# TABLE OF CONTENTS

Optimal Control of DDoS Defense with Multi-Resource Max-min Fairness ............................................................... 1  
Wei Wei, Yabo Dong, Dongming Lu, Guang Jin

Review on the Application of Artificial Intelligence in Antivirus Detection System ................................................................. 9  
Xiao-bin Wang, Guang-yuan Yang, Yi-chao Li, Dan Liu

A Particle Filter Using SVD Based Sampling Kalman Filter to Obtain the Proposal Distribution .................................................................................................................. 13  
Bin Liu, Xiao-chuan Ma, Chao-huan Hou

David B. Bracewell

Manifold Learning with Local Geometry Preserving and Global Affine Transformation ................................................................. 22  
Dong Huang, Xiaorong Pu

High Accuracy Measurement Technology of CCD and its Industrial Application ................................................................. 28  
Pengfei Hao, Xiaodong Zhang, Yuanzong Li, Lihong Zheng

A New Image Encryption Arithmetic Based on a Three-dimensional Map ................................................................................. 35  
Feng Huang, Chao Wang, Shijun Li

The Choice of Welding Parameters and Prediction of Weld Seam Dimensions for Welding Rapid Prototyping ................................................................................................................................................. 40  
Jian-ning Xu, Hua Zhang, Guang-yun Zhang, Yu-long Li, Rong-hua Hu

Bifurcation of a Class of Discrete-time Neural Networks ......................................................................................................................... 44  
Xiaoliang Zhou, Xueliang Gao

The Reuse Policy in Developing Multi-agent System ............................................................................................................................. 49  
Xiao Xue, Zhi Sun, Junwei Luo

Medical Image Fusion with a Shift-Invariant Morphological Wavelet ................................................................................................. 55  
Bo Yang, Zhongliang Jing

A New Palmprint Identification Algorithm Based on Gabor Filter and Moment Invariant ................................................................. 59  
Shuang Wang, Yong Xu

Study on Fuzzy Automatic Transmission Strategy of Vehicles .............................................................................................................. 65  
Zhiyi Zhang, Dingxuan Zhao, Bei Sun

LMI-based Criterion for the Robust Guaranteed Cost Control of 2-D Systems Described By the Roesser Model ................................................................................................................................................. 70  
Jian-tao Dai, Wei-quin Wang

Effects of Image Alignment Error on Vehicle License Image Reconstruction using Non-uniform Interpolation Method ................................................................................................................................................. 75  
Shih-Chieh Lin, Chi-hui-Ting Chen

Improved Multi-scale and Structuring Element Morphological Detection in the Log CT Image ................................................................................................................................................. 81  
Lei Yu, Dawei Qi

ABIS: A Language of Intelligent Systems ................................................................................................................................................. 87  
A. Poletykin, M. Byvaykov, A. Baybulatov

Global Asymptotic Stability of Stochastic Neural Networks with Time-Varying Delays ................................................................................................................................................ 91  
Zhengxia Wang, Dacheng Wang, Xinyuan Liang, Haixia Wu
A New Image Thresholding Method based on Isoperimetric Ratios ................................................................. 95
Zuoyong Li, Chuancai Liu, Yong Cheng

Omnidirectional Structure Element of Mathematical Morphology Applied to Wood Computed Tomography Testing ................................................................. 99
Meiheng Zhang, Dawei Qi, Lei Yu

A Novel Algorithm of Constructing LDPC Codes with Graph Theory ................................................................. 105
Yan Cui, Xinhui Si, Yanan Shen

An Optimized Atmospheric Missed Data Recovery Algorithm Based on Singular Spectrum Iteration ..................... 109
Liu Wei, Jin Weidong, Wang Huizan, Zhang Ren

Research of the Active Control for High-Speed Train Pantograph ........................................................................... 113
Wang Shudong, Guo Jingbo, Gao Guosheng

An Improved Result for Observer-based H∞ Fuzzy Control ................................................................................. 118
Kuan-Hsuan Tseng, Shih-Wei Kai, Chi-Chuan Lu, Te-Yi Chiu, Chun-Hsiung Fang

Fuzzy-GA and Multi-Objective Transportation Optimization ..................................................................................... 124
Shu-rong Zou, Hong-wei Zhang, Kun-Kun Wang

Model Parameter Selection of Support Vector Machines ...................................................................................... 128
Mingyuan Zhao, Ke Tang, Mingtian Zhou, Fengli Zhang, Ling Zeng

An Intelligent FMEA System Implemented with a Hierarchy of Back-Propagation Neural Networks .......................... 133
Chiang Ku, Yun-Shiow Chen, Yun-Kung Chung

Using Hopfield Neural Networks to Solve DEA Problems ..................................................................................... 139
Shing-Cheng Hu, Yun-Kung Chung, Yun-Shiow Chen

Research on Fuzzy Guidance Law Based on Self-adaptive Genetic Annealing Algorithm ...................................... 145
Jin-yong Yu, Ru-chuan Zhang, Hong-chao Zhao

Implementation and Optimization of Particle Filter Tracking Algorithm on Multi-DSPs System ................................ 151
Gongyan Li, Bin Li, Zhou Liu, Xiaopeng Chen

Genetic Algorithm Based Fuzzy Multi-objective Nonlinear Programming of Regional Water Allocation ...................... 157
Shurong Li, Peng Wang, Tao Ma, Wei Yan

ECOC-Based Training of Neural Networks for Face Recognition ..................................................................... 163
Nima Hatami, Reza Ebrahimpour, Reza Ghaderi

Optimizing Cooperative Control based on Genetic Algorithm for ElectroSlag Remelting Process ............................ 168
Jin-chun Song, Li-li Zhao, Hong-yi Liu

An Improved Grey Self-Organizing Map Based DOS Detection ....................................................................... 172
Rui Chen, Jin-yu WEI, He-feng YU

Study on the Design of CRM-Oriented Synthetic Decision Support System ......................................................... 178
Jin-yu WEI, Rui CHEN, He-feng YU

Genetic Algorithm for Power Load Dispatch ........................................................................................................ 182
Chao-Lung Chiang

Support Vector Regression Hybrid Algorithm Based on Rough Set .................................................................... 188
Jiu Ying Deng, Qiang Chen, Zongyuan Mao, Xiangjun Gao

A Neural Network Approach for Creating a NTC Thermistor Model Library for PSPICE .................................. 193
Lian Ming Wang, Yu Fen Deng, Xian Long Zhao, Bao Liang Liu
A Novel k-Times Short Digital Signature Scheme using Pairing ................................................................. Jianhong Zhang, Jianjun Xie .......................... 198

A Web Services Based Wide-area Corporation Multiagent System Platform for Power System .......................................................... Xiaoyang Tong .................................................. 201

Correction Model of Carbon Potential using AI Techniques and Mechanism Analysis ........................................ Xixia Huang, Jiansheng Pan, Fanhuai Shi, Shanben Chen .................. 207

Research on Rotary Dump Health Monitoring Expert System Based on Causality Diagram Theory ................................................ Quan Liu, Jingsong Li .............................................. 211

A Fast Block Matching Algorithm for Stereo Correspondence .............................................................. Tangfei Tao, Ja Choon Koo, Hyouk Ryelon Choi .................. 215

Optimal Control of Polymer Flooding Injection Under Nonlinear Inequality Constraints ............................ Shu-rong Li, Lan-lei Guo, Xiao-dong Zhang .................. 219

Proposal of an ODX Data Exchange System Applied to Automotive Diagnosis ........................................ A. Cremmel, A. Azarian, A. Siadat ........................................ 225

Automatic Text Classification Based on Knowledge Tree ........................................................................... Lu Peng, Yibo Gao, Yiping Yang ........................................ 231

A Real-Coded Quantum-Inspired Evolutionary Algorithm for Global Numerical Optimization ................................................ Chaoyong Qin, Yongjina Liu, Jianguo Zheng .................. 239

Knowledge Reduction of Dominance-based Fuzzy Rough Set in Fuzzy Decision System ........................ Jun Xie, Yu-Qing Song, Xi-Bei Yang, Huai-Jiang Sun, Jing-Yu Yang .......................................................... 244

A Robust Algorithm for Fingerprint Singular Point Detection and Image Reference Direction Determination Based on the Analysis of Curvature Map ........................................ Jin Qi, Mei Xie ...................................................... 249

A New Genetic Algorithm for Optimization ......................................................................................... Ji Peirong, Hu Xinyu, Zhao Qing ........................................ 253

Research on Prediction Technique of Network Situation Awareness ...................................................... Juan Wang, Zhi-Guang Qin, Li Ye ........................................ 256

A New Elman Neural Network and Its Dynamic Properties .................................................................... Yuan-Chu Cheng, Wei-Min Qi, Jie Zhao .................. 261

A Polynomial-Based Key Predistribution Scheme for Wireless Sensor Networks Using Matrix Decomposition .......................................................... Hong Zheng, Hangyang Dai ........................................ 266

Research Advances and Prospects of Mathematical Morphology in Image Processing ........................ Zijuan Yu, Yuqian Zhao, XiaoFang Wang ........................................ 271

The Design of Softman-Based Digital Copyright Protection System in Internet .................................... Fu-Cheng You .......................................................... 277

A Novel Fuzzy Clustering Method Based on Chaos Small-World Algorithm for Image Edge Detection ........................................................................ Mingxin Yuan, Sun'an Wang, Naijian Chen .................. 281

Similarity Search Based on Random Projection for High Frequency Time Series ................................... Wei Wu, Jingtiao Hu .................................................. 287
Propagation Modeling of Passive Worms in P2P Networks ...............................293
Chaosheng Feng, Zhiguang Qin, Laurence Cuthbet, Laurissa Tokarchuk

An Example of Balanced Truncation Method and Its Surprising Time Domain Performance ..................................................................................................................298
Sheng-Guo Wang, Ben Wang

The Discrete Fuzzy Numbers on a Fixed Set With Finite Support Set ..................304
Guixiang Wang, Qing Zhang, Xianjun Cuib

Infinity Norm Based Neural Network Algorithm for Principal Component Analysis ...............................................................310
Lijun Liu, Hongjie Xing, Dong Nan

Formation of Standard Tibetan Syllables and Comparison as well as Analysis of the Statistical Results .................................................................315
Weilan Wang, Duola

Cost-based FMEA and ABC Concepts for Manufacturing Process Plan Evaluation .................................................................321
Alaa Hassan, Iman Dayarian, Ali Siadat, Jean-Yves Dantan

Application of ANP in Production Line Selection: A Case Study for ERP Sand Table Simulation Evaluation .................................................................327
Jinyu Wei, Ran Bi

Short-term Traffic Flow Prediction Based on Embedding Phase-space and Blind Signal Separation .................................................................331
Hong Xie, Zhonghua Liu

A Fast Algorithm for Solving Large Scale Nonlinear Optimization Problems Using RNN .................................................................336
Xiaoliang Xu, Huajin Tang, Xiaoxin Shi

Validating Multiattribute Decision Making Methods for Supporting Group Decisions .................................................................342
Chung-Hsing Yeh, Yu-Hern Chang

A Novel Ring Signature Scheme with Multi-designated Verifiers .................................................................348
Jianhong Zhang, Jianjun Xie

Extraction of Text Classification Rules Based on Multi-Population Collaborative Optimization .................................................................353
He Liu, Dayou Liu

Activity Invariant Sets and Stable Attractors of Lotka-Volterra Recurrent Neural Networks .................................................................358
Lei Zhang, Zhang Yi, Bochuan Zheng

A Symbolic Approach to Reconstruct Polyhedral Scene from Single 2D Line Drawing .................................................................364
Ying Chen, Hongbo Li

A Novel Unsupervised Feature Extraction Based on Image Matrix .................................................................370
Yong-zhi Li, Zuo-yong Li, Song-song Wu, Jing-yu Yang

Real-time Tissue Deformation and Image Rendering for Computer Simulation .................................................................376
Qian Yin, Zhiyong Yuan, Zukuan Wei, Xin Zheng

A Delay-Dependent Stability Criterion for Neural Networks with Interval Time-varying Delays .................................................................380
Haixia Wu, Wei Zhang, Wei Feng, Zhengxia Wang

Facial Expression Recognition Based on Histogram Sequence of Local Gabor Binary Patterns .................................................................384
Xinghua Sun, Hongxia Xu, Chunxia Zhao, Jingyu Yang

Precise Determination of Non-additive Measures .................................................................390
Hai-Feng Guo, Wen Zheng, Song Ci
Intelligent Control of Thermal Comfort in Automobile ......................................................... 396
Yadollah Farzaneh, Ali Akbarzadeh Tootoonchi

A Systematic and Simple Approach for Designing Takagi-Sugeno Fuzzy Controller with Reduced Data .......................................................... 401
Yadollah Farzaneh, Ali Akbarzadeh Tootoonchi

On-line Identification of Multivariable Processes Using EKF Learning-based Adaptive Neural Networks ........................................................................ 407
Karim Salahshoor, Amin Sabet Kamalabady

Multi-objective Fuzzy Modeling Using NSGA-II .......................................................... 413
Xing Zong-Yi, Zhang Yong, Hou Yuan-Long, Cai Guo-Qiang

The Discrete Surface Kernel: Framework and Applications ................................ 419
Naoufel Werghi

Design of the Intelligent Heat Meter Based on MSP430FW425 ......................... 424
Bingjiang Gong, Yan Liu

The SVM Classification Leafminer-infected Leaves Based on Fractal Dimension .......................................................... 428
Da-ke Wu, Chun-yan Xie, Cheng-wei Ma

A Scene Recognition Algorithm Based on Covariance Descriptor ....................... 433
Yinghui Ge, Jianjun Yu

Robust Control Based on LS-SVM for Uncertain Nonlinear System .................. 438
Hong Yang, Fei Luo, Yu-Ge Xu

Improve Go AI based on BP-Neural Network .......................................................... 442
Jianming Liao, Difei Zou, Rui Luo

Adaptive and Coordinated Traffic Signal Control Based on Q-Learning and MULTIBAND Model ........................................................................ 446
Shoufeng Lu, Ximin Liu, Shiqiang Dai

Extension of Statistical Process Control (SPC) Methodology to Dynamic Systems Controlled via Output Feedback .................................................. 452
Raphael Linker

Spam Image Discrimination using Support Vector Machine based on Higher-Order Local Autocorrelation Feature Extraction .......................................................... 457
Hongrong Cheng, Zhiguang Qin, Qiao Liu, Mingcheng Wan

New Method to Measure Pulp Flow Velocity Based on Time-frequency Analysis of Pulp Consistency Noise .................................................. 462
Qiang Zhou, Jiuxiang Han

An Immune Algorithm Based on Danger Model .................................................. 468
Chenggong Zhang, Guisong Liu, Wang Hu

Resilient Robust H. Fuzzy Controller Design for a Class of Nonlinear Systems with Time-Varying Delays in States .................................................. 474
Junsheng Ren

Study on the Structure and Algorithm of a Feedback Fuzzy Controller ................ 480
Sheng-li Qu, Bo Qian, Xin-zhi Zhu, Wen-long Xu

Topological Optimization Method and Its Application Research In The Rear Platen’ 3-D Structure Design .................................................. 485
Jing LI, Yonghui ZHANG

Text Mining for Chat Message Analysis .......................................................... 489
Siu Cheung Hui, Yulan He, Haichao Dong

</table>
Mining Atypical Groups for a Target Quantitative Attribute
Sylvie Guillaume, Florian Guillochon ................................................................. 698

Web-based Remote Human Pulse Monitoring System with Intelligent Data Analysis for
Home Healthcare
Chih-Ming Chen, Chin-Ming Hong, Chia-Meng Huang, Tai-Hung Lee ................................................................. 706

An Improved Adaptive CUSUM Control Chart for Monitoring Process Mean
Jun Du, Zhang Wu, Roger J. Jiao ........................................................................... 712

Ontology-based Concept Map for Planning Personalized Learning Path
Chih-Ming Chen, Chi-Jui Peng, Jer-Yeu Shiue ......................................................... 718

An Integrated Intrusion Detection System by Using Multiple Neural Networks
Guisong Liu, Xiaobin Wang .................................................................................... 724

An LMI Approach to Robust Controller Designs of Takagi-Sugeno fuzzy Systems with
Parametric Uncertainties
Li Qi, Jun-You Yang ............................................................................................. 730

A Method for Detection of Known Objects in Visual Search Tasks
Andrzej Sluzek ....................................................................................................... 735

A Novel Model for Stock Portfolio Based on ARX, RS and a New Grey Relational Grade
Theories
Kuang Yu Huang, Chuen-Jiuan Jane ...................................................................... 741

Representations of Continuous Attractors of Discrete-Time Cellular Neural Networks
Jiali Yu, Zhang Yi, Lei Zhang ................................................................................ 747

Function Approximation Based on Twin Support Vector Machines
Chengfui Yang, Zhang Yi, Lin Zuo ......................................................................... 752

Theory of Grey Systems and its Application in Electric Load Forecasting
Ji Peirong Chen, Juan Zheng, Wen Chen ................................................................. 758

Learning the Boundary of One-Class-Classifier Globally and Locally
Aimin Feng, Bin Chen, Xuejun Liu ......................................................................... 763

A Research on BPM System based on Process Knowledge
Tao Yaxiong, Zhu Guoquan, Xu Zhen, Liu Boqing .................................................. 769

Solving TSP Using Lotka-Volterra Neural Networks without Self-Excitatory
Manli Li, Jiali Yu, Stones Lei Zhang, Hong Qu ....................................................... 776

Group Selection by Using Lotka-Volterra Recurrent Neural Networks
Stones Lei Zhang, Zhang Yi, Peng Ann Heng ......................................................... 781

A Maximum Entropy Model for Product Feature Extraction in Online Customer Reviews
Gamgarn Somprasertsri, Pattarachai Lalitrojwong .................................................. 786

A Batch Splitting Job Shop Scheduling Problem with Bounded Batch Sizes under
Multiple-resource Constraints using Genetic Algorithm
Hai-yan Wang, Yan-wei Zhao, Xin-li Xu, Wan-liang Wang ........................................... 792

High Performance Intelligent PID Control System and Application
Li-xin Ma, Min-xuan Chen, Tao Zhou, Hiromi Miyajima .......................................... 798

Chinese Word Segmentation based on the Improved Particle Swarm Optimization Neural
Networks
Jia He, Lin Chen .................................................................................................... 803

Operational Separability Criteria and Matrix Reorderings
Wei Cheng ............................................................................................................. 808
Application of Intelligent PID Control for Robot.................................................................81
Li-xin Ma, Dao-nian Shi, Min-xuan Chen, Xiao-qin Wang

A Method of Remote Fault Diagnosis Based on Multilayer SOM ........................................81
Wen-yu Chen, Xiao-bin Wang, Shi-xin Sun, Jing-bo Liu

Detection of Seizures in EEG Signal using Weighted Locally Linear Embedding and SVM
Classifier ........................................................................................................................................82
Yaozhang Pan, Shuzhi Sam Ge, Feng Ru Tang, Abdullah Al Mamun

Least Squares Support Vector Machine Classifiers Using PCNNs.............................................82
Yongsheng Sang, Haixian Zhang, Lin Zuo

Continuous Attractors of a Class of Recurrent Neural Networks without Lateral Inhibition........83
Haixian Zhang, Stones Lei Zhang, Jiali Yu, Hong Qu

A Economic Lot Scheduling Problem for Manufacturing and remanufacturing........................83
Huiqing Ouyang, Xiangyang Zhu

An Improved Fuzzy Comprehensive Evaluation Method Using Expanded Least Deviations
Algorithm .........................................................................................................................................84
Wei Chen, Xiaohong Hao, Jie Lin

Delegatability of Designated Verifier Signature........................................................................84
Yongjian Liao, Zhiguo Qin

Constructing Scalable TTS System based on Corpus Approach.................................................85
Wei Zhang, Zheng-hua Ling, Li-rong Dai

Co-evolutionary Stability in the Alternating-Offer Negotiation................................................85
Yong-quan Liang, Yong Yuan

A Novel Image Matching Method in Camera-calibrated System.................................................86
Junwei Yu, Lubin Weng, Yuan Tian, Yangqin Wang, Xiangting Tai

Optimizing Voice over Internet Protocol (VoIP) Networks Based-on Extended E-model ...........86
Yoanes Bandung, Carmadi Machbub, Armein Z.R. Langi, Suhono H. Supangkat

Evolution-generated Communications in Digital Business Ecosystem.......................................87
Juan Wang, Philippe De Wilde

The Research of Association Rules Mining Algorithm Based on Binary.....................................87
Gang Fang, Zu-Kuan Wei, Qian Yin

Multiobjective Optimal Secure Routing Algorithm Using NSGA-II........................................88
Dan Han, Guang-min Hu, Cai Lu

The Scale Self-Adjusting Multi-Resolution Network Traffic Anomaly Detection........................88
Xing-jian Qi, Guang-min Hu, Dan Yang, Zong-lin Li

Film Line Scratch Detection using Neural Network and Morphological Filter..........................89
Kyung-tai Kim, Eun Yi Kim

Color Pattern Diffusion: Verification for Wide Baseline Matching............................................90
Liu Xinhai, Fang Kangling, Xu Wangming, Wu Jin

Multi-object Segmentation Based on Pulse Coupled Neural Network......................................90
Liu Xiaofang, Cheng Dansong, Tang Xianglong, Liu Jiafeng

Gabor-based Discriminant Locality Preserving Projections for Face Recognition.......................90
Lei Zhu, Lihua Li

A Novel Contract Net Negotiation Model based on Trust Mechanism........................................91
Zude Zhou, Songlin Cheng, Quan Liu
Hospital Linens Inventory Control Re-engineering Based on RFID .................................................. 917
Yuan-Yuan Jiao, Yi-Wen Zhen, Roger J. Jiao

Making Discriminative Common Vectors Applicable to Face Recognition with One Training Image per Person ........................................................................................................... 923
Lei Zhu, Yongying Jiang

Path Planning in an Unknown Environment on the Basis of Observations of Occluded Areas ................................................................................................................................. 926
Shuichi Utsugi, Hisashi Suzuki

Multi-person Location and Tracking Method Based on BP Neural Network .................................... 932
Pan Wei, Liu Zhizhan, Zou Yi

A DNA Genetic Algorithm for Beam Angle Selection in Radiotherapy Planning .......................... 936
Jie Lei, Yongjie Li

Convergence Analysis of Background Neural Networks with Two Subnetworks .......................... 942
Fang Xu, Lei Zhang, Hong Qu

A New Algorithm for Extracting Specific Signals with Temporal Structure .................................. 947
Min Wan, Shangming Yang, Hua Yan

Webcam Configurations for Ground Texture Visual Servo ................................................................ 952
Takeshi Matsumoto, David Powers, Nasser Asgari

A Password-based Authenticator: P-Auth .................................................................................. 958
Wei Linna, Qin Zhiguang

Left Ventricular Segmentation of Cardiac Magnetic Resonance Images Using a Novel Edge Following Technique .................................................................................................................. 963
Krit Somkantha, Nipon Theera-Umpon, Sansanee Auephanwiriyakul

Finding Multiple Real Roots by Neural Networks Based on Complete Discrimination System of Polynomial .......................................................................................................................... 969
Xinli Zhang, Dayong Zhu, Wang Hu

A Hybrid Face Recognition Algorithm Based on WT, NMFs and SVM ........................................ 975
Pei Jiang, Yongjie Li

Contour Detection Based On the Property of Orientation Selective Inhibition of Nonclassical Receptive Field ........................................................................................................... 979
Li Long, Yongjie Li

Automatic Image De-Weathering Using Physical Model and Maximum Entropy .......................... 984
Xin Wang, Zhenmin Tang

A Coloured Petri Net Model for Composite Behaviors in Multi-Agent System ............................... 990
Su Jindian Guo Heqing, Yu Shanshan

A Model-free Adaptive Control of Welding Pool Dynamics during Arc Welding .......................... 994

Research on the Fouling Prediction of Heat Exchanger Based on Wavelet Neural Network ........... 999
Lingfang Sun, Haidi Cai, Yingying Zhang, Yukun Qin

Reasoning of Fuzzy Causality Diagram with Interval Probability ................................................ 1003
Xinyuan Liang, Qingxi Shi

A New Strip Temperature Control Method for the Heating Section of Continuous Annealing Line ............................................................................................................................ 1009
Zhou Ming, Yu Datai, Zhou Jiangang
Research on the Recognition of Surface Defects in Copper Strip Based on Fuzzy Neural Network
Xue-wu Zhang, Yan-yun Lv, Yan-qiong Ding, Zhen-tao Zhou

Emotion Recognition using Color and Pattern in Textile Images
Na Yeon Kim, Yunhee Shin, Youngrae Kim, Eun Yi Kim

Investigation of KLIM Algorithm Applied to Face Recognition
Yunfei Jiang, Rukun Hu, Ping Guo, Xin Zheng

A Technique for the Quantitative Measure of Data Cleanliness
Abhijit Wakchaure, Ronald Eaglin, Bahman Motlagh

A New Adaptive Neuro-Fuzzy Approach for On-Line Nonlinear System Identification
Morteza Hanzehnejad, Karim Salahshoor

A New MSBF-based HDR Image Processing Algorithm
Jun Wang, Yan Kang

Z. J. Zhao, J. Kim, M. Luo, H. C. Lau, S. S. Ge, J. B. Zhang

Study on Fuzzy-Extension Control System for Marine Steering
Wang Minghui, Yu Yongquan, Yang Yimin, Wang Fei

Fault Diagnosis of Oil Pump Based on High Speed and Precise Genetic Algorithm Neural Network
Meijuan Gao, Jingwen Tian, Liting Cao, Jin Xu

An Algebraic Criterion for Global Exponential Stability of Cohen-Grossberg Neural Networks with Time-varying Delays
Xinyuan Liang, Tian Wang, Zhengxia Wang, Haixia Wu

Multi-agent Test Environment for BPEL-based Web Service Composition
Wenli Dong

A Chaotic Encryption System Using PCA Neural Networks
Xiao Fei, Guisong Liu, Bochuan Zheng

Intelligent Fault Diagnosis of Distillation Column System based on PCA and Multiple ANFIS
Peyman Akhlaghi, Amir Reza Kashanipour, Karim Salahshoor

A Simulation of Ant Formation and Foraging using Fuzzy Logic and Reinforcement Learning
S. Afshar, M. J. Mahjoob

Segmentation of Fingerprint Images Using the Gradient Vector Field
Jin Qi, Mei Xie

A Survey of the Image Copy Detection
Y. H. Wan, Q. L. Yuan, S. M. Ji, L. M. He, Y. L. Wang

Research on Common Mode Noise Evaluation Method
Yonggao Zhang, Yanli Gao, Ming Yao, Qiang Dong

UAV Route Planning using Multiobjective Ant Colony System
Wang Zhenhua, Zhang Weiguo, Shi Jingping, Han Ying

Approximate Frequent Itemsets Compression Using Dynamic Clustering Method
Hua Yan, Yongsheng Sang

An Iterative Modified Kernel for Support Vector Regression
Fengqing Han, Zhengxia Wang, Ming Lei, Zhixiang Zhou
