Proceedings of

Ninth ACIS International Conference on Software Engineering,
Artificial Intelligence, Networking and
Parallel/Distributed Computing

In conjunction with
Second International Workshop on
Advanced Internet Technology and Applications

August 6-8, 2008
Phuket, Thailand
TABLE OF CONTENTS

VOLUME 1

Message from the Conference Chairs
Message from the Program Chair
Program Committee
Organizing Committee
Hosting and Sponsoring Organization
Keynote 1
Keynote 2

AITA WORKSHOP TRACK

<table>
<thead>
<tr>
<th>Paper Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>An Efficient Key Distribution Method Applying to OMA DRM 2.0 with Device Identifier</td>
<td>1</td>
</tr>
<tr>
<td>Classification of Facial Expression Using SVM for Emotion Care Service System</td>
<td>6</td>
</tr>
<tr>
<td>Comparison of the Mechanisms of the Zigbee’s Indoor Localization Algorithm</td>
<td>11</td>
</tr>
<tr>
<td>Managing Quality Level for Developing Information Security System Adopting QFD</td>
<td>17</td>
</tr>
<tr>
<td>Multidisciplinary Design Approach Using Repetitive Response Surface Enhancement and Global Optimization</td>
<td>23</td>
</tr>
<tr>
<td>Neural Net Water Level Trend Prediction and Dynamic Water Level Sampling Frequency</td>
<td>27</td>
</tr>
</tbody>
</table>

ALGORITHMS TRACK

<table>

<tbody>
<tr>
<td>A Novel Method for All Solutions SAT Problem</td>
<td>36</td>
</tr>
<tr>
<td>A Tabu Search and Ant Colony System Approach for the Capacitated Location-Routing Problem</td>
<td>41</td>
</tr>
<tr>
<td>An Adaptive Performance Management Method for Failure Detection</td>
<td>46</td>
</tr>
</tbody>
</table>
ARTIFICIAL INTELLIGENCE TRACK

A Comparison of Iterative Repair Strategies for Earth Observing Satellites Imaging Scheduling .......................................................................................................................... 86
Guo Yu-hua, Jing Ning, Li Jun, Wang Jun

A Formal Approach for Design of Agent Based Earthquake Management System (EMS) ................................................................................................................................. 92
Sarmad Sadik, Alade Rahman, Arshad Ali, H. Farooq Ahmad, Hiroki Suguri

A New Classifier to Deal with Incomplete Data .............................................................................................................. 112
Jun Wu, Yo Seung Kim, Chi-Hwa Song, Won Don Lee

A Sound and Complete Reified Temporal Logic .................................................................................................................. 104
Guoxing Zhao, Jixin Ma, Fuxing Shen, Miltos Petridis

Application of Multi-layer Feed-forward Neural Network in Fault Diagnosis Based on FBP Algorithm .................................................................................................................. 110
Zhang Bin, Yan Jun, Zhang Wei

Clustering ICT Indicators of Bhutan using Two Level HSOM Algorithm .................................................................................. 114
Tshering, Somjit Arch-int

Comparison of Direct and Incremental Genetic Algorithm for Optimization of Ordinal Fuzzy Controllers .......................................................................................................... 121
Khairulmizam Samsudin, Faisul Arif Ahmad, Syamsiah Mashohor, Norfazilah Mohd Latif

Lipschitz Continuity of Approximate Reasoning .............................................................................................................. 128
Takashi Mitsuishi, Takanori Terashima, Toshimichi Homma, Yasunari Shidama

On Relaxing and Steady State Genetic Methods for Satellite Imaging Scheduling ................................................................. 134
Jin Xiao-shan, Li Jun, Jing Ning

The Study of a Financial Crisis Prediction Model based on XBRL .................................................................................................................. 140
Fengyi Lin, Deron Liang, Shih-Jung Chiu

Reinforcement Distribution in a Team of Cooperative Q-learning Agents .................................................................................. 147
Zahra Abbasi, Mohammad Ali Abbasi
COMPONENT-BASED SOFTWARE ENGINEERING TRACK

An MDA Approach to Byte Code Level Cross-Compilation .......................................................... 234
Arno Puder, Sascha Haeberling, Rainer Todtenhoefer

Customer Value-based HW/SW Partitioning Decision in Embedded Systems ......................... 240
Neunghoe Kim, Taek Lee, Donghyun Lee, Keun Lee, Hoh Peter In

Early-Life Cycle Reuse Approach for Component-Based Software of Autonomous Mobile Robot System .......................................................................................................................... 246
Dayang N.A. Jawawi, Safaai Deris, Rosbi Mamat

The Implementation and Execution Framework of a Role Model Based Language, EpsilonJ ................................................................................................................................. 252
Supasit Monpratarnchai, Tamai Tetsuo

CRYPTOGRAPHY AND NETWORK SECURITY TRACK

A Multisecret Sharing Threshold Scheme.................................................................................. 260
Yanyan Zhang

A Practical Certified E-Mail System with Temporal Authentication Based on Transparent TSS ............................................................................................................................. 266
Dongmei Liu, Sihan Qing, Pengfei Li, Chun Yang Yuan

Effect of Security Increment to Symmetric Data Encryption through AES Methodology ................................................................................................................................. 272
Md. Nazrul Islam, Md. Monir Hossain Mia, Muhammad F. I. Chowdhury, M.A. Matin

An Improved ID-based Restrictive Partially Blind Signature Scheme................................... 276
Shangping Wang, Pei Han, Yaling Zhang, Xiaofeng Wang

DHA-KD: Dynamic Hierarchical Agent Based Key Distribution in Group Communication .......................................................... 282
M. Amir Moulavi, Jalal A. Nasiri, Behnam Bahmani, Hossein Parvar, M. Sadeghizadeh, Mahmoud Naghibzadeh

Improved Nonce Construction Scheme for AES CCMP to Evade Initial Counter Prediction .......................................................... 288
Mansoor Ahmed Khan, Ahmad Raza Cheema, Aamir Hasan

Malicious Code Detection Architecture Inspired by Human Immune System.......................... 293
Mohd Fadzli Marhusin, David Comforth, Henry Larkin

Modular Matrix Cipher and Its Application in Authentication Protocol .................................. 299
Bao Ngoc Tran, Thuc Dinh Nguyen

Multi-signers Strong Designated Verifier Signature Scheme .................................................. 305
Yaling Zhang, Jing Zhang, Yikun Zhang

Panupong Sornkhom, Yongyuth Permpoontanararp

Security Enhancements for Privacy and Key Management Protocol in IEEE 802.16e-2005 ................................................................................................................................. 316
Ayesha Altaf, M. Younus Javed, Attiq Ahmed

Type Flaw Attacks and Prevention in Security Protocols ............................................................ 321
Juan Wang, Jingwei Zhang, Huanguo Zhang
Vulnerabilities Exposing IEEE 802.16e Networks to DoS Attacks: A Survey ........................................ 325
Sheraz Naseer, Muhammad Younus, Attiq Ahmed

Vulnerabilities of UMTS Access Domain Security Architecture .............................................. 331
Muzammil Khan, Attiq Ahmed, Ahmad Raza Cheema

A Photonic-based Random Number Generator for Cryptographic Application ...................... 337
N.M. Thamrin, G. Witjaksono, A. Nuruddin, M.S. Abdullah

DATA MINING AND KNOWLEDGE DISCOVERY TRACK

A Feature Selection for Malicious Detection .................................................................................. 343
Yingxu Lai

A Study of Classification Algorithm for Data Mining Based on Hybrid Intelligent Systems .............................................. 349
Gang Wang, Chenghong Zhang, Lihua Huang

A Two-Stage Clustering Algorithm for Multi-type Relational Data ............................................. 354
Ying Gao, Da-you Liu, Cheng-min Sun, He Liu

An Effective Method for Chinese Related Queries Recommendation ......................................... 359
Shen Xiaoyan, Cheng Bo, Chen Junliang, Meng Xiangwu

Decision Tree-Based Model for Automatic Assignment of IT Service Desk Outsourcing in Banking Business ........................................................................................................ 365
Padej Phomasakha Na Sakolnakorn, Phayung Meesad

Detecting Semantic Mapping of Ontologies with Inference of Description Logic ....................... 371
Wenhui Ma, Guangping Xu, Gang Wang, Jing Liu

Improve Frequent Closed Itemsets Mining over Data Stream with Bitmap ...................................... 377
Haifeng Li, Hong Chen

Mining Approximate Closed Frequent Itemsets over Stream ...................................................... 383
Haifeng Li, Zongjian Lu, Hong Chen

Adaptive Evolvement of Query Plan Based on Low Cost in Dynamic Grid Database .................................................. 389
Naijing Hu, Yuan Luo, Yingying Wang

Prioritizing Default Rules Embedded in Description Logic Knowledge Base .............................. 394
Shaohua Liu, Junsheng Yu, Yinglong Ma, Xu Zhang, Xiaoming Liu, Hansheng Su

Stock Price Time Series Prediction using Neuro-Fuzzy with Support Vector Guideline System .................................................................................................................. 400
Phayung Meesad, Tong Srikhacha

Using Social Network Analysis to Better Understand the Dependencies in UML Use Cases Collection .................................................................................................................. 406
Phanurat Srichetta, Songsri Tangsripairoj

Privacy Preserving of Associative Classification and Heuristic Approach ................................... 412
Nattapon Harnsamut, Juggapong Natwichai, Bowonsak Seisungsittisunti

A Sequential Pattern Mining Algorithm Based on Improved FP-tree .......................................... 418
Yi Sui, Feng Jing Shao, RenCheng Sun, JinLong Wang
E-COMMERCE AND ITS APPLICATIONS TRACK

E Commerce - Forward and Reverse Auction - A Managerial Tool to Succeed over Business Competitiveness ................................................................. 423
  D. Ganguly, Samit Chakraborty

Meta-heuristic Enabled MAS Optimization in Supply Chain Procurement ......................... 429
  Xia Zhanguo, Wang Ke, Wang Zhixiao

EMBEDDED SYSTEMS TRACK

ICLS : Intelligent Cricket-based Location Tracking System Using Sensor Fusion ............ 435
  Ho Min Jung, Byung Ki Kim, Wan Yeon Lee, Young Woong Ko

Specifying and Verifying Timing Properties of a Time-triggered Protocol for In-vehicle Communication .................................................................................. 441
  Bo Zhang

IMAGE, SPEECH, AND SIGNAL PROCESSING TRACK

A Genetic Algorithm-aided Hidden Markov Model Topology Estimation for Phoneme Recognition of Thai Continuous Speech .......................................................... 447
  Pattana Bhuriyakorn, Proadpran Punyabukkana, Atiwong Suchato

A New Auto-Focusing Method Based on WBDCT for Many Object Situations ...................... 453
  Ke Han, Xue-mei Jiang, Quan Feng, Xiu-chang Zhu

A Novel Voice Morphing System Using Bi-GMM for High Quality Transformation .............. 457
  Ning Xu, Xi Shao, Zhen Yang

VOLUME 2

A Secure Scheme for Image Transformation ........................................................................ 462
  Samir K. Bandyopadhyay, Debnath Bhattacharyya, Debasis Ganguly, Swarnendu Mukherjee, Poulami Das

Efficient Object Recognition Using Parametric Eigenspace under Influence of Noise and Occlusion ......................................................................................... 466
  Pravinkumar S. Revankar, Prabir Kumar Biswas, Sonali N. Deshpande

Image Preprocessing and Trajectory Feature Extraction based on Hidden Markov Models for Sign Language Recognition ................................................. 473
  Duong Van Hieu, Supot Nitsuwat

Modified Method for Denoising Color Images using Fuzzy Approach .................................. 479
  Madhu S. Nair, M. Wilscy

Novelty towards Hybrid Segmentation of Coronary Artery in CT Cardiac Images .............. 485
  Valliappan Raman, Patrick Then

Static Hand Gesture Recognition and its Application based on Support Vector Machines ........ 489
  Yun Liu, Zhijie Gan, Yu Sun

Face Detection Based on Skin Gaussian Model and KL Transform .................................. 494
  Wang Chuan-xu, Li Zuo-yong
Face Detection using BP Network Combined with Gabor Wavelet Transform ...................................................... 498
Wang Chuan-xu, Li Xue

A New Kind of Super-Resolution Reconstruction Algorithm Based on the ICM and the Constrained Cubic Spline Interpolation ........................................................................................................ 502
Zhang Xiang-guang

Background Subtraction Enhancement using Segmentation ..................................................................................... 507
Kyongil Yoon

INFORMATION ASSURANCE TRACK

Information Value Evaluation Model for ILM ........................................................................................................... 513
Hai Jin, Muzhou Xiong, Song Wu

INTERNET TECHNOLOGY TRACK

SMILE Visualization with Flash Technologies ........................................................................................................ 519
Anucha Tungkasthan, Pittaya Poompuang, Wichian Premchaiswadi

Bring Precision and Access Control to Business Document Search ........................................................................ 525
Somchai Chatvichienchai, Katsumi Tanaka

Byte Code Transformations using XSL Stylesheets ................................................................................................ 531
Arno Puder

COS: A Frame Work for Clustered off-line Search .................................................................................................. 537
Sree Harsha Totakura, S. Venkata Nagendra, Rohit Indukuri, V. Vijayasherly

Image Authentication Schemes against Key-Logger Spyware .............................................................................. 542
M.N. Doja, Naveen Kumar

Information Flow based Ontology Mapping ........................................................................................................... 548
Ye Liang, Hong Bao, Hong-Zhe Liu

Multi-Agent System Model of a BitTorrent Network ............................................................................................. 554
Enrique Costa-Montenegro, Juan C. Burguil-lo-Rial, Pedro S. Rodgruez-Hernandez, Francisco J. Gonzalez-Castano, Maria Curras-Parada, Patricia Gomez-Rana, Juan P. Rey-Souto

MOBILE/WIRELESS/AD-HOC NETWORKS TRACK

A Crossover Game Routing Algorithm for Wireless Multimedia Sensor Networks ........................................ 560
Zongwu Ke, Layuan Li, Nianshen Chen

Accuracy of an Icing On-line Monitoring System ............................................................................................... 565
Huang Xinbo, Sun Qindong

Adaptive Self-Organizing Overlay Network for Car-to-Car Communications .................................................. 570
Mikio Aoyama, Hiroshi Takeichi

Multicasting Support for NEMO based on ODMRP ............................................................................................ 576
Seong-Yee Phang, Chee-Min Yeoh, HoonJae Lee, Hyotaek Lim

QoS Protocol Verification using Petri-Net for Seamless Mobility in a Ubiquitous Environment: A Case Study .................................................................................................................. 582
Dalju Lee, Jongmoon Baik
The Upper Bound of Coverage on Fixed Energy Budget in Wireless Sensor Networks
Fang Wang, Lisheng Ren, Guifa Teng

Omni-Directional Antenna for Wireless Access Point
Suwat Pattamavorakun, Wuttipol Wanarsup, Suwarin Pattamavorakun

NATURAL LANGUAGE PROCESSING TRACK

A New Hybrid Farsi Text Summarization Technique Based on Term Co-Occurrence and Conceptual Property of the Text
Azadeh Zamanifar, Behrouz Minaei-Bidgoli, Mohsen Sharifi

Collation Strategy Based on Heuristics Chart for Myanmar Language
Yuzana, Khin Marlar Tun

NEURAL NETWORKS AND GENETIC ALGORITHMS TRACK

A New Model of Mine Hoist Fault Diagnosis Based on the Rough Set Theory
Xia Zhanguo, Wang Zhixiao, Wang Ke, Guan Hongjie

M. Phankokkruad, K. Woraratpanya

Classification of Bio-Optical Signals using Soft Computing Tools
G. Subramanya Nayak, C. Puttamadappa, Akshata Kamath, B. Raja Sudeep, K. Kavitha

Design of MLP using Evolutionary Strategy with Variable Length Chromosomes
Abbas Sarraf Shirazi, Tahereh Seyedena

Equalization for a Wireless ATM Channel with a Recurrent Neural Network Pruned by Genetic Algorithm
Dong-Chul Park

OPERATING SYSTEMS TRACK

ESnapII: A Writable Dependent Snapshot System with Shared Cache
Guangjun Xie, Lu Qi, Feng Wang, Gang Wang, XiaoGuang Liu, Jing Liu

PARALLEL AND DISTRIBUTED COMPUTING TRACK

A Formal Model of Dynamic Resource Allocation in Grid Computing Environment
Leila Ismail, Bruce Mills, Alain Hennebelle

A Visualization Portal for a Tsunami Warning System on a Distributed Environment
Pemjit Aphimaeteethomrong, Veera Muangsin

Aggregate Congestion Control for Peer-to-Peer File Sharing Applications
Wei Li, Shanzhi Chen, Yaning Liu, Xin Li

An Efficient Parallel Eye Detection Algorithm on Facial Color Images
Jalal A. Nasiri, M. Amir Moulavi, Sepideh Nazemi Gelyan, Hossein Deldari, H. Sadoghi Yazdi, A. Eshghi Shargh
An Optimal Data Center Availability and Investment Trade-Offs ............................................... 668
Montri Wiboonrat

Fast Preemptive Task Scheduling Algorithm for Homogeneous and Heterogeneous Distributed Memory Systems .......................................................... 676
Maruf Ahmed, Sharif M.H. Chowdhury, Masud Hasan

Implementation of Parallel Algorithms for LUC Cryptosystem ........................................... 682
Zulkarnain Md Ali, Mohamed Othman, Mohd Rushdan Mohd Said, Mohammad Nasir Sulaiman

Parallel Implementation of the Novel Approach to Genome Assembly .................................. 688
Jacek Blazewicz, Marta Kasprzak, Aleksandra Swiercz, Marek Figlerowicz, Piotr Gawron, Darren Platt, Lukasz Szajkowski

SERVICE ORIENTED COMPUTING TRACK

Model Checking for Web Service Flow Based on Annotated OWL-S ..................................... 694
Rujuan Liu, Changjun Hu, Chongchong Zhao

Web Services Communication Model in Telecom Domain ..................................................... 700
Cheng Bo, Shen Xiaoyan, Meng Xiangwu, Chen Junliang

An Ensemble of Complexity Metrics for BPEL Web Processes ............................................ 706
Reza Meimandi Parizi, Abdul Azim Abdul Ghani

A Preliminary Study on Portable Interceptor Mechanism to SOAP ........................................ 712
Chen-Liang Fang, Deron Liang, Fengyi Lin, Chien-Cheng Lin

Enhancing Service-Side QoS Monitoring for Web Services .................................................. 718
Natee Artaiam, Twittie Senivongse

SOFTWARE SPECIFICATION AND ARCHITECTURE TRACK

A Review of Software Risk Management for Selection of Best Tools and Techniques .................. 724
Md. Forhad Rabbi, Khan Olid Bin Mannan

A Z-Specification of Classification and Relationships between Usecases ............................... 730
Durga Prasad Kakollu, B.D. Chaudhary

An Alternative Model for ERP Maintenance Strategy ........................................................... 736
Muhammad Rofi Imitihan, Mohd. Salihin Ngadiman, Habibollah Haron

An Application Generator Framelet ......................................................................................... 745
Inggriani Liem, Yohanes Nugroho

An Approach to Modeling Software Safety ............................................................................... 751
M. Ben Swarup, P. Seetha Ramaiah

Architecture-aware Partial Order Reduction to Accelerate Model Checking of Networked Programs .................................................................................. 758
Cyrille Artho, Watcharin Leungwattanakit, Masami Hagiya, Yoshinori Tanabe

Conceptual Modeling for Safety Critical Computer Systems ................................................ 765
P. Seetha Ramaiah, M. Ben Swarup, K. Raja Kumar

Eclipse Project and Resource Tracking Plug-in ......................................................................... 771
Kevin Li, Dwight Deugo
Identification and Extraction of Design Pattern Information in Java Program
Chengwan He, Zheng Li, Keqing He

Research on UML-based Modeling of Workflow Manage System
Guan Hong-jie, Meng Fan-rong, Xia Zhan-guo

Software Engineering Issues in Developing a Context-aware Exhibition Guide System
Jongmyung Choi, Hyun-Joo Moon

The Prototype of the Massive Events Streams Service Architecture and its Application
Kyungneun Park, Yanggon Kim, Juno Chang, Daewoong Rhee, Jinkyu Lee

Tools and Techniques for Model Checking Networked Programs
Cyrille Artho, Watcharin Leungwattanakit, Masami Hagiya, Yoshinori Tanabe

Multi Readers Detection in Adaptive RFID Middleware
Siti Zaiton Mohd Hashim, Mardiyono, Wan Mohd Nasir Wan Kadir, Nurulhaini Anuar

SOFTWARE TESTING TRACK
A Comparative Evaluation of Tests Generated from Different UML Diagrams
Supaporn Kansomkeat, Jeff Offutt, Aynur Abdurazik, Andrea Baldini

Finding Causes of Software Failure Using Ridge Regression and Association Rule Generation Methods
Saeed Parsa, Mojtaba Vahidi-Asl, Somaye Arabi Naree

Test Sequence Generation from UML Sequence Diagrams
Philip Samuel, Anju Teresa Joseph

Testing Component-Based Real Time Systems
Rachid Bouaziz, Ismail Berrada

Detecting Feature Interactions in Home Appliance Networks
Pattara Leelaprute, Takafumi Matsuo, Tatsuhiro Tsuchiya, Tohru Kikuno

VISUAL AND MULTIMEDIA COMPUTING TRACK
A Traffic Modeling Method for MMOG
Shi Xiang-bin, Du Ling, Liu Fang, Li Bao-long, Chen Xian-min

An Algorithm of Level of Detail Terrain
Shi Xiang-bin, Liu Fang, Du Ling, Bao Siqin, Chen Xianmin

An Interest Management Mechanism Based on N-Tree
Shi Xiang-bin, Wang Yue, Li Qiang, Du Ling, Liu Fang

WEB-BASED APPLICATIONS TRACK
A Hierarchical Cache Scheme for the Large-scale Web Search Engine
Sungchae Lim, Joonseon Ahn

Dynamic Data Feed to Bayesian Network Model and SMILE Web Application
Nipat Jongsawat, Pittaya Poompuang, Wichian Premchaiswadi
E-Tax Invoice System Using Web Services Technology: A Case Study of the Revenue Department of Thailand ................................................................. 880
   Sukanya Suwisuthikasem, Songsri Tangsripairoj

Knowledge Representation and Query Process Based-on Semantic Web Technologies ................................................................. 886
   Chenghong Zhang, Songran Liu, Zhengchuan Xu, Zhuojun Gu, Xiaoling Wang

Ranking of Indian E-commerce Web-applications by Measuring Quality Factors ..................... 892
   Priyanka Tripathi, M. Kumar, Namita Shrivastava

Research on Mechanism of Agricultural FAQ Retrieval Based on Ontology .................... 898
   Fang Wang, Guifa Teng, Lisheng Ren, JianBin Ma

Intelligent Personalization Job Web Site ............................................................................. 902
   Wuttipol Wanarsup, Suwarin Pattamavorakun, Suwat Pattamavorakun

PAPERS PRESENTED AT SNPD 2007

A Class of SIR Epidemic Model with Saturation Incidence and Age of Infection .................. 908
   Junyuan Yang, Fengqin Zhang, Xiaoyan Wang

A Hybrid Text Classification Model based on Rough Sets and Genetic Algorithms ............. 912
   Xiaoyue Wang, Zhen Hua, Rujiang Bai

PAPER PRESENTED AT ICIS 2008

Mixing Protocol based on the Cooperation and the Parallelism for the Distributed Environment ................................................................. 919
   Belaid Saad, Francine Herrmann, Yann Lanuel, Thomas Tamisier

Author Index
