# Table of Contents

Improving Q-Factor of Monolithic Inductor by Using Double Ground Shield - N+ Buried and Polysilicon - a Realistic Simulation ................................................................. 1  
Lagoia Fonseca, L. C. Kretly

Inverse Model Identification of 2-Axes Pneumatic Artificial Muscle (PAM) Robot Arm Using Double NARX Fuzzy Model and Genetic Algorithm ......................................................... 5  
Ho Pham, Huy Anh, Kyoung Kwan Ahn, Yoon Jong Il

Analysis and Evaluation of Traffic-Performance in a Backtracked Routing Network-on-Chip ......................................................... 13  
P. T. Hong, Phi-Hung Pham, Xuan-Tu Tran, Chulwoo Kim

Dynamic Model Identification of the 2-Axes PAM Robot Arm Using Neural MIMO NARX Model ......................................................... 18  
Ho Pham, Huy Anh, Kyoung Kwan Ahn, Yoon Jong Il

Prototyping of a Network-on-Chip on Spartan 3E FPGA ......................................................... 24  
Huynh Viet Thang, Pham Ngoc Nam

A Comparative Study of Position Control of a SMA Actuated Manipulator ......................................................... 29  
S M Mahfuzur Rahman, Kyoung Kwan Ahn, Ho Pham Huy Anh

Design and Implementation of Parallel Hierarchical Finite State Machines ......................................................... 33  
Valery Sklyarov, Ioulia Skliarova

Utilize Absorption Modulation of an Injection- Locked Fabry-Perot Laser Diode to Demonstrate All-Optical Multi-Wavelength Conversion ......................................................... 39  
Tran Quoc Hoi, Cheong Sik Cho, Yong Deok Jeong, Yong Hyub Won

Introduction to Quantitative Feedback Theory For Robust Force Control of Load Simulator ......................................................... 42  
Quang Truong Dinh, Kyoung Kwan Ahn, Jong Il Yoon

HEVS: Herbal Effect Visualization System for Treatments in Oriental Medicine ......................................................... 48  
Cao Thang, Kamei Katsuari, Dang Tuan Linh

Multitask Automatic Manoeuvring Systems Using Recursive Optimal Control Algorithms ......................................................... 54  
Hung D. Nguyen

A Kerberos-based EAP Method for re-authentication with integrated support for fast handover and IP mobility in Wireless LANs ......................................................... 60  
Herbert Almus, Eduard Brise, Klaus Rehensburg

On Some Fundamental Properties of P2P Push/Pull Protocols ......................................................... 66  
Renato Lo Cigno, Alessandro Russo, Damiano Carra

Vietnamese Spam Detection based on Language Classification ......................................................... 73  
Nguyen Tuan Anh, Tran Quang Anh, Nguyen Ngoc Binh

TCP-MR: Achieving End-to-End Rate Guarantee for Real-Time Multimedia ......................................................... 79  
Inhee Kim, Yunmo Kim, Moonsoo Kang, Jeonghoon Mo, Daehan Kwak

Vinh Tran Quang, Takumi Miyoshi

Dynamic Contention Window Adaptation (DCWA) in IEEE 802.11e Wireless Local Area Networks ......................................................... 91  
Rastin Pries, Stefan Menth, Dirk Staehle, Michael Menth, Phuoc Tran-Gia

Modular Exposure of Next Generation Network Services to Enterprises and Testbed Federations ......................................................... 97  
Florian Schreiner, Sebastian Wahle, Niklas Blum, Thomas Magedanz

Hard Decision Packet Combining Methods for Industrial Wireless Relay Networks ......................................................... 103  
Elisabeth Uhlemann, Andreas Willig$\S$

Joint Network Coding and Power Control for Cellular Radio Networks ......................................................... 108  
Tuan Tran, Dong Nguyen, Thinh Nguyen, Duc Tran.

iii
# Table of Contents

Hybrid ARQ-Random Network Coding for Wireless Media Streaming ......................................................... 114  
Dong Nguyen, Tuan Tran, Thinh Nguyen, Bella Bose

Application of Raytracing Technique for Predicting Average Power Distribution in Indoor Environment ........ 120  
Nhut Tran-Minh, Tuan Do-Hong

Characterizing Chord, Kelips and Tapestry algorithms in P2P streaming applications over wireless network ........................................................................................................... 125  
Hung Nguyen Chan, Khang Nguyen Van, Giang Ngo Hoang

An energy-efficient distributed routing algorithm for Wireless Sensor Networks ........................................ 131  
Hugues Smets, Kris Steenhaut, Ann Nowe

Load-aware Routing Protocol for Multi-radio Wireless Mesh Networks ....................................................... 137  
Anh-Ngoc Le, Dong-Won Kim, You-Ze Cho

ART: A Dynamic Medium Access Protocol for Closed Light-Trail Networks ............................................. 143  
Nguyen Thanh Dao, Ngocson Vu, Duchan Tran, Jinwoo Park

Building a Plan-Supported Grid Collaborative Framework ......................................................................... 149  
Binh Nguyen Thanh, Doan B. Hoang

A Qualitative Measurement Survey of Popular Internet-based IPTV Systems .............................................. 155  
Tobias Hofstel, Kenji Leibnitz

mSCTP-based Proxy in Support of Multimedia Session Continuity and QoS for IMS-based Networks .......... 161  
Nguyen Hau Thanh, Nguyen Tai Hung, Tran Ngoc Lan, Tran Quang Thanh, Do Hanh, Thomas Magedanz

Fast segmentation based on a hybrid of clustering and morphological approaches .................................. 168  
Tien Dzung Nguyen, Viet Dzung Nguyen, Thuan Duong Ba Hong, Nam Chul Kim

High-Rate Space-Time Block Coding Schemes ............................................................................................ 174  
Duy H. N. Nguyen, Ha H. Nguyen, Hoang D. Tuan

Nonlinear Filtering for the Linear Fractional Transformation Model ......................................................... 178  
Syed Ahmed Pasha, Hoang Duong Tuan

Constructing local cyclic code based on compound decompositions of two polynomial rings .................. 184  
Thien D. Ngo, Bac H. Dang, Binh Nguyen

Bit Priority-Based Biometric Watermarking ................................................................................................ 189  
Tuan Hoang, Dat Tran, Dharmendra Sharma

A Cooperative Relaying Protocol without Reducing Spectral Efficiency for Wireless Communications Systems ................................................................. 194  
Ho Van Khuong, Pham Hong Lien

Security Improvement for CSK via Breaking Time Correlation among State Variables ............................. 198  
Thang Manh Hoang, Laurent Larger

Robust Speech Recognition Using Adaptive Noise Threshold Estimation And Wavelet Shrinkage ............ 204  
Tuan Van Pham, Gernot Kubin, Erhard Rank

An LP-based blind Model for Restoring Bone-conducted Speech .............................................................. 210  
Thang Tat Vu, Masashi Unoki, Masato Akagi

Reliable Voice Activity Detection Algorithms Under Adverse Environments ............................................. 216  
Michael Stadtschnitzer, Tuan Van Pham, Tang Tan Chien

Phoneme-based Spectral Voice Conversion Using Temporal Decomposition and Gaussian Mixture Model .................................................................................................................. 222  
Binh Phu Nguyen, Masato Akagi

Optimal Triplet Halfband Filter Banks with K-Regularity and Image Coding Application * .................. 228  
H. H. Kha, H. D. Tuan, T. Q. Nguyen
# Table of Contents

**Tone Recognition of Vietnamese Continuous Speech using Hidden Markov Model** .......................................................... 233
*Nguyen Hong Quang, Nocera Pascal, Castelli Eric, Trinh Van Loan*

**Opportunistic Spectrum Access Using Fuzzy Logic for Cognitive Radio Networks** ..................................................... 237
*Hong-Sam T. Le, Hung D. Ly*

**Partial one bit time reversal for UWB impulse radio multi-user communications** ...................................................... 243
*Hung Tuan Nguyen*

**On the Use of Quasi-Orthogonal Space-Time-Frequency Codes in MB-OFDM UWB** .................................................. 249
*L. C. Tran, A. Mertins*

**The Perceptual Wavelet Feature for Noise Robust Vietnamese Speech Recognition** ............................................ 255
*Nguyen Quoc Trung, Phung Trung Nghia*

**A Bandwidth-efficient Cooperative Relaying Scheme with Space-Time Block Coding and Iterative Decoding** ......... 259
*Ho Van Khuong, Tho Le-Ngoc*

**An Improved Soft Threshold Method for DCT Speech Enhancement** ................................................................. 265
*Phu Ngoc Le, Eliathamby Ambikairajah, Eric Choi*

**Performance of a Non-Orthogonal STBC over Correlative Fading Channels** ......................................................... 269
*Rainfield Y. Yen, Hong-Yu Liu, Chun-Chi Lee, Shang-Chieh Nan, Ming-Chih Hong*

**On Constellation Permutations in Decode-and-Forward Relay Communications** ............................................. 275
*Nam H. Hn, Ha H. Nguyen, Tho Le-Ngoc*

**A Modified Spatial Spread Spectrum Method for Digital Image Watermarking** ............................................... 279
*Tuan T. Nguyen, H. D. Tuan*

**The Performance Analysis of Advanced T-DMB using Unequal Error Protection System and Hierarchical Modulation** .................................................................................................................. 285
*Jongtae Bae, Minhyuk Kim, Suksoon Choi, Taedoo Park, Namsoo Kim, Jiwon Jung*

**An Improved Method for Analyzing & Compensating of GDV in Transmission Line for broadband satellite system** .................................................................................................................. 291
*A.R. Eskandari, L. Mohammady*

**Highly accurate Geometric Correction for NOAA AVHRR data considering the feature of elevation, coastline and reference data** .................................................................................................................. 297
*An Ngoc Van, Mitsuru Nakazawa, Yoshimitsu Aoki*

**EFFICIENT LOW COMPLEXITY PARTIAL CROSSTALK CANCELLATION ALGORITHM BY USING SUCCESSIVE LINEAR CONVEX RELAXATION AND BRANCH AND BOUND APPROACHES IN VDSL NETWORKS** .................................................................................................................. 303
*M. Maesumi, M. A. Masnadi-Shirazi*

**Localization Based on the Hybrid Extended Kalman Filter with a Highly Accurate Odometry Model of a Mobile Robot** .......................................................................................................................... 308
*Tran Huu Cong, Young Joong Kim, Myo-Taeg Lim*

**Ultra-Wideband Antennas: Design and Modeling** ............................................................................................................. 314
*Yvan Duroc, Anthony Ghiotto, Tan-Phu Vuong, Smail Tedjini*

**Comparison of Two Types of Electric Field Integral Equation for 3-Dimensional Waveguide** .......................... 320
*Masahiro Tanaka, Kazuo Tanaka*

**Design and Analysis of a Trellis-Based Receiver Exploiting Two Co-located Antennas with Dual Polarizations** ......................................................................................................................... 326
*Tran Thuc Linh, S. Badri Hoerar*

**Estimation of High Frequency NLOS Path loss in Street-Cell Environment** ....................................................... 332
*Amornchai Amornthipparat, Hiroshi Shirai, Kenya Yonezawa, Takashi Inoue, Yuichi Nakamura*
# Table of Contents

Yu Van Yem, Nguyen Huu Thanh

Polarization Control of Nanometric Optical Fields by Surface Plasmon Polariton Gap Waveguides ................................................................. 343  
Kazuo Tanaka, Masahiro Tanaka, Kiyofumi Katayama

Application of Array Antenna For a High-speed ISDB-T Reception .................................................................................. 347  
Dang Hai Pham, Tomohisa Wada

Genetic Algorithm for Optimization of HEMT Model Parasitic Parameters .................................................................................. 351  
Phan Hong Phuong, Tong Duc Thanh

Channel Characteristics in Actual SISO and MIMO Propagation Environments .................................................................................. 356  
Bui Huy Phu, Hiroshi Nishimoto, Toshihiko Nishimura, Takeo Ohgane, Yasutaka Ogawa

Electromagnetic characterisation of Pani/PU in multilayered structure, application for EMI protection at microwave frequency .................................................................................. 362  
Hoang Ngoc Nhan, Pham Hong Thinh, Nguyen Thi Lan Huong

Performance Assessment of Meta-PSO on EM Optimization Problems .................................................................................. 366  
S. Selleri, M. Mussetta, P. Pirinoli, R. E. Zich, L. Matekovits

Miniaturizing the Axial Mode Helical Antenna .................................................................................. 370  
Amir H. Safavi-Naeini, Omar Ramahi

Efficient Finite-Element Solution for the Problem of Scattering from Multiple Cavities and Holes .................................................................................. 376  
Babak Alavikia, Omar M. Ramahi

Effect of Optical Losses on Characteristics of Silicon Nanocrystal-Er-doped Fiber Amplifier .................................................................................. 379  
A. Salman Ogli, A. Rostami

Broadband Nearly Zero Ultra-Flattened Dispersion Single Mode Holey Fibers .................................................................................. 385  
Nguyen Hoang Hai, Yoshinori Namihiro, Shubi Kaijage, Tatsuya Kinjo
