Proceedings

BLISS 2008
2008 ECSIS Symposium on Bio-inspired, Learning, and Intelligent Systems for Security

4-6 August 2008
Edinburgh, United Kingdom

Organized by
European Center for Secure Information and Systems (ECSIS.EU)
The University of Edinburgh, United Kingdom

Supported by
European Center for Secure Information and Systems (ECSIS.EU)
Institute for System Level Integration, United Kingdom
Spiral Gateway Ltd., United Kingdom

Hosted by
The University of Edinburgh, United Kingdom
# Table of Contents

**Preface** ........................................................................................................................................... vii  
**Conference Organizers** ................................................................................................................ viii  
**Program Committee** ..................................................................................................................... ix  

## Paper Session

**Effecting an Improvement to the Fitness Function. How to Evolve a More Identifiable Face** ..................... 3  
Charlie Frowd, Joanne Park, Alex McIntyre, Vicki Bruce, Melanie Pitchford,  
Steve Fields, Mary Kenirons, and Peter J.B. Hancock

**Biometric-Based Decision Support Assistance in Physical Access Control Systems** ............................. 11  
S. Chague, B. Droit, O. Boulanov, S. N. Yanushkevich, V. P. Shmerko, and A. Stoica

**Evaluating Biometric Encryption Key Generation Using Handwritten Signatures** ................................. 17  
Sanaul Hoque, Michael Fairhurst, and Gareth Howells

**CHLAC Approach to Flexible and Intelligent Vision Systems** ................................................................. 23  
Nobuyuki Otsu

**Development of Software for Real-Time Unusual Motions Detection by Using CHLAC** ...................... 34  
Kenji Iwata, Yutaka Satoh, Katsuhiko Sakaue, Takumi Kobayashi, and Nobuyuki Otsu

**HLAC Approach to Automatic Object Counting** ................................................................................... 40  
Takumi Kobayashi, Tadaaki Hosaka, Shu Mimura, Takashi Hayashi, and Nobuyuki Otsu

**Object Detection by Selective Integration of HLAC Mask Features** ....................................................... 46  
Akinori Hidaka, Takio Kurita, and Nobuyuki Otsu

**Motion Recognition by Higher Order Local Auto Correlation Features of Motion History Images** .......... 51  
Kenji Watanabe and Takio Kurita

**The Cow Gait Recognition Using CHLAC** ......................................................................................... 56  
Shu Mimura, Keichi Itoh, Takumi Kobayashi, Tomohiro Takigawa, Atsushi Tajima,  
Atsushi Sawamura, and Nobuyuki Otsu

**Using a Cognitive Architecture to Automate Cyberdefense Reasoning** .............................................. 58  
David Paul Benjamin, Partha Pal, Franklin Webber, Paul Rubel, and Mike Atigetchi
Network Intrusion Detection by Using Cellular Neural Network with Tabu Search ........................................ 64
Zhongxue Yang, Adem Karahoca, Ning Yang, and Nizamettin Aydin

Fuzzy Vault Fingerprint Smartcard Implementation Using an Orientation-Based Feature Vector ............ 69
K. Harmer, W. Sheng, G. Howells, M. Fairhurst, and Farzin Deravi

Detecting Voltage Glitch Attacks on Secure Devices .................................................................................... 75
Asier Goikoetxea Yanci, Stephen Pickles, and Tughrul Arslan

Towards Embedded Artificial Intelligence Based Security for Computer Systems................................. 81
A.B.T. Hopkins, P. Sartain, K.D. McDonald-Maier, and W.G.J. Howells

Effects of Feature Trimming on Encryption Key Stability for an ICmetric System................................. 87
Evangelos Papoutsis, Gareth Howells, Andrew Hopkins, and Klaus McDonald-Maier

Tamper Protection for Security Devices ........................................................................................................ 92
Philip Paul, Simon Moore, and Simon Tam

Analytical Modelling: An Investigation into the Use of Smart Biosensors as Stealth Countermeasures.... 97
HJ Kadim

Partially Observable Markov Decision Process for Transmitter Power Control
in Wireless Sensor Networks ................................................................................................................ 101
Adrian Udenze and Klaus McDonald-Maier

High-Level Functional Architecture for Sensor Management System ..................................................... 107
Isabella Panella

Artificial Intelligence Methodologies Applicable to Support the Decision-Making Capability on Board
Unmanned Aerial Vehicles ......................................................................................................................... 111
Isabella Panella

WLAN for Earth Observation Satellite Formations in LEO ...................................................................... 119
Tanya Vladimirova and Kawsu Sidibeh

Towards Recognition of Humans and their Behaviors from Space and Airborne Platforms: Extracting
the Information in the Dynamics of Human Shadows ................................................................................. 125
Adrian Stoica

Stochastic Interpolation: A Probabilistic View ............................................................................................. 129
Joseph Kolibal and Daniel Howard

A Securable Autonomous Generalised Document Model (SAGENT) ..................................................... 136
Gareth Howells, Hossam Selim, Michael Fairhurst, Farzin Deravi, and Sanaul Hoque

Granular Association Analysis ...................................................................................................................... 142
Yun Shen and Trevor Martin

Clone-Resistant DNA-Like Secured Dynamic Identity ........................................................................... 148
Wael Adi

The Re-emission Side Channel .................................................................................................................. 154
Andrew Burnside, Ahmet Erdogan, and Tughrul Arslan

Author Index.............................................................................................................................................. 160
