Fast Abstracts III and Student Forum**

**Keynote Speaker**

Angelo Marino, Research Programme Officer, European Commission-Information Society and Media DG, Brussels, Belgium

**Session 4: Security Issues**

SGNET: A Worldwide Deployable Framework to Support the Analysis of Malware Threat Models .......... 99  
*Corrado Leita and Marc Dacier*

Fuzzing Wi-Fi Drivers to Locate Security Vulnerabilities ................................................................................... 110  
*Manuel Mendonça and Nuno Neves*

**Session 5: Dependability for Hardware**

A Transient-Resilient System-on-a-Chip Architecture with Support for On-Chip and Off-Chip TMR ........ 123  
*Roman Obermaisser, Hubert Kraut, and Christian Salloum*

A Novel Naming Scheme for System-on-a-Chips Supporting Dynamic Resource Management .......... 135  
*Christian El Salloum, Roman Obermaisser, Bernhard Huber, and Hermann Kopetz*

Software Implemented Detection and Recovery of Soft Errors in a Brake-by-Wire System ......................... 145  
*Daniel Skarin and Johan Karlsson*

**Session 6: Methodologies**

SONDe, a Self-Organizing Object Deployment Algorithm in Large-Scale Dynamic Systems ............... 157  
*Vincent Gramoli, Anne-Marie Kermarrec, Erwan Le Merrer, and Didier Neveux*

Refinement Patterns for Fault Tolerant Systems ................................................................................................. 167  
*Alexei Iliasov and Alexander Romanovsky*
Session 7: Panel Discussion

Moderator
Andrea Bondavalli, DSI, University of Firenze, Italy
How hard is Assessing and Measuring Resilience? ................................................................. 179

Panellists:
Dario Avallone (Eng, Ingegneria Informatica, NESSI)
Karama Kanoun (LAAS-CNRS),
Henrique Madeira (University of Coimbra, Portugal)

Miroslaw Malek, Humboldt-Universität zu Berlin, Germany
Online Dependability Assessment through Runtime Monitoring and Prediction ..................... 181

Author Index ......................................................................................................................... 182
