2008 23rd IEEE/ACM International Conference on Automated Software Engineering

Proceedings

15-19 September 2008
L’Aquila, Italy
# Table of Contents

## Keynote

- **Swarm Verification**
  Gerard J. Holzmann, Jet Propulsion Laboratory, California Institute of Technology; Rajeev Joshi, Jet Propulsion Laboratory, California Institute of Technology; Alex Groce, Jet Propulsion Laboratory, California Institute of Technology

  Reflections on, and Predictions for, Support Systems for the Development of Programs
  Cliff Jones, Newcastle University, UK

## Testing 1

- **Increasing Test Granularity by Aggregating Unit Tests**
  Matthew Jorde, University of Nebraska, USA; Sebastian Elbaum, University of Nebraska, USA; and Matthew Dwyer, University of Nebraska, USA

- **Random Test Run Length and Effectiveness**
  James Andrews, University of Western Ontario, Canada; Alex Groce, Jet Propulsion Laboratory, USA; Melissa Weston, University of Western Ontario, Canada; and Ru-Gang Xu, University of California, Los Angeles, USA

- **Program Analysis with Dynamic Precision Adjustment**
  Dirk Beyer, Simon Fraser University, Canada; Thomas A. Henzinger, EPFL, Switzerland; and Gregory Theoduloz, EPFL, Switzerland

## Traceability

- **IR-based Traceability Recovery Processes: an Empirical Comparison of "One-Shot" and Incremental Processes**
  Andrea De Lucia, University of Salerno, Italy; Rocco Oliveto, University of Salerno, Italy; and Genoveffa Tortora, University of Salerno, Italy

- **Enabling Automated Traceability Maintenance by Recognizing Development Activities Applied to Models**
  Patrick Mäder, Ilmenau Technical University, Germany; Orlena Gotel, Pace University, New York, USA; and Ilka Philippow, Ilmenau Technical University, Germany

- **Incremental Latent Semantic Indexing for Automatic Traceability Link Evolution Management**
  Hsin-yi Jiang, Iowa State University, USA; Tien Nguyen, Iowa State University, USA; Ing-Xiang Chen, Yuan Ze University, Taiwan; Hojun Jaygarl, Iowa State University, USA; and Carl Chang, Iowa State University, USA
Verification

Automated Verification of Multi-Agent Programs ................................................................. 69
Rafael H. Bordini, Durham University, UK; Louise A. Dennis, University of Liverpool, UK;
Berndt Farwer, Durham University, UK; and Michael Fisher, University of Liverpool, UK

Validating Real Time Specifications using Real Time Event Queue Modeling ...................... 79
Robert Hall, AT&T Labs Research, USA

Automatic Inference of Frame Axioms Using Static Analysis ............................................. 89
Zvonimir Rakamaric, University of British Columbia, Canada; and Alan Hu, University of
British Columbia, Canada

Modelling 1

Generating and Evaluating Choices for Fixing Inconsistencies in UML Design Models ........... 99
Alexander Egyed, Johannes Kepler University, Austria; Emmanuel Letier, University College
London, United Kingdom; and Anthony Finkelstein, University College London, United
Kingdom

Mining Scenario-Based Triggers and Effects ....................................................................... 109
David Lo, Singapore Management University, Singapore; and Shahar Maoz, The Weizmann
Institute of Science, Israel

Refining Real-Time System Specifications through Bounded Model- and
Satisfiability-Checking ............................................................................................................... 119
Matteo Pradella, CNR IEIIT, Italy; Angelo Morzenti, Politecnico di Milano, Italy;
and Pierluigi San Pietro, Politecnico di Milano, Italy

Debugging

Evaluating Models for Model-Based Debugging ..................................................................... 128
Wolfgang Mayer, University of South Australia, Australia; and Markus Stumptner, University of
South Australia, Australia

Error Reporting Logic ............................................................................................................. 138
Ciera Jaspan, Carnegie Mellon University, USA; Trisha Quan, Carnegie Mellon University,
USA; and Jonathan Aldrich, Carnegie Mellon University, USA

Efficient Monitoring of Parametric Context-Free Patterns .................................................. 148
Patrick Meredith, University of Illinois Urbana-Champaign, United States; Feng Chen,
University of Illinois Urbana-Champaign, United States; Dongyun Jin, University of Illinois
Urbana-Champaign, United States; and Grigore Rosu, University of Illinois Urbana-Champaign, United States; and Michael Fisher, University of Liverpool, UK
Component-based Systems

A Framework for Dynamic Service Discovery................................................................. 158
Andrea Zisman, City University, UK; George Spanoudakis, City University, UK; and James Dooley, City University, UK

A Methodology and Framework for Creating Domain-Specific Development Infrastructures... 168
George Edwards, University of Southern California, USA; and Nenad Medvidovic, University of Southern California, USA

Connecting Programming Environments to Support Ad-Hoc Collaboration ..................... 178
Rajesh Hegde, Microsoft Research, Redmond, USA; and Prasun Dewan, University of North Carolina, Chapel Hill, USA

Experience Reports

Reducing False Positives by Combining Abstract Interpretation and Bounded Model Checking ............................................................... 188
Hendrik Post, University of Karlsruhe, Germany; Carsten Sinz, University of Karlsruhe, Germany; Alexer Kaiser, University of Tuebingen, Germany; and Thomas Gorges, Robert Bosch GmbH Chassis Systems Control, Germany

Unit Testing of Flash Memory Device Driver through a SAT-based Model Checker .......... 198
Moonzoo Kim, KAIST, South Korea; Yunho Kim, KAIST, South Korea; and Hotae Kim, Samsung Electronics, South Korea

Effort Estimation in Capturing Architectural Knowledge .................................................. 208
Rafael Capilla, Universidad Rey Juan Carlos, Spain; Francisco Nava, Universidad Rey Juan Carlos, Spain; and Carlos Carrillo, Universidad Politecnica de Madrid, Spain

Testing 2

Test-suite Augmentation for Evolving Software ................................................................. 218
Raul Santelices, Georgia Institute of Technology, USA; Pavan Kumar Chittimalli, TCS Ltd, India; Taweesup Apiwattanapong, NECTEC, Thailand; Alessandro Orso, Georgia Institute of Technology, USA; and Mary Jean Harrold, Georgia Institute of Technology, USA

Reducing the Cost of Path Property Monitoring Through Sampling................................. 228
Matthew Dwyer, University of Nebraska - Lincoln, USA; Madeline Diep, University of Nebraska - Lincoln, USA; and Sebastian Elbaum, University of Nebraska - Lincoln, USA

Query-aware Test Generation Using a Relational Constraint Solver .................................... 238
Shadi Abdul Khalek, University of Texas at Austin, USA; Bassem Elkarablieh, University of Texas at Austin, USA; Yai O. Laleye, University of Texas at Austin, USA; and Sarfraz Khurshid, University of Texas at Austin, USA
**Modelling 2**

Inferring Finite-State Models with Temporal Constraints ........................................................... 248

*Neil Walkinshaw, The University of Sheffield, United Kingdom; and Kirill Bogdanov, The University of Sheffield, United Kingdom*

Type-checking Software Product Lines - A Formal Approach ........................................................ 258

*Christian Kästner, University of Magdeburg, Germany; and Sven Apel, University of Passau, Germany*

**Requirements & Evolution**

Using Simulation to Investigate Requirements Prioritization Strategies ........................................ 268

*Daniel Port, University of Hawaii, USA; Alexy Olkov, University of Hawaii, USA; and Tim Menzies, West Virginia University, USA*

Automated Aspect Recommendation through Clustering-Based Fan-in Analysis ............................. 278

*Danfeng Zhang, Key laboratory of High Confidence Software Technologies (Ministry of Education), P.R. China; Yao Guo, Key laboratory of High Confidence Software Technologies (Ministry of Education), P.R. China; and Xiangqun Chen, Key laboratory of High Con*

**Testing 3**

Predictive Typestate Checking of Multithreaded Java Programs .................................................... 288

*Pallavi Joshi, UC Berkeley, USA; and Koushik Sen, UC Berkeley, USA*

Improving Structural Testing of Object-Oriented Programs via Integrating Evolutionary Testing and Symbolic Execution ........................................................................................................ 297

*Kobi Inkumsah, North Carolina State University, USA; and Tao Xie, North Carolina State University, USA*

Automatic Debugging of Concurrent Programs Through Active Sampling of Low Dimensional Random Projections ........................................................................................................ 307

*Elad Yom-Tov, IBM Research, Israel; Rachel Tzoref, IBM Research, Israel; Shmuel Ur, IBM Research, Israel; and Shlomo Hoory, IBM Research, Israel*

**Maintenance**

How Program History Can Improve Code Completion .................................................................. 317

*Romain Robbes, Università della Svizzera Italiana, Switzerland; and Michele Lanza, Università della Svizzera Italiana, Switzerland*

SpotWeb: Detecting Framework Hotspots and Coldspots via Mining Open Source Code on the Web .................................................................................................................. 327

*Suresh Thummalapenta, North Carolina State University, USA; and Tao Xie, North Carolina State University, USA*

Generic Patch Inference ................................................................................................................. 337

*Jesper Andersen, University of Copenhagen, Denmark; and Julia Lawall, University of Copenhagen, Denmark*
Doctoral Symposium

Configuration Lifting: Verification meets Software Configuration ............................................. 347
Hendrik Post, University of Karlsruhe, Germany; and Carsten Sinz, University of Karlsruhe, Germany

Product Line Tools Are Product Lines Too: Lessons Learned from Developing a Tool Suite ... 351
Paul Grünbacher, Johannes Kepler University Linz, Austria; Rick Rabiser, Christian Doppler Laboratory for Automated Software Engineering, Austria; and Deepak Dhungana, Christian Doppler Laboratory for Automated Software Engineering, Austria

A Specification Language for Static Analysis of Student Exercises ........................................... 355
Carsten Köllmann, T-Systems, Germany; and Michael Goedicke, University of Duisburg-Essen, Germany

A Case Study on the Automatic Composition of Network Application Mashups ....................... 359
Maxim Shevertalov, Drexel University, USA; and Spiros Mancoridis, Drexel University, USA

Predicting Effectiveness of Automatic Testing Tools ................................................................. 363
Brett Daniel, University of Illinois at Urbana-Champaign, United States; and Marat Boshernitsan, Coverity, Inc., United States

Distributed Constraints Maintenance in Collaborative UML Modeling Environments .............. 367
Haifeng Shen, Nanyang Technological University, Singapore; Siyuan Liu, Nanyang Technological University, Singapore; Steven Xia, Nanyang Technological University, Singapore; and Chengzheng Sun, Nanyang Technological University, Singapore

Software Cost Estimation using Fuzzy Decision Trees ............................................................... 371
Efi Papatheocharous, University of Cyprus, Cyprus; and Andreas Andreou, University of Cyprus, Cyprus

Rhizome: A Feature Modeling and Generation Platform ............................................................ 375
Guozheng Ge, Univ. of California, Santa Cruz, USA; and Emmet James Whitehead, Jr., Univ. of California, Santa Cruz, USA

Combining the Analysis of Spatial Layout and Text to Support Design Exploration .................. 379
J. Michael Moore, Texas A&M University, USA; and Frank Shipman, Texas A&M University, USA

Using Cluster Analysis to Improve the Design of Component Interfaces .................................. 383
Rahmat Adnan, Delft University of Technology, The Netherlands; Graaf Bas, Delft University of Technology, The Netherlands; Arie van Deursen, Delft University of Technology, The Netherlands; and Joost Zonneveld, ASML, The Netherlands

Augmenting Counterexample-Guided Abstraction Refinement with Proof Templates .............. 387
Thomas E. Hart, University of Toronto, Canada; Kelvin Ku, University of Toronto, Canada; Arie Gurfinkel, Carnegie Mellon University, United States; Marsha Chechik, University of Toronto, Canada; and David Lie, University of Toronto, Canada
An Assume Guarantee Verification Methodology for Aspect-Oriented Programming .......... 391
Mustafa Ispir, Middle East Technical University, Turkey; and Aysu Betin Can, Middle East Technical University, Turkey

Living with the Law: Can Automation give us Moore with Less? .............................................. 395
Celina Gibbs, University of Victoria, Canada; Jennifer Baldwin, University of Victoria, Canada; Nieraj Singh, IBM, Canada; Maja D’Hondt, IMEC, Belgium; and Yvonne Coady, University of Victoria, Canada

VCR: Virtual Capture and Replay for Performance Testing ....................................................... 399
Antonia Bertolino, ISTI-CNR, Italy; Guglielmo De Angelis, ISTI-CNR, Italy; and Antonino Sabetta, ISTI-CNR, Italy

A Case for Automatic Exception Handling ................................................................................. 403
Bruno Cabral, University of Coimbra, Portugal; and Paulo Marques, University of Coimbra, Portugal

DiffGen: Automated Regression Unit-Test Generation ........................................................................ 407
Kunal Taneja, North Carolina State University, USA; and Tao Xie, North Carolina State University, USA

An Automated Test Code Generation Method for Web Applications using Activity Oriented Approach ................................................................................................................. 411
David Turner, California State University San Bernardino, U.S.A.; Moonju Park, University of Incheon, South Korea; Jaehwan Kim, University of Incheon, South Korea; and Jinseok Chae, University of Incheon, South Korea

The Consistency of Web Conversations ...................................................................................... 415
Jeffrey Fischer, University of California, Los Angeles, USA; Rupak Majumdar, University of California, Los Angeles, USA; and Francesco Sorrentino, University of Salerno, Italy

Testing Peers’ Volatility .............................................................................................................. 419
Eduardo Cunha de Almeida, Université de Nantes, France; Gerson Sunyé, Université de Nantes, France; Yves Le Traon, Université de Nantes, France; and Patrick Valduriez, INRIA and Université de Nantes, France

Automated Continuous Integration of Component-Based Software: an Industrial Experience .. 423
Seojin Kim, Samsung electronics, Korea; Sungjin Park, Samsung electronics, Korea; Jeonghyun Yun, Samsung electronics, Korea; and Younghoo Lee, Samsung electronics, Korea

A Two-Step Approach for Modelling Flexibility in Software Processes ..................................... 427
Ricardo Martinho, School of Technology and Management, Polytechnic Institute of Leiria, Portugal; João Varajão, University of Trás-os-Montes e Alto Douro, Portugal; and Dulce Domingos, Faculty of Sciences, University of Lisboa, Portugal

A Generic Approach for Class Model Normalization .................................................................... 431
Jean-Rémy Falleri, LIRMM, France; Marianne Huchard, LIRMM, France; and Clémentine Nebut, LIRMM, France

XE (eXtreme Editor) - Bridging the Aspect-Oriented Programming Usability Gap ..................... 435
Wiwat Ruengmee, Department of Informatics, Donald Bren School of Information and Computer Sciences, University of California, Irvine, USA; Roberto Silva Filho, Department of Informatics, Donald Bren School of Information and Computer Sciences, University
Rapid: Identifying Bug Signatures to Support Debugging Activities .......................................... 439
Hwa-You Hsu, Georgia Institute of Technology, USA; James A. Jones, Georgia Institute of Technology, USA; and Alessandro Orso, Georgia Institute of Technology, USA

Heuristics for Scalable Dynamic Test Generation ....................................................................... 443
Jacob Burnim, UC Berkeley, USA; and Koushik Sen, UC Berkeley, USA

Managing Models through Macromodeling ................................................................................ 447
Rick Salay, University of Toronto, Canada; John Mylopoulos, University of Toronto, Canada; and Steve Easterbrook, University of Toronto, Canada

Cleman: Comprehensive Clone Group Evolution Management .................................................. 451
Tung Nguyen, Iowa State University, USA; Hoan Nguyen, Iowa State University, USA; Nam Pham, Iowa State University, USA; Jafar Al-Kofahi, Iowa State University, USA; and Tien Nguyen, Iowa State University, USA

Composition of Qualitative Adaptation Policies ......................................................................... 455
Franck Chauvel, Valoria, Université de Bretagne Sud, France; Olivier Barais, IRISA/INRIA & Université de Rennes 1, France; Isabelle Borne, Valoria, Université de Bretagne Sud, France; and Jean-Marc Jézéquel, IRISA/INRIA & Université de Rennes 1, France

A System for Supporting Development of Large Scaled Rich Internet Applications ................. 459
Hiroaki Fukuda, Keio University, Japan; and Yoshikazu Yamamoto, Keio University, Japan

Discovering Patterns of Change Types ........................................................................................ 463
Beat Fluri, University of Zurich, Switzerland; Emanuel Giger, University of Zurich, Switzerland; and Harald Gall, University of Zurich, Switzerland

Model-driven Development of Mobile Personal Health Care Applications ............................ 467
Abizer Khambati, University of Auckland, New Zealand; John Grundy, University of Auckland, New Zealand; James Warren, University of Auckland, New Zealand; and John Hosking, University of Auckland, New Zealand

Enforcing Structural Regularities in Source Code using IntensiVE ............................................ 471
Johan Brichau, Université catholique de Louvain, Belgium; Kim Mens, Université catholique de Louvain, Belgium; and Andy Kellens, Vrije Universiteit Brussel, Belgium

QuARS Express - A Tool Demonstration .................................................................................... 473
Antonio Bucchiarone, ISTI-CNR of Pisa, Italy; Stefania Gnesi, ISTI-CNR of Pisa, Italy; Giuseppe Lami, ISTI-CNR of Pisa, Italy; Gianluca Trentanni, ISTI-CNR of Pisa, Italy; and Alessandro Fantechi, Universita` degli studi di Firenze, Italy

MTSA: The Modal Transition System Analyser ........................................................................... 475
Nicolas D’Ippolito, Imperial College London, United Kindom; Dario Fischbein, Imperial College London, United Kindom; Marsha Chechik, University of Toronto, Canada; and Sebastian Uchitel, Imperial College London, United Kindom

MaramaEML: An Integrated Multi-View Business Process Modelling Environment with Tree-Overlays, Zoomable Interfaces and Code Generation ........................................... 477
Lei Li, University of Auckland, New Zealand; John Hosking, University of Auckland, New Zealand; and John Grundy, University of Auckland, New Zealand
PtYasm: Software Model Checking with Proof Templates ......................................................... 479
Thomas E. Hart, University of Toronto, Canada; Kelvin Ku, University of Toronto, Canada; Arie
gurfinkel, Carnegie Mellon University, United States; Marsha Chechik, University of Toronto, Canada; and David Lie, University of Toronto, Canada

Semi-Automating Pragmatic Reuse Tasks………………………………………………………………………………… 481
Reid Holmes, University of Calgary, Canada; and Robert J. Walker, University of Calgary, Canada

DUALLY: a framework for Architectural Languages and Tools Interoperability ......................... 483
Patrizio Pelliccione, University of L'Aquila, Italy; Ivano Malavolta, University of L'Aquila, Italy; and Henry Muccini, University of L'Aquila, Italy

Automated Mapping from Goal Models to Self-Adaptive Systems ............................................ 485
Mirko Morandini, FBK-IRST Trento, Italy; Loris Penserini, Universiteit Utrecht, Netherlands; and Anna Perini, FBK-IRST Trento, Italy

ADDSS: Architecture Design Decision Support System Tool.......................................................... 487
Rafael Capilla, Universidad Rey Juan Carlos, Spain; Francisco Nava, Universidad Rey Juan Carlos, Spain; Jesus Montes, Universidad Rey Juan Carlos, Spain; and Carlos Carrillo, Universidad Politecnica de Madrid, Spain

APPAREIL: A Tool for Building Automated Program Translators Using Annotated Grammars489
Diego ORDONEZ CAMACHO, Universite catholique de Louvain, Belgium; and Kim Mens,
Universite catholique de Louvain, Belgium

Rapid Model-Driven Prototyping and Verification of High-Integrity Real-Time Systems........ 491
Matteo Bordin, AdaCore, France; Marco Panunzio, University of Padua, Italy; and Stefano Puri,
Intecs, Italy

Save-IDE - An Integrated Development Environment for Building Predictable
Component-Based Embedded Systems ....................................................................................... 493
Séverine Sentilles, Mälardalen University, Sweden; John Håkansson, Uppsala University,
Sweden; Paul Pettersson, Mälardalen University, Sweden; and Ivica Crnkovic, Mälardalen
University, Sweden

The Clem Toolkit.............................................................................................................. 495
Annie Ressouche, INRIA, FRANCE; and Daniel Gaffé, Nice University & CNRS, FRANCE

Tool Support for Parametric Analysis of Large Software Simulation Systems......................... 497
Johann Schumann, RIACS/NASA Ames, USA; Karen Gundy-Burlet, NASA Ames, USA; Corina
Pasareanu, QSS Inc./NASA Ames, USA; Tim Menzie, West Virginia University, USA; and Tony
Barrett, JPL, CalTech, USA

ReqsCov: A Tool for Measuring Test-Adequacy Over Requirements ........................................ 499
Matt Staats, University of Minnesota, United States of America; Weijia Deng, University of
Minnesota, United States of America; Ajitha Rajan, University of Minnesota, United States of
America; Mats Heimdahl, University of Minnesota, United States of America

AspectM: UML-based Extensible AOM Language........................................................................ 501
Naoyasu Ubayashi, Kyushu Institute of Technology, Japan; Genya Otsubo, Kyushu Institute of
Technology, Japan; Kazuhide Noda, Kyushu Institute of Technology, Japan; Jun Yoshida,
Kyushu Institute of Technology, Japan; and Tetsuo Tamai, University of Tokyo,
Tools for Traceability in Secure Software Development ............................................................. 503
Yijun Yu, The Open University, United Kingdom; Jan Jürjens, The Open University, United
Kingdom; and Jörg Schreck, Telefónica O2, Germany

Unifying Analysis Tools with Rosetta .......................................................................................... 505
Nicolas Frisby, University of Kansas, United States

Model-Driven Development of Mobile Applications ................................................................ 509
Florence Balagtas-Fernandez, University of Munich, Germany; and Heinrich Hussmann,
University of Munich, Germany

Automated Web Performance Analysis ....................................................................................... 513
Martin Pinzger, University of Linz, Austria

Automatic Test Generation for LUSTRE/SCADE programs .................................................... 517
Virginia Papailiopoulos, University of Grenoble 1, France

Feature Interaction Detection in the Automotive Domain ............................................................ 521
Alma Juarez Dominguez, University of Waterloo, Canada

Towards Good Enough Testing: A Cognitive-Oriented Approach Applied to
Infotainment Systems ................................................................................................................. 525
Asem Eltaher, University of Braunschweig, Germany

ASE 2008 Workshops contents

ARAMIS 2008- The First International Workshop on Automated Engineering of
Autonomic and Run-Time EvolvIng Systems ............................................................................. 529
Eda Marchetti, ISTI -CNR, Italy

First International Workshop on Social Software Engineering and Applications (SoSEA 2008) 531
Eda Marchetti, ISTI -CNR, Italy

4th International ERCIM Workshop on Software Evolution and Evolvability (Evol’08) .......... 533
Eda Marchetti, ISTI -CNR, Italy

Author Index.................................................................................................................................... follows page 534
