# TABLE OF CONTENTS

## KEYNOTES

Software Architectures for Task-Oriented Computing
David Garlan ................................................................. 1

Issues and Models of Security Oriented Systems
C. V. Ramamoorthy .......................................................... 2

## COMMUNICATION SYSTEMS AND NETWORKS TRACK

A Rate Control Protocol for High Speed Streaming Video
Xiaogang Yang, Baosong Shan, Yaping Yang .......................... 3

Collaboration Between Security Devices Toward Improving Network Defense
Meharouech Sourour, Bouhoula Adel, Abbes Tarek ........................ 9

Trust Mechanism in Distributed Access Control Model of P2P Networks
Lei Wang, Yanqin Zhu, Lanfang Jin, Xizhao Luo ......................... 15

## COMPUTER ARCHITECTURE AND VLSI TRACK

Convergence Analysis of Jacobi Iterative Method Using Logarithmic Number System
Peng Huang, Daniel H.-Y. Teng, Khan Wahid, Seok-Bum Ko .................. 21

Effective RTL Method to Develop On-Line Self-Test Routine for the Processors Using the Wavelet Transform
Amin Asghari, Seied Ahmad Motamedi, Sepehr Attarchi .................. 27

## COMPUTER SCIENCE, INFORMATION SCIENCE, AND INFORMATION

Comparison Between New Quantum Approaches for Finding the Minimum Or the Maximum of an Unsorted Set of Integers
Mir Shahriar Emami, Mohammad Reza Fattahi, Hossein Keshmiri ........ 33

Evaluation on Quantum Computation and Classic Parallel Approaches for Finding Estimation of the Length of Shortest Path in a Weighted Graph
Mir Shahriar Emami, Mohammad Reza Fattahi, Hossein Keshmiri .......... 39

A Real-Time Interactive Visualization System for DNS Amplification Attack Challenges
Huiming Yu, Xiangfeng Dai, Tomas Baxley, Jinsheng Xu .................. 47
Radix Plus Length Based Insert Sort
Yongcheng Zhang

CONTROL SYSTEMS, INTELLIGENT SYSTEM TRACK

An Integer Linear Programming Approach for Dedicated Machine Constraint
Huy Nguyen Anh Pham, Arthar Shr, Peter P. Chen

Efficient Complex Event Processing Over RFID Data Stream
Xingyi Jin, Xiaodong Lee, Ning Kong, Baoping Yan

Tabu Search Solution for Fuzzy Linear Programming
M. Hadi Mashinchi, M. Reza Mashinchi, M. Mashinchi

Temperature Control for the Thermal Cycling of Polymerase Chain Reaction
Jinhe Wang, Nan Zhang

DATA MINING, DATA WAREHOUSING, AND DATABASE TRACK

A Parallel Algorithm for Closed Cube Computation
Jinguo You, Jianqing Xi, Pingjian Zhang, Hu Chen

An Efficient Structural Index for Graph-Structured Data
Yingjie Fan, Chenghong Zhang, Shuyun Wang, Xiulan Hao, Yunfa Hu

(t, λ)-Uniqueness: Anonymity Management for Data Publication
Qiong Wei, Yansheng Lu, Qiang Lou

Autonomic Computing in SQL Server
Abdul Mateen, Basit Raza, Tauqeer Hussain, M. M. Awais

Cross-Channel Customer Mapping
Jayanta Basak, Sunil Goyal

DBPowder-mdl: Mapping Description Language between Applications and Databases
Tadashi Murakami

Dimensionality Reduction in Hyperbolic Data Spaces: Bounding Reconstructed-Information Loss
Duc A. Tran, Khanh Vu

Entropy Based Clustering of Data Streams with Mixed Numeric and Categorical Values
Shuyun Wang, Yingjie Fan, Chenghong Zhang, HeXiang Xu, Xiulan Hao, Yunfa Hu

Information Analysis for Enabling Optimal Utilization of Service Delivery Channels in Indian Banks
Hemalatha Diwakar, Alka Vaidya

Privacy-Preserving Data Publishing Based on De-clustering
Qiong Wei, Yansheng Lu, Qiang Lou

Schema Versioning in Multi-temporal XML Databases
Zouhaier Brahmia, Rafik Bouaziz

Subspace Clustering of High Dimensional Data Streams
Shuyun Wang, Yingjie Fan, Chenghong Zhang, HeXiang Xu, Xiulan Hao, Yunfa Hu

Synchronizer – A Web-Based Application to Enhance Capabilities of NEESC Central Web Portal
Thuy T. Le, Syeda Naema Hashmi, Kurt McMullin
IMAGE PROCESSING AND PATTERN RECOGNITION TRACK

A Fast and Accurate Iris Recognition Method Using the Complex Inversion Map and 2DPCA ................................................................. 165
   Sepehr Attarchi, Karim Faez, Amin Asghari

A Novel Image Text Extraction Method Based on K-Means Clustering .................................................. 171
   Yan Song, Anan Liu, Lin Pang, Shouxun Lin, Yongdong Zhang, Sheng Tang

Attention Model Based SIFT Keypoints Filtration for Image Retrieval .................................................. 177
   Ke Gao, Shouxun Lin, Yongdong Zhang, Sheng Tang, Huamin Ren

Content-Based Classifying Traditional Chinese Calligraphic Images ................................................ 183
   Zhong Gao, Guanming Lu, Daquan Gu, Chun He

Region-Based Image Fusion Approach Using Iterative Algorithm .................................................. 188
   Yingjie Zhang, Liling Ge

Three Dimensional Face Recognition Using SVM Classifier .................................................. 194
   Mir Hashem Mousavi, Karim Faez, Amin Asghari

IMAGE, ACOUSTIC, SPEECH AND SIGNAL PROCESSING TRACK

A Novel Detection Method of Filled Pause in Mandarin Spontaneous Speech .................................. 200
   Yan-Xiong Li, Qian-Hua He, Tao Li

Research of English-Chinese Alignment at Word Granularity on Parallel Corpora .................................. 206
   Yang Xu, Hou-feng Wang, Xue-qiang Li

INFORMATION MANAGEMENT SYSTEMS AND MANAGEMENT TRACK

Objective Types for the Valuation of Secure Business Processes .................................................. 212
   Thomas Neubauer, Johannes Heurix

On-Line Network Reachability Analysis Using Forward Information Base Emulation .................................. 218
   Young Dae Kim, Chan Kyou Hwang, Jae Hyoung Yoo

Secure E-cheques for Joint Accounts with Collective Signing Using Forward-Secure Multi-signature Scheme .................................. 222
   N. R. Sunitha, B. B. Amberker, Prashant Koulgi

Verification of Unstructured Workflows via Propositional Logic .................................................. 228
   Qianhui Althea Liang, J. Leon Zhao

INTELLIGENT AGENT TECHNOLOGY, AGENT BASED SYSTEMS TRACK

Agent Based Architecture for Secure Access from Multiple Hospitals .................................. 234
   Sun K. Yoo, Jun Choe, Do Yoon Kim

P2P Distributed Intrusion Detections by Using Mobile Agents .................................. 238
   Dayong Ye, Quan Bai, Minjie Zhang, Zhen Ye
INTERNET TECHNOLOGY AND APPLICATIONS, E-COMMERCE TRACK

An Adaptive Index of XML for Frequent Branching Path Queries ............................................................... 245
Yingjie Fan, Chenghong Zhang, Shuyun Wang, Xiulan Hao, Yunfa Hu

Email Categorization Using (2+1)-Tier Classification Algorithms ................................................................. 252
M. Rafiqul Islam, Wanlei Zhou, Morshed U. Chowdhury

Identity-Based Conference Key Distribution Scheme Using Sealed Lock .............................................................. 258
Yongquan Cai, Xiuying Li

SIMPA: A SIP-Based Mobile Payment Architecture ............................................................................. 263
Ge Zhang, Feng Cheng, Christoph Meinel

KNOWLEDGE DISCOVERY, ARTIFICIAL INTELLIGENCE, NEURAL NETWORKS TRACK

A Document Clustering Method Based on One-Dimensional SOM ........................................................... 269
Yan Yu, Pilian He, Yushan Bai, Zhenlei Yang

A Genetic Algorithm for Finding Minimal Multi-homogeneous Bézout Number ................................................. 275
Dongshu Yan, Jintao Zhang, Bo Yu, Changtong Luo, Shaoliang Zhang

An Effective Data Classification Algorithm Based on the Decision Table Grid ............................................... 280
Hongjie Liu, Boqin Feng, Jianjie Wei

An Extensive Empirical Study of Feature Selection for Text Categorization ................................................. 286
Li-Qing Qiu, Ru-Yi Zhao, Gang Zhou, Sheng-Wei Yi

An Improved Condensing Algorithm ............................................................................................................. 290
Xiulan Hao, Chenghong Zhang, Hexiang Xu, Xiaopeng Tao, Shuyun Wang, Yunfa Hu

Efficient Projection for Compressed Sensing .................................................................................................. 296
Vo Dinh Minh Nhat, Duc Vo, Subhash Challa, SungYoung Lee

Ensemble Methods for Ontology Learning - An Empirical Experiment to Evaluate Combinations of Concept Acquisition Techniques .......................................................... 302
Ricardo Gacitua, Pete Sawyer

Low Dimensional Reproduction Strategy for Real-Coded Evolutionary Algorithms .............................................. 308
Changtong Luo, Shaoliang Zhang, Bo Yu

Machine Learning Approach for Ontology Mapping Using Multiple Concept Similarity Measures .............................................. 314
Ryutaro Ichise

Optimizing Text Summarization Based on Fuzzy Logic .................................................................................. 321
Farshad Kyoomarsi, Hamid Khosravi, Esfandiar Eslami, Pooya Khosravyan Dehkordy, Asghar Tajoddin

MIDDLEWARE ARCHITECTURES AND TECHNIQUES TRACK

A Solution Framework on Fundamentals in Model Transformation .......................................................... 327
Yucong Duan, Kyo-Chul Kang, Yuqing Gu

EESM for IEEE 802.16e: WiMax .................................................................................................................. 333
Shahid Muntaz, Atilio Gamerio, Jonathan Rodriguez
Lessons Learned from Implementing WS-Coordination and WS-AtomicTransaction ........................................... 339
Ivan Silva Neto, Francisco Reverbel

Observations on Liner Prediction Based Blind Source Extraction Algorithms ................................................. 345
Min Gan, Hongfa Wang, Guoying Yue, Nan Xie, Haibo Zhang

Research and Application of Information Granulation Based on Extension Method ......................................... 349
Minghui Wang, Yongquan Yu, Bi Zeng

Sensor Data Collection of the Single Location Surveillance Point System .......................................................... 354
T. Räty, J. Oikarinen, M. Nieminen, M. Lindholm

MOBILE/WIRELESS COMPUTING TRACK

A Novel Enterprise Mobile E-mail System Using the SyncML Protocol .......................................................... 360
Jing Xie, Dan Yu, Shilong Ma

Design and Implementation of Wireless Sensor Network for Ubiquitous Glass Houses .................................. 366
Meong-hun Lee, Ki-bok Eom, Hyun-joong Kang, Chang-sun Shin, Hyun Yoe

Distributed Detection in Wireless Sensor Networks ......................................................................................... 370
Sheng-Tzong Cheng, Szu-Yun Li, Chia-Mei Chen

PARALLEL AND DISTRIBUTED COMPUTING AND SYSTEMS TRACK

An Empirical Analysis of Intel Thread Checker for Detecting Races in OpenMP Programs .............................. 376
Young-Joo Kim, Daeyoung Kim, Yong-Kee Jun

Execution Time Analysis of a Parallel Steiner Tree Algorithm on Server-Client Model of Computation .............................................................. 382
Rashid Bin Muhammad

Exponential Integral Methods for Burgers Equation ......................................................................................... 388
Jing-jun Zhao, Shu-xin Bao, Yu Li

Finite–State Modeling and Testing of Image Based Authentication System .................................................. 394
Nitin, Durg Singh Chauhan, Vivek Kumar Sehgal, Ankit Mahanot, Pallavi Singh, Sohit Ahuja,
Utkarsh Shrivastava, Manisha Rana, Vineet Panjabi, Shivam Vinay, Nakul Sharma

Gauging the OpenSourceMark Benchmark in Measuring CPU Performance ............................................. 400
Fadi N. Sibai

Parallel Sorting on the Biswapped Network ................................................................................................. 406
Wenhong Wei, Wenjun Xiao, Zhen Zhang

Predicate Detection Modality and Semantics in Three Partially Synchronous Models .............................. 411
Chunbo Chu, Monica Brockmeyer

PROGRAMMING LANGUAGES, COMPILERS, AND OPERATING SYSTEMS TRACK

Control Network Programming Illustrated: Solving Problems with Inherent Graph-Like Representation .................... 418
Kostadin Kratchanov, Emilia Golemanova, Tzanko Golemanov
SOFTWARE METRICS AND PROJECT MANAGEMENT TRACK

An Effort-Based Approach to Measure Completeness of an Entity-Relationship Model
Taquee Hussain, Mian M. Awais

A Value-Added Predictive Defect Type Distribution Model Based on Project Characteristics
Youngki Hong, Jongmoon Baik, In-Young Ko, Ho-Jin Choi

Monitoring Software Projects with Earned Value Analysis and Use Case Point
Jinhua Li, Zhibing Ma, Huanzhen Dong

SOFTWARE ENGINEERING AND INFORMATION ENGINEERING TRACK

A Mechanical Approach for Deriving Algorithmic Programs
Haihe Shi, Jinyun Xue, Dawei Du

Engineering Education - A Great Challenge to Software Engineering
Jaroslav Král, Michal Žemlicka

Generating Algorithms Plus Loop Invariants by Formal Derivation
Haihe Shi, Dawei Du, Jinyun Xue

Manual Specific Testing and Quality Evaluation for Embedded Software
Seon-Jae Jang, Hae-Geun Kim, Youn-ky Chung

Mobile GUI Testing Tool based on Image Flow
Oh-Hyun Kwon, Sun-Myung Hwang

On the Precision and Accuracy of Impact Analysis Techniques
Lile Hattori, Dalton Guerrero, Jorge Figueiredo, João Brunet, Jemerson Damásio

Quantitative Process Improvement in XP Using Six Sigma Tools
Sajid Ibrahim Hashmi, Jongmoon Baik

Static Analysis of the Disassembly against Malicious Code Obfuscated with Conditional Jumps
Chao Dai, Jianmin Pang, Rongcai Zhao, Xiaojun Ma

Two-Dimensional Framework for Analyzing Variabilities in Software Product Lines
Mikyeong Moon, Heung Seok Chae, Junseok Park, Keunhyuk Yeom

SOFTWARE REUSE, DESIGN PATTERNS TRACK

Reconstructing Control Flow in Modulo Scheduled Loops
Miao Wang, Rongcai Zhao, Jianmin Pang, Guoming Cai

Recovering Variable-Argument Functions from Binary Executables
Wen Fu, Rongcai Zhao, Jianmin Pang, Jingbo Zhang

SOFTWARE TESTING AND TOOLS TRACK

A New Operational Framework for Benchmarking the SAN Products
Prabu D., Devi Prasad B., Lakshminarayana Prasad K., Kishor Arumilli
A Strategic Test Process Improvement Approach Using an Ontological Description for MND-TMM

Hoyeon Ryu, Dong-Kuk Ryu, Jongmoon Baik

Enhancing Data Flow Testing of Classes through Design by Contract

Yogesh Singh, Anju Saha

Security Analysis and Implementation of JUIT–Image Based Authentication System Using Kerberos Protocol

Nitin, Durg Singh Chauhan, Vivek Kumar Sehgal, Ankit Mahanot, Pallavi Singh, Sohit Ahuja, Utkarsh Shrivastava, Manisha Rana, Vineet Punjabi, Shivam Vinay, Nakul Sharma

The Utilization of User Sessions in Testing

Izzat Alsmadi

UML, OO MODELING, AND SIMULATION TRACK

Queuing Network Performance Model for Evaluation of CMP-Based VoIP SPS

Jiuzhen Jin, Jianmin Pang, Zheng Shan, Rongcai Zhao

VISUAL AND MULTIMEDIA TRACK

Relevance-Feedback Image Retrieval Based on Multiple-Instance Learning

Duc A. Tran, S. R. Pamidimukkula, Phuong Nguyen

WEB ENGINEERING AND APPLICATIONS TRACK

An Efficient Approach for QoS-Aware Service Selection Based on a Tree-Based Algorithm

Minhyuk Oh, Jongmoon Baik, Sungwon Kang, Ho-jin Choi

Coordination Behavioral Structure: A Web Services Coordination Model in Dynamic Environment

Yongwang Zhao, Dianfu Ma, Min Liu, Chunyang Hu

Designing Fault Tolerant Web Services Using BPEL

Jim Lau, Lau Cheuk Lung, Joni da S.Fraga, Giuliana Santos Veronese

Verification for Time Consistency of Web Service Flow

Rujuan Liu, Changjun Hu, ChongChong Zhao, Zhong Gao

On the Dynamic Ant Colony Algorithm Optimization Based on Multi-pheromones

Ya-mei Xia, Jun-liang Chen, Xiang-wu Meng

WORKSHOP ON E-ACTIVITY TRACK

A New Negotiation Mechanism for Agent-Based Lecture Allocation Systems

Yoshihito Saito, Takayuki Fujimoto, Tokuro Matsuo

RDF-Based Approach to Data Transform Composition

Jungmin Shin, Joachim Hammer, Herman Lam

Building a Service-Oriented Ontology for Wireless Sensor Networks

Jeong-Hee Kim, Hoon Kwon, Do-Hyeun Kim, Ho-Young Kwak, Sang-Joon Lee
Research Process Support with Organizational Flow in e-Science ................................................................. 601
Dukyun Nam, June H. Lee, Soonwook Hwang, Young-Kyoon Suh, Byungsang Kim

A Design on Collaborative-Cooperative Document Edit System Based on Cognitive Analyses ................................................................. 607
Takayuki Fujimoto, Muhammad Dzulqarnain Muhammad Nasir, Tokuro Matsuo

A New Approach on Interactive SOA Security Model Based on Automata ......................................................... 613
Hamidreza Amouzegar, Shahriar Mohammadi, Mohammad Jafar Tarokh, Anahita Naghilouye Hidaji

Mobile Mapping Service Using Scalable Vector Graphics on the Human Geographic .............................................. 618
Jin Suk Kang, Yonghee You, Mee Young Sung, Taikyeong T. Jeong, Jongan Park

Analysis of E-bank Innovation in China Using a Hypercube Model ................................................................. 624
HaiBo Zhu, Ying Zou

Developing Accessible Applications with User-Centered Architecture ................................................................. 630
Sabina Jeschke, Helmut Vieritz, Olivier Pfeiffer

Web Page Dependent Vision Based Segmentation for Web Sites .................................................................. 636
Pyungkwan Ko, Sanggil Kang, Harshit Kumar

Robust Routing ............................................................................................................................................... 641
Himanshu Agrawal, Andrew Jennings, Mark Gregory, Daud Channa

Author Index
