IEEE/WIC/ACM International Conference on Web Intelligence
(WI’06)

Hong Kong, China
18-22 December 2006
2006 IEEE/WIC/ACM International Conference on Web Intelligence (WI 2006 Main Conference Proceedings) (WI’06)

Welcome Message from Conference Chairs
Welcome Message from Program Chair
WI’06 and IAT’06 Conference Organization
Program Committee
WI’06 Non-PC Reviewers

ICDM/WI/IAT Joint Keynote Paper

Neuroscience: New Insights for AI? ................................................................. 3
  Tomaso Poggio

Invited Papers

Service-Oriented Science: Scaling eScience Impact ........................................... 9
  Ian Foster

Two Obvious Intuitions: Ontology-Mapping Needs Background Knowledge
and Approximation ......................................................................................... 11
  Frank van Harmelen

Approximate Reasoning in MAS: Rough Set Approach .................................... 12
  Andrzej Skowron

Engaging in a Conversation with Synthetic Agents along the Virtuality Continuum ..................................................................................... 19
  Elisabeth André

World Wide Wisdom Web (W4)

Regular Papers

Generating Concept Ontologies through Text Mining ........................................... 23
  Lipika Dey, Ashish Chandra Rastogi, and Sachin Kumar

Short Papers

Enhancing Software Engineering Project Information through Software Engineering
Ontology Instantiations .................................................................................... 33
  P. Wongthongtham, E. Chang, and T. S. Dillon

Origin-Destination Network Tomography with Bayesian Inversion Approach ................................................................. 38
  Jianzhong Zhang
# New Social Interaction Paradigms

Knowledge Community Formation and Support

*Short Papers*

Utilizing Rich Bluetooth Environments for Identity Prediction and Exploring Social Networks as Techniques for Ubiquitous Computing ................................................................. 137
  Jukka Perkiö, Ville Tuulos, Marion Hermersdorf, Heli Nyholm, Jukka Salminen, and Henry Tirri

Knowledge Grids and Grid Intelligence

*Regular Papers*

Dynamic Access Control Prediction for Ordered Service Sequence in Grid Environment .................................................................................................................. 145
  Chuanjiang Yi, Hai Jin, and Chengwei Wang

Fast Discovery of Interesting Collections of Web Services ............................................. 152
  Zhou Zhu and James Bailey

*Short Papers*

Semantic-Based Workflow Composition for Video Processing in the Grid................................. 161
  Gayathri Natarajan, Yun-Heh Chen-Burger, and James Malone

Grid Security Framework for Managing the Certificate.................................................................. 166
  May Phyoo Oo, Nilar Thein, and Thinn Thu Naing

Semantic Discovery of Grid Services Using Functionality Based Matching Algorithm................................................................. 170
  S. Thamarai Selvi, R.A Balachandar, K. Vijayakumar, N. Mohanram,
  M. Vandana, and Rajagopalan Raman

Intelligent Transportation Information Sharing and Service Integration in Semantic Grid Environment ................................................................. 174
  Wei Shi, Jian Wu, Ying Li, and Li Kuang

Web Mining and Farming

*Regular Papers*

Personalized Hierarchical Clustering .................................................................................... 181
  Korinna Bade and Andreas Nümberger

Improving Index Compression Using Cluster Information ....................................................... 188
  Jinlin Chen, Ping Zhong, and Terry Cook

Personalized Spam Filtering with Semi-supervised Classifier Ensemble .................................... N/A
  Victor Cheng and C. H. Li

Query Directed Web Page Clustering ...................................................................................... 202
  Daniel Crabtree, Peter Andreae, and Xiaoying Gao

Using Multimedia Ontology for Generating Conceptual Annotations and Hyperlinks in Video Collections ................................................................. 211
  Gaurav Harit, Santanu Chaudhury, and Hiranmay Ghosh

</table>
The Design of Gugubarra 2.0: A Tool for Building and Managing Profiles of Web Users ................................................................. 317
   Natascha Hoebel, Sascha Kaufmann, Karsten Tolle, and Roberto V. Zicari

Financial News Mining: Monitoring Continuous Streams of Text ................................................................. 321
   Jon Espen Ingvaldsen, Jon Atle Gulla, Tarjei Laegreid, and Paul Christian Sandal

Active User-Based and Ontology-Based Web Log Data Preprocessing for Web Usage Mining ........................................... 325
   Natheer Khasawneh and Chien-Chung Chan

Semantic Analysis of Web Pages Using Web Patterns ................................................................. 329
   Milos Kudelka, Vaclav Snasel, Ondrej Lehecka, and Eyas El-Qawasme

Support Vector Machines for Text Categorization in Chinese Question Classification .............................................. 334
   Xu-Dong Lin, Hong Peng, and Bo Liu

Topic Detection and Tracking for News Web Pages ................................................................. 338
   Masaki Mori, Takao Miura, and Isamu Shioya

Extracting Users' Interests from Web Log Data .................................................................................. 343
   Tsuyoshi Murata and Kota Saito

Finding Conceptual Document Clusters with Improved Top-N Formal Concept Search .............................................. 347
   Yoshiaki Okubo and Makoto Haraguchi

Web Information Retrieval in Collaborative Tagging Systems ........................................................................... 352
   Sheung-On Choy and Andrew K. Lui

IMFTS: High-Speed Mining Frequent Traversal Sequences with Bidirectional Constraints .............................................. 356
   Jiadong Ren, Xiaojian Zhang, and Huili Peng

Improving Web Site Content Using a Concept-Based Knowledge Discovery Process ...................................... 361
   Sebastián A. Ríos, Juan D. Velásquez, Eduardo S. Vera, Hiroshi Yasuda, and Terumasa Aoki

Detection of Bloggers' Interests: Using Textual, Temporal, and Interactive Features ........................................ 366
   Chun-Yuan Teng and Hsin-Hsi Chen

The Mining and Extraction of Primary Informative Blocks and Data Objects from Systematic Web Pages ......................................................................... 370
   Yi-Feng Tseng and Hung-Yu Kao

Data Extraction from Semi-structured Web Pages by Clustering ............................................................................. 374
   Le Phone Bao Vuong, Xiaoying Gao, and Mengjie Zhang

Name Disambiguation in Person Information Mining .................................................................................. 378
   Yu-Chuan Wei, Ming-Shun Lin, and Hsin-Hsi Chen

Extraction of Reliable Reputation Information Using Contributor's Stance .................................................. 382
   Takayuki Yamada, Daisaku Sakano, Yoshiaki Yasumura, and Kuniaki Uehara

Web Appearance Disambiguation of Personal Names Based on Network Motif ............................................. 386
   Kai-Hsiang Yang, Kun-Yan Chiou, Hahn-Ming Lee, and Jan-Ming Ho
Learning to Generate Labels for Organizing Search Results from a Domain-Specific Corpus ................................................................. 390
   Jing Zhao and Jing He

Semantics and Ontology Engineering

Regular Papers

Interoperability among Distributed Overlapping Ontologies – A Fuzzy Ontology Framework ................................................................. 397
   Muhammad Abulaish and Lipika Dey

A Tableau-Based Federated Reasoning Algorithm for Modular Ontologies ................................................................. 404
   Jie Bao, Doina Caragea, and Vasant Honavar

Forgetting in Managing Rules and Ontologies ................................................................. 411
   Thomas Eiter, Giovambattista Ianni, Roman Schindlauer, Hans Tompits, and Kewen Wang

Context-based Hierarchical Clustering for the Ontology Learning ................................................................. 420
   Lobna Karoui, Marie-Aude Aufaure, and Nacera Bennacer

A Fine-Grained Approach to Resolving Unsatisfiable Ontologies ................................................................. 428
   Sik Chun Lam, Jeff Z. Pan, Derek Sleeman, and Wamberto Vasconcelos

Research on Reasoning of the Dynamic Semantic Web Services Composition ................................................................. 435
   Yingjie Li, Xueli Yu, Lili Geng, and Li Wang

Mining Domain-Specific Thesauri from Wikipedia: A Case study ................................................................. 442
   David Milne, Olona Modelyan, and Ian H. Witton

SeseiOnto: Interfacing NLP and Ontology Extraction ................................................................. 449
   Maxime Moreau, Guy W. Mineau, and Dan Corbett

Identifying Document Topics Using the Wikipedia Category Network ................................................................. 456
   Peter Schönhofen

Instantiation of Relations for Semantic Annotation ................................................................. 463
   S. Tenier, Y. Toussaint, A. Napoli, and X. Polanco

Short Papers

Document Classification Based on Support Vector Machine Using a Concept Vector Model ................................................................. 473
   Shuang Deng and Hong Peng

A Hybrid Model of Image Retrieval Based on Ontology Technology and Probabilistic Ranking ................................................................. 477
   Lisa Fan and Botang Li

Importance of Entities in Knowledge ................................................................. 481
   Jun Fang, Lei Guo, Xiaodong Wang, Liang Chen, Ning Yang, and Weili Yang

Towards a New Approach for Information Retrieval in the SemanticLIFE Digital Memory Framework ................................................................. 485
   Hanh Huu Hoang, Amin Andjomshoaa, and A Min Tjoa
Using Semantic Web Technology for Self-Management of Distributed
Object-Oriented Systems.......................................................................................... 489
A.R. Haydarlou, M.A. Oey, B.J. Overeinder, and F.M.T. Brazier

A Semantic Learning Approach for Mapping Unstructured Query to Web Resources.................. 494
Gan Keng Hoon, Phang Keat Keong, and Tang Enya Kong

A Persistent Labeling Scheme for Dynamic Ordered XML Trees................................................. 498
Aye Aye Khaing and Ni Lar Thein

Course Composition Based on Semantic Topical Dependency .................................................. 502
Javed I. Khan, Yongbin Ma, and Manas Hardas

Fuzzy Ontology Map—A Fuzzy Extension of the Hard-Constraint Ontology .............................. 506
Toby H. W. Lam

Retrieving and Matching RDF Graphs by Solving Satisfiability Problem.................................. 510
Sheng Liu and Jian Zhang

Heraclitus II: A Framework for Ontology Management and Evolution..................................... 514
Alexander Mikroyannidis and Babis Theodoulidis

Geographic Named Entity Disambiguation with Automatic Profile Generation .......................... 522
Yefei Peng, Daqing He, and Ming Mao

Automatic Ontology Generation Using Schema Information.................................................. 526
Shun-hong Sie and Jian-hua Yeh

Automatically Acquiring Training Sets for Web Information Gathering..................................... 532
Xiaohui Tao, Yuefeng Li, Ning Zhong, and Richi Nayak

Integration of Ontology Data through Learning Instance Matching.......................................... 536
Chao Wang, Jie Lu, and Guangquan Zhang

Web Directory Integration Using Conditional Random Fields.................................................... 540
Terry Chia-Wei Wu and Wen-Lian Hsu

Towards A Selective Inference Platform Based On OWL ....................................................... 544
Youwei Xu, Shengqun Tang, Yan Yang, Xu Yang

Mapping between Relational Database Schema and OWL Ontology
for Deep Annotation............................................................................................................. 548
Zhuoming Xu, Shichao Zhang, and Yisheng Dong

Toward Semantic QoS-Aware Web Services: Issues, Related Studies
and Experience.................................................................................................................... 553
Jiehan Zhou and Eila Niemelä

Utilizing Search Intent in Topic Ontology-Based User Profile for Web Mining .......................... 558
Xujuan Zhou, Sheng-Tang Wu, Yuefeng Li, Yue Xu, Raymond Y.K. Lau, and Peter D. Bruza
Web Agents

Regular Papers
Specifications and Rapid Prototyping of Multi-agent Systems through Coloured Petri Net Represented in Abductive Logic Programming (CPN-LP) .................................................. 565
   T. H. Fung

From Local Behaviors to the Dynamics in an Agent Network ........................................... 572
   Shiwu Zhang and Jiming Liu

Short Papers
Performances of Mobile-Agents for Interactive Image Retrieval ........................................ 581
   David Picard, Arnaud Revel, and Matthieu Cord

Web Services

Regular Papers
Efficient Service Composition Using Zero-Suppressed Reduced Ordered Binary Decision Diagrams ................................................................................................................. 587
   Walter Binder, Ion Constantinescu, and Boi Faltings

A Semantic Web Service Based Approach for Augmented Provenance ................................ 594
   Liming Chen, Xueqiang Yang, and Feng Tao

On Board: Sharing Resources in a Collaborative Grid-TV Environment ................................ 601
   Pilar Herrero, José Luis Bosque, Manuel Salvadores, and María S. Pérez

Semantic Web Services Discovery Using Ontology-Based Rating Model ............................. 608
   Natenapa Sriharee

Short Papers
An SOA-Based Software Deployment Management System .................................................. 617
   Ing-Yi Chen and Chao-Chi Huang

A Similarity Measure for OWL-S Annotated Web Services ................................................. 621
   Yasser Ganjisaffar, Hassan Abolhassani, Mahmood Neshati, and Mohsen Jamali

Towards a Transaction Model for Services in Grid Environment ........................................ 625
   Jinlei Jiang, Guangwen Yang, and Meilin Shi

Expressing Service and Query Behavior Using π-Calculus for Matchmaking ............................. 629
   Li Kuang, Ying Li, Shuiguang Deng, Jian Wu, and Zhaohui Wu

Web Services Description Ontology-Based Service Discovery Model ................................. 633
   Chuanchang Liu, Yong Peng, and Junliang Chen

Extending Semantic Web Service Description by Service Assumption .................................. 637
   Zheng Lu, Shiyan Li, Aditya Ghose, and Peter Hyland

Relation-Based Case Retrieval Approach for Web Services Selection .................................... 644
   S.M.F.D Syed Mustapha
Web Service Discovery via Semantic Association Ranking and Hyperclique Pattern Discovery ................................................................................................................................................. 649  
   Aabhas V. Paliwal, Nabil R. Adam, Hui Xiong, and Christof Bornhövd
A Contextual Based Semantic Modeling Approach to Task-Service Formation in Virtual Organization ................................................................................................................................................. 653  
   William Song and Mingquan Zhou
A Component-Based Approach to Automated Web Service Composition ................................................................................................................................................. 657  
   Quoc Bao Vo and Lin Padgham
An Unabridged Method Concerning Capability Matchmaking of Web Services ................................................................................................................................................. 662  
   Hai Wang, Zengzhi Li, and Lin Fan
A Dynamic Semantic Association-Based Web Service Composition Method ................................................................................................................................................. 666  
   Meng Xu, Junliang Chen, Yong Peng, Xiang Mei, and Chuanchang Liu

**Web Information Filtering and Retrieval**

**Regular Papers**

C$^2$ :: A Collaborative Recommendation System Based on Modal Symbolic User Profile ................................................................................................................................................. 673  
   Byron Leite Dantas Bezerra, Francisco de Assis T Carvalho, and Valmir Macário Filho
A Memory-Efficient Strategy for Exploring the Web ................................................................................................................................................. 680  
   Carlos Castillo, Alberto Nelli, and Alessandro Panconesi
PageSim: A Novel Link-Based Similarity Measure for the World Wide Web ................................................................................................................................................. 687  
   Zhenjiang Lin, Irwin King, and Michael R. Lyu
Web Search Engine as a Bee Hive ................................................................................................................................................. 694  
   Pavol Navrat and Martin Kovacik
Proof: A DHT-Based Peer-to-Peer Search Engine ................................................................................................................................................. 702  
   Kai-Hsiang Yang and Jan-Ming Ho
A Generalized Hidden Markov Model Approach for Web Information Extraction ................................................................................................................................................. 709  
   Ping Zhong and Jinlin Chen

**Short Papers**

Recommender System Based on Consumer Product Reviews ................................................................................................................................................. 719  
   Silvana Aciar, Debbie Zhang, Simeon Simoff, and John Debenham
Personalization of E-newsletters Based on Web Log Analysis and Clustering ................................................................................................................................................. 724  
   Carla Carvalho, Alipio M. Jorge, and Carlos Soares
A Hierarchy of Search Engines Based on ODP Concepts ................................................................................................................................................. 728  
   Venkata Sudhakar Reddy Ch and Banshi D. Chaudhary
A Novel Web Page Filtering System by Combining Texts and Images ................................................................................................................................................. 732  
   Zhouyao Chen, Ou Wu, Mingliang Zhu, and Weiming Hu
A Multi-Agent Simulation Framework for Spiders Traversing
the Semantic Web ........................................................................................................ 736
   Christos Dimou, Alexandros Batzios, Andreas L. Symeonidis, and Pericles A. Mitkas

The Impact of the Web Prefetching Architecture on the Limits of Reducing
User's Perceived Latency ............................................................................................ 740
   Josep Domènech, Julio Sahuquillo, José A. Gil, and Ana Pont

   Yan Guo, Kui Li, Kai Zhang, and Gang Zhang

A Framework of Feedback Search Engine Motivated by Content
Relevance Mining ........................................................................................................ 749
   Yuexian Hou, Honglei Zhu, and Pilian He

A Method for Focused Crawling Using Combination of Link Structure
and Content Similarity .............................................................................................. 753
   Mohsen Jamali, Hassan Sayyadi, Babak Bagheri Hariri, and Hassan Abolhassani

Substitution or Complement: An Empirical Analysis on the Impact of Collaborative
Tagging on Web Search ............................................................................................ 757
   Peng Han, Zhimei Wang, Zhiyun Li, Bernd Krämer, and Fan Yang

An Adaptive Scoring Method for Block Importance Learning .................................... 761
   Yan Liu, Qiang Wang, QingXian Wang, Yao Liu, and Liang Wei

Hybrid System Based on Intelligent Neighbor Formation Algorithm ........................ 765
   Saranya Maneeroj and Pattarasinee Bhattarakosol

Rapid Synthesis of Domain-Specific Web Search Engines Based on Semi-automatic
Training-Example Generation .................................................................................. 769
   Hidetomo Nabeshima, Reiko Miyagawa, Yuki Suzuki, and Koji Iwanuma

On Textual Documents Classification Using Fourier Domain Scoring ............................ 774
   Michal Pryczek and Piotr S. Szczepaniak

   Marco Gori and Augusto Pucci

Binary Search Join between an IR System and an RDBMS ........................................ 782
   Ernest Dawei Wang, Qiong Lup, Dongqing Yang, and Shiwei Tang

Improving Link Analysis through Considering Hosts and Blocks .................................. 786
   Qiang Wang, Yan Liu, JunYong Luo, Jing Ning, and Qing Yao

Distributed Recommender Profiling and Selection with Gittins Indices ......................... 790
   Li-Tung Weng, Yue Xu, Yuefeng Li, and Richi Nayak

LSCrawler: A Framework for an Enhanced Focused Web Crawler Based
on Link Semantics ..................................................................................................... 794
   M Yuvarani, N.Ch.S.N. Iyengar, and A Kannan
Intelligent Human-Web Interaction

Regular Papers

Privacy Preserving Multiagent Probabilistic Reasoning about Ambiguous Contexts: A Case Study ................................................................. 801
  Xiangdong An, Dawn Jutla, and Nick Cercone

A Web Browser for Ajax Approach with Asynchronous Communication Model ................................................................. 808
  Noriko Hanakawa and Nao Ikemiy

Designing Interaction Paradigms for Web-Information Search and Retrieval ......................................................... 815
  Ya-Wen Hsu, Naureen Moon, and Rahul Singh

3D Component-Based Visualization Framework for Generating Simple 3D Applications Using Web Services ................................................................. 823
  Masahiko Itoh and Yuzuru Tanaka

Effective Page Segmentation Combining Pattern Analysis and Visual Separators for Browsing on Small Screens ................................................................. 831
  Peifeng Xiang, Xin Yang, and Yuanchun Shi

Short Papers

UPRE: User Preference Based Search System ................................................................. 841
  Peter Gurský, Tomáš Horváth, Róbert Novotný, Veronika Vaneková and Peter Vojtáš

Topic-Specific Web Content Adaptation to Mobile Devices ................................................................. 845
  Eunsil Lee, Jinbeom Kang, Joongmin Choi, and Jaeyoung Yang

Web Service Based Architecture and Ontology Based User Model for Cross-System Personalization ................................................................. 849
  Fuzhi Zhang, Zhizheng Song, and He Zhang

Subject-Oriented Knowledge Formalization: Method and Prototype ................................................................. 853
  Xuan Zhou, Qing Li, Lars Ludwig, and Yuliu Chen

Web Support Systems

Regular Papers

Navigating Provenance Information for Distributed Healthcare Management ................................................................. 859
  Vikas Deora, Arnaud Contes, Omer F. Rana, Shrija Rajbhandari, Ian Wootten, Kifor Tamas, and Laszlo Z. Varga

A Comparative User Study of Web Search Interfaces: HotMap, Concept Highlighter, and Google ................................................................. 866
  Orland Hoeber and Xue Dong Yang

Interactive Web Information Retrieval Using WordBars ................................................................. 875
  Orland Hoeber and Xue Dong Yang

Process-Recollective Refinding on the Web ................................................................. 883
  Ippei Nishimoto and Masashi Toda
Short Papers

A Perception Based, Domain Specific Expert System for Question-Answering Support ........................................ 893
Raheel Ahmad and Shahram Rahimi

Adopting Wildlife Experiments for Web Evolution Estimations: The Role of an AI Web Page Classifier ................................................................. 897
Ioannis Anagnostopoulos and Photis Stavropoulos

Granular Web Shopping Experts .......................................................................................................................... 902
Ling Gu and Yan-Qing Zhang

Web-Based Distributed Embedded Gateway System Design ................................................................................. 905
Qiang Huang, J. S. Smith, and Tuo Li

Interdisciplinary Contents Management Using 5W1H Interface for Metadata ......................................................... 909
Keiko Shimazu, Tatsuya Arisawa, and Isao Saito

An Efficient Incremental Algorithm for Frequent Itemsets Mining in Distorted Databases with Granular Computing ........................................................................... 913
Congfu Xu and Jinlong Wang

Intelligent E-Technology

Regular Papers

View-Based Semantic Search and Browsing ............................................................................................................. 919
Christo Dichev and Darina Dicheva

Anting: An Adaptive Scanning Method for Computer Worms ............................................................................. 926
Yi Tang and Xiangning Dong

Strategy Acquisition of Agents in Multi-issue Negotiation .................................................................................. 933
Shohei Yoshikawa, Takahiko Kamiyko, Yoshiaki Yasumura, and Kuniaki Uehara

Public Authentication of 3D Mesh Models ........................................................................................................... 940
Hao-tian Wu and Yiu-ming Cheung

Short Papers

Safe Credential-Based Trust Protocols: A Framework ......................................................................................... 949
Sultan Almuhammadi and Nien T. Sui

A Uniform Product Knowledge Representation Semantic Model ........................................................................ 953
Chengfeng Jian, Meiyu Zhang, and Cunju Lu

Protocol Identification of Encrypted Network Traffic ....................................................................................... 957
Matthew Gebski, Alex Penev, and Raymond K. Wong

The Role of Different Thesauri Terms and Captions in Automated Subject Classification ................................... 961
Koraljka Golub

Developing Mining-Grid Centric e-Finance Portal .............................................................................................. 966
Jia Hu and Ning Zhong
The Research of a New Workflow Model with Step-Task Layers Based on XML Documents .................. 970
Xing Jianping, Zhao Lin, and Meng Lingguo

Business Process Integration of Third-Party Logistics Service Providers in E-commerce .................................................. 974
Li Yan, Liu Zhixue, and Xu Juan

Towards Fast Digestion of IMF Staff Reports with Automated Text Summarization Systems .................................................. 978
Shuhua Liu and Johnny Lindroos

A Web-Based System for Observing and Analyzing Computer Mediated Communications .................................................. 983
Madeth May, Sébastien George, and Patrick Prévôt

Factor Analysis to Support the Visualization and Interpretation of Clusters of Portal Users .................................................. 987
Carmen Rebelo, Pedro Queihas Brito, Carlos Soares, and Alípio Jorge

Distributed Storage of High-Volume Environmental Simulation Data: Mantle Modelling .................................................. 991
Martin Wolstencroft, Omer F. Rana, and J. Huw Davies

Others

Regular Papers

Interactive Tuples Extraction from Semi-structured Data .................................................. 997
Rémi Gilloron, Patrick Marty, Marc Tommasi, and Fabien Torro

A Lazy Approach for Category Model Construction Using Training Texts .................................................. 1005
Saravadee Sae Tan, Gan Keng Hoon, and Tang Enya Kong

Using Cross-Document Random Walks for Topic-Focused Multi-document Summarization .................................................. 1012
Xiaojun Wan, Jianwu Yang, and Jianguo Xiao

Fast Rollup on Recursive Hierarchy in OLAP .................................................. 1019
Lin Yuan and Hengming Zou

Short Papers

Protection Techniques from Information Extraction .................................................. 1029
Gianluigi Greco, Giovambattista Ianni, Vincenzino Lio, and Luigi Palopoli

An Ant Colony Optimization Algorithm for Learning Classification Rules .................................................. 1034
Junzhong Ji, Ning Zhang, Chunnian Liu, and Ning Zhong

Identifying User Goals from Web Search Results .................................................. 1038
Yao-Sheng Chang, Kuan-Yu He, Scott Yu, and Wen-Hsiang Lu

Investigating Semantic Measures in XML Clustering .................................................. 1042
Richi Nayak

Automatic Discovery of Concepts from Text .................................................. 1046
Ong Siou Chin, Narayanan Kulathuramaiyer, and Alvin W. Yeo
QSCM: Engineering QoS in Web-Based Software Configuration Management
System ........................................................................................................................................ 1050
Xiuli Wang, Yongji Wang, and Hui Zhou

Industry Track Papers

PARMENIDES: Towards Business Intelligence Discovery from Web Data ........................................ 1057
Alexander Mikroyannidis, Babis Theodoulidis, and Andreas Persidis

iShakti – Crossing the Digital Divide in Rural India.............................................................................. 1061
Shail Patel, Ogi Batavaljic, Paulo J. Lisboa, Chris Hawkins, and Rohithari Rajan

Towards Automated Reputation and Brand Monitoring on the Web .............................................. 1066
Cai-Nicolas Ziegler and Michal Skubacz

Demonstration Track Papers

dlvhex: A Prover for Semantic-Web Reasoning under the Answer-Set Semantics............................. 1073
Thomas Eiter, Giovambattista Ianni, Roman Schindlauer, and Hans Tompits

MICE³: An Information Desktop on the Web...................................................................................... 1075
Gan Keng Hoon, Saravadee Sae Tan, and Bryan Gan

An Integrated Argumentation Environment for Arguing Agents...................................................... 1077
Takashi Isogai, Taro Fukumoto, and Hajime Sawamura

VIREX: Interactive Approach for Database Querying and Integration
by Recoding Relational Data into XML.......................................................................................... 1079
Anthony Lo, Reda Alhaji, and Ken Barker
