Proceedings

The 28th International Conference on Distributed Computing Systems Workshops

Beijing, China
June 17 - 20, 2008

Sponsored by
The IEEE Computer Society Technical Committee on Distributed Processing
China Computer Federation
Institute of Computing Technologies, Chinese Academy of Sciences

Los Alamitos, California
Washington • Tokyo
Welcome Message from the Conference Chairs
Welcome Message from the Workshop Co-Chairs.
Message from MNSA-2008 International Workshop Organizers
MNSA 2008 Organizing Committee
Message from the WiMAN 2008 Chairs
WiMAN 2008 Organizing Committee
Message from the DTMN 2008 Workshop Co-Chairs
DTMN 2008 Organizing Committee
Message from the TRAM 2008 Program Chairs
TRAM 2008 Organizing Committee.
Message from the WWASN 2008 Chairs
WWASN 2008 Organizing Committee
Message from the WiSP 2008 Workshop Chairs
WiSP 2008 Workshop Organization
Message from the CDS 2008 Workshop Organizers
CDS 2008 Organizing Committee
Message from the WCPS 2008 Co-Chairs
WCPS 2008 Organizing Committee
WCPS 2008 Reviewers.
Message from the ADSN 2008 Co-Chairs
ADSN 2008 Organizing Committee.
ADSN 2008 Reviewers
The 10th International Workshop on Multimedia Network Systems and Applications — MNSA 2008

Session 1: P2P and Overlay Networks  Chair: Leonard Barolli, Fukuoka

Institute of Technology

A Protocol for Making an Agreement in a Peer-to-Peer (P2P) Society ..........................................................1
Ailixier Aikebaier, Tomoya Enokido, and Makoto Takizawa

On Feasibility of P2P On-Demand Streaming via Empirical VoD User Behavior Analysis ..............................................................7
Bin Chang, Liang Dai, Yi Cui, and Yuan Xue

A Measurement Study of Cache Rejection in P2P Live Streaming System .....................................................12
Yishuai Chen, Changjia Chen, and Chunxi Li

A Multi-Source Streaming Model for Mobile Peer-to-Peer (P2P) Overlay Networks ...............................................18
Alireza Goudarzi Nemati, Tomoya Enokido, and Makoto Takizawa

Session 2: Distributed Systems  Chair: Yoshitaka Shibata, Iwate Prefectural University

Role Based Access Control in Distributed Object Systems ..................................................................................24
Tomoya Enokido and Makoto Takizawa

Security Framework in a Virtual Large-Scale Disk System .................................................................................30
Minoru Uehara

Pose Estimation for Evaluating Standing Long Jumps via Dynamic Bayesian Networks ........................................36
Hui-Huang Hsu, Yao-Bao Yen, Chu-Song Chen, and Chun-Ta Ho

Delivery Infrastructure for Secure Scalable Coded Multimedia ......................................................................42
Markus Dunte and Christoph Ruland

Session 3: Wireless Networks  Chair: Makoto Takizawa, Sekei University

Adaptive Layered Multimedia Transmissions over Wireless Networks .............................................................48
Arjan Durresi, Vamsi Paruchuri, Mimoza Durresi, and Leonard Barolli

Experimental Evaluation of Usage Pattern in Campus Mobile IP Network ........................................................54
Jaehyuk Ryu and Koji Okamura

An Adaptive Bandwidth Request Scheme for QoS Support in WiMAX Polling Services .......................................60
Cheng-Yueh Liu and Yaw-Chung Chen

Routing Efficiency of AODV and DSR Protocols in Ad-Hoc Sensor Networks .............................................66
Tao Yang, Makoto Ikeda, Giuseppe De Marco, Leonard Barolli, Arjan Durresi, and Fatos Xhafa
Session 4: Multimedia Systems  Chair: Minoru Uehara, Toyo University

Collaborative and Multimodal Communications System Using Immersive Virtual Reality Environment over Ultrahigh-Speed Network ................................................................. 72
Tomoyuki Ishida, Akihiro Miyakawa, and Yoshitaka Shibata

Open 3D Shared Space Construction Scheme for Symbiotic Collaborative Works .......................................................................................................................................................................... 78
Takayuki Kuroda, Akira Sakatoku, Gen Kitagata, Debasish Chakraborty, and Norio Shiratori

Adam — A Testbed for Distributed Virtual Environments .................................................................................................................. 84
Jan Sablatnig, Jiehua Chen, Ruedi Seiler, Sven Grottke, Andreas Kopke, and Adam Wolisz

MultiStream — A Cross-Platform Display Sharing System Using Multiple Video Streams ............................................................................................................................. 90
Yong Liu, Otto J. Anshus, Phuong H. Ha, Tore Larsen, and John Markus Bjorndalen

The Second International Workshop on Wireless Mesh and Ad Hoc Networks — WiMAN 2008

Session 1: Routing, Scheduling, and Channel Assignment  Chair: Hock Beng Lim, Nanyang Technological University

Bipartite Graph Based Dynamic Spectrum Allocation for Wireless Mesh Networks ................................................................................................................................. 96
Jianjun Yang and Zongming Fei

Cross-Layer Scheduling for Multiple Video Streams over a Hierarchical Emergency-Deployed Network .................................................................................................................. 102
Virginia Corvino, Velio Tralli, and Roberto Verdone

Joint Routing and Channel Assignment in WMN Using Extended Petri Net .......................................................................................................................... 108
Hejiao Huang, Yun Peng, and Jing Li

Real-Time Routing in Wireless Sensor Networks ............................................................................................................................. 114
Adel Ali Ahmed, Liza Abdul Latiff, M.A. Sarijari, and Norsheila Fisal

Session 2: MAC Protocols  Chair: Liqiang Zhang, Indiana University South Bend

Fast Link Assessment in Wireless Mesh Networks by Using Non-Constant Weight Code ................................................................................................................................. 120
Ravi Nelavelli, Rajesh Prasad, and Hongyi Wu

On Load Regulated CSMA ............................................................................................................................................................. 126
Manzur Ashraf, Aruna Jayasuriya, and Sylvie Perreau
Maximizing Aggregate Throughput of Wireless Ad Hoc Networks Using Enhanced Physical Carrier Sensing ......................................................................................................................132
Nyein Aye Maung Maung, Taku Noguchi, and Makoto Kawai

Session 3: Sensor Networks and Multi-Hop Communications  Chair:

Yu-Kwong Kwok, Colorado State University

Flip Error Resistant Stitching in Sensor Network Localizations ..................................................................................................................138
Oh-Heum Kwon and Ha-Joo Song

On Improving the Precision of Localization with Gross Error Removal .................................................................................................144
Chongming Zhang, Xi Zhou, Chuanshan Gao, and Chunmei Wang

Comparing the Efficiency of Localization Algorithms with the Power-Error-Product (PEP) .............................................................................................................................150
Frank Reichenbach, Jan Blumenthal, and Dirk Timmermann

Local Topology Assisted XOR Coding in Wireless Mesh Networks ........................................................................................................156
Rajesh Prasad, Hongyi Wu, Dmitri Perkins, and Nian-Feng Tzeng

Session 4: Modeling and Performance Evaluations  Chair: Christian

Poellabauer, University of Notre Dame

Game Theoretic Packet Scheduling to Combat Non-Cooperativeness in Wireless Mesh Networks ..................................................................................................................162
Zhen Kong, Yu-Kwong Kwok, and Jiangzhou Wang

A Middleware Services Simulation Platform for Wireless Sensor Networks ........................................................................................................168
Hock Beng Lim, Bang Wang, Cheng Fu, Arpan Phull, and Di Ma

An Actor-Oriented Group Mobility Model for Wireless Ad Hoc Sensor Networks ........................................................................................................174
Enkhbold Ochirsuren, Leandro Soares Indrusiak, and Manfred Glesner

The Third International Workshop on Delay/Disruption-Tolerant Mobile Networks — DTMN 2008

Session 1: Routing, Scheduling, and Channel Assignment

Understanding the Tolerance of Dynamic Networks: A Routing-Oriented Approach ..................................................................................................................180
Yifeng Shao and Jie Wu

Reliable and Efficient Alarm Message Routing in VANET .................................................................................................................................186
Hao Jiang, Hao Guo, and Lijia Chen

A Cooperative ARQ for Delay-Tolerant Vehicular Networks .................................................................................................................................192
Julián Morillo Pozo, Oscar Trullols, José M. Barceló, and Jorge García Vidal
Session 2: Routing II

A Receiver-Based Opportunistic Forwarding Protocol for Mobile Sensor Networks ................................................................. Lian Li, Limin Sun, Jian Ma, and Canfeng Chen
Reality-Check for DTN Routing Algorithms ...................................................................................................................................... Arshad Islam and Marcel Waldvogel
Bounded-Delay, Probability-Based Routing in Intermittently Connected Mobile Ad Hoc Networks ........................................... Xianning Li and Xianwei Zhou

Session 3: Routing III

Data Collection with Multiple Mobile Actors in Underwater Sensor Networks ......................................................... Jincheng Wang, Deshi Li, Mi Zhou, and Dipak Ghosal
Remaining Delivery Time Estimation Based Routing for Intermittently Connected Mobile Networks ........................................ Feng Liu, Ming Li, Run Zhang, He Zhang, and Zhen Xu
Online Estimation of Effective Delivery Capability in Delay-Tolerant Mobile Sensor Networks ........................................ Zhipeng Yang, Ha Dang, and Hongyi Wu

The Second International Workshop on Trust and Reputation Management in Massively Distributed Computing Systems — TRAM 2008

Session 1: TRAM 2008 Keynote Chair: Yafei Dai
A Grassroots Approach in P2P Reputation Studies .......................................................................................................................... Xiaoming Li

Session 2: Invited Papers Chair: Yafei Dai
H-Trust: A Robust and Lightweight Group Reputation System for Peer-to-Peer Desktop Grid .......................................................................................................................................................................................... Huanyu Zhao and Xiaolin Li
Modeling Attack Behaviors in Rating Systems ............................................................................................................................ Qinyuan Feng, Yafei Yang, Yan Lindsay Sun, and Yafei Dai

Session 3: Trust Models and Reputation Systems Chair: Yan Sun
On the Modeling of Honest Players in Reputation Systems ........................................................................................................ Qing Zhang and Ting Yu
Computing Reputation Metric in Multi-Agent E-Commerce Reputation System .................................................................................................................................................................................. Anna Gutowska and Kevan Buckley
### Session 1: Routing and Broadcasting

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Manetkit: A Framework for MANET Routing Protocols</td>
<td>261</td>
</tr>
<tr>
<td>Rajiv Ramdhany and Geoff Coulson</td>
<td></td>
</tr>
<tr>
<td>The (k,l) Coredian Tree for Ad Hoc Networks</td>
<td>267</td>
</tr>
<tr>
<td>Amit Dvir and Michael Segal</td>
<td></td>
</tr>
<tr>
<td>An Effective Algorithm for Computing Energy-Efficient Broadcasting Trees in All-Wireless Networks</td>
<td>273</td>
</tr>
<tr>
<td>Doina Bein and S.Q. Zheng</td>
<td></td>
</tr>
<tr>
<td>Fast-Converging Distance Vector Routing for Wireless Mesh Networks</td>
<td>279</td>

### Session 3: Security and Applications

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>A Distributed Intrusion Detection Scheme for Wireless Sensor Networks</td>
<td>309</td>
</tr>
<tr>
<td>Guorui Li, Jingsha He, and Yingfang Fu</td>
<td></td>
</tr>
<tr>
<td>Intrusion Objects with Shapes under Randomized Scheduling Algorithm</td>
<td>315</td>
</tr>
<tr>
<td>Yang Xiao, Hui Chen, Yanping Zhang, Xiaojiang Du, Bo Sun, and Kui Wu</td>
<td></td>
</tr>
<tr>
<td>Design and Implementation of a WSN-Based Intelligent Light Control System</td>
<td>321</td>
</tr>
<tr>
<td>Meng-Shiuan Pan, Lun-Wu Yeh, Yen-Ann Chen, Yu-Hsuan Lin, and Yu-Chee Tseng</td>
<td></td>
</tr>
<tr>
<td>SCALAR: Scalable Data Lookup and Replication Framework for Mobile Ad-hoc Networks</td>
<td>327</td>
</tr>
<tr>
<td>Emre Atsan and Oznur Ozkasap</td>
<td></td>
</tr>
</tbody>
</table>
Session 4: Modeling and Measurements

Measuring the Node Energy Consumption in USB Based WSN Testbeds ....................................................333

Andreas Kopke and Adam Wolisz

Performance of Incomplete Channel Sensing for Frequency Hopping

Cognitive Personal Area Networks .................................................................339

Vojislav B. Misic and Jelena Misic

Impact of Selfish Rate Adaptation on the Performance in IEEE 802.11-Based Wireless Multi-Hop Networks ...............................................................345

Pei Li, Yinlong Xu, and Chunpeng Zhang

The First International Workshop on Wireless Security and Privacy — WiSP'08

Session 1: WiSP 2008 Opening Remarks and Keynote Chair: Sajal Das, Zhen Jiang and Xiao Chen

Cyber Security: An Obtainable Goal? ..................................................................................................................351

David H.C. Du

Session 2: Detections and Reputation Management Chair: Xukai Zou

Compromised Sensor Nodes Detection: A Quantitative Approach .................................................................352

Tao Li, Min Song, and Mansoor Alam

Anonymous Misbehavior Detection in Mobile Ad Hoc Networks ..............................................................358

Bo Zhu, Kui Ren, and Lingyu Wang

A Novel CDS-Based Reputation Monitoring System for Wireless Sensor Networks ................................................64

Avinash Srinivasan, Feng Li, and Jie Wu

ARM: An Account-Based Hierarchical Reputation Management System for Wireless Ad Hoc Networks .................................................................370

Haiying Shen and Ze Li

Session 3: Key Agreement and Management Chair: Haiying Shen

LEAP++: A Robust Key Establishment Scheme for Wireless Sensor Networks ........................................376

Chae Hoon Lim

Pairing Devices with Good Quality Output Interfaces ..................................................................................382

Nitesh Saxena and Jonathan Voris

Optimized User Revocation for Group Signature Based Privacy-Aware PKI ................................................388

Wei Ren, Kui Ren, and Wenjing Lou
Session 4: Methodology and Protocol  Chair: Wenjing Lou

Quality-of-Protection (QoP): A Quantitative Methodology to Grade Security Services .......................................................................................................................................................................................... 394
  Yan Sun and Anup Kumar

n-LDA: n-Layers Data Aggregation in Sensor Networks ................................................................. 400
  Ioana Rodhe and Christian Rohner

Notes on the CRTDH Group Key Agreement Protocol ........................................................................ 406
  Spyros Magliveras, Wandi Wei, and Xukai Zou

Preserving Source-Location Privacy in Energy-Constrained Wireless Sensor Networks .......................................................................................................................................................................................... 412
  Jianbo Yao and Guangjun Wen

The Second International Workshop on Cooperative Distributed Systems —

CDS 2008

CDS Session 1

Higher Confidence in Event Correlation Using Uncertainty Restrictions .............................................. 417
  Gerald G. Koch, Boris Koldehofe, and Kurt Rothermel

Flexible Concurrency Control for Real-Time Collaborative Editors ...................................................... 423
  Abdessamad Imine

A Dynamic Hashing Approach to Supporting Load Balance in P2P Systems .............................................. 429
  Ye-In Chang, Hue-Ling Chen, Sih-Ning Li, and Hung-Ze Liu

CDS Session 2

ROCC: A Communication Overlay Abstraction for Wireless Users .......................................................... 435
  Seth Holloway and Christine Julien

Towards a Group-Based RBAC Model and Decentralized User-Role Administration ...................................... 441
  Qi Li, Mingwei Xu, and Xinwen Zhang

Scalable AOI-Cast for Peer-to-Peer Networked Virtual Environments ...................................................... 447
  Jehn-Ruey Jiang, Yu-Li Huang, and Shun-Yun Hu

CDS Session 3

A Formalism for Recongurability Analysis in Distributed Non-Blocking Components .................................................. 453
  Mahdi Niamanesh and Rasool Jalili

Caching Invalidation Strategies for Supporting 'Weak' Location Dependent Queries .................................. 459
  Yilin Wang, Edward Chan, Wenzhong Li, and Sanglu Lu

Heuristic Relay Node Selection Algorithm for One-Hop Overlay Routing ............................................. 465
  Yin Chen, Li Tang, and Jun Li
Probabilistic Routing with Multi-Copies in Delay Tolerant Networks .................................................................471
Ze Li and Haiying Shen

The First International Workshop on Cyber-Physical Systems — WCPS 2008

WCPS Session 1: Invited Papers

WCPS 2008 Invited Talk

RETRoFIT: Reliable Exchanges through Resilient Overlays for Internet Teleoperation .................................................................477
Karthik Singaram Lakshamanan and Raj Rajkumar

WCPS Session 2

Real-Time Data Services for Cyber Physical Systems .................................................................................................483
Kyoung-Don Kang and Sang H. Son
A Certificateless Signature Scheme for Mobile Wireless Cyber-Physical Systems .................................................................489
Zhong Xu, Xue Liu, Guoqing Zhang, Wenbo He, Guanzhong Dai, and Weihuan Shu
Secure Control: Towards Survivable Cyber-Physical Systems .................................................................................................495
Alvaro A. Cardenas, Saurabh Amin, and Shankar Sastry
A Relaxation Approach to Dynamic Sensor Selection in Large-Scale Wireless Networks .................................................................501
James E. Weimer, Bruno Sinopoli, and Bruce H. Krogh

WCPS Session 3

Towards Cyber-Physical Holodeck Systems Via Physically Rendered Environments (PRE’s) .................................................................507
Veljko Krunic and Richard Han
Module-Based Modeling of Cyber-Physical Power Systems .................................................................................................513
Le Xie and Marija D. Ilic

WCPS Session 4

Security Property Violation in CPS through Timing .................................................................................................519
Han Tang and Bruce M. McMillin
Design and Development Methodology for Resilient Cyber-Physical Systems .................................................................................................525
Honguk Woo, Jianliang Yi, James C. Browne, Aloysius K. Mok, Ella Atkins, and Fei Xie
Cyber-Physical Medical and Medication Systems .................................................................................................529
Albert M.K. Cheng
The Seventh International Workshop on Assurance in Distributed Systems
and Networks — ADSN 2008

ADSN 2008 Keynote Chair: Kinji Mori

Coverage Based Testing for Concurrent Software .......................................................... 533

Juichi Takahashi, Hideharu Kojima, and Zengo Furukawa

Session 1: Dependable Computing Chair: Kenji Ishida

Automated Addition of Fault-Tolerance to SCR Toolset: A Case Study .......................... 539

Fuad Abujarad and Sandeep S. Kulkarni

Improving Routing Reliability on Wireless Sensors Network with Emergency
Paths ........................................................................................................................................ 545

Bastien Mainaud, Mariem Zekri, and Hossam Afifi

Session 2: Autonomous Decentralized Architecture Chair: Tomoyuki Ohta

On Robotics Applications in Service-Oriented Architecture ........................................ 551

Yinong Chen and Xiaoying Bai

Autonomous Decentralized VoD Architecture to Achieve Service Assurance .................. 557

Xiaodong Lu and Kinji Mori

Autonomous Decentralized Community Construction Technology for High
Quality Information Service .............................................................................................. 563

Khalid Mahmood, Yuuya Kanamaru, Xiaodong Lu, and Kinji Mori

Session 3: Networking Chair: Yinong Chen

An Autonomous Clustering-Based Hierarchical Routing Using Decentralized
Route Information Management Scheme for Mobile Ad Hoc Networks ...................... 569

Ryotaro Oda, Tomoyuki Ohta, and Yoshiaki Kakuda

Route-Split Routing with Resiliency to Simultaneous Failure for Mobile Ad
Hoc Networks ..................................................................................................................... 575

Tsuyoshi Mizumoto, Tomoyuki Ohta, and Yoshiaki Kakuda

A Novel Railway Signal Control System Based on the Internet Technology
and an Assurance Technology ........................................................................................... 581

Takashi Kunifuji, Tadao Miura, Gen Kogure, Hiroyuki Sugahara,
and Masayuki Matsumoto

Session 4: Scheduling Chair: Xiaodong Lu

A New Scheduling Algorithm for Distributed Streaming Media System Based
on Multicast ........................................................................................................................ 587

Yunpeng Chai, Zhihui Du, and Sanli Li
