Industrial Energy Technology Conference

IETC 2008

May 6-9, 2008
New Orleans, Louisiana, USA

Printed from e-media with permission by:
Curran Associates, Inc.
57 Morehouse Lane
Red Hook, NY 12571
www.proceedings.com

ISBN: 978-1-60560-504-3

Some format issues inherent in the e-media version may also appear in this print version.
# TABLE OF CONTENTS

## AMERICAN CHEMISTRY COUNCIL AWARD WINNERS

- Energy Management at Dow Chemical
  - J. Almaguer
  - 1
- Energy Management SMARTboard
  - P.R. Jagen
  - 3
- Multi-site Energy Reduction Through Teamwork
  - T. Theising
  - 13

## CASE STUDIES

- Energy Efficiency Opportunities in California Food Processing Facilities
  - T. Wong, D. Kazama, J. Wang
  - 1
- What Efficiency Projects Are Being Installed in the Pulp and Paper Industry
  - J. Nicol
  - 17
- All Electric Injection Molding Machines: How Much Energy Can You Save
  - A. Kanungo, E. Swan
  - 23
- Optimizing Steam and Condensate Systems: a Case Study
  - V.V. Venkatesan, R. Grillo, R.G. Bockwinkel
  - 24
- Energy Savings Through Steam Trap Management
  - C. Gibbs
  - 25

## CONDUCTING ENERGY STUDIES

- Energy Audit Findings by Category
  - T.R. Theising
  - 51
- Energy Intensity Strategy
  - D. Rappolee, J. Shaw
  - 54
- Possible Savings Achievable by Recipients of Training and Software Provided by the U.S. Department of Energy's Industrial Technologies Program
  - M. Schweitzer, M.A. Martin, R.L. Schmoyer
  - 55
- Conducting Your Own Energy Audit
  - J. Phillips
  - 56

## DEMAND RESPONSE

- Incorporating Demand Resources Into ISO New England's Forward Capacity Market
  - E. Winkler
  - 66
Capitalize on Existing Assets with Demand Response ................................................................. 69  
J. Collins

ENHANCEMENTS IN POWER AND STEAM GENERATION
Steam Turbine Cogeneration ........................................................................................................... 70  
K. Quach, G. Robb
Cyclone Boiler Reburn NO\textsubscript{x} Control Improvements Via Cyclone Design  
Improvements and Advanced Air Staging ..................................................................................... 78  
B. Morabito, B. Nee, V. Goff, G. Maringo
Assessment of Inlet Cooling to Enhance Output of a Fleet of Gas Turbines................................. 84  
T. Wang, L. Braquet
Cascading Closed Loop Cycle Power Generation .......................................................................... 97  
M.H. Romero
Near-zero NO\textsubscript{x} Technology ........................................................................................... 98  
M. Utzinger

GHG: CAPITALIZING ON THE OPPORTUNITIES
Greenhouse Gas Initiatives-analysis of McCain-lieberman Bill S.280 ‘the Climate Stewardship and Innovation Act of 2007’ Using the National Energy Modeling System ................................................................................................................................. 100  
C. Ellsworth
Greening Industrial Facilities: a Sustainable Approach to Addressing Energy Concerns ......................................................................................................................................................... 109  
D. Love
Catalyst Paper No-carb Strategy .................................................................................................... 120  
C. McClain, J. Robinson
Leveraging Existing Data Streams Toward Climate-driven Emissions Inventoring and Reporting .................................................................................................................. 121  
C.C. Reith, D. Shanin
K. Patrick

IMPROVING YOUR ENERGY MANAGEMENT PERFORMANCE
The Energy Star® Plant Label: a Valuable Component of Strategic Corporate Energy Management ................................................................................................................................. 127  
W. Tunnessen
Building an Energy Efficient Plant Certification Program: System Assessment Standards .................................................................................................................. 133  
A.T. McKane, P. Sheaffer
Building an Energy Efficient Plant Certification Program: Management System for Energy 2000 ................................................................................................................................. 141  
B. Meffert, M. Brown
Certifying U.S. Manufacturing Plants for Energy Efficiency ...................................................... 142
P. Scheihing, S. Schultz, J. Almaguer

INDUSTRIAL ENERGY STRATEGY AND TRENDS

Establishing and Maintaining Effective Energy Management Practices................................. 151
T.M. Giffin

Industrial Decision Making ........................................................................................................... 152
R.N. Elliott, V. McKinney, A. Shipley

Simple Payback: the Wrong Tool for Energy Project Analysis? .............................................. 159
C. Russell

Energy Management: Best Practice Approach in a Carbon Constrained World ...................... 164
C.N. Spates

U.S. Department of Energy (DOE) Industrial Programs and Their Impacts ............................... 176
S.A. Weakley

INNOVATIVE UTILITY & POWER PROGRAMS

State Demand-side Management Programs Funds Are Exploding! How Industries Can Best Use These Programs to Maximize Their Benefits ......................................................... 184
J. Nicol

Measurement and Verification of Industrial Energy-savings Projects-lessons Learned by Measuring Successful and Not-so Successful Projects ....................................................... 185
D. Hebert

Electric Utility Industrial DSM and M&V Program ................................................................. 195
K.P.K. (Ken) Lau

Successful Real Time Pricing (RTP) Tieline Control Must Do More Than Save Money ........... 201
J. Robinson

POWER AND STEAM SYSTEM MODELING

Finding Benefits by Modeling and Optimizing Steam and Power Systems............................. 202
C. Harper, D.A. Nelson

Case Studies of Onsite Energy Systems for Healthcare Facilities ........................................... 204
R. Schwass

A Preliminary Study on Designing Combined Heat and Power (CHP) System for the University Environment ................................................................. 208
T.A. Kozman, C.M. Reynolds, J. Lee

A Management Tool for Analyzing CHP Natural Gas Liquids Recovery System .................. 214
C. Olsen, T.A. Kozman, J. Lee

Optimization of Steam Network in Tehran Oil Refinery ....................................................... 221
H. Khodaie, M.R.J. Nasr

STATE INDUSTRIAL SESSION

Review of a State Industrial Efficiency Program: Texas Industries of the Future .................... 227
K. Ferland
Program Strategies and Results for California's Energy Efficiency and Demand Response Markets ................................................................................................................................................. 228
R. Ehrhard, G. Hamilton

TOOLS AND ANALYSIS METHODS

Energy and Emissions Savings Through Insulation Upgrade Projects ............................................................... 229
M.J. Lettich

Using a Practical Approach to Energy Management to Get it Done .......................................................... 230
J. Nicol, T. Dantoin

Measured Savings of DC to AC Drive Retrofit in Plastic Extrusion .................................................. 236
R.A. Sfeir

CO₂ Reduction Through Optimization of Steam Network in Petroleum Refineries: Evaluation of New Scenario ....................................................................................... 240
M.H.K. Manesh, H. Khodaie, M. Amidpour

U.S. DOE SAVE ENERGY NOW

DOE’s Save Energy Now Assessments-results and Lessons Learned from 450 Assessments Conducted in 2006-2007 .................................................................................. 248
M.A. Martin, A. Wright

WASTE HEAT RECOVERY

Waste Heat Recovery-submerged Arc Furnaces (SAF) ................................................................................. 249
T. O'Brien

Hexion CHP Project ........................................................................................................................................ 250
B. Bullock

Low Carbon Footprint and Ultra Low NOx Boilers Through Efficiency Gains ........................................... 251
R. Benz, M. Staedter

Improving Energy Efficiency and Reducing Greenhouse Gas Emissions in BPS PTA Manufacturing Plants ............................................................................................................. 260
F. Clark

WATER USE IN INDUSTRIAL FACILITIES

Implementing Energy Efficiency in Wastewater to Reduce Costs ................................................................. 261
J.C. Cantwell

Process Cooling Pumping Systems Analysis .................................................................................................. 262
C. Sherman
