# TABLE OF CONTENTS

## Volume 1

"Effect Coatings" by Morphological Design of Polyurethane Dispersions ........................................ 1  
Schoondermark, M.C.

Solvent-Free Secondary Dispersions for Waterborne 2K PUR Coatings ........................................... 10  
Münzmay, Thomas

Prepolymer Mixing Process for Making NMP-Free, High-Quality PUDs ........................................... 17  
Gertzmann, Rolf

Effects of the European Legislation on the Future of the Paint Industry ........................................... 29  
Warnon, Jacques

Implications of VOC and Chemicals Legislation on Coatings Technology Development Trends .......................................................... 38  
Busato, Franco

Resins and Additives for Alkyd Paints and Powder Coatings, Based on Renewable Resources .......................................................... 43  
van Haveren, Jacco

Al₂O₃/ZrO₂ Nanocomposites for Paint Industry .................................................................................. 58  
Tolnai, Gyula

Nanocomposite Dispersions - An Innovative Technology for Water-Based Coatings ...................... 63  
Tiarks, Franca

Inorganic/Organic Core/Shell Nanoparticle Dispersions to Improve Scratch Resistance of Coatings ................................................................................. 80  
Hajas, Janos

Plenary 1: Use of Spiro-Ortho Silicates as Blocked Polyols/Reactive Diluents in High Solid PUR Clear Coats for Car Refinish Application .......................................................... 91  
van den Berg, Keimpe

New Waterborne Acrylic Binders for Zero VOC Paints ....................................................................... 102  
Geurts, John

Structure Development in Polyurethane Networks Based on Star-Like Precursors ......................... 111  
Vlasak, Petr

Accuracy of the Weathering of Paints Containing Titanium Dioxide .................................................. 117  
Schmelzer, Josef

New Methodology for the Determination of the Photocatalytic Stability and Activity of Pigments and Organic Coatings ......................................................................................... 136  
Eisenbach, C.D.

Durability Assessment Methods to Evaluate the Service Life of External Walls Paints ................. 143  
Daniotti, Bruno

Optimised Network Structures for High Performance Coating Systems ........................................... 157  
Flosbach, Carmen

Hybrid Polymer Dispersions for Coatings ......................................................................................... 165  
Kozakiewicz, Janusz
How to Improve the Performance of UV Cured Wood Coatings ........................................... 177
    Poitoux, Mariane

Synthesis and Characterisation of New Epoxy Binders for Coatings ........................................ 184
    Rucinska, Katarzyna

High Solids Transportation Primer Based on New Phenalkamine Epoxy Curing Agents ....... 187
    Dallons, Jean-Luc

New Cycloaliphatic Epoxides for Photocationic Curing ......................................................... 198
    Boncza-Tomaszewski, Zbigniew

The Particles Fineness Effect on the Optical Efficiency and Colour of Chromatic Pigments ................................................................. 203
    Indeikin, Eugene A.

What Colour is My House Going to Be? Relationship Between the Colour and the Structure of Plasters ........................................................................................................ 210
    Molnár-Nagy, Lívia

New Technology for Advanced Drying Analysis of Coatings ..................................................... 223
    Brun, Alice

Conducting Polypyrrole Particle Composites ............................................................................. 229
    Adler, Hans-Jürgen

Fluorinated UV-Curable Coatings on Polyolefins: Properties and Adhesion .................... 233
    Bongiovanni, Roberta

Graffiti Resistant Waterborne 2K Polyurethane Coatings ..................................................... 243
    Melchior, Martin

Corrosion Inhibitors .................................................................................................................. 254
    Gichuhi, Tony

Introduction of a Voluntary Mark Entitled “Excellent Construction Product” in Hungary ...... 278
    Pálvölgyi Tamás

A 25/2006-Os Kormányrendelet (Voc-Rendelet) Lényegi Elemei .............................................. 280
    Sándor, Gáborné

Plenary 2: Metal Oxides as Potential Active Fillers for Polymers: Concepts and Challenges From Coatings Perspective ...................................................................................... 284
    Kijenski, Jacek

High Chroma Pearlescent Pigments Designed By Optical Simulation ...................................... 293
    Shiomi, Hiroyuki

Novel Mechanisms of Matting and the Properties of Matted Coatings ........................................ 306
    Fletcher, Tim

Improved Performance of Waterborne Coatings Through Polymer-Pigment Composite Particle Formation .................................................................................................................. 334
    Rosano, William

Protective Ability of Organic Coatings for Concrete Under Chloride Attack ............................ 350
    Creazzi, Luigi

Water Uptake/Release of Waterborne Paint Resin Films as Studied By Impedance Spectroscopy and Gravimetry .......................................................... 361
    Lendvay-Győrik, Gabriella

Investigation of the Epoxy Curing Process on Mild Steel Via Electrochemical Impedance Spectroscopy ..................................................................................... 372
    Attar, M.M.

Powder Coating and Coil Coating - a Possible Wedding? ......................................................... 376
    Pierre, David

</table>
The Optimization of Latex Paint Formulations with Carbonate Extenders ................. 590
Zubielewicz, Malgorzata

Resinous Coatings for Ship Decks ............................................................................. 599
Delucchi, Marina

Organic Coatings for Cheeses ..................................................................................... 605
Golikov, Igor V.

Stability, Particle Size and Surface Charge of Nanoparticles .................................. 608
Schwarz, Simona

Accelerated Testing of Different Binder Types Waterborne Coating Systems ............ 613
Fekete, Éva

Analysis of Weathering Effects in Automotive Coatings By Thermoluminescence ...... 620
Krueger, Simone

Screening the Weathering Stability of Automotive Coatings By
Chemiluminescence ................................................................................................. 629
Krueger, Simone

Influence of Fluorescent Polymer Materials Composition on the Optical Properties .... 637
Kulikova, Olga A.

Influence of Titanium Dioxide on the Hardening of Epoxy Oligomeres with the
Amine Hardeners ........................................................................................................ 642
Manerov, Vladimir B.

Use of Synergetic Methods in Management of Steady Functioning of the Coating
Materials Manufacturing Plant .................................................................................... 647
Gladilovich, Vladimir

Plenary 4: Inorganic Nanoparticles: a New Revolution in the Coatings Industry ......... 652
Sawitowsky, Thomas

Hydroxyphenyl Triazines: Advanced Multi-Purpose UV Absorber ......................... 655
Schaller, Christian

Application of Biocides and Silver Preparations in Architectural Interior Paints ........ 669
Slusarczyk, Anna

New Alternatives for Dry-Film Preservation in Coatings .......................................... 676
Wood, Paul

Relating the Performance of One-Component Acrylic Coatings with Fundamental
Mechanical Properties ............................................................................................... 691
Mestach, Dirk

Surface Structure Analysis of Substrates and Coatings ............................................. 710
Osterhold, Michael

Morphology and Electrical Conductivity Behaviour of Electro-Deposited Conductive
Carbon Black-Filled Epoxy Dispersions Near the Insulator-Metal Transit ................. 720
Ranjbar, Zahra

Nano Grinding in Agitator Bead Mills ......................................................................... 744
Kißwetter, Hans-Georg

New Corrosion Protection Nanocoatings: Principles, Application and Case Studies .... 749
Wagner, Georg

Silicone-Containing Polymer Matrices as Coating Materials .................................... 758
Zielecka, Maria

Shapable Weather-Resistant Low Temperature Thermosetting Uretdione Powder
Coating Prototypes ..................................................................................................... 768
Gedan-Smolka, Michaela
Ionomeric Powder Coating Binders with Improved Storage Stability and Reactivity ........... 781
ten Cate, Tessa

A New Class of Tailor Made Hydroxy Acrylate Copolymers for Fast Drying, Low VOC Polyurethane Clear Coats ......................................................................................................................... 786
Heymans, Denis

Fundamentals of Electrostatic Charging of Polymers ........................................................................ 801
Simon, Frank

Forensic Examination of Car Paints ................................................................................................. 810
Miczarek, Jakub M.

International Cooperation Through Research Networks: Case Study of WAITRO ................. 816
Werblinski, Wieslaw

The Relationship Between the Italian Antifouling Coating Market and Customer Expectations in the Yachting Field ........................................................................................................... 825
Trentin, Ilva

Goethe's Theory of Colours ............................................................................................................. 842
Voutsinas, John
