Proceedings

2008 International Symposium on Applications and the Internet
SAINT 2008

28 July - 1 August 2008
Turku, Finland

Co-sponsored by
IEEE Computer Society (IEEE-CS)
Information Processing Society of Japan (IPSJ)

The SAINT 2008 organizers would like to thank the following Platinum Supporter

NOKIA
Connecting People

Los Alamitos, California
Washington • Tokyo
International Symposium on Applications and the Internet
SAINT 2008

Table of Contents

Message from the General Chairs
Message from the Program Committee Chair
Organizing Committee
Program Committee
Steering Committee
Workshops Program Welcome Message
Message from the Organizers of the Second International Workshop on SensorWebs, Databases and Mining in Networked Sensing Systems (SWDMNSS)
Message from the Organizers of the Third International Workshop on Dependable and Sustainable Peer-to-Peer Systems (DAS-P2P 2008)
Organizers’ Welcome for the Workshop on Heuristic Methods for the Design, Deployment, and Reliability of Networks and Network Applications (HEUNET 2008)
Message from the Organizers of the Workshop on Middleware Architecture in the Internet (Mid Arch 2008)
Message from the Organizers of the Workshop on Social and Personal Computing for Web-Supported Learning Communities (SPeL 2008)

Message from Organizer of Workshop for Ubiquitous Networking and Enablers to Context-Aware Services (UNECAS)

Message from the Organizers of the Workshop on Power Consumptions in Future Network Systems (PCFNS)

Message from Organizers of the Second International Workshop on Practical Applications of Sensor Networking (PASN)

Message from the Organizers of the Workshop on Next Generation Service Platforms for Future Mobile Systems (NGSP-FMS)

---

Session 1: Network Architecture and Performance

Performance Measurements and Statistics of Tor Hidden Services ............................................................1
  Karsten Loesing, Werner Sandmann, Christian Wilms, and Guido Wirtz
Dynamic Relay Node Placement in Wireless Sensor Networks ...................................................................8
  Jorge Mena and Vana Kalogeraki
DHT Network with Link Access Control Using a Social Network ...............................................................18
  Kimihiko Ando, Atsuo Fukagai, Kohta Ohshima, and Matsuaki Terada

Session 2: Web Services

Semantic Web Services Discovery by Matching Temporal Restrictions ....................................................26
  Cássio V. S. Prazeres, Cesar A. C. Teixeira, and Maria da Graça C. Pimentel
On the Enhancement of BPEL Engines for Self-Healing Composite Web Services ..........................................33
  Sattanathan Subramanian, Philippe Thiran, Nanjangud C. Narendra, Ghita Kouadri Mostefaoui, and Zakaria Maamar
A Web Service Communication Policy for Describing Non-standard Application Requirements ..........................40
  Steffen Heinzl, Markus Mathes, and Bernd Freisleben
Session 3: Security 1
ROOK: Multi-session Based Network Security Event Detector .................................................................48
  Masayoshi Mizutani, Shin Shirahata, Masaki Minami, and Jun Murai
A Generalized Feature Extraction Scheme to Detect 0-Day Attacks via IDS Alerts ......................................................55
  Jungsuk Song, Hiroki Takakura, and Yongjin Kwon
Function Call Mechanism Based Executable Code Detection for the Network Security ........................................62
  Daewon Kim, Yangseo Choi, Ikkyun Kim, Jintae Oh, and Jongsoo Jang

Session 4: Security 2
Extracting Worm-Infected Hosts Using White List ..........................................................................................68
  Noriaki Kamiyama, Tatsuya Mori, Ryoichi Kawahara, Shigeki Harada, and Hideaki Yoshino
Manager-Based Architecture in Ad Hoc Network Intrusion Detection System for Fast Detection Time ................76
  Muhammad Arifin Ritonga and Masaya Nakayama
Secure Framework for Integrated Multipath MANET with Internet ..............................................................83
  Binod Vaidya, Jae-Young Pyun, Sungbum Pan, and Nak-Yong Ko

Session 5: Search and Verification
Tiny LSH for Content-Based Copied Video Detection ......................................................................................89
  Kenichi Yoshida and Noboru Murabayashi
Efficient Information Searching Methods Based on User Utility in Super Distributed Environments ..................96
  Shinji Sugawara, Hiroyuki Ohnishi, and Yutaka Ishibashi
An Abstract Generic Framework for Web Site Verification ...........................................................................104
  M. Alpuente, P. Ojeda, D. Romero, D. Ballis, and M. Falaschi

Session 6: Collaboration
Huffman-DHT: Index Structure Refinement Scheme for P2P Information Retrieval ........................................111
  Hisashi Kurasawa, Atsuhiro Takasu, and Jun Adachi
inContext: A Pervasive and Collaborative Working Environment for Emerging Team Forms .........................118
  Hong-Linh Truong, Schahram Dustdar, Dino Baggio, Stephane Corlosquet, Christoph Dorn, Giovanni Giuliani, Robert Gombotz, Yi Hong, Pete Kendal, Christian Melchiorre, Sarit Moretzky, Sebastien Peray, Axel Polleres, Stephan Reiff-Marganiec, Daniel Schall, Simona Stringa, Marcel Tilly, and HongQing Yu
Group-Based Image Retrieval Method for Video Annotation ........................................................................126
  Noboru Murabayashi, Setsuya Kurahashi, and Kenichi Yoshida
International Symposium on Applications and the Internet Workshops (SAINT 2008 Workshops)

The 2nd International Workshop on SensorWebs, Databases and Mining in Networked Sensing Systems (SWDMNSS 2008)

### Session 1: Wireless Sensor Networks

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Scalable Sensor Data Management under Frequent Content Changes in Peer-to-Peer Network</td>
<td>133</td>
</tr>
<tr>
<td>Design and Implementation of Sensor Network on the NGN/IMS</td>
<td>141</td>
</tr>
<tr>
<td>Managing Heterogeneous Data Flows in Wireless Sensor Networks Using a 'Split Personality' Mote Platform</td>
<td>145</td>
</tr>
</tbody>
</table>

**Authors:**
- Masatoshi Sekine and Kaoru Sezaki
- Monty Beuster, Michael Beigl, Daniel Röhr, Till Riedel, Christian Decker, and Martin Berchtold
- Yasuhiro Araki, Minh Tuan Nguyen, and Hiroyuki Morikawa
- Danny Hughes, Mickaël Daudé, Geoff Coulson, Gordon Blair, Paul Smith, Keith Beven, and Wlodek Tych

### Session 2: Data Management and Modeling

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Experiences on Data Collection Tools for Wearable and Ubiquitous Computing</td>
<td>149</td>
</tr>
<tr>
<td>Capturing Personal Health Data from Wearable Sensors</td>
<td>153</td>
</tr>
<tr>
<td>Models and Issues on Probabilistic Data Streams with Bayesian Networks</td>
<td>157</td>
</tr>
<tr>
<td>Creating Location-Based Services by Utilising a Web of Places</td>
<td>161</td>
</tr>
</tbody>
</table>

**Authors:**
- Susanna Pirttikangas, Kaori Fujinami, and Simo Hosio
- Fabrice Camous, Dónall McCann, and Mark Roantree
- Hideyuki Kawashima, Ryo Sato, and Hiroyuki Kitagawa
- Benedikt Ostermaier and Philipp Bolliger

### Session 3: Sensing Techniques and Applications

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Detection of Pedestrians Using Subtraction Stereo</td>
<td>165</td>
</tr>
<tr>
<td>Foot-Step Input Method for Operating Information Devices While Jogging</td>
<td>173</td>
</tr>
</tbody>
</table>

**Authors:**
- Yuuki Hashimoto, Yusuke Matsuki, Tatsuya Nakanishi, Kazunori Umeda, Kei Suzuki, and Kazunori Takashio
- Arei Kobayashi, Takeshi Iwamoto, and Satoshi Nishiyama
- Tetsuya Yamamoto, Masahiko Tsukamoto, and Tomoki Yoshihisa
Life2Guard: A Physical Disorder Detection in Private Rooms .................................................................177
Naoya Namatame, Jin Nakazawa, Kaznori Takashio, and Hideyuki Tokuda

Session 4: Frameworks for Networked Sensing Systems

ContextXML: A Data Processing Framework for Ubiquitous Computing ......................................................181
D. Wildschut, T. Riedel, C. Decker, D. Roehr, M. Beigl, and M. Isomura
Towards a Common Sensor Network API: Practical Experiences .................................................................185
Filip Šuba, Christian Prehofer, and Jilles van Gurp
Sharing Worldwide Sensor Network ..............................................................................................................189
Lei Shu, Manfred Hauswirth, Long Cheng, Jian Ma, Vinny Reynolds, and Lin Zhang

The Third International Workshop on Dependable and Sustainable Peer-to-Peer Systems (DAS-P2P 2008)

Session 1: Identity, Reputation and Trust

A Sybil-Resilient Reputation Metric for P2P Applications ...........................................................................193
Tien Tuan Anh Dinh and Mark Ryan
A Recommender Scheme for Peer-to-Peer Systems ...................................................................................197
Loubna Mekourar, Youssef Iraqi, and Raouf Boutaba

Session 2: Reliability and Self-Organization

A Reliability Model for Result Checking in Volunteer Computing ..............................................................201
Ling Xu, Hong Wang, Hiroyuki Takizawa, and Hiroaki Kobayashi
Bootstrapping of Peer-to-Peer Networks ...................................................................................................205
Chris GauthierDickey and Christian Grothoff
Analysis of a Self-Organizing Maintenance Algorithm under Constant Churn ...........................................209
Richard Price, Tien Tuan Anh Dinh, and Georgios Theodoropoulos
A Design for Distributed Backup and Migration of Distributed Hash Tables .............................................213
Yusuke Doi, Shirou Wakayama, and Satoshi Ozaki

Session 3: Fairness and Social Responsibility

SSS: A Personal File Storage System Considering Fairness among Users Based on Pure P2P Model ...................217
Shouta Morimoto and Fumio Teraoka
Local Production, Local Consumption Storage Economics for Peer-to-Peer Systems ..................................221
Kenji Saito and Eiichi Morino
Workshop on Heuristic Methods for the Design, Deployment, and Reliability of Networks and Network Applications (HEUNET 2008)

Session 1: Networks and Network Applications

A Multilevel Approach for the Routing and Wavelength Assignment Problem ..................................................225
  Thomas Fischer, Kerstin Bauer, and Peter Merz
Integer Programming Approaches to the Problem of Network Upgrading .........................................................229
  Toshihide Ibaraki, Toshihide Nomura, and Masahiro Sasaki
Variable Neighborhood Search for a Prize Collecting Capacity Constrained Connected Facility Location Problem ........................................................................................................233
  Markus Leitner and Günther R. Raidl
Wireless Sensor Network Deployment Using a Memetic Simulated Annealing .............................................237
  Guillermo Molina and Enrique Alba
Efficiency Analysis on an Information Sharing Process with Randomly Moving Mobile Sensors .............................................241
  Akihiro Fujihara and Hiroyoshi Miwa

Session 2: Network Design, Deployment and Reliability

Some Communication Aspects in Extended Fibonacci Cubes ........................................................................245
  Ioana Zelina, Grigor Moldovan, and Petrică Pop Sitar
Optimization of the Answering Method with Probability Conversion .........................................................249
  Atsushi Tagami, Chikara Sakaki, Teruyuki Hasegawa, Shigehiro Ano, and Yoichi Tomiura
Evolutionary Approach to Maxmin-Fair Network-Resource Allocation ......................................................253
  Mario Köppen, Masato Tsuru, and Yuji Oie
A GRASP Algorithm for the Connected Facility Location Problem ...........................................................257
  Alessandro Tomazic and Ivana Ljubić
Heuristic Cut Separation in a Branch&Cut Approach for the Bounded Diameter Minimum Spanning Tree Problem .............................................................................................................261
  Martin Gruber and Günther R. Raidl

Workshop on Middleware Architecture in the Internet (Mid Arch 2008)

Session 1: Grid Computing Middleware

A Dynamic Window Control Method of Grid Middleware for Volume Data Transfer to Make the Best Use of Reservation Bandwidth ..........................................................265
  Naoto Ikeda, Masaaki Noro, Ken-ichi Baba, and Shinji Shimojo
Consideration of Resource Access History for Optimizing Overlay Networks in P2P-Based Resource Discovery ..........................................................269
  Tsutomu Inaba, Yoshitomo Murata, Hiroyuki Takizawa, and Hiroaki Kobayash
A Communication Relay Mechanism toward Virtual Cluster Computing on the Grid .................................................................273
Yasuyuki Kusumoto, Susumu Date, Kohei Ichikawa, Shingo Takeda, and Shinji Shimojo

An Authentication System Development in Application of Grid Middleware to a Nationwide Joint-Use Environment for Computing .................................................................277
Eisaku Sakane, Manabu Higashida, Shingo Okamura, Toyokazu Akiyama, Ken-ichi Baba, Shinji Shimojo, and Yuuichi Teranishi

Session 2: Network Middleware

Resource Access Control for Wireless LAN Roaming Systems .................................................................281
Yoshikazu Watanabe, Hideaki Goto, and Hideaki Sone

Realizing Policy Roaming by Cooperating Edge-Mobility and Authentication Systems .................................................................285
Kouji Nishimura, Akio Seki, Hajime Masaoka, Tohru Kondo, Koichi Tashima, Seigo Kishiba, and Reiji Aibara

Proposal of New Layer of Indirection between Application and Transport Layers for Flexible Communications in IP Networks .................................................................289
Nobuo Ryoki, Hiroyuki Koga, Kenji Kawahara, and Yuji Oie

Session 3: AAI

Privacy Oriented Attribute Exchange in Shibboleth Using Magic Protocols .................................................................293
Toshihiro Takagi, Takaaki Komura, Shuichi Miyazaki, and Yasuo Okabe

Implementation of PKI Authentication Functions for Network User Authentication System "Opengate" .................................................................297
Suguru Fujisawa, Makoto Otani, and Kenzi Watanabe

LESSO: Legacy Enabling SSO .........................................................................................................................301
Takeshi Nishimura and Hiroyuki Sato

Workshop on Social and Personal Computing for Web-Supported Learning Communities (SPeL 2008)

Session 1: Social Computing for Web-Supported Learning Communities

Learning from Peers: Motivating Students through Reputation Systems .................................................................305
Marco Temperini and Andrea Sterbini

Developing a Web 2.0 RESTful Cocoon Web Services for Telemedical Education .................................................................309
Sabah Mohammed, Ahmed Orabi, Jinan Fiaidhi, and Kalpdrum Passi

CRICOS: A Web-Based System for Creating Interconnected Communities .................................................................313
Stefanos Ziovas and Maria Grigoriadou
Session 2: Personal Computing for Web-Supported Learning Communities

Sustaining Teacher’s Professional Development and Training through Web-Based Communities of Practice .................................................................317

Andreja Istenic Starcic

Analyzing Learners’ Interaction with an Educational Hypermedia System: A Focus on Learning Styles ..............................................................321

Elvira Popescu, Costin Badica, and Philippe Trigano

An Approach for Personalized Web-Based Vocabulary Learning through Word Association Games .................................................................325

Jaeyoung Jung and Sabine Graf

Adaptive and Collaborative Learning Using the LMS/LCMS netUniversity .................................................................................................329

Amir Benmimoun and Philippe Trigano

The Fifth Workshop for Ubiquitous Networking and Enablers to Context-Aware Services (UNECAS 2008)

Session 1: Service and Security for Ubiquitous Networking

Practical Study on Providing Event-Driven Composite Services for Telecom-Enterprise Convergence .............................................................333

Takaaki Moriya, Yuichi Nakatani, Hiroyuki Ohnishi, Makoto Yoshida, and Miki Hirano

Evaluation of Social Capital in Context-Aware Content-Provision Service .................................................................................................337

Yuki Yokohata, Michiharu Takemoto, Makoto Hamada, and Toshirou Nakamura

Evaluation of Similarities of Propagation Forms on Social Network forExtracting Relationships of Information .........................................................................................341

Susumu Takeuchi, Tomohiro Kondoh, Masanori Aklyoshi, and Norihisa Komoda

Inter-device Communication Paradigm: Requirements Analysis for Its Security Mechanisms ....................................................................................345

Manabu Hirano, Takeshi Okuda, and Suguru Yamaguchi

Session 2: New Technologies for Ubiquitous Networking

ULP: A Location Platform That Can Handle Multiple Location Representations .................................................................349

Daiki Terauchi, Keisuke Uehara, Yasuhito Watanabe, Hideki Sunahara, and Fumio Teraoka

Distributed Sensor Information Management Architecture Based on Semantic Analysis of Sensing Data ................................................................353

Tomoya Kawakami, Bich Lam Ngoc Ly, Susumu Takeuchi, Yuuichi Teranishi, Kaname Harumoto, and Shojiro Nishio
Workshop on Power Consumption in Future Network Systems (PCFNS 2008)

Session 1: Energy Reduction Issues on Wireless Network Systems

Energy Consumption Issues on Mobile Network Systems .................................................................365
   Minoru Etoh, Tomoyuki Ohya, and Yuji Nakayama
A Prototype of a Multi-core Wireless Sensor Node for Reducing Power Consumption .........................369
   Sotaro Ohara, Makoto Suzuki, Shunsuke Saruwatari, and Hiroyuki Morikawa
Novel Energy Harvesting Technologies for ICT Applications ..............................................................373
   Manos M. Tentzeris and Yoshihiro Kawahara
Applying Low Power Consumption Superconductive Device Technology to Real-Time Waveform Monitoring for Photonic Network .................................................................377
   Mutsuo Hidaka, Michitaka Maruyama, and Hideo Suzuki

Session 2: Energy Reduction Issues on Photonic Network Systems

Power Saving Strategies and Technologies in Network Equipment Opportunities and Challenges, Risk and Rewards .................................................................381
   Luc Ceuppens, Alan Sardella, and Daniel Kharitonov
Technologies to Save Power for Carrier Class Routers and Switches ..................................................385
   Masaki Yamada, Takeki Yazaki, Shinji Nishimura, and Naoya Ikeda
Optical Packet & Path Integration for Energy Savings toward New Generation Network .................................................................389
   Hiroaki Harai
Dynamic Optical Path Switching for Ultra-Low Energy Consumption and Its Enabling Device Technologies .................................................................393
   S. Namiki, T. Hasama, M. Mori, M. Watanabe, and H. Ishikawa
The Latest Trend of Low Power High-Speed CMOS I/O Technology for Photonic Network ..................397
   Tadashi Ikeuchi, Tszshing Cheung, and Hiroshi Onaka

Session 1: Design and Implementation for Local Area Sensor Networks

Implementation and Evaluation of a Memory Management System for IPv6
Wireless Sensor Networks ................................................................. 401
   Hideki Shimada, Takahiko Sato, Kazutoshi Fujikawa, and Hideki Sunahara

Observing Walking Behavior of Humans Using Distributed Phenomenon
Detection and Tracking Mechanisms ................................................. 405
   Raja Bose and Abdelsalam (Sumi) Helal

Obtaining Sensing Data Based on the Proximity of Sensor Nodes ................................................................. 409
   Kazumasa Kojima, Shigeru Kashihara, Teruaki Yokoyama, Takeshi Okuda, and Suguru Yamaguchi

Session 2: Design and Implementation for Global Area Sensor Networks

Composite Event Detection in Heterogeneous Sensor Networks ................................................................. 413
   Hideki Kamiya, Hiroshi Mineno, Norihiro Ishikawa, Tomoyuki Osano, and Tadanori Mizuno

An Implementation Methodology of Geographical Location Based Peer-to-peer Networks for Managing Ubiquitous Sensors ................................................................. 417
   Satoshi Matsuura, Kazutoshi Fujikawa, and Hideki Sunahara

Accuracy-Based Cache Consistency Management for Numerical Object Replication ......................................................... 421
   Hideya Ochiai and Hiroshi Esaki

The Workshop on ITeS: IT Enabled Services (ITeS 2008)

Session 1: IT Enabled Services: Business Perspectives

B to C for Revitalizing Rural Economy ................................................................. 425
   Takashi Okamoto

Cluster Analysis of E-Commerce Customer Profiles Based on Trust Perception ................................................. 429
   Kanokwan Atchariyachanvanich and Noboru Sonehara

Enterprise Architecture and Information Systems: In Japanese Banking Industry ................................................................. 433
   Takaaki Kamogawa and Hitoshi Okada

From Internet Information Searching to Information Summarizing ................................................................. 437
   Yu-Hui Tao
Session 2: Innovations for ITeS
Bridging between Real and Virtual – Technologies to Advance ITeS ..........................................................440
  Shiro Uesugi
A Simple Way to Improve the Security of Bluetooth Devices .................................................................................444
  Peter Dell and Khwaja Shan-ul-Hasan Ghori
A Network for Copyright Management and Control of Private Information ..................................................448
  Hirotsugu Kinoshita and Tetsuya Morizumi
Possibility of Human Grid Computing for Artificial Intelligence Systems ..................................................452
  Yuya Dan

Session 1: Mobile Communication Technology on Real Field
Activities for the Improvement of the Services Using the Information and Communication Technologies on the Tokaido-Shinkansen .............................................................455
  Kazuhiro Yamada, Junji Kawazu, Masakatsu Yoshizawa, and Takahiko Hoshino
Effective Use of Heterogeneous Wireless Links in High Speed Railways by Predictive Scheduling .........................................................459
  Hitoshi Aida and Shinya Kambori

Session 2: Service Platforms for Future Mobile Systems
A Framework of Community Management with Object Deputy Mechanism for IP Multimedia Subsystem ..........................................................................................................................463
  Akio Yamamoto, Yasuhiro Araki, and Michael Sweeney
Ad-Hoc Endpoint Pairing Based on Simultaneous Clicking for Ubiquitous Communications .................................................................467
  Takashi Oshiba, Kazuaki Nakajima, and Hideaki Nebayashi

Author Index ..................................................................................................................................................471
