Conference Organization ........................................................................... xii

Keynotes

Novel Applications of Machine Learning in Software Testing ......................... 3
  Lionel C. Briand

Testing in the Distributed Test Architecture: An Extended Abstract .................. 11
  Robert M. Hierons

Invited Special Track: Formalization of UML and Design Patterns

A Coalgebraic Semantic Framework for Reasoning about UML Sequence Diagrams .................................................................................. 17
  Sun Meng and Luis S. Barbosa

On the Composition of Design Patterns ....................................................... 27
  Ian Bayley and Hong Zhu

An Executable Interface Specification for Industrial Embedded System Design .................................................................................. 37
  Jinfeng Huang, Jeroen Voeten, Serge Wolfs, and Mark Coopmans

Model Transformation Specification and Verification ..................................... 45
  Kevin Lano and David Clark
Session 1: Software Testing Process

Optimizing Test Process Action Plans by Blending Testing Maturity Model and Design of Experiments..........................................................57
Hyejin Oh, Byoungju Choi, Hyuksoo Han, and W. Eric Wong

Bridging the Concept to Implementation Gap in Software System Testing..........................................................67
Harry M. Sneed

Session 2: Security

MUSIC: Mutation-Based SQL Injection Vulnerability Checking..........................................................77
Hossain Shahriar and Mohammad Zulkernine

An Approach for Generation of J2EE Access Control Configurations from Requirements Specification..........................................................87
Lianshan Sun, Gang Huang, Yanchun Sun, Hui Song, and Hong Mei

Targeting Security Vulnerabilities: From Specification to Detection (Short Paper)..........................................................97
Aiman Hanna, Hai Zhou Ling, Jason Furlong, Zhenrong Yang, and Mourad Debbabi

Session 3: Formal Methods

Integrating Top-Down and Scenario-Based Methods for Constructing Software Specifications..........................................................105
Shaoying Liu

Path-Sensitive Reachability Analysis of Web Service Interfaces (Short Paper)..........................................................114
Xutao Du, Chunxiao Xing, and Lizhu Zhou

SMT-Based Bounded Model Checking for Real-Time Systems (Short Paper)..........................................................120
Liang Xu

Verifying Business Process Compatibility (Short Paper)..........................................................126
Peter Y. H. Wong and Jeremy Gibbons

Session 4: Software Testing Techniques and Methods

Using Machine Learning to Refine Black-Box Test Specifications and Test Suites..........................................................135
Lionel C. Briand, Yvan Labiche, and Zaheer Bawar

Does Adaptive Random Testing Deliver a Higher Confidence than Random Testing?..........................................................145
Tsong Yueh Chen, Fei-Ching Kuo, Huai Liu, and W. Eric Wong

Greedy Heuristic Algorithms to Generate Variable Strength Combinatorial Test Suite (Short Paper)..........................................................155
Ziyuan Wang, Baowen Xu, and Changhai Nie

Session 5: Static and Dynamic Analysis

An Object Oriented Approach towards Dynamic Data Flow Analysis (Short Paper)..........................................................163
A. Cain, T. Y. Chen, D. D. Grant, F.-C. Kuo, and J.-G. Schneider
An Approach to Merge Results of Multiple Static Analysis Tools (Short Paper) .............................................................. 169
Na Meng, Qianxiang Wang, Qian Wu, and Hong Mei

Performance Analysis of a Composition of Middleware Patterns (Short Paper) ................................................................. 175
Paul J. Vandal and Swapna S. Gokhole

Abstracting Execution Logs to Execution Events for Enterprise Applications (Short Paper) ...................................................... 181
Zhen Ming Jiang, Ahmed E. Hassan, Parminder Flora, and Gilbert Hamann

**Session 6: Specification-Based Software Testing**

Reachability and Propagation for LTL Requirements Testing .................................................................................................. 189
Gordon Fraser and Paul Ammann

Coverage Based Testing with Test Purposes .......................................................................................................................... 199
Gordon Fraser, Martin Weiglhofer, and Franz Wotawa

A Boundary Checking Technique for Testing Real-Time Systems Modeled as Timed Input Output Automata (Short Paper) ........................................................................................................... 209
Abdeslam En-Nouaary and Abdelwahab Hamou-Lhadji

Utilizing Formalization to Test Programs without Available Source Code (Short Paper) ......................................................... 216
Shaoying Liu

**Session 7: Software Process and Evolution**

Developing Application Specific Ontology for Program Comprehension by Combining Domain Ontology with Code Ontology ......................................................... 225
Hong Zhou, Feng Chen, and Hongji Yang

Model-Based Quality Assurance of the SMB2 Protocol Documentation .............................................................................. 235
Wolfgang Grieskamp, Nicolas Kicillof, Dave MacDonald, Alok Nandan, Keith Stobie, Fred Wurden, and Danpo Zhang

On the Relationship between Software Aging and Related Parameters (Short Paper) ............................................................. 241
Yun-Fei Jia, Xiu-E Chen, Lei Zhao, and Kai-Yuan Cai

Web Application Development Lifecycle for Small Medium-Sized Enterprises (SMEs) (Short Paper) ........................................... 247
Wei Huang, Ru Li, Carsten Maple, Hongji Yang, David Foskett, and Vince Cleaver

**Session 8: Regression Testing and Software Reuse**

Looking for More Confidence in Refactoring? How to Assess Adequacy of Your Refactoring Tests .................................................. 255
Trung Dinh-Trong, Birgit Geppert, J. Jenny Li, and Frank Roessler

On Partitioning the Domain for Test Case Reusability (Short Paper) .................................................................................... 264
Yunwei Dong, M. F. Lau, and Si-yu Lin
An Empirical Evaluation of Test Suite Reduction for Boolean Specification-Based Testing (Short Paper) .............................................................. 270  
Xiaofang Zhang, Baowen Xu, Zhenyu Chen, Changhai Nie, and Leifang Li

Creating a Test Model Library for GUI Testing of Smartphone Applications (Short Paper) ............................................................. 276  
Antti Jääskeläinen, Antti Kervinen, and Mika Katara

**Session 9: Measurement, Metrics and Assessment 1**

Steering the Inspection Process with Prescriptive Metrics and Process Patterns ...................................................................................... 285  
Lasse Harjumaan, Ilkka Tervonen, and Sirpa Salmela

Towards an Assessment Method for Software Reuse Capability (Short Paper) ....................................................................................... 294  
Vinicius Cardoso Garcia, LianaBarachisio Lisboa, Silvio Romero de Lemos Meira, Eduardo Santana de Almeida, Daniel Lucrédio, and Renata Pontin de Mattos Fortes

How to Measure Quality of Software Developed by Subcontractors (Short Paper) ................................................................. 300  
Yoshihiro Iwami

Towards a Method for Evaluating the Precision of Software Measures (Short Paper) ................................................................. 305  
Beatriz Marin, Nelly Condori-Fernández, and Oscar Pastor

**Session 10: Service Orientation**

History Heuristic Based Negotiation of Service Level Agreements for Composite Service ............................................................................. 313  
Shiyang Ye and Jun Wei

Web Service Test Case Generation Based on Decision Table (Short Paper) ......................................................................................... 321  
Siripol Noikajana and Taratip Suwannasart

**Session 11: Measurement, Metrics and Assessment 2**

A Method for Measuring the Size of a Component-Based System Specification .................................................................................. 329  
Thareendira Wijayasiriwardhane and Richard Lai

Importance Measures for a Modular Software System (Short Paper) ............................................................................................. 338  
Lance Fiondella and Swapna S. Gokhale

**Session 12: Software Architecture**

Architecture Compliance Checking at Runtime: An Industry Experience Report ....................................................................................... 347  
Dharmalingam Ganesan, Thorsten Keuler, and Yutaro Nishimura

Selecting a High-Quality Central Model for Sharing Architectural Knowledge .................................................................................. 357  
Peng Liang, Anton Jansen, and Paris Avgeriou

Visual Software Architecture Description Based on Design Space ................................................................................................. 366  
Qian Zhang

Mapping Software Architecture Specification to Rewriting Logic (Short Paper) .................................................................................. 376  
Yufian Fu, Zhijiang Dong, Junhua Ding, and Xudong He
Session 13: Faults and Failures

Fault Localization with Non-parametric Program Behavior Model .......................................................... 385
   Peifeng Hu, Zhenyu Zhang, W. K. Chan, and T. H. Tse

Linux Bugs: Life Cycle and Resolution Analysis ......................................................................................... 396
   Mohamed F. Ahmed and Swapna S. Gokhale

On Failure Propagation in Component-Based Software Systems ................................................................. 402
   Atef Mohamed and Mohammad Zulkernine

Path and Context Sensitive Inter-procedural Memory Leak Detection .......................................................... 412
   Zhongxing Xu and Jian Zhang

Workshop on Integration of Software Engineering and Agent Technologies

An Agent-Based Middleware for Adaptive Systems ......................................................................................... 423
   Nauman A. Qureshi and Anna Perini

Dynamic Event/Fault Tree Analysis of Multi-agent Systems Using Galileo .................................................. 429
   Josh Dehlinger and Joanne Bechta Dugan

A UML Heavyweight Extension for MAS Modeling ....................................................................................... 435
   Manar El-Kady, Reem Bahgat, and Aly Fahmy

Tutorials

Adaptive Random Testing .............................................................................................................................. 443
   T. Y. Chen

Architecture-Based Assessment of Software Reliability .................................................................................. 444
   Swapna S. Gokhale and Veena B. Mendiratta

Author Index ................................................................................................................................................... 445
