American Society of Mining and Reclamation

25th Annual Meetings of the American Society of Mining and Reclamation and 10th Meeting of IALR 2008

June 14-19, 2008
Richmond, Virginia, USA

Volume 1 of 2

Printed from e-media with permission by:

Some format issues inherent in the e-media version may also appear in this print version.
# TABLE OF CONTENTS

## Volume 1

**Occurrence of Phytophthora on Reforested Loose-graded Spoils in Eastern Kentucky**
K. Adank, C. Barton, M. French, P. de Sa ................................................................. 1

**Testing and Analyses of Chat and Asphalt-containing Chat**
S. Al-Abed, D. Reisman, G. Jegadeesan, N. Deshpande ................................................. 14

**Forest Establishment and Water Quality Characteristics As Influenced by Spoil Type on a Loose-graded Surface Mine in Eastern Kentucky**
P. Angel, C. Barton, R. Warner, C. Agouridis, T. Taylor, S. Hall ..................................... 28

**Where Did All the Water Go**
R. Asberry .................................................................................................................. 66

**A Cost Effectiveness Analysis of Forestry Versus Pasture Reclamation in the Southern Appalachians**
K. Baker, J. Sullivan, J. Burger, G. Amacher .................................................................. 78

**Innovations in Erosion Control, Landslide Remediation and Design and Construction of Retaining Walls, Box Culverts and Bridges: One Technology; Multiple Applications**
R. Barrett, C. Lobato, C. Barrett .................................................................................. 97

**Evaluating Spoil Amendment Use and Mycorrhizal Inoculation on Reforestation Success in the Eastern and Western Kentucky Coalfields**
C. Barton, R. Sweigard, D. Marx, W. Barton .................................................................. 98

**Plant Growth Effects of Coal Combustion Product Amendment to Mine Spoils and Associated Leaching Potentials**
W. Daniels, M. Beck, M. Eick ...................................................................................... 112

**Passive Treatment of Acid Mine Drainage – the ENOS Reclamation Project, Indiana: Preliminary Results**
P. Behum, D. Hause, M. Stacy, T. Branam ........................................................................ 129

**Using Enzyme Bioassays As a Rapid Screen for Metal Toxicity**
E. Blumenstein, J. Volberding, J. Gusek ........................................................................ 148

**Early Tree and Ground Cover Establishment As Affected by Seeding and Fertilization Rates in Tennessee**
D. Buckley, J. Franklin ................................................................................................. 180

**Hardwood Reforestation for Phase III Bond Release: Need for Reduced Ground Cover**
J. Burger, D. Mitchem, C. Zipper, R. Williams .................................................................. 192

**Preliminary Results: Release of Metals from Acid-mine Drainage Contaminated Streambed Sediments Under Anaerobic Conditions**
B. Butler, D. Reisman .................................................................................................... 206
Quantity and Quality of Stream Water Draining Mined Areas of the Upper Schuylkill River Basin, Schuylkill County, Pennsylvania, USA, 2005-2007 ........................................... 223
C. Cravotta III, J. Nantz

Illinois River Dredged Sediment: Characterization and Utility for Brownfield Reclamation ........................................................................................................... 253
R. Darmody, J. Marlin

Assessment of Abandoned Quarries for Revegetation and Water Harvesting in Lebanon, East Mediterranean .................................................................................. 271

Sustainable Passive Treatment of Mine Drainage: Demonstration of Manganese Resource Recovery ................................................................. 285
C. Denholm, T. Danehy, S. Busler, R. Dolence, M. Dunn

Nutrient Fluxes from Abandoned Mine Soils Reclaimed with Poultry Manure and Paper Mill Sludge .......................................................................................... 298
A. Dere, R. Stehouwer, K. McDonald

A Two-phase Process for Revegetation of Acidic Bauxite Tailings in the Amazon Region, Brazil ......................................................................................................... 316
L. Dias, A. Franco, E. Campello, S. Faria, A. Castilho, J. Henriques, W. Daniels

Revegetation of Acid Forming Mine Spoils in Paracatu, Minas Gerais State, Brazil ................................................................. 328
L. Dias, I. de Assis, W. Usuario

Changes in Soil Manganese Concentrations: a Case Study from an Illinois Coal Strip Mine ...................................................................................................................... 341
M. Duncan, T. Wesley

The Use of Peat Pellets to Remove Copper and Cobalt from Mine Drainage .......................................................................................................................... 342
P. Eger, E. Paulson, D. Green

ITRC – Improving Regulatory Acceptance for New Approaches to Mine Waste Issues ......................................................................................................................... 353
P. Eger, C. Baysinger, S. Hill

Survival and Growth of Native Hardwoods on a Reclaimed Surface Mine .......................................................................................................................... 360
P. Emerson, J. Skousen

Remedial and Reclamation Cost Estimating for Large Metal Mine Sites .......................................................................................................................... 379
G. Emilsson, C. Freshman

Fourth-year Tree Response to Three Levels of Silvicultural Input on Mined Lands ............................................................................................................... 390
C. Fields-Johnson, C. Zipper, D. Evans, T. Fox, J. Burger

Measured and Modeled Removal Mechanisms for Bench-scal Constructed Wetlands Receiving Lead Mine Water ............................................................................. 406
M. Fitch, J. Burken, C. Ye

Direct-seeding Versus Containerized Transplantation of American Chestnuts on Loose Mine Spoils in the Cumberland Plateau ......................................................... 424
M. French, C. Barton, D. Graves

Two-year Sulfate Reducing Bioreactor Pilot Test Results at the Golinsky Mine, California .................................................................................................................. 425
J. Gusek, T. Rutkowski, E. Blumenstein, B. Shipley

Differential Uptake of Transition Elements by Mesquite Obtained from Plants Grown in Impacted and Clean Sites ............................................................................... 443
N. Haque, J. Peralta-Videa, J. Gardea-Torresdey

Regulatory Approaches to Complying with Water Quality Standards .......................................................................................................................... 452
J. Harper
Effective Passive Treatment of a Large Flow of Alkaline FE-contaminated Mine Water .......................................................... 467
R. Hedin

Evaluation of Leachate Chemistry from Coal Refuse Blended and Layered with Fly Ash .......................................................... 489
J. Hunt, M. Eick, W. Daniels, M. Beck

Settlement Evaluation of End Dumped Coal Mine Spoil Fill .......................................................... 490
W. Karem, C. Lee

Evaluation of Three Different Purities of Crab-shell for the Remediation of Mine Impacted Water .......................................................... 512
K. Korte, C. Newcombe, R. Brennan

Transformation of Phosphorus and Nitrogen in Deep Row Biosolids Incorporation Technology in Coastal Plain Mining Sites in Virginia .......................................................... 527

Generation of 400-500 MG/L Alkalinity in a Vertical Anoxic Limestone Drain .......................................................... 553
J. LaBar, R. Nairn, G. Canty

Subsoils As Topsoil Substitutes for Surface Coal Mine Reclamation in Mississippi: Alluvial Floodplains .......................................................... 566
D. Lang, G. Hawkey

Assessing Visual Quality Change 25 Years After Post-mining Housing Development in Plymouth, Minnesota .......................................................... 577
E. Lee, J. Burley

Hydrologic and Aquatic Impacts from a Landslide in the Tennessee Coal Fields .......................................................... 587
R. Liddle, S. Bakaletz

Acid Mine Drainage Remediation in a Small Watershed .......................................................... 611
J. Long

Acidity Decay Curves of 40 Above Drainage Mines in West Virginia .......................................................... 624
B. Mack, J. Skousen

Assessment and Closure of the Glengarry ADIT, New World Mining District, Cooke City, Montana .......................................................... 640
M. Marks, A. Kirk, M. Cormier

Performance of Mesocosm-scale Sulfate-reducing Bioreactors for Treating Acid Mine Drainage in New Zealand .......................................................... 674

Volume 2

Research Initiatives for Developing Passive-treatment Technologies for Ameliorating Acid Mine Drainage in New Zealand .......................................................... 711
C. McCauley, A. O’Sullivan, P. Weber, D. Trumm, A. Brough, M. Milke

The Influence of Soil Reconstruction Techniques on Mineral Sands Mine Soils in Virginia .......................................................... 712
K. Meredith, W. Daniels, Z. Omendorff, M. Alley, C. Teutsch

Watershed-scale Environmental Monitoring to Prioritize Mine Drainage Passive Treatment Implementation .......................................................... 732
