ISI 2008
2008 IEEE International Conference on Intelligence and Security Informatics

June 17 – 20, 2008, Taipei, Taiwan
Conference Venue: Grand Formosa Regent Hotel

Hosted by:

Central Police University, Taiwan
National Taiwan University of Science and Technology, Taiwan
Institute of Information Science, Academia Sinica, Taiwan
National Taiwan University, Taiwan

IEEE Catalog Number: CFP08ITI-PRT
ISBN: 978-1-4244-2414-6
Library of Congress: 2008903429
# Table of Contents

Preface .................................................................................................................. ix  
Message from the Program Chairs ........................................................................ xi  
Conference Organizers .......................................................................................... xii  
Program Committee .............................................................................................. xv  
Sponsors .................................................................................................................. xviii  
Programs ................................................................................................................ xix  
Keynote Talks ......................................................................................................... xxiv  
Invited Talks ........................................................................................................... xxix  
Technical Papers .................................................................................................... xliii

## PART I: Long Papers

### Knowledge Discovery and Text Mining

Analysis of Cyberactivism: A Case Study of Online Free Tibet Activities ................. 1  
  *Tianjun Fu and Hsinchun Chen*

Developing Ideological Networks using Social Network Analysis and Writeprints: A Case Study of the International Falun Gong Movement .................................................. 7  
  *Yi-Da Chen, Ahmed Abbasi and Hsinchun Chen*

Detecting Deception in Testimony ............................................................................ 13  
  *A. Little and D.B. Skillcorn*

Subverting Prediction in Adversarial Settings ............................................................ 19  
  *J.G. Dutrisac and D.B. Skillcorn*

Analyzing Content Development and Visualizing Social Interactions in Web Forum ....................................................................................................................... 25  
  *Christopher C. Yang and Tobun D. Ng*

Link Analysis Based on Webpage Co-occurrence Mining – a Case Study on a Notorious Gang Leader in Taiwan .......................................................... 31  
  *Yi-Ting Peng and Jau-Hwang Wang*

A Study on Early Decision Making in Objectionable Web Content Classification ...... 35  
  *Lung-Hao Lee, Cheng-Jye Luh and Chih-Jie Yang*

Information Sharing and Privacy Protection of Terrorist or Criminal Social Networks ........................................................................................................ 40  
  *Christopher C. Yang*

A Framework for Privacy-Preserving Cluster Analysis ............................................ 46  
  *Benjamin C. M. Fung, Ke Wang, Lingyu Wang and Mourad Debbabi*
WikiNetViz: Visualizing Friends and Adversaries in Implicit Social Networks ............................52
    Minh-Tam Le, Hoang-Vu Dang, Ee-Peng Lim and Anwitaman Datta

Constrained K-Closest Pairs Query Processing Based on Growing Window in Crime Databases ....58
    Shaojie Qiao, Changjie Tang, Huidong Jin, Shucheng Dai and Xingshu Chen

Distributed Processing of Event Data and Multi-faceted Knowledge in a Collaboration Federation ....64
    Stanley Y.W. Su, Howard Beck, Seema Degwekar, Jeff DePree, Xuelian Xiao, Chen Zhou
    and Minsoo Lee

A Latent Semantic Indexing and WordNet based Information Retrieval Model for Digital Forensics ....70
    Lan Du, Huidong Jin, Olivier de Vel and Nianjun Liu

Terrorism Informatics

Bioterrorism Event Detection Based on the Markov Switching Model: A Simulated Anthrax
    Outbreak Study ......................................................................................................................76
    Hsin-Min Lu, Daniel Zeng and Hsinchun Chen

Simulating Bioterrorism through Epidemiology Approximation .............................................82
    Ryan Layfield, Murat Kantarcioglu and Bhavani Thuraisingham

Discovery of Improvised Explosive Device Content in the Dark Web ....................................88
    Hsinchun Chen

IEDs in the Dark Web: Genre Classification of Improvised Explosive Device Web Pages ............94
    Hsinchun Chen

Cyber Extremism in Web 2.0: An Exploratory Study of International Jihadist Groups ..................98
    Hsinchun Chen, Sven Thoms and Tianjun Fu

Sentiment and Affect Analysis of Dark Web Forums: Measuring Radicalization on the Internet ......104
    Hsinchun Chen

Emergency Response and Infrastructure Protection

RiskPatrol: A Risk Management System Considering the Integration Risk Management with
    Business Continuity Processes ...............................................................................................110
    Shi-Cho Cha, Pei-Wen Juo, Li-Ting Liu and Wei-Ning Chen

A Game Theory Approach for an Emergency Management Security Advisory System ...............116
    Yi-Ming Chen, Dachrahn Wu and Cheng-Kuang Wu

Efficient and Complete Remote Authentication Scheme with Smart Cards .............................122
    Wen-Gong Shieh and Wen-Bing Horng

Reading Order Independent Grouping Proof for RFID Tags ....................................................128
    Yuanhung Lien, Xuefei Leng, Keith Mayes and Jung-Hui Chiu
Cyber Security

Identity Management Architecture..............................................................137
   Uwe Glaesser and Mona Vajihollahi

Sighttiming Scheme based on Aggregate Signatures......................................145
   Duc-Phong Le, Alexis Bonnecaze and Alban Gabillon

PRM-Based Identity Matching Using Social Context .....................................150
   Jiexun Li, G. Alan Wang and Hsinchun Chen

Intrusion Detection

Unknown Malcode Detection via Text Categorization and the Imbalance Problem .................................................................156
   Robert Moskovitch, Dima Stopel, Clint Feher, Nir Nissim and Yuval Elovici

Automated Network Feature Weighting-Based Anomaly Detection......................162
   Dat Tran, Wanli Ma and Dharmendra Sharma

Intrusion Activity Projection for Cyber Situational Awareness ..........................167
   Shanchieh J. Yang, Stephen Byers, Jared Holsoonpl, Brian Argauer and Daniel Fava

Advanced Sensor Fusion Technique for Enhanced Intrusion Detection .....................173
   Ciza Thomas and Narayanaswamy Balakrishnan

A Real-time Network Intrusion Detection System Based on Incremental Mining Approach ..........................................................179
   Ming-Yang Su, Kai-Chi Chang, Hua-Fu Wei and Chun-Yuen Lin

PART II: Short Papers

Knowledge Discovery and Text Mining

Hiding Clusters in Adversarial Settings..........................................................185
   J.G. Dutrisac and D.B. Skillicorn

Models and methods for prediction problem of evolving graphs ........................188
   Anurat Chapanond and Mukkai S. Krishnamoorthy

A Locality Model of the Evolution of Blog Networks......................................191
   Mark Goldberg, Malik Magdon-Ismail, Stephen Kelley and Konstantin Mertsalov

Novel Position-Coded Methods for Mining Web Access Patterns ........................194
   Wenjia Wang and Phuong Thanh Cao-Thai

A Template Alignment Algorithm for Question Classification ........................197
   Cheng-Lung Sung, Min-Yuh Day, Hsu-Chun Yen and Wen-Lian Hsu

Swarm Intelligence Based Rough Set Reduction Scheme for Support Vector Machines ......................200
   Ajith Abraham and Hongbo Liu
A Study of Anti-robot Agent Mechanisms and Process on Online Games ................................................. 203
  N.W. Lo and Shiou-Hung Chen

Botnets, and the CyberCriminal Underground ......................................................................................... 206
  Clinton J. Mielke II and Hsinchun Chen

An Integrated Approach to Mapping Worldwide Bioterrorism Research Capabilities ................................. 212
  Yan Dang, Yulei Zhang, Nichalin Suakkaphong, Cathy Larson and Hsinchun Chen

Cyber Security, Emergency Response, and Infrastructure Protection

Anonymous Attribute Authentication Scheme Using Self-Blindable Certificates ..................................... 215
  Shinsaku Kiyomoto and Toshiaki Tanaka

Keying Material Based Key Pre-distribution Scheme ............................................................................. 218
  Zhihong Liu, Jianfeng Ma, Qiping Huang and SangJae Moon

Secure Remote Control Model for Information Appliances ...................................................................... 222
  Wen-Gong Shieh, Jian-Min Wang and Wen-Bing Horng

Efficient Keyword Index Search over Encrypted Documents of Groups ....................................................... 225
  Hyun-A Park, Justin Zhan, Gary Blosser and Dong Hoon Lee

Data Hiding Using VQ Index File ............................................................................................................. 230
  Yu-Jie Chang and Ja-Chen Lin

A New On-line Signature Verification by Spatio-Temporal Neural Network ............................................. 233
  Maryam Moghadam Fard, Mehdi Moghadam Fard and Nasser Mozayani

Multiplicatively-Weighted Order-k Minkowski-Metric Voronoi Models for Disaster Decision Support Systems ......................................................................................................................... 236
  Ickjai Lee and Christopher Torpelund-Bruin

Restoration of Linear Motion and Out-of-Focus Blurred Images in Surveillance Systems ....................... 239
  Chung-Hao Chen, Te-Yu Chien, Wen-Chao Yang and Che-Yen Wen

A Novel Risk Assessment System for Port State Control Inspection ....................................................... 242
  Zhong Gao, Guanming Lu, Mengjue Liu and Meng Cui

Intrusion Detection

A Study on the Feature Selection of Network Traffic for Intrusion Detection Purpose ............................ 245
  Wanli Ma, Dat Tran and Dharmendra Sharma

Depth Evaluation Intrusion Detection using Coloured Stochastic Petri Nets ............................................. 248
  Chien-Chuan Lin and Ming-Shi Wang

Anomaly Detection in High-dimensional Network Data Streams: A Case Study .................................... 251
  Ji Zhang, Qigang Gao and Hai Wang
A Fast Algorithm for Data Erasure ................................................................. 254
Guomeng Wang and Yanping Zhao

PART III: Posters

KARI: A multiple-scheme framework for encryption based on an annotation model for enhanced information security ................................................................. 257
Robert Charles

The Performance Analysis of Anti-terrorism Intelligence from Taiwan’s Investigation Bureau of the Ministry of Justice ....................................................... 259
Yu-Ping Fan, Cheng-Wei Chen

An Effective Surveillance Video Retrieval Method based upon Motion Detection ....................................................... 261
Shih-Hsuan Chiu, Che-Yen Wen and Wei-Chieh Kao

A Study of the Identification of Authorship for Chinese Texts ....................................................... 263
Jian Zhang and Tianfang Yao

Design and Implementation of Honeypot Systems Based on Open-Source Software ....................................................... 265
Chao-Hsi Yeh and Chung-Huang Yang

Unknown Malcode Detection – A Chronological Evaluation ....................................................... 267
Robert Moskowitz, Clint Feher and Yuval Elovici

A Study on Critical Infrastructure Information Technology Malfunction Controls -- Illustration of Taiwan ....................................................... 269
Kuo-Jean Fann, Shu-Kuo Lin, Kuo-Sui Lin and Chung-Huang Yang

Visual Cryptography (VC) with Non-expanded Shadow Images: Hilbert-curve Approach ....................................................... 271
Sen-Jen Lin, Ja-Chen Lin and Wen-Pinn Fang

A New Classifier for Numerical Incomplete Data ................................................................. 273
Jun Wu, Dong-Hun Seo, Chi-Hwa Song and Won Don Lee

Transport Security using Mobile Technology ................................................................. 275
Pankaj Panjigar, Pradeep Mourya, Neeraj Bansal, Prateek Srivastava and Asim Mukherjee

Sem@ntica: A system for semantic extraction and logical querying of text corpora ....................................................... 277
Daniel W. McMichael, Raymond Fu, Simon Williams, and Geoff A. Jarrad

Evaluating AVDL Descriptions for Web Application Vulnerability Analysis ....................................................... 279
Ha Thanh Le and Peter Kok Keong Loh

Preparedness for Post-Disaster Internet Traffic Management ....................................................... 282
Jan-Mou Li, Chung-Hao Chen, Shang-Hsing Hsieh, Wen-Chao Yang and Che-Yen Wen

An Efficient Montgomery Exponentiation Algorithm for Public-Key Cryptosystems ....................................................... 284
Chia-Long Wu, Der-Chyuan Lou and Te-Jen Chang
User-Centered Evaluation of Question Answering Systems ................................................................. 286
Chorng-Shyong Ong, Min-Yuh Day, Kuo-Tay Chen and Wen-Lian Hsu

A New Online Auction with Convertible Authenticated Encryption and Authentication .................. 288
Guo-Lun Luo and Henry Ker-Chang Chang

A Study of Integrated Criminal Justice Data Base System ................................................................. 290
Weiping Chang, ChiChao Lu and WenYuan Jen

An Novel Two Layer User Identification Method .............................................................................. 292
Wen-Pinn Fang, Hong-Ru Lee and Fang-Pan Lin

An Extended Security Framework for e-Government ...................................................................... 294
Walid Al-Ahmad and Reem Al-Kaabi

Author Index ...................................................................................................................................... 297
