TABLE OF CONTENTS

SESSION 1: CYBER-INFRASTRUCTURE I

CUAHSI HIS-Service Oriented Architecture: From Design to Deployment, Initial Experience and Lessons Learned ............................................................... 1
  Ilya Zaslavsky, David R. Maidment, David Valentine

HydroSeek: Semantic Mediation and its Application in a Global Search Engine .................. 2
  Timothy Whiteaker, David Maidment

Development of an Open Source Client-Side User Interface and toolkit for the CUAHSI his wateroneflow Web Service ...................................................... 3
  Brian Marchionni, Daniel P. Ames, Michael Piasecki

The Arizona Hydrologic Information System ...................................................................... 4
  Corinna Gries, Kathy Jacobs, Wolf-Dieter Otte, Ramon Vazquez, Raul Aguilar, James McGill, Shankar Bhargav, Hung Nguyen

SESSION 2: FLOODPLAIN MAPPING I

Automated GIS DFIRM Production Tools ........................................................................... 10
  Andreas (Andy) Wohlsperger

Automation of DFIRM Floodplain Mapping; Tools and Techniques .................................. 16
  Masoud Meshkat, Andy Clevenger

Geoterrain Part 1: Leveraging Terrains in ArcGIS 9.2 .......................................................... 17
  Francisco Olivera, Ken Logsdon, Jr.

Geoterrain Part 2: Leveraging Terrains in Hydraulic Analyses ........................................... 18
  Mathew Mampara, Milver Valenzuela, Srikanth Koka

SESSION 3: WATERSHED MANAGEMENT

Regional Watershed Management System--Enterprise GIS-Based Decision Support and Workflow Management ............................................................. 19
  D. Cesur, N. Garza, W.S. Burmeister

Modeling the Hydrological Impacts of Climate Change .................................................. 26
  David Purkey, Martha Fernandes, Brian Joyce, Michael Kiparsky, David Yates, Chuck Young
Hydra: A Geographical Information System for Sierra Nevada Watersheds ........................................ 27
Joshua Viers, Aaron M. King, Alexandra Geddes-Osborne

RTEMP- A Regional Water Temperature Model Developed for a Sierra Nevada Watershed ................................................................. 28
Leon Basdekas

A GIS Foundation of Agricultural Water Planning in Georgia ............................................................... 29
Mark Masters, James M. McKimmey

SESSION 4: NHD – STEWARDSHIP AND ENHANCEMENTS

The Stewardship of the National Hydrography Dataset ........................................................................ 30
Jeff Simley, Keven Roth

Web Certification and Stewardship Status in California ............................................................... 36
Lori Peltz-Lewis, Mike T. Laitta, Karen Hanson, Donna Knifong

An ARC Hydro Geodatabase from High Resolution NHD ............................................................. 37
Christine Mundy

SESSION 5: LiDAR

Terrain Characteristics as a Function of ArcGIS Terrain Dataset Generalization ................. 38
Dean Djokic, Thomas A. Evans, Amit Sinha

New TauDEM Tools for Deriving Hydrologic Information from Digital Elevation Models ........................................................................ 39
David Tarboton, Kimberly A. T. Schreuders, Matthew E. Baker

Application of Accurate Vertical Controls to LiDAR DEMs and the Impact on Hydrologic Modeling in Flat Landscapes ............................................................. 40
Jason Braud, Jessica I. Mason, J. Anthony Cavell, Roy K. Dokka, Clinton S. Wilson

Using High Resolution Ground Based Lidar to Assess Affects of Digital Elevation Model Resolution and Storm Size on Hydrologic Modeling ......................................... 41
Scott Miller, Ginger B. Paige, Maneesh Sharma

SESSION 6: CYBER-INFRASTRUCTURE II

Leveraging Olap Datacubes for Water Resources Research ................................................................. 42
Bora Beran, Matt Rodriguez, David Valentine, Catharine van Ingen, Ilya Zaslavsky

Development and Application of a Web-Enabled Interactive Water Resources Management Tool .................................................................................. 43
Wen-Hsing Chiang, Eric Lindberg, Ryan Anderson, Samantha Stevens

WaterML and WaterOneFlow Web Services as the Core Components of CUASHI HIS Cyberinfrastructure .............................................................................. 49
David Valentine, Ilya Zaslavsky, Thomas Whitenack, David R. Maidment

Towards an Open Source CUAHSI Hydrologic Information System ........................................... 50
Guowen (Joe) Hu, Daniel P. Ames, Michael Piasecki
SESSION 7: FLOODPLAIN MAPPING II

Comparison of One-Dimensional HEC-RAS with Two-Dimensional FESWMS Model in Flood Inundation Mapping ................................................................. 51
   Venkatesh Merwade, Aaron Cook

Automation of Floodplain Delineation-An Innovative Solution ....................................................... 52
   Lin Peng, Barrett Goodwin

Uncertainty in Flood Inundation Mapping Process ........................................................................... 56
   Venkatesh Merwade, Francisco Olivera, Scott Edleman

Harris County Flood Control District-Standard Naming Convention for Hydrologic and Hydraulic Models ........................................................................... 57
   Anjali Bhangay, Fred Liscum, Karl E. McArthur, Yu-Chun Su, Jacob Spenn

SESSION 8: WATERSHED CHARACTERIZATIONS

Developing an Approach to Rank Improvement Projects Using Technology Applications ................................................................. 63
   Amy Rockwell, Monica Kruckow

Characterization of the Spatial Variability of Terrestrial Watershed Properties in Relation to In-stream CDOM Distributions ........................................................................... 68
   Frederick Bradley, Barnali Dixon, Julie Earls

A Interactive GIS Tool for Site-Specific Determination of Stormwater infiltration Feasibility .................................................................................. 69
   Lucas Paz

Rio Grande Basin Initiative-Interactive Mapping for New Mexico ....................................................... 75
   Susanna Glaze, Bobby J. Creel, Casey Gomez, Royce Stevens

SESSION 9: NHD - UTILIZATION

Estimating Perennial Streams in Idaho Using a Regression Model of -Day, 2-Year Low Flows ................................................................. 76
   Alan Rea

Meeting the Hydrographic Mapping Needs of North Carolina Stakeholders: Local-Resolution National Hydrography Dataset (NHD) Production in North Carolina ........................................................................... 77
   Roger Cottrell, Joe Sewash, Scott Edelman, Kristy MacDougall

Landscape Metrics Arranged by Hydrological Proximity to Sites on the Mississippi, Missouri, and Ohio Rivers ........................................................................... 78
   Tatiana Nawrocki, Matthew Starry, Mary Moffett, David Bolgrien

Implementing a Watershed Information System Using ArcHydro .................................................................................. 84
   Nils Babel
SESSION 10: LiDAR II

Locating Channel Heads Using Digital Elevation Data ................................................................. 90
N.L. Arave, D. Ames

Large Scale LiDAR Acquisition: Execution and QA/QC Strategies ............................................. 95
Tim Blak

Development of LiDAR-Derived Digital Elevation Models (DEMS) for Watershed Characterization ............................................................................................................. 96
Emmanuel U. Nzeqi, Mahesh Adhikari

What Impact does the Topographic Resolution of Your Data Source Have of Channel Capacity Calculations? ..................................................................................................... 97
Mathew Manges, Derek St. John, Russ Poppe

SESSION 11: CYBER-INFRASTRUCTURE III

Using an Observations Data Model in Hydrologic Information Systems........................................ 98
David Tarboton, Jeffrey S. Horsburgh, David R. Maidment, Allya Zaslavsky

Using GIS in Creating an End-to-End System for Publishing Environmental Observations Data ............................................................................................................................ 99
Jeffery S. Horsburgh, Amber Spackman, David K. Stevens, David G. Tarboton, Nancy O. Mesner

Weather and Climate Data for Hydologic Modeling .................................................................. 100
Steve Kopp, Nawajish Noman

Synthesis of Web Service Data to Support Hypoxia Modeling in Corpus Christi Bay .................. 101
Ernest To, David R. Maidment

SESSION 12: FLOODPLAIN MAPPING III

LiDAR Mapping of the Yellowstone River ..................................................................................... 102
Jim Robinson, Tony Thatcher, Karin Boyd, Gerry Daumiller

Data Collection and Population of the USACE National Levee Inventory Database ................. 104
Dan Henderson, Tom Schweitzer

Coastal Analyst: Enhancing the Application of One-Dimensional Wave Height Models for Coastal Flooding Through GIS ................................................................. 105
Guillermo Simon, John Messer

Application of GIS to New Orleans Flood Inundation and Evacuation Route Analysis ................. 106
Timothy Nelson, Sohei Uematsu, John W. Labadie
SESSION 13: WATERSHED WATER QUALITY I

Utilizing GIS to Plan Dormant-Spray Runoff Sampling in the San Joaquin River Basin, CA ................................................................. 112
Donna Knifong

Information Technology Application for District Stream Maintenance Program (SMP) ................................................................. 113
Shree Dharasker, Vitaliy Vaysfeld

HCFCD M3 System Coordination of Contemporaneous Studies for Floodplain Permitting .......................................................... 118
Karl McArthur, P.E., CFM; Stephen Bourne, Jacob Spenn, P.E., CFM; Carl W. Woodward, P.E., CFM

Development and Use of a Multiple Objective Spatial Decision Support System in East African Rural Watershed Management ................................................................. 124
T.J. Baldyga, S.N. Miller, W.A. Shivoga, L.W. Chiuri, G.B. Paige

SESSION 14: HYDROLOGIC DATA SYSTEMS

Using Geospatial Technologies to Transform Hydrology, Hydraulics & Coastal Engineering in USACE ................................................ 130
Seshu Vaddey

The Trinity River IIMS - Helping Water Managers Access Disparate Scientific Data ................................................................. 131
Philip Bailey

New Geospatial and Hydrologic Databases Spanning 100-200+ Years of Change on the Mississippi River System ................................................................. 132
Reuben Heine, Jonathan Remo, Nicholas Pinter, Brian S. Ickes

Development of a Global River Transport and Observation Network ................................................................. 133
Jonathan M. Pickus, Jeffrey Johnson, Mondher Chehata, Rakesh Bahadur, David E. Amstutz, William B. Samuels

SESSION 15: LiDAR III

Accuracy Assessment of LiDAR-Derived DEMs: Investigating the Effects of Resolution and Interpolation Method ................................................................. 139
Suzanne Wechsler

Using LiDAR to Establish a Stream Gauging Network in a Tropical Experimental Forest: What Works and What Doesn't ................................................................. 140
Boris Poff, Daniel G. Neary, Gregory P. Asner

Comparison of LiDAR-Generated Forest Road and Channel Features with Ground-Surveyed Features ................................................................. 144
Russell White, Brian C. Dietterick, Thomas Mastin, Rollin Strohman, Ryan Hilburn

The Problem of Data Series Documentation: A Geospatial Metadata Profile in Support of Elevation Data Processing at NYSDEC ................................................................. 145
Ricardo Lopez-Torrijos, Bruce Wescott
SESSION 16: HEC GeoRAS: CASE STUDIES

Automating HEC-FDA Floodplain Inventory with IWR-GeoFIT .................................................. 146
Greg Gagliano

Snap to It: A Better Way to Cut Cross-Sections Using HEC-GeoRAS ........................................ 147
Sarah North, Chris Long, Chris Nelson

Assessment of Flood Inundation Using Geometry Input Deprived from LIDAR ...................... 153
Fadi Shatnawi, Jonathan Goodall

Using GIS to Complete a Rehabilitation Plan for a High Hazard Dam ..................................... 154
Nathaniel Todea

SESSION 17: NHD – BIOLOGICAL AND ECOSYSTEMS

NHD-Based Modeling of Stream Habitat Fragmentation and Steelhead Distribution in California Anadromous Watersheds .......................................................... 155
Martina Koller, Connie Shannon, Robin Carlson, Tom Christy, Eric Haney, Stan Allen

Network-Based Analysis of Freshwater Ecosystems using the FLoWS Tools ....................... 156
David M. Theobald, John B. Norman

Modeling Green Sturgeon Habitat in the Central Valley, CA .............................................. 157
Ethan Mora, Daniel L. Erickson, Steve T. Lindley

Using GIS to Characterize Multiple Watersheds of Interest to Forest Products Industry Stakeholders ................................................................. 158
Douglas McLaughlin, John Beebe

SESSION 18: WATERSHED MODELS AND TOOLS

A Coupled Surface/Subsurface Model for Multi-Scale Evaluation of Watersheds .............. 159
George Matanga, Lorri Peltz-Lewis, Lisa Rainger

Spatial Trends in Water Chemistry and the Biotic Ligand Model ........................................ 160
James N. Carleton

Use of GIS Water Analysis Screening Tool for Identifying Critical Water Planning Areas ............................................................... 166
Mike Hill, Absolhossain Liaghat, David Jostenski

Development of the spatially Explicit Load enrichment Calculation Tool (SELECT) for Characterizing E. Coli Potential Within a Watershed ........................................... 167
Kendra Riebschleager, R. Karthikeyan, R. Srinivasan

SESSION 19: NHD/ARCHYDRO STREAMSTATS

Streamstats ArgGIS Server Web Application ............................................................................. 168
Kernell Ries
Extending USGS Streamstats to Estimate Daily Precipitation and Temperature Time Series for Kentucky

Kenneth Odom, John Guthrie, Mark Ayers

A Desktop Application to Assess the Sustainable Basin Yields and Surface-Water Resources in Massachusetts

Pete Steeves, Stacey A. Archfield

Arc Hydro Tools for Determining Stream Slope

Kermell Ries, Peter Steeves, Christine Dartiguenave

SESSION 20: HSPF MODELING AND SWAT

The San Francisco Bay Watershed Model for Copper Runoff from Brake Pad Wear Debris: Part I--GIS Data Processing for Model Setup

Paul B. Duda, Anthony S. Donigian, Jr., Driss Ennaanay

The San Francisco Bay Watershed Model for Copper Runoff from Brake Pad Wear Debris: Part II-Model Application and Results

Anthony S. Donigian, Jr., Brian R. Bicknell, James N. Carleton, Kirsten Sinclair Rosselot

The Santa Clara River HSPF Watershed Model: GIS Data Process

Driss Ennaanay, Anthony S. Donigian, Jr.

Development of an Open Source GIS Interface and Analysis Tools for the Soil and Water Assessment Tool (SWAT)

Jeyakanthan Veluppillai, Daniel P. Ames, Srinivasan Raghavan, David Wells

SESSION 21: HEC GeoRAS: CASE STUDIES II

Visualization of Groundwater-Surface Water interaction for the Rio Grande in Albuquerque, NM

Kelly Isaacson, Julie Coonrod, Venkatesh Merwade

A Sketch-Based Interface for Rapid Floodplain Assessment

Joshua Peschel, Tracy Hammond, Kelly Brumbelow, Tony Cahill

The Use of Retro-Modeling to Assess the Effects of River Engineering on Lower Mississippi River Stages

Jonathan Remo, Nicholas Pinter, Ruben Hiene

SESSION 22: NHD – WATER RIGHTS AND BASIN ASSESSMENTS

Indexing Water Rights Data to the National Hydrography Dataset

Fiona Renton, Jeff Kapellas, Leo Anguiano

Space-Time Analysis of Water Availability Model Data in GIS

Clark Siler, Tim Whiteaker, David Maidment

A Geo-Referenced Assessment of the Niger River Basin

Georgette Koty
SESSION 23: WATERSHED BIOLOGIC ANALYSIS

Predicting River Floodplain and Lateral Channel Migration with GIS for Salmon Habitat Conservation .............................................................. 208
  Jason Hall, Damon M. Holzer, Timothy J. Beechie

Spatial Modeling of Nearshore Habitats, Grand Canyon ................................. 209
  Michael Breedlove, Craig Anderson, Thomas Gushue

Biological Criteria and Stressor Identification as Inputs to Watershed Retrofit Analyses ............................................................... 210
  James Stribling, Michael J. Paul, Jennifer Stamp, Tham Saravanapavan, Shannon Moore

Site Specific GIS for Coastal Resource Managers, Where is that Eelgrass? .......... 211
  Brett Still, Ann Marten, Mark Manganello

SESSION 24: HYDROLOGIC INFORMATION SYSTEMS AND SPARROW

The Digital Watershed for Dynamic Decision Support ........................................ 212
  Jack Hampson, Stephen Bourne, Kelly Brumbelow

Application of Sparrow Model to Assess Pathogen Contamination in Two Basins of Texas ................................................................. 218
  Deepti, Meghna Babbar-Sebens, R. Karthikeyan

Modeling Spatial Distributions of Nonpoint Source Pollution Loadings in the Great Lakes Watersheds by Using the Distributed Large Basin Runoff Model ........ 219
  Chansheng He, Carlo DeMarchi, Thomas E. Croley

SESSION 25: SWAT MODELING

Multifaceted Univariate Sensitivity Analysis for Complex Watershed Simulation Models .................................................................................. 225
  Ryan Fleming, Christine Shoemaker, Jennifer Benaman

The Use of SWAT Modelling to Detect Small-Dam Influences on Hydrological Modifications in Downstream Reaches ........................................ 226
  Jacquelyn Duke, Joseph D. White, Shane Prochnow, Lisa Zygo

Comparing SWAT Overall Drainage Basin Predictions With Individual Sub-Basin Predictions ................................................................. 227
  Julie Earls, Branali Dixon, Frederick Bradley

Karst Hydrology Modeling Using Soil and Water Assessment Tool (SWAT) .......... 233
  Bakkiyalakshmi Palanisamy, Stephen R. Workman
SESSION 26: HEC CASE STUDIES

Development of a Hydrologic Model Using GIS Tools in a Watershed With Extreme Losses ............................................................................................................................................................................. 234
Jonathan Quebbeman

Coupling ArcHydro with a Land Use Forecasting Model to Mitigate Flood Hazard.................. 235
Graeme Aggett

HEC-GeoRAS Modeling—Application of the Optional Layers and Lessons Learned in the HEC-GeoRAS Modeling Environment .......................................................................................................................... 236
Andrew H. MacLeod

Adjusting HEC-RAS Cross Sections for Subsidence for the Master Drainage Plan at Bush Intercontinental Airport, Houston, Texas .................................................................................................................. 237
John Grounds, Beecroft Shittu, Brandon Grimm

SESSION 27: NHD – CASE STUDIES

Spatially Distributed Sedimentation Modeling in the Lake Lanier Watershed ......................... 238
J.B. Sharma, Marguerite Madden

Automated Matching of Sampling Sites to Characterize a Stream Reach .................................. 243
Alena Bartosova, Philip M. Graff

A Spatial Decision Support System for Watershed Fecal Pollution Control ............................ 244
Jy S. Wu, Z. Wang, W. Xiang

Real-Time Water Budget Assessment in South Florida ................................................................ 245
Joshua Peschel, Ron Mireau, Stephen Bourne, Kelly Brumbelow, Ken Stewart, Jack Hampson

SESSION 28: WATERSHED WATER QUALITY II

The Role of GIS in Regional Watershed-Based Facilities Planning .............................................. 251
Troy Deibert, Timothy Bate, Michael Benedict, Sara Hackbarth, Jeff Siegel, William Krill

Using GIS to Develop a Performance Based Watershed Improvement Plan ................................ 257
Lori Visone, Pete Wright

Geospatial Information Platform for Sustainable River Basins Through Stakeholders Collaboration ............................................................................................................. 262
Satoru Sadohara, Yuichi Sato

SESSION 29: NHDPLUS

Introduction to NHDPlus and Developing Advanced Applications ........................................... 268
Cindy McKay

National Hydrography Dataset Plus (NHDPlus) Applications Sampler ..................................... 269
Tommy Dewald
Using the National Hydrography Dataset Plus (NHDPlus) in Arc Hydro

Alan Rea

NHDPlus as the Core for Significant Nexus Analyses of Wetlands and Headwater Streams

William Cooter, Jay Rineer, Brandon Bergenroth, Shel Brannan, Kevin Pickren, David Cunningham

SESSION 30: HYDROLOGIC INFORMATION SYSTEMS – MODELING I

Developing Plug-ins for the Open Source MapWindow GIS Project and EPA's BASINS Watershed Analysis System

Ahmad Aburizaiza, Daniel P. Ames

A Team Approach to Building a GIS Integrated Hydrologic Model for the McKenzie River Watershed, Oregon

Bob DenOuden, David Richey, Karl Morgenstern

Spatially Explicit Water Budget Analysis Using GIS-Based Stocks-and-Flows Model

Yiwen Chiu, Sangwon Suh

SESSION 31: HYDROLOGIC INFORMATION SYSTEMS – MODELING II

Water Resources Modeling Using OpenMI-Based Web Services

Jon Goodall, Bella Robinson, Anthony Castonova, Fadi Shatnawi

An OpenMI Model Interface Implementation for Hydrologic Modeling in an Open Source GIS

Daniel P. Ames, Harold Dunsford

Guad2D: A Two-Dimensional Flow Model for Floodplain Mapping Over Time

Francisco Olvera, Martin Rodriguez, Javier Murillo

Application of Independent GIS Programming in NCCHE Numerical Modeling System

Yaoxin Zhang, Yafei Jia, Sam S.Y. Wang

SESSION 32: ARCHYDRO STORMWATER

Clark County Regional Flood Control District Arc Hydro (CCRFCD Arc Hydro): Toward Ongoing Stormwater Master Planning

Stephen Bourne, Stan Clawson, Harshal Desai, P.E., Kevin Eubanks, P.E.

Using ArcGIS to Standardize Data Processing for USEPA's Storm Water Management Model

Jennifer Austin Wardwell, Jonathan Quebbeman, PE

GIS Modeling for Stormwater and Groundwater Management

Suzanne Dallman

GIS-Enhanced Application of the Impervious Cover Method of Runoff Calculation

Kenneth J. Heim, James Herberich
SESSION 33: HYDROLOGICAL INFRASTRUCTURE

Sacramento-San Joaquin Delta Levees-Interrelationships ................................................. 313  
  David Hansen

Integrated GIS-Based Levee Assessments ............................................................................ 314  
  Timothy I. Mote, Greg Stemler, Chris Coutu, Serkan Bozkurt

Managing Local Government Environmental Water Utilities in CAD and GIS ..................... 315  
  Jason Hill

The 1,600 Mile Challenge: Terrain Processing & Floodplain Mapping of the Upper Mississippi and Missouri Rivers in FEMA Region VII ................................................................. 316  
  Andy Bonner, Rick Nusz

SESSION 34: ARCHYDRO – CASE STUDIES

A Pilot Project to Develop and Implement Streamstats and NHDPlus Applications Using Local Resolution Data in the Upper French Broad River Basin, North Carolina ............................................................................................................................... 317  
  Kirsten Tighe, Silvia Terziotti, Chad Wagner

Regression Modeling and NHDPlus to Improve Pathogen Beach Advisories ....................... 318  
  Michele Cutrofello, Timothy Bondelid, Breda Munoz

Using GIS to Calculate Bacterial Loadings Along the Texas Gulf Coast ................................ 324  
  Stephanie L. Johnson, David R. Maidment

Development of a Web-Based Toxic Spill Model .................................................................. 329  
  William B. Samuels, Christopher Ziemniak, Michael Monteith, Rakesh Bahadur, Douglas Ryan

SESSION 35: HYDROLOGIC INFORMATION SYSTEMS – BASINS

Basins 4.0: Expanding Capabilities in an Open GIS Framework ............................................. 335  
  Paul R. Hummel, John L. Kittle, Jr., Paul B. Duda, Mark H. Gray, James N. Carleton

Application of Hydrological Simulation Program-Fortran (HSPF) for Hydrological Modeling of a Watershed in Southern Turkey ................................................................. 341  
  Mansoor Baloch

  Harold Dunsford, Daniel P. Ames, Gerry Laniak, Jack Kittle

Using Gis to Better Model and Identify Urban Water Use Patterns ..................................... 343  
  Austin Polebitski, Richard Palmer

SESSION 36: HYDROLOGIC INFORMATION SYSTEMS – DATA SOLUTIONS

Map Interfaces to USGS Water-Resources Data .................................................................... 344  
  David McCulloch, Gary T. Fisher
National Weather Service Use of the KML File Format ............................................................... 345
Tim Brice, Corey Pieper

Kisters Time-Series Management System and its Integration Into a Multi-Purpose
and Spatio-Temporal Hydro-It-Landscape .............................................................................. 346
Stefan Fuest, Roland Funke, Stan Malinky, Brad St.Cyr

WebH2O, A Low-Cost, Feature-Rich Web-Based EIMS, GIS, and Data Analysis
Tool ........................................................................................................................................ 353
Pascual Benito

SESSION 37: MODELING – FLOOD

Extreme Precipitation Analysis Tool (EPAT)...An Alternative to Site Specific,
Regional, and HMR PMP ......................................................................................................... 354
Rob Rahrs, Greg Gagliano, Bill Badini, John Henz

Real-Time Flood Forecasting, The SARA Test Study for Bexar County ................................. 355
Nefi Gaza, Anthony Henry

Use of GIS Visualization and Google Earth Mapping Service to Aid Flood Hazard
Impact Decision Making ........................................................................................................ 358
David Judi, Steven Burian, Alfred Kalyanapu, Tim McPherson

Estimation of Basin Hydrologic Characteristics for Gridded Flash Flood Guidance ............... 359
John A. Schmidt, James H. Paul, Anthony J. Anderson, Britt E. Westergard

SESSION 38: WATERSHED PLANNING AND WATER USE

GIS Analysis for Watershed-Based Planning .......................................................................... 365
Lainie Levick, Kristine Uhlman, D. Philip Guertin

How Utilities May Use GIS to Estimate Tourist Population Served ................................... 366
Yassert Gonzalez

Modeling the Cumulative Effects of Forest Fire on Watershed Hydrology ........................... 367
Crystal S. Stonesifer, Donald F. Potts, Lloyd P. Queen

Estimating Net Irrigation Requirements for Utilities Service Areas .................................... 373
Yassert Gonzalez, Jay W. Yingling, Corey Denninger

SESSION 39: REMOTE SENSING I

Improving Runoff Simulation with Remotely Sensed Cover Estimates ................................ 374
Philip Heilman, Mariano Hernandez, Steven Hagen

Field Verification of a Remote-Sensing Based Method to Quantify Irrigated
Acreages in the Lower Rio Grande Valley, New Mexico ...................................................... 375
David Jordan, Christopher Park

Utilization of Remotely Sensed Data for Mapping Impervious Surfaces .............................. 376
Brenda Berasi, Scott Stoodley

Boise River Green LiDAR ....................................................................................................... 382
Linda Davis, Diego Caamano
SESSION 40: LANDUSE – CLASSIFICATIONS AND ASSESSMENTS

Public Involvement Enhances Watershed Land Use GIS Data Development
Stephen Skripnik, Eileen White ................................. 387

Back River Watershed Initial Scope and Water Quality Assessment Investigation
Chris Nisterowicz ................................................................. 393

Water Quality-Based Facilites Planning alternative Analysis Using-GIS
Michael Schwar, Timothy Bate, Michael Benedict, Sara Hack Barth, Jeff Siegel, William Krill,
Troy Deibert ............................................................................. 394

A Geoinformatic Classification of Sierra Nevada Lakes: Can Terrestrial
Inventories Benefit from Including Water Resources?
David Waetjen, Joshua H. Viers, Hugh D. Safford ............................................................................. 399

SESSION 41: WEB PUBLISHING I

Framework and Implementation of a Spatially Integrated Hydrologic Modelling
Web Application ........................................................................ 400
Averill Cate Jr.

Drinking Water Quality (DWQ) Geographic Information System (GIS) ................................................. 401
Paul Neary

Implementing GIS on the Web for the Enterprise ................................................................................. 402
Ali Diba, Robert Eadie, Meade Maleki

Federal Interagency Hydrology and Hydraulics GIS Applications Workgroup ................................. 403
William Merkel, David Wells

SESSION 42: HYDROLOGY – COASTAL APPLICATIONS

ACES: Building a GIS-Based Analytical Framework for Coastal and Estuarine
Study ......................................................................................... 406
Sandra Fox, Stephen Bourne, Clay Montague, Aisa Ceric, Palmer Kinser

e-Estuary: Developing a Decision-Support System for Coastal Management ......................................... 412
Naomi Detenbeck, M.C. Pelletier, M. Abdelrhmama, S. Rego, M. Nixon

Coastal Risk Analysis: Combined Effects of Storm Surge and Rainfall ................................................ 413
Kelly Knee, Chris Galagan

Comparing the Influence of Riparian Zone and Catchment Land Cover to Indices
of Biotic Integrity ......................................................................... 419
Judith Okay, Peter Claggett, Frederick Irani

SESSION 43: GROUNDWATER I

The Arc Hydro Modflow Data Model ................................................................................................. 420
Norm Jones, Gil Strassberg
Integration of GIS and EVS for Three-Dimensional Hydrogeologic Visualizations

Eric Rogoff, John Kivett, Christopher Hickman

Integration of Regional Hydrologic Modeling Using FORTRAN and ArcGIS to Evaluate the Effects of A+3 degreesC Climate Change on Recharge and Runoff

Alan Flint, Lorraine E. Flint, Michael D. Dettinger

GIS, A Management Tool for Long-Term Monitoring Programs

Ji-Young Kim, Al Easterday, Gina Calderone, Catherine Guido

SESSION 44: REMOTE SENSING II

Optimizing Runoff Production in Watershed modeling Using Multispectral, Hyperspectral, and LiDAR imagery

Raul Mercado, PE, CFM

Sensitivity of Distributed Hydologic Model Output to Surface Hydraulic Roughness Parameterization Technique

Alfred Kalyanapu, Steven J. Burian, Timothy N. McPherson

Evaluating Methods to Estimate Total and Directly-Connected Impervious Areas in Urban Watersheds

Alexis Dufour, Douglas Wright

Using Satellite Data to Improve the Accuracy of River Flow Forecasting Models A Case Study of Zayande-Rood River Basin, Iran

Ahmad Abrishamchi, Massoud Tajrissy, Ali Tafarojnoruz, Behdad Chehrenegar, Shadab Shadzad

SESSION 45: LANDUSE AND CLIMATE

The Impacts of Land Use Change on Water Resources and Traditional Acequia Culture in North-Central New Mexico

Quita Ortiz, Bobby Creel, Christopher Brown, Sam Fernald, Steve Guldan

Vulnerability of U.S. Water Supply to Projected Climate Change

Matt Sagues, Edwin Maurer, Leonard Sklar

Using GIS to Determine Stream Flow in Response to Climate Change

Julie Coonrod

Land Use Based GIS Water Demand Forecasting Application

Ming-Chin Jeng

SESSION 46: WEB PUBLISHING II

Web-Based GIS for Sediment TMDL Implementation in the Imperial Valley, California

Serene Ong, Nathan Strout, Paul Burgess

Geospatial Reporting of Water Resource Condition Assessments

Marian Norris, Jeff Runde, James Pieper, Mark Lehman, John Paul Schmitt, Shawn Carter
Making Science Affordable: Open-Source Tools for Mapping and Data Analysis
Brent Pedersen, Yoram Rubin, Pascual Benito, Doron Rotem

SESSION 47: DIGITAL WATERSHEDS

WIKIWATERSHED: Developing Cyberinfrastructure for Watershed Management and Education
Susan E. Gill, Anthony Auftenkampe, C. Dana Tomlin, Robert Cheetham

Northeast Florida Runoff Analysis Using the Integrative Environmental Assessment Toolkit
Nathan Martin, Adrian Lin, Aisa Ceric

Identification of Erosion Potential Areas in Lake Tana Catchment, Ethiopia
Shimelis G. Setegn, R. Srinivasan, B. Dargahi

SESSION 48: GROUNDWATER II

GIS Implementation for Evaluating Groundwater Artificial Recharge in Eastern Colorado
Nathan T. Smith, Gordon McCurry, Andrew Horn

Utilizing the Power of GIS for Surface Water/Groundwater Modeling
Brian J. Heywood, Karlyn J. Heisen, Kristen E. Hard

The Role of GIS in the Dewey-Burdock Uranium Mine Permit
Jason Love

Morris County Water Balance Model
Sumant Mallavaram, Charles V. Beckers, Jr., Guy Apicella, Michael D. Lehtinen

SESSION 49: HYDROLOGIC INFORMATION SYSTEMS – DATA COLLECTION

Development of a Water Quality Management and Spill Response Information System
Janey Smith, Eugene J. LeBoeuf, Mark D. Abkowitz, James P. Dobbins, Edsel B. Daniel

GIS Utilization Within a Civil Engineering Firm
Jay Halligan, Paul Welle

Utilizing Mobile GIS for H&H Field Reconnaissance
Noelle Gaspard, Jessica Baker

Mobile Computing Tools for Field Data Collection Including GPS Photo Capture
Robin Wood

POSTER SESSION

A GIS/RUSLE Approach to Estimating Potential Erosion Risk
Eric Berntsen, Annalisa Kihara
Emergency Preparedness Mapping Using HEC-GeoRAS .......................................................... 491
Jennifer Buchanan

Determining Flood Hazard Zones Using GIS ............................................................. 497
Jennifer Buchanan

BASINS 4.0 (Open Source GIS): Better Assessment Science Integrating Point and Non-Point Sources .................................................................................................................. 501
James Carleton, Ed Partington, Marjorie Wellman, David Wells, Jack Kittle, Paul Duda

GIS Analysis for a Colorado Water Rights Change Case .................................................. 502
Greg Johnson, Cari Bischoff

Analyzing Depth to Water Based on a Cooperative Well Measuring Program in San Bernadino and Riverside Counties, California .............................................................. 507
Jason Kennedy

Identification of Coalbed Natural Gas-Discharge Reservoirs with Aster Data and GIS in Powder River Basin, Wyoming ........................................................... 508
Scott Miller, Ramesh Sivanpillai

Spatial and Temporal Analyses of Coalbed Natural Gas and Co-Produced Water in the Powder River Basin, Wyoming ........................................................... 509
Scott Miller, Teal B. Wyckoff, Erica Bishop

Hydraulic Model of the Paraguay River and Pantanal Wetland in South America ............ 510
Francisco Olivera, Adriano R. Paz, Martin Bravo, Dante G. Larentis, Walter Collischonn,
Carlos E.M. Tucci

The Role of Geographic Information Systems in the Development of Predictive Disturbance Models of Biological Conditions in Streams of the Western United States ...................................................................................................................................... 511
James Orlando, Kimberly A. Jones, Ian R. Waite

Modeling Surface Runoff in the Mustang Creek Basin, California, Using the Soil and Water Assessment Tool (SWAT) ................................................................................... 512
Dina K. Saleh, Charles R. Kratzer

Land Use Forecasting Alternatives for Assessing Future Water Use Scenarios for the Placer County Water Agency (PCWA) ............................................................. 513
Greg Cantrell, Allan Scott

Spatial Analysis of Groundwater Resources in El Toro, Monterey County ..................... 514
Gordon Thrupp, Alene Pearson, Brad Janke German Criollo, Howard Franklin

National Hydrography Dataset Plus (NHDPlus) .......................................................... 515
Santina Wortman, Tommy DeWald

ADDITIONAL PAPERS

Water Resources Impact ............................................................................................ 516
N. Earl Spangenberg

SWAT Interface Based on Korean Hydro Geographic Information System .................. 568
Yun-Seok Choi, Kim Kyung-Tak

A GIS Based Framework for Integrated Time-Varying Agrohydrological Forecasting System .................................................................................................................. 569
Yonas Beyene Ghile, R.E. Schulze
Utilizing Landsat 7TM and NAIP Imagery to Calculate the Evapotranspiration of the Discharge Area in Red Rock Basin ................................................................. 570
   Liang Jiang, Lori A. Carpenter

The Hydrologic Atlas of the State of Durange, Mexico ........................................ 571
   José Návar

GIS Modeling of River and Flood Hazards ........................................................................ 578
   Trihono Kadri

Parameter Estimation of Topmodel Using GIS and Genetic Algorithm ......................... 579
   Kyung-Tak Kim, Choi Yun-Seok, Kim Joo-Hun

Predicting Downstream Flow Impacts of Dams Via Artificial Neural Network Modeling ........................................................................................................... 580
   Brian Kraus, Denis Dean

GIS and Time-Variant Watershed Modeling ................................................................... 581
   Clark Liu, Krispin Fernandes

Managing Water Resources Through Comprehensive Land and Water Use Modeling ................................................................................................................................. 582
   Mehrshad Nourani

Simulations of Nutrient Loading from On-Site Wastewater Treatment System to the Deschutes River, Oregon Using AVGWLF ......................................................... 583
   Amber Patrick, Kyle E. Murray

Using a Geographic Information System to Monitor the Establishment of Submerged Aquatic Vegetation in a South Florida Constructed Wetland ........................................................................................................... 584
   Amy Peters, Michael Korvela

Different Approaches for Debris Flow Modeling and Hazard Assessment: The Case of Laures Watershed, Valle D'Aosta, Italy ......................................................................................................................... 585
   Raffaele Rocco, Marilena Segato, Evelyne Navillod, Massimo Coccato

SWAT Interface Based on Korean Hydro Geographic Information System ................... 586
   Yun-Seok Choi, Kim Kyung-Tak
