# TABLE OF CONTENTS

**VOLUME 1**

**PLENARY LECTURES**

Automation and Robotization of Production Processes in Shipbuilding .......................................................... 1  
  J-H. Kim

Mobile Manipulation for Everyday Environments ........................................................................................................ 8  
  H. Christensen, P. Case

High-Gain Observers in Nonlinear Feedback Control ............................................................................................... 13  
  H. Khalil

**WA01: CONTROL APPLICATIONS TO AUTOMOTIVE SYSTEMS (I)**

WA01-1 Optimum Integrated Design of Mechanical Structure/Controller Using Bargaining Game Theory .................................................................................................................. 24  
  Yoji Iwai

WA01-2 Simulations on Creep Forces Acting on the Wheel of a Rolling Stock ......................................................... 30  
  Chul-Goo Kang, Ho-Yeon Kim, Min-Soo Kim and Byeong-Choon Goo

WA01-3 Control of Container Crane by Binary Input Using Mixed Logical Dynamical System ........................................ 36  
  Yuya Tanaka

WA01-4 A Second-Order Sliding Mode Controller for Active Suspension Systems .................................................... 41  
  Shigehiro Toyama, Fujio Ikeda and Yoshio Sorimachi

WA01-5 Steering Control for Lateral Guidance of an All Wheel Steered Vehicle ..................................................... 47  
  Young Chol Kim, Kyung-Deuk Min, Kyoung-Han Yun, Yeun-Sahun and Jai-Kyun Mok

**WA02: UNMANNED AERIAL VEHICLES**

WA02-1 Optimal Phantom Track Generation for Multiple Electronic Combat Air Vehicles ........................................ 52  
  Il Hyong Lee and Hyochooing Bang

WA02-2 3D Depth Estimation for Target Region Using Optical Flow and Mean-Shift Algorithm .................................................. 57  
  Seon Yeong Jo, Jong Hun Kim, Jeong ho Kim, Dae woo Lee and Kyeum-rae Cho

WA02-3 Fuzzy Logic PID Based Control Design and Performance for a Pectoral Fin Propelled Unmanned Underwater Vehicle ................................................................................. 63  
  Jason Geder, John Palmisano, Ravi Ramamurti, William Sandberg and Banahalli Ratna

WA02-4 Flight Test Results of Automatic Tilt Control for Small Scaled Tilt Rotor Aircraft ........................................ 70  
  Young Shin Kang, Bumjin Park, Changsun Yoo, Yushin Kim and Samok Koo

WA02-5 Distributed Target Tracking Algorithm in Underwater Wireless Sensor Networks .......................... N/A  
  Chang Ho Yu, Kang Hoon Lee, Jae Weon Choi and Young Bong Seo
### WA02-6 Backstepping Sliding Mode Controller Design for a Flying Quadrotor

Haider Mohamed, Mahmoud Moghavvemi, Soo Siang Yang and Hayder Al-Assadi

### WA03: ADAPTIVE NEURAL NETWORK APPLICATIONS

WA05-3 Achieving Formations Under Medium Access, Relative Position and Velocity Constraints............................................................................................................................... 116
  Soura Dasgupta, Manish Vemulapalli and Jon Kuhl

WA05-4 IP Based Ubiquitous Healthcare Systems .................................................................................................................................................................................. 120
  Dhananjay Singh, Wan-Young Chung and Uma Shankar Tiwary

WA05-5 Information Gathering by Wireless Camera Node with Passive Pendulum Mechanism ........................................................................................................................................... 126
  Hideo Sato, Kuniaiki Kawabata, Tsuyoshi Suzuki, Hayato Kaetsu, Yasushi Hada and Yoshito Tobe

WA06: MOTION PLANNING AND DYNAMICS

WA06-1 An Adaptive Disturbance Observer for A Two-Link Robot Manipulator............................................................................................................................... 130
  Yonggu Kim, Jirwook Seok, Ilhwan Noh and Sangchul Won

WA06-2 Motion Planning of Hyper-Redundant Manipulators ............................................................................................................................... N/A
  Haider Mohamed, Samer Yahya, Mahmoud Moghavvemi and Soo Siang Yang

WA06-3 Developing a New Carrier System with Throwing and Catching Robot ............................................................................................................................... 135
  Sameshima Yutaka and Oguro Ryuichi

WA06-4 2D CAD Based Robot Programming for Processing Metal Profiles in Short Series Manufacturing ........................................................................................................................................... 139
  Topi Pulkkinen, Tapio Heikkilä, Mikko Sallinen, Sauli Kivikunnas and Timo Salmi

WA06-5 A Manipulator Workspace Generation Algorithm Using a Singular Value Decomposition ............................................................................................................................... 146
  Changhwan Choi, Hee-Seong Park, Seong-Hyun Kim, Hyo-Jik Lee, Ji-Sub Yoon, Byung-Seok Park and Jong-Kwang Lee

WA07:OS005 GUIDANCE, NAVIGATION & CONTROL (I)

WA07-1 [Invited Paper] Nonlinear Trajectory Tracking Using Vectorial Backstepping Approach............................................................................................................................... 152
  Hyochoong Bang, Sangjong Lee and Haechang Lee

WA07-2 Momentum Transfer Control of a Spacecraft with Two Wheels by Feedback Linearization ............................................................................................................................... 158
  In-Ho Seo, Heungh Lee, Heon Lee and Hyochoong Bang

WA07-3 Design of Optimal Controllers for Spacecraft Formation Flying Based on the Decentralized Approach ............................................................................................................................... 164
  Jonghee Bae and Youdan Kim

WA07-4 Improving Mobile Robot Navigation Performance Using Vision Based SLAM and Distributed Filters ........................................................................................................................................... 169
  Dae Hee Won, Sebum Chun, Sangkyung Sung, Taesam Kang and Young Jae Lee

WA07-5 Autonomous Flight Control System Design for a Blended Wing Body UAV ............................................................................................................................... 175
  D.Jin Lee, Byoung-Mun Min, Min-Jea Tahn, Hyochoong Bang and David Hyunchul Shim

WA08: OS013 MOBILE ROBOTIC SYSEYEM CONTROL & NAVIGATION

WA08-1 The Performance of Independent Four Wheels Steering Vehicle (4WS) Applied Ackerman Geometry ............................................................................................................................... 180
  Min Wan Choi, Jun Seok Park, Bong Soo Lee and Man Hyung Lee

WA10-5 Interaction with a Display Panel - An Evaluation of Surface-Transmitted Haptic Feedback
Seung-Chan Kim, Tae-Heon Yang, Byung-Kil Han and Dong-Soo Kwon

WP01: CONTROL APPLICATIONS TO AUTOMOTIVE SYSTEMS (II)

WP01-1 A New Concept of Diesel Engine Fuel Injection System with DDVC Hydraulic Actuator
Feifei Zhang, Kyoko Narukawa and Masanori Ito

WP01-2 Wheel Slip Control for ABS with Time Delay Input Using Feedback Linearization and Adaptive Sliding Mode Control
Kyun-Sang Park and Jong-Tae Lim

WP01-3 Lateral Control of an UCT (Unmanned Container Transporter) Using Ultrasonic Satellite System and System Identification
Seong Man Yoon, Kil Soo Lee, Su Yong Kim, Ji Hoon Kang and Man Hyung Lee

WP01-4 Development of Steering Behavior Recognition Method by Using Sensing Data of Drive Recorder
Hideki Tsunai, Kozo Maeda, Ryuzo Hayashi, Pongsathorn Raksincharoensak and Masao Nagai

WP01-5 Application of a Sliding Mode Control to Anti-Lock Brake Systems
Seunghwan Baek, Jeonghoon Song, Heungseob Kim, Duksun Yun and Kwangsuck Boo

WP02: UNMANNED AERIAL AND UNDERGROUND VEHICLES

WP02-1 Autonomous Flight Test Using Angle of UAV’s Velocity Vector
Dong-In Han, Jong-hun Kim, Dae-woo Lee, Kyeum-rae Cho and Sang-jin Cho

WP02-2 Delayed Feedback Altitude Control for Micro UAV Without Sensing Pitch Rate
Ryota Kojima

WP02-3 Hardware-In-the-Loop Test for Fault Diagnosis System of Tilt Rotor UAV
Changsun Yoo, Youngshin Kang and Bumjin Park

WP02-4 Obstacle-Overcoming Algorithm for Unmanned Ground Vehicle with Active Suspensions on Unstructured Terrain
Kyeong Bin Lim, Jung Hoon Kang, Yong-San Yoon, Sang Hoon Lee and Shincheon Kang

WP02-5 Enhancing Situational Awareness by Means of Hybrid Adaptive Neural Control of Vertical Flight in Unmanned Helicopter
Igor Astrov and Andrus Pedai

WP02-6 Modified Nonlinear Guidance Algorithm for Formation Flight of Two UAVs
Do-myung Kim, Sihyun Nam and Jinyoung Suk

WP03: FUZZY MOTION CONTROL

WP03-1 Self-Tuning Fuzzy-Based Dispatching Strategy for Elevator Group Control Systems
Jaffari Jamaludin, Nasrudin Abdul Rahim and Woon Ping Hew

WP03-2 Direct Torque Control of Induction Motors with Fuzzy Logic Controller
Hassan Halleh, Metsam Rahman and Bahram Kimiaghaham
WP03-3 Stability Analysis for Fuzzy Pulse-Width-Modulated Systems ........................................... 329
   Hwa Chang Sung, Jin Bae Park and Young Hoon Joo

WP03-4 An Adaptive Neuro-Fuzzy Controller for DC-DC Converter ............................................. N/A
   Sayed Ali Emami, Mohamad Bayat Poudeh, saeid eshtehardiha and Mohamad reza Moradiyan

WP03-5 Speed & Torque Vector Control of Induction Motors with Fuzzy Logic Controller ............ 333
   Bahram Kimiaghalam, Meisam Rahmani and Hassan Halleh

WP04: IDENTIFICATION

WP04-1 Identification of Nonlinear Discrete Time Systems Using Trigonometric Polynomial Neural Networks .......................................................... 339
   Yoshihiro Yamamoto

WP04-2 Identification of Piecewise Affine Systems with Hysteresis Model............................... N/A
   Haider Mohamed, Masood Askari, Mahmoud Moghavvemi and Soo Siang Yang

WP04-3 Structure Identification of Volterra Model with Gaussian Input ..................................... N/A
   Houda Mathlouthi, Kamel Abderrahim, Faouzi Msahi and Gérard Favier

WP04-4 Prediction of Dynamical Properties of Flow Over a Three-Element Airfoil via Computationally Intelligent Architectures ................................................. 344
   Cosku Kasnakoglu and Mehmet Onder Efe

WP04-5 Layer-Recurrent Network in Identifying a Nonlinear System .......................................... 350
   Farah Hani Nordin and Farrukh Hafiz Nagi

WP04-6 MOESP Approach for Designing a Compensation Input to Linear Unknown SISO Systems .......................................................... 355
   Masuhiro Nitta

WP05 NETWORK CHARACTERIZATION

WP05-1 Traffic Prediction of CAN Network System with Dual Communication Channels .......... 360
   Man Ho Kim, Kyoung Nam Ha, Kyung Chang Lee and Suk Lee

WP05-2 Window-Based Congestion Control to Improve TCP Fairness and Utilization for Wide-Bandwidth Networks .......................................................... 364
   Jae Seang Lee and Jong-Tae Lim

WP05-3 Personal Rapid Transit Network Design Using Genetic Algorithm and Ant Colony System Hybridization .......................................................... 369
   Jin-Myung Won and Fakhreddine Karray

WP05-4 Adaptive Beamforming Algorithms for Smart Antenna Systems .................................. 375
   Shaheera Hossain, M. Tariqul Islam and Seiichi Serikawa

WP05-5 Reliability Analysis Using Discrete Event Simulation and Petri Net Modeling .................. N/A
   Behrooz Safarinejad, Mohammad Bagher Menhaj and Ali Doustmohammadi

WP05-6 Remote Control Management for Large Scale FM Transmitter Sites .......................... N/A
   Haider Mohamed, Soo Siang Yang, Mahmoud Moghavvemi and Bala Murali
WP06: MOBILE ROBOTS AND NAVIGATION (I)

WP06-1 ELA: Real-Time Obstacle Avoidance for Rescue Robots .............................................................. N/A
Haekwan Jeong, Kyung Hak Hyun and Yoon Keun Kwak

WP06-2 Development of a Robot Balancing on a Ball ................................................................. 380
Masaaki Kumagai and Takaya Ochiai

WP06-3 Systematic Robustness Analysis of Least Squares Mobile Robot Velocity
Estimation Using a Polygonal Optical Mouse Array ................................................................. 386
Sungbok Kim and Sanghyup Lee

WP06-4 Development of an Intelligent Traffic Light for Reducing Traffic Accidents ......................... 386
Katsuya Matsuzaki, Masuhiro Nitta and Kiyotaka Kato

WP06-5 Development of Prototype of a Unmanned Transport Robot for Transport of
Construction Materials ................................................................. 391
BoHyun Yu, DongHyung Kim, ByungGap Yu, SeungYeol Lee and ChangSoo Han

WP07: OS006 GUIDANCE, NAVIGATION & CONTROL (II)

WP07-1 Federated Unscented Kalman Filter Design for Multiple Satellites Formation
Flying in LEO ........................................................................ 396
Muhammad Ilyas, Junkyu Lim, Jang Gyu Lee and Chan Gook Park

WP07-2 On-Orbit Estimation of Dynamic Properties for STSAT3 ...................................................... 402
Sungwook Yang, Dong-Ik Cheon, Sangchul Lee and Hwa-Suk Oh

WP07-3 Time-to-Go Estimator for Missiles Guided by BPNG ............................................................ 406
Ick-Ho Whang and Won-Sang Ra

WP07-4 Strapdown Sensors and Seeker Based Guidance Filter Design .................................................. 411
Jung-Seob Yun, Chang-Kyung Ryoo and Taek-Lyul Song

WP07-5 Biased PNG with Maximal-G Barrel-Roll for Survivability Enhancement of Anti-Ship Missiles ................................................................................................................. 416
Yoon-Hwan Kim and Min-Jea Tahk

WP08: OS014 MECHATRONICS SYSTEM DESIGN AND MODELING

WP08-1 A Theory of Thermal Growth Control Techniques for High Speed Spindles ......................... 420
Ching-Feng Chang, Te-Chau Chen, Kuen-Cheng Wang, Jin-Jia Chen and Tsair-Rong Chen

WP08-2 Hysteresis Modeling and Compensation in a Magnetostrictive Actuator .............................. 426
Jong-Kwan Jung and Young-Woo Park

WP08-3 A Concrete Repair Robot Under the Upper Plate of Bridge .................................................. 431
woowon lee

WP08-4 Optimal Design of Micro Flywheel Energy Storage System ................................................. 435
Seong-yeol Yoo, Hyun-chu Lee and Myounggyu Noh

WP08-5 A New Design Approach for the Disturbance Observer ......................................................... 440
Jukwang Park and Seol Jung
WP09: OS22 VISUAL SENSING AND INSPECTION SYSTEM

WP09-1 Visual Gyroscope: Integration of Visual Information with Gyroscope for Attitude Measurement of Mobile Platform ................................................................. 446
Deokhwa Hong, Hyunki Lee, Hyungsuck Cho, Youngjin Park and Jong Hyung Kim

WP09-2 A Low Cost Optical Motion Capture System for Video Games ........................................... N/A
Young Kee Ryu and Choonsuk Oh

WP09-3 Wafer Bump Inspection with Transparent Film Layer Using Vertical Scanning Interferometer for Semiconductor Packaging ................................................ 451
Min Young Kim

WP09-4 Robot Tracking Method by Using Cone-Shaped Laser Beam ................................................ N/A
Hyuk Hoon Shim

WP09-5 Profile Measurement of a Partially Specular Object Using Spatial Light Modulation .................. 455
Joongki Jeong, Min Young Kim and Hyungsuck Cho

WP10: BIOMEDICAL SYSTEMS

WP10-1 Design of a Low-power Consumption Wearable Reflectance Pulse Oximetry for Ubiquitous Healthcare System ................................................................. 459
Wan-Young Chung, Sang-Joong Jung, Yong-Su Seo and Young-Dong Lee

WP10-2 Conditional Probability of Cauchy Distribution in Automatic Sleep Stage Determination for Sleep Data with Artifacts ..................................................... 463
Bei Wang, Takenao Sugi, Fusae Kawana, Xingyu Wang and Masatoshi Nakamura

WP10-3 Retinal Image Enhancement by Index of Fuzziness in Multi-Mode Histogram .................. 467
Vittaya Tipsuwanporn and Sathit Intajag

WP10-4 Classification of Robot Control Commands from Animal’s Neural Signals Using Extreme Learning Machine ................................................................. N/A
Youngbum Lee, Jinkwon Kim, Hyunjoo Lee, Hyuncheul Shin and Myoungho Lee

WP10-5 Knee Joint Moment Estimation Using Neural Network System Identification in Sit-to-Stand Movement ................................................................. 471
Jae-Kang Lee and Yoonsu Nam

WP10-6 Muscles Force Patterns Prediction and Joint Reactions Determination During 3D Spine Movements by Means of Optimal Control Theory ......................... 475
Ali Shahvarpour, Hossein Pourtakdoust, Gholamreza Vossoughi, Mohammad Parnianpour and Jung-Yong Kim

WE01: CONTROL APPLICATIONS TO AUTOMOTIVE SYSTEMS (III)

WE01-1 Design and Optimization of Parallel Hybrid Electric Vehicle (PHEV) Drivetrain Based on Mechatronics Design Approach ..................................................... N/A
Omid Movahhedi and Farzad Rajaei Salmasi

WE01-2 AUTOSAR Migration from Existing Automotive Software .................................................. 481
Daechyun Kum, Gwang-Min Park, Seonghun Lee and Wooyoung Jung
WE04: ADAPTIVE CONTROL

WE04-1 Model following Adaptive Control Based on Least Squares Method .......................................................... 557
Hiromitsu Ogawa, Manato Ono, Yuichi Masukake and Yoshihisa Ishida

WE04-2 A Stability Criterion for Weighting Multiple Model Adaptive Control .......................................................... 561
Weicun Zhang, Xiaobo Wang and Yuejin Song

WE04-3 Adaptive Decoupling Control of the Quadruple-Tank System ........................................................................ N/A
Sajjad Pourmohammad and Alireza Yazdizadeh

WE04-4 Adaptive Superheat Control of a Refrigeration Plant Using Backstepping ....................................................... 566
Henrik Rasmussen

WE04-5 Adaptive Energy-based Controllers for a Two Link Flexible Manipulator under Gravity ........................................ 572
Sanaz Hosseini, Ali Fallah and Mahtab Nazari

WE04-6 A New Result on the Stability and Convergence of Self-Tuning Adaptive Control ........................................ 577
Weicun Zhang, Yuejin Song and Jiwei Liu

WE05: VISION APPLICATIONS

WE05-1 Expression of Individual Woven Yarn of Textile Fabric Based on Yarn Positional Information Extracted from Its Three Dimensional CT Image ........................................................................... 581
Toshihiro Shinohara

WE05-2 A Design of Mobile Robot Based on Network Camera and Sound Source Localization for Intelligent Surveillance System ........................................................................................................... 587
JungHyun Park and Kwee-Bo Sim

WE05-3 Shape Based Moving Object Tracking with Particle Filter ............................................................................. 592
Md. Zahidul Islam and Chil-Woo Lee

WE05-4 Position Measurement of Container Crane Spreader Using an Image Sensor System for Anti-Sway Controllers .............................................................................................................. 596
Hideki Kawai, Yongwoon Choi, Young-Bok Kim and Yuzuru Kubota

WE05-5 HSI Color Based Vehicle License Plate Detection ............................................................................................. 600
Kaushik Deb and Kang-Hyun Jo

WE05-6 Vision System and Flexible Robot Hand for Cloth Handling Robot System ..................................................... 605
Seiji Hata

WE06: MOBILE ROBOTS AND NAVIGATION (II)

WE06-1 Representation of the Results from Rao-Blackwellized Particle Filtering for SLAM ........................................... 611
Nosan Kwak, Beom-Hee Lee and Kazuhito Yokoi

WE06-2 Stable Monocular SLAM with Indistinguishable Features on Estimated Ceiling Plane Using Upward Camera .................................................................................................................. 617
Seo-Yeon Hwang and Jae-Bok Song

WE06-3 Mobile Robot Global Localization Using Particle Filters .................................................................................. 623
Guanghui Cen, Nobuto Matsuhira, Junko Hirokawa, Hideki Ogawa and Ichiro Hagiwara

WE06-4 Robust Near Optimal Sub-Motions for Differentially-Driven Mobile Robots .................................................. N/A
Mohammad Hassan Behroozi, Khalil Alipour, Behrooz Mashhadi and Samaneh Arabi
WE06-5 Connectivity of Collaborative Robots in Partially Observable Domains ....................................................... N/A
Suranga Hettiarachchi, Paul Maxim, William Spears and Diana Spears

WE06-6 Distributed Moving Algorithm of Swarm Robots to Enclose an Invader ...................................................... 627
Heejae Lee and Kwee-Bo Sim

WE07:OS030 NAVIGATION THEORY AND APPLICATIONS

WE07-1 Simulation Results of Ranging Performance in Two-Ray Multipath Model .................................................. 632
Ik-Seon Kang, Chan Gook Park and Jinik Kim

WE07-2 Hybrid Extended Kalman Filter-Based Localization with a Highly Accurate Odometry Model of a Mobile Robot .......................................................... 636
Cong Tran Huu

VOLUME 2

WE07-3 Optical Communication Method Using CCR .......................................................... 642
Gong Bo Moon, Chan Gook Park and Jang Gyu Lee

WE07-4 Development of Prototype Reference Station and Integrity Monitors (RSIM) for Maritime Application ............... 647
Jongsun Ahn, Kyungho Yoo, Deuk Jae Cho, Sang Hyun Park, Taesam Kang, Sangkyung Sung and Young Jae Lee

WE07-5 Design of Software-Based Multi-Channel GNSS IF Signal Generator ................................................ 652
Soon Lim, Deok Won Lim, MeiLin Liu, Seung Wook Moon, Chansik Park and Sang Jeong Lee

WE07-6 Trajectory Optimization by Cooperative Maneuver with Multiple Sensors .................................................. 657
Wonsuk Lee and Hyochoong Bang

WE08: OS037 ADVANCED CONTROL THEORY WITH APPLICATION TO MECHATRONIC ELECTRONIC SYSTEMS

WE08-1 A General Actuator Array Amplifier Design Using MIMO Optimal Feedback ........................................ 663
Keng Yuan Chen and Jwu Sheng Hu

WE08-2 A Novel High Precision Electromagnetic Flexure-Suspended Positioning Stage with an Eddy Current Damper .......................................................... 669
Chih-Hsien Lin, Shao-Kung Hung, Mei-Yung Chen, Shan-Tsung Li and Li-Chen Fu

WE08-3 Passivity, Global Stabilization and Disturbance Attenuation of Weekly Minimum-Phase Nonlinear Uncertain Systems with Applications to Mechatronic Systems ......................................................... 675
Ching-Chih Tsai and Liao-Lang Wu

WE08-4 Design and Control of Tapping Mode Atomic Force Microscope in Liquid Utilizing Optical Pickup System ........................................................................ 681
Wan-Lin Hu, Shao-Kung Hung and Li-Chen Fu

WE08-5 SOPC Based Weight Lifting Control Design for Small-Sized Humanoid Robot ........................................ 687
Tzuu-Hseng S. Li, Chia-Ling Hsu, Chun-Yang Hu, Yu-Tsai Su, Ming-Feng Lu and Shao-Hsien Liu

WE08-6 Design of the Multiple-Rate Robust Controller for Wireless Networked Control Systems .................................................. 692
Pau-Lo Hsu and Chien-Liang Lai
WE09: OS029 ROBOT SENSING AND SENSOR

WE09-1 Real-Time Control Strategy for EMG-Drive Meal Assistance Robot- My Spoon...........................................698
Xiu Zhang, Xingyu Wang, Bei Wang, Takenao Sugi and Masatoshi Nakamura

WE09-2 A Discontinuous Control of VTOL Aerial Robots with Four Rotors Through a Chained Form Transformation.............................................................702
Keigo Watanabe, Kensaku Okamura, Kouki Tanaka and Kiyotaka Izumi

WE09-3 Voice Control of a Robotic Forceps Using Hierarchical Instructions .................................................................708
Kiyotaka Izumi, Shinichi Ishii and Keigo Watanabe

WE09-4 Mean-Shift Tracker with Face-Adjusted Model..............................................................................................................714
Jeehyun Choe, Ju-Jang Lee and Joon-Hong Seok

WE09-5 Abandoned Object Position Prediction Based on Mobile Robot..................................................................................718
SoungMin Im and Ju-Jang Lee

WE10: OS036 COMPONENT TECHNOLOGY FOR INTELLIGENT MOBILE ROBOTS

WE10-1 Network Module Design Based on Photonic-EtherCAT for Robot Drive.................................................................722
Youngchul Bae, Yongseon Moon, Nak Yong Ko and Eunju Kim

WE10-2 Real Time Path Planning Using Trapezoidal Acceleration Profile for Omnidirectional Mobile Robot ....................................................728
Kyung Seok Byun and Hongxia Zhang

WE10-3 Ubiquitous Robotic Companion Systems Implemented with Standard Tools for Integration..................................................732
Nak Yong Ko, Youngseon Moon, Dong Jin Seo, Youngchul Bae and Gwang Jin Kim

WE10-4 Automatic Driving of Robotic Vehicle Using Magnetic Position Sensor ...............................................................................737
Young-Jae Ryoo

WEP: POSTER SESSION (I)

WEP-1 Real-Time Collision Avoidance Algorithm for Unmanned Ground Vehicles......................................................741
Tokson Choe, Jin Wook Huh, Jeong Sook Chae and Yong Woon Park

WEP-2 Development of Auto Measuring System for Shock Absorbing Performance Test of Turf Ground ..................................................745
Seongguk Oh and MyungJin Chung

WEP-3 Design and Implementation of Beacon Based Wireless Sensor Network for Real-Time Monitoring Systems...............................................................749
Young Duk Kim

WEP-4 Analysis and Design of an Intrusion Tolerance Node for Application in Traffic Shaping......................................................755
Nam-Kyun Baik, Hyeon-Mee Park, Won-Tae Sim and Nam-Hi Kang

WEP-5 Establishment of a Security System Using Aspect Oriented Programming ........................................761
Taeho Kim and Hongchul Lee

WEP-6 A Research on Renovation of GOP Guard by Applied RFID...................................................................................765
Youngsoo Jang and Hongchul Lee

WEP-44 A Robust ImageTracker Based on Phase Correlation and Fourier-Mallin Transform .................................908
Sang-hun Jin and Gwang-sik Koh

WEP-45 Application of RBF Neural Network in Fault Diagnosis of FOG SINS ......................................................912
Wu Lei, Sun Rong-ping and Cheng Jian-hua

TA01: CONTROL APPLICATIONS TO AUTOMOTIVE SYSTEMS (IV)

TA01-1 Priority-Based Scheduling of Dynamic Segment in FlexRay Network .........................................................916
Kwangho Jung, Moogeun Song, Dongik Lee and Sungho Jin

TA01-2 A Comparative Study of Fuzzy Logic-Based Control Strategies for a Parallel Mild Hybrid Electric Vehicle
Choon Young You, Won-Yong Park, Gyu-Min Jeong, Chanwoo Moon and Hyun-Sik Ahn

TA01-3 Hybrid Planning and Hierarchical Optimization of Mechatronic Systems ...............................................927
Eckehard Muench, Philipp Adelt, Martin Krueger, Bernd Kleinjohann and Ansgar Traechtler

TA01-4 Design of Electrostatic Suspension System Based on Delay Controller ...............................................935
Le The Truyen and Jong Up Jeon

TA02: FAULT DIAGNOSIS

TA02-1 Evaluation of Selection Method for Appropriate Inspection Points Using Diversity and Consistency .................941
Yosuke Takahashi, Shigueyuki Tateno and Hisayoshi Matsuyama

TA02-2 Expansion of Simulator of Pressure Control System for Air-Conditioning System ....................................946
Yu Fukahara, Shigueyuki Tateno, Hisayoshi Matsuyama, Nobuhiro Tanaka and Takayuki Miyake

TA02-3 A Neural Network Fault Diagnosis Method Applied for Faults in Intake System of a Spark Ignition Engine Using Normalized Process Variables .................................................N/A
Reza Chini, Mohammadhassan Behroozi, Amirhossein Shamekh and Ehsan Samadani

TA02-4 State Estimation Using Qualitative State Observer ..................................................................................N/A
Sobhi Baniardalani, Javad Askari and Jun Lunze

TA02-5 Fault Diagnosis System Based on Smart Bearing ..................................................................................951
Yimin Shao

TA02-6 Fatigue Life Prediction of Rear Axle Using Time Series Model ..............................................................957
Yimin Shao
TA03: NAVIGATION ALGORITHM AND APPLICATIONS

TA03-1 The Development of Modularized Post Processing GPS Software Receiving Platform ................................................................. 961
Ghangho Kim, Hyoungmin So, Sanghooon Jeon, Changdon Kee, Young Su Cho and Wansik Choi

TA03-2 Correction Error Generation Algorithm for Differential Positioning Performance Analysis of Navigation Equipments ......................................................... 966
Jin Kyu Choi, Sang Hyun Park, Deuk Jae Cho and Ki Yeol Seo

TA03-3 Vision-Based Global Localization Based on a Hybrid Map Representation ................................................................. 971
Juhong Park, Soohwan Kim, Nakju Doh and Sung-Kee Park

TA03-4 Quaternions Based Orbit and Attitude Model for Low Earth Orbiters ......................................................... N/A
Rudy Cepeda and Luis Prieto

TA03-5 Topological Map Building and Exploration Based on Concave Nodes ................................................................. 976
Howon Cheong, Soonyong Park and Sung-Kee Park

TA03-6 Single Star Identification and Attitude Determination Using Predictive Centroiding Scheme in Tracking Mode ................................................................. 982
Masood Ur Rehman

TA04: ADAPTIVE CONTROL AND ESTIMATION

TA04-1 The Feasibility Study of Noise Disturbance in STW Process ................................................................. 986
Vittaya Tipsuwanporn and Arjin Numsonran

TA04-2 Estimating the Fractional Order of Orthogonal Rational Functions Used in the Identification ................................................................. 991
Mohammad Haeri, Mohammad Saleh Tavazoei, Narges Nazari and Esmaeil Alibeiki

TA04-3 Gimbals Control with the Camera for Aerial Photography in RC Helicopter ................................................................. 996
Taki Shiino, Kazuo Kawada, Yamamoto Toru, Manabu Komichi and Takefumi Nishioka

TA04-4 A Hybrid Real-Time Control Using Model Reference Adaptive System Designed by Coefficient Diagram Method ................................................................. N/A
Omar Ocal and Atilla Bir

TA04-5 Disturbance Attenuation Type Distributed Control for Identical Decoupled Linear Systems ................................................................. 1001
Jun Araki and Kenko Uchida

TA05: HUMANOID ROBOT

TA05-1 A Feedback Control for a Feel Regeneration System with Linear Slider ................................................................. 1007
Yusuke Nakagawa and Ryuichi Oguro

TA05-2 Development of KNU Hand with Infrared LED-Based Tactile Fingertip Sensor ................................................................. 1011
Dong-Hyun Jeong, Jun-Uk Chu and Yun-Jung Lee

TA05-3 Biologically Inspired Controller for Biped Robot Gait Based on Functional Model of Human Locomotion System ................................................................. N/A
Hooman Homayouni, Fariba Bahrani and Caro Lucas

TA05-4 Development of Motion-Maker for an Android ................................................................. 1017
Seulgi Lee, Byung-Rok So and Ho-Gil Lee
TA05-5 Motion Planning of Biped Robot with Quad Roller Skates ............................................................... 102
   Seong-Ho Jo, Jun-Uk Chu and Yun-Jung Lee

TA05-6 Development of a Humanoid Walking Command System Using a Wireless Haptic Controller ............................................................... 1027
   Jong-Wook Kim, Taegyu Kim and EunSu Kim

**TA06: PROCESS CONTROL AND MONITORING**

TA06-1 A New Method for Detection Discrete-Trace Transition Systems of Hybrid Systems ............................................................... N/A
   Sobhi Baniardalani, Javad Askari and Jan Lunze

TA06-2 Switching Control of State-Dependent Switched Systems under Consistent Perturbation ............................................................... N/A
   Fatemeh Tahersima, Soroush Afkhami and Mohammad Javad Yazdanpanah

TA06-3 Modeling and Control of pH Neutralization Using Neural Network Predictive Controller ............................................................... 1033
   Subaila Badarol Hisham and Mohamed Gaberalla Mohamed KhairElarafi

TA06-4 Analysis of Probe Current in Scanning Electron Microscopy ............................................................... 1037
   Sun Jong Lim and Chan Hong Lee

TA06-5 Improving Performance of PID Controller Using Artificial Neural Network for Disturbance Rejection of High Pressure Steam Temperature Control in Industrial Boiler ............................................................... 1041
   Abdullah Nur Aziz

**TA07:OS035 MECHATRONICS AND APPLICATIONS**

TA07-1 New Lane Detection Algorithm for Autonomous Vehicles Using Computer Vision ............................................................... 1045
   Sung Hyun Han, Truong Quoc Bao and Byong Ryong Lee

TA07-2 Parameter Optimization for Fish Robot's Smooth Gaiting Using Hill-Climbing Genetic Algorithm ............................................................... 1051
   Sung Hyun Han, Tuong Quan Vo and Byong Ryong Lee

TA07-3 Design and Control of Energy Efficient Heteropolar Magnetic Bearings ............................................................... 1057
   Sung Hyun Han and Uhn Joo Na

TA07-4 Large Free Form Measurement Using Slit Beam ............................................................... 1061
   Sung Hyun Han and Byoungchang Kim

TA07-5 Robust Self-organization for Swarm Robots ............................................................... 1065
   Sung Hyun Han and Dong Hun Kim

**TA08: OS018 ADVANCED SYSTEM DESIGN THEORY AND APPLICATIONS**

TA08-1 High Gain Adaptive Output Feedback Control of Nonlinear Systems with Time-Varying Uncertainties in Control Input Term ............................................................... 1071
   Ryuji Michino and Ikuro Mizumoto

TA08-2 Feedback Stabilization of a Class of Time-Delay Systems with Discontinuity: a Functional Differential Inclusion-Based Approach ............................................................... 1077
   Jiangyan Zhang and Tielong Shen
TA08-3 Adaptive Collaborative Compensator Design Method for Human-Machine System
Hirofumi Ohtsuka, Koki Shibasato and Shigeyasu Kawaji

TA08-4 Recursive Sample-Entropy Method and its Application for Complexity Observation of Earth Current
Shohei Shimizu, Koichi Sagisaki and Hiromitsu Ohmori

TA08-5 Modeling and Balancing Control for Torque Generation in Combustion Event Scale for Multi-Cylinder SI Engines
Po Li, Tielong Shen, Kaipei Liu, Junichi Kako and Shozo Yoshida

TA09: OS001 IMAGE PROCESSING AND PATTERN RECOGNITION (IPPR)

TA09-1 Extraction of Multi Organs by use of Level Set Method from the CT Images
Masafumi Komatsu, Hyoungseop Kim, Joo Kooi Tan, Seiji Ishikawa and Akiyoshi Yamamoto

TA09-2 Face Direction Estimation Based on Eigen Space Technique
Jun Okubo, Budi Sugandi, Hyoungseop Kim, Joo Kooi Tan and Seiji Ishikawa

TA09-3 Optimal Registration Method Based on ICP Algorithm from Head CT and MR Image Sets
Hyoungseop Kim, Joo Kooi Tan, Seiji Ishikawa, Akiyoshi Yamamoto and Kouhei Harada

TA09-4 Development of the MI-Viewer KIT for Medical Image Viewer
Tatsuki Kizuka, Hyoungseop Kim, Joo Kooi Tan, Seiji Ishikawa and Akiyoshi Yamamoto

TA09-5 Detection of Blood Vessels on CTA Images of the Legs
Keita Kozono, Akiyoshi Yamamoto, Yoshinori Itai, Hyoungseop Kim, Joo Kooi Tan and Seiji Ishikawa

TA10: OS028 HAPTICS

TA10-1 Two-Stage Articulated Hand Interaction for Virtual Assembly Simulation
Yongwan Kim, Wookho Son and Jinah Park

TA10-2 Two-Channel Controller for Macro-Micro Telemanipulation of Soft Tissues
Hyoung Il Son and Doo Yong Lee

TA10-3 Design and Control of Omni-Directional Mobile Robot for Mobile Haptic Interface
KyungLyong Han, Ohkyu Choi, Jin S. Lee, Seungmoon Choi, In Lee and Inwook Hwang

TA10-4 Passivity Analysis of a 1-DOF Haptic System with Consideration of Human Arm Impedance
Hyun Soo Woo and Doo Yong Lee

TA10-5 Applications of A Miniature Pin-Array Tactile Module for a Mobile Device
Tae Heon Yang, Sang-Youn Kim and Dong-Soo Kwon

TAP: POSTER SESSION (II)

TAP-1 Implementation of Edutainment Contents for Touch-Face System
Dae Hyeon Song, Jae Wan Park and Chil Woo Lee

TAP-2 Interactive Level of Detail Control for Film Quality Crowd Animation
Sung June Chang
TAP-3 Design and Realization of Intelligent Question Answering System Based on Ontology
Xiaobo Wang, Wei Cui and Weicun Zhang

TAP-4 A Selective Multilevel Successive Elimination Algorithm for Block Matching Motion Estimation
Sangwoo Han and Sangeun Han

TAP-5 A Miniaturized Nano-Motion Stage Driven by Piezo Stacks
Kee-Bong Choi, Jae Jong Lee and Gee Hong Kim

TAP-6 Hybrid Modeling of the Non-inverting Buck-Boost DC-DC Converter
Mahmood Mirzaei and Ali A. Afzalian

TAP-7 Explicit Model Predictive Control of the Non-Inverting Buck Boost DC-DC Converter
Mahmood Mirzaei and Ali A. Afzalian

TAP-8 Solar Powered EL Traffic Police Vest
Khanchai Tunlasakun and Panya Makasorn

TAP-9 Artificial Intelligent Control System for Maximum Power Point Tracking of Photovoltaic
Dong Hwa Chung, Jung Sik Choi, Do Yeon Kim, Ki Tae Park and Jung Hoon Choi

TAP-10 A Study for Improvement Performance of Electric Brake for Electric Train
Jeeho Lee, Hyeongcheol Lee and Jaeho kwak

TAP-11 Estimation and Adaptive Control of a Fed-batch Bioprocess
Dan Selisteau, Emil Petre, Constantin Marin and Dorin Sendrescu

TAP-12 Neural Networks Based Adaptive Control for a Class of Time Varying Nonlinear Processes
Emil Petre, Dan Selisteau and Dorin Sendrescu

TAP-13 Setting Procedure of a Robust Torsional Compensation Scheme Using a Shaft Angle Control Loop
Ricardo Leon, Guillermo Ramirez and Anibal Valenzuela

TAP-14 Hybrid Robust Controller Design for a Two Mass System with Disturbance Compensation
Kwang Ho Yoon, Jong kwang lee, Byung-Suk Park, Ji-Sup Yoon and Ki-Ho Kim

TAP-15 Decentralized Adaptive Control for Interconnected Strict-Feedback Systems With Unknown Time Delays
Sung Jin Yoo and Jin Bae Park

TAP-16 The Stability of the Adaptive Two-stage Extended Kalman Filter
Kwang-Hoon Kim, Gyu-In Jee and Jong-Hwa Song

TAP-17 Finite Memory Generalized Predictive Controls for Discrete-Time State Space Models
Jung Hun Park, Soo Hee Han and Wook Hyun Kwon

TAP-18 Model Reference Adaptive Control Using Neural Networks for Synchronization of Discrete-Time Chaotic Systems
Jaeho Baek and Jong Yo Choi

TAP-19 Sensorless Neural Approach for Speed Estimation in Induction Motors
Ivan Silva and Alessandro Goedtel

TAP-20 Measurement of delay time in Communication Channels by Anfis
Seyed mohammad amir Hosseinipanah
TAP-21 Genetically Optimized Linguistic Models
Keun-Chang Kwak

TAP-22 An Incremental Adaptive Neuro-Fuzzy Networks
Keun-Chang Kwak

TAP-23 Nonlinear Hydraulic System Control Using Coefficient Diagram Method
Seung Cheol Kim, Shin Chool Kang, Yeon Gyu Choo, Yong Sung Cho, Jae Hyung Park and Kyu Han Bae

TAP-24 Guaranteed cost Control for a Class of Neutral Systems with Uncertain Delays
Min Kook Song, Jin Bae Park and Young Hoon Joo

TAP-25 DSP-Based Fuzzy Speed Controller of Three-Phase Induction Motor with V/f Control Strategy
Ivan Silva, Marcelo Suetake and Alessandro Goedtel

TAP-26 Stability Analysis of Varying The Range of Fuzzy Variables of Consequence Membership Function
Kyoung-Woong Yi and Han Soo Choi

TAP-27 Development of Driving Motor System for Small Electric Vehicle
Myung Jin Chung and Jangsung Chun

TAP-28 Design of Active Suspension System with Fuzzy Control
Yanghui Nan

TAP-29 Longitudinal Control of Bimodal-tram Using Sliding Mode Control
Yeun-Sub Byun, Min-Soo Kim, Jai-Kyun Mok and Young-Chol Kim

TAP-30 A Study on Train Management System Characteristic in Korea Tilting Train
Su-Gil Lee

TAP-31 The Study of Tilting System Control of Korea Tilting Train
Su-Gil Lee, Young-Jae Han, Seong-Ho Han and Young-Soo Song

TAP-32 Implementation of AUTOSAR I/O Driver Modules for a SSPS System
Gwangmin Park, Daehyun Kum, Sung Ho Jin and Wooyoung Jung

TAP-33 The Sensorless Safety Power Window Control System in Automotive Applications
Jung Hoon Park, Ga Hyung Choi, Tae Sung Yoon and Jin Bae Park

TAP-34 The Positioning System Based on IEEE 802.15.4a PHY and MAC Protocol for Low Rate WPAN
Cheolhyo Lee and Jae-Young Kim

TAP-35 A Systematic Approach to Apply the Simulation Modeling and Analysis for a Flexible Manufacturing System
In Sup Um and Hong Chul Lee

TAP-36 Performance Test of Gas By-Pass Type Thermal Error Controller
Hankil Yeom and Seung Woo Lee

TAP-37 Development of Automatic Process Control System with Simulation in PECVD System
Youn Jin Kim

TAP-38 The Integrated Monitoring and Control System for the Combined Thermal Power Plant
Bongkuk Lee and Yonghak Shin

TAP-39 Printing Robot System for Labeling on the Moving Steel Plate
SinWook Ryu, SeungChul Back, SeongJun Bae, DongHun Lee, DooKyoung Park and JongGi Ahn
TAP-40 Skew Control of a Container Crane .................................................................................. 1276
Hieu Ngo Quang, Keum-Shik Hong, Kyeong Han Kim, Yong Jeong Shin and Sang-Hei Choi

VOLUME 3

TAP-41 Factory test for Development of Energy Storage System .................................................. 1281
Hanmin Lee, Sechhan Oh, Changmu Lee and Gildong Kim

TAP-42 PLDs Implementation of Islanding Detection for Grid Connected Inverter ......................... 1285
Khanchai Tunlasakun, Krissanapong Kirtikara, Sirichai Thepa and Veerapol Monyakul

TAP-43 A Method for the Development of Value-added Service Business Model and its System in Consideration of Korea Power Market ........................................................................ N/A
Won Chul Yang, Jae Hee Kim, Sang Soo Kim, SangJin Kim, SeongWoo Nam and JinChul Kim

TAP-44 Development of In-Wheel Motor System Using Blushless DC Motor of Hall Sensor Type ................................................................................................................................. 1289
MyungJin Chung

TAP-45 An Adaptive Pole Placement Controller on STATCOM with Genetic Algorithm to Improvement Power System Transient Stability ........................................................................ N/A
Mohammad Bayati Poudeh, Saeid Eshtehardiha and Mohamad reza Moradiyan

TAP-46 Propulsion System Characteristics of TTX(Tilting Train eXpress) ........................................ 1293
Young Jae Han, Su-Gil Lee, Hysung-Woo Lee and Seong-Ho Han

TAP-47 Measurement System of TTX(Tilting Train eXpress) Network ............................................. 1297
Young Jae Han, Su-Gil Lee, Chang-Young Lee and Seong-Ho Han

TP01: CONTROL APPLICATIONS TO COMMUNICATION SYSTEMS (I)

TP01-1 Multiuser Generalized Detector for Uniformly Quantized Synchronous CDMA Signals in Wireless Sensor Networks with Additive White Gaussian Noise Channels ........................................ 1301
Vyacheslav Tuzlukov

TP01-2 Adaptive Equalization for DS-CDMA Multi-User Communication System Using Laguerre Filters ...................................................................................................................... 1307
Tippakon Somkur and Chawalit Benjangkaprasert

TP01-3 Wideband Performance Comparison of Double-Element Microstrip-Fed Slot Antennas Based on Simulated Results ......................................................................................... N/A
Pavita Wiriyacosol, Chawalit Benjangkaprasert, Noppin Anantrasirichai and Toshio Wakabayashi

TP01-4 A Proposal of Pictures Sharing Network Using Multicast with NAK ..................................... 1311
Wataru Uemura

TP01-5 A 3.5 GHz WiMAX Power Amplifier Using Si-LDMOS ................................................................................................................................. 1315
Paitoon Rakluea and Jintana Nakasuwon

TP01-6 Active Notch Uniformly Distributed RC Circuit and Their Application .................................. 1319
Virote Pirajnanchai

TP02: SENSORS AND INSTRUMENTATION (I)

TP02-1 A Novel Touch Probe Triggered by Harmonic Generation .................................................... 1324
Hiroshi Mizumoto
TP02-2 A Simple Technique to Improve the Output Voltage of the CMOS Dickson Charge Pump Circuit
Nutchaya Kaewraungrit, Jirawath Parnklang and Sittisak Chaisotthe
N/A

TP02-3 Constant THD Class D Power Amplifier
Panapong Laohawarit, Jirawath Parnklang and Chaleampan Wangviwatana
N/A

TP02-4 Positive/Negative Floating Resistor Using OTAs
Wandee Petchmaneelumka, Vanchai Riewruja and Prasit Julsereeewong
1328

TP02-5 Simple VCO with Negative Voltage-Frequency Relation
Amphawan Julsereeewong, Sawai Pongswatd, Kitti Tiravesth, Hirofumi Sasaki and Yan Shi
1332

TP02-6 Detection and Classification of Pills Moving at Very High Speeds Using Bi-iV2 Vision System
Quyen T.T. Bui, Thuong Cat Pham and Keum-Shik Hong
1336

TP03: GUIDANCE AND NAVIGATION FUSION

TP03-1 AGV Parking System Using Artificial Visual Landmark
Jeehoon Park, YoungSu Park and Sang Woo Kim
1342

TP03-2 Prototype Design of Traffic Information Service-Broadcast Server Using the ADS-B Test-Bed
Jae-Hoon Song, Kyung-Ryoon Oh, Inkyu Kim, Injung Kim, Sang-Man Moon, Keun-Taek Kim and
Jang-Yeon Lee
1346

TP03-3 Vision Based Obstacle Detection for Wheeled Robots
Tilman Wekel, Olaf Kroll-Peters and Sahin Albayrack
1350

TP03-4 A Large Gain Variable range, Wide bandwidth Analog AGC Circuitry for a CMOS GPS Receiver
Dianwei Zhang
N/A

TP03-5 VTV: Real Time Obstacle Avoidance of Mobile Robots for Local Path Planning Using LMS
Kyung Woon Kwak
N/A

TP03-6 A Mitigation of Non-Line-of-Sight by TDOA Error Modeling
Jinik Kim, Jang Gyu Lee and Chan Gook Park
1356

TP04: SLIDING MODE CONTROL

TP04-1 Control of Uncertain Butterfly-Shaped Chaotic Systems: Sliding-Mode Approach
Sara Dadras, Hamidreza Memeni and Vahid Johari Majd
1361

TP04-2 Nonlinear Sliding Surfaces; Computing and Existence of Solution
Azad Ghaifari and Mohammad Javad Yazdanpanah
1365

TP04-3 The Ultimate Bounds of Equivalent Control Based Sliding-Mode Control Systems with Short Sampling Time
Kang-Bak Park, Moonho Son and Hum Young Park
1371

TP04-4 Adaptive Sliding Mode Control for Roll Motions of Ships
Elham Amini Boroujeni and Hamidreza Memeni
1377

TP04-5 A Sliding Mode Observer Approach to Chaos Synchronization
Abdolkarim Daryabor and Hamidreza Memeni
1381
TP05: HUMAN-FRIENDLY ROBOT

TP05-1 A Study on Agile Navigation System of Mess-Cleanup Robot
Youngkak Ma and Seung-woo Kim.................................1385

TP05-2 Hybrid Robotic Wheelchair with Photovoltaic Solar Cell and Fuel Cell
Yoshihiko Takahashi and Shogo Matsumo..........................1391

TP05-3 Fabrication of Simple Robot Face Regarding Experimental Results of Human
Facial Expressions
Yoshihiko Takahashi and Masanori Hatakeyama..........................1396

TP05-4 Robot Technology Component with UPnP Communication (RTU Component)
Maria Niken Mayangsari, Yong Moo Kwon, Sang Chul Ahn and Ju Young Park..........................1402

TP05-5 Design of a Servomanipulator with Tendon Transmission
Jong Kwang Lee, Changhwan Choi, Kwang Ho Youn, Byung Suk Park and Ji Sup Yoon..........................1408

TP05-6 Passivity Based Bilateral Control with Motion Scaling for Robotic Forceps
Teleoperation System with Time Delay
Yusuke Kamei and Chiharu Ishii........................................1412

TP06: PROCESS DESIGN AND OPTIMIZATION

TP06-1 Optimal Multi-Distributed Generation Placement by Adaptive Weight Particle
Swarm Optimization
Witoon Prommee and Weerakorn Ongsakul..........................1418

TP06-2 Particle Swarm Optimization and Genetic Algorithm Optimizing Linear
Quadratic Regulator Controller on DC-DC Converter
Saeed Eshtehardiha, Mohammad Bayati Poudeh, Sayed Ali Emami and Mohammad reza Moradiyan..........................N/A

TP06-3 Eigenstructure Assignment for Four-Wheel Anti-lock Braking System Model
Javad Mashayekhi Fard, Mohammad Ali Nekoui and Ali Khaki Sedigh..........................N/A

TP06-4 A GA-Based Comparative Study of DI Diesel Engine Emission and Performance
Using a Neural Network Model
Ehsan Samadani, Mohammadhassan Behroozi, Amirhossein Shamekh and Reza Chini..........................N/A

TP06-5 Neural Network Based Approach for Designing Automotive Devices Using SMD
LED
Ivan Silva and Antonio Ortega........................................N/A

TP07: OS033 MECHATRONICS SYSTEM CONTROL

TP07-1 An LMI (Linear Matrix Inequality) Approach to Initial Value Compensation
Tae-Yong Doh and Jung Rae Ryoo.................................1424

TP07-2 Track Jump Scheme without Controller Switching in Optical Disc Drives
Jung Rae Ryoo and Tae-Yong Doh.................................1428

TP07-3 Control of Unmanned Container Transporters and Management System
Development
Kil Soo Lee..................................................N/A

TP07-4 Reference Compensation Technique of a Fuzzy Controlled Inverted Pendulum
System for Control Education
GeumHyeong Lee and Seul Jung.................................1432
TP07-5 Swing-up Fuzzy Control of an Inverted Pendulum System for Control Education with an Experimental Kit .......................... 1437
Jaekook Ahn and Seul Jung

TP08: OS008 STEELMAKING PROCESS: INSTRUMENTATION, CONTROL, AND SYSTEMS (I)

TP08-1 [Invited Paper] An Automatic Coating Weight Control for Continuous Galvanizing Line ................................................................. 1443
Yeon Tae Kim

TP08-2 Robust Optical Measurement of Water Vapor in Steel Making Process .................. 1449
haesung Park, youngjean Jung, kyoungsik Kim, jinsu Bae, jonghak Lee and hyoungkuk Park

TP08-3 Detection of Line Defects in Steel Billets Using Undecimated Wavelet Transform ............ 1453
Jong Pil Yun, SungHoo Choi, Young-ju Jeon, Doo-chul Choi and Sang Woo Kim

TP08-4 Development of Defect Detection Algorithm in Cold Rolling .................................. 1457
Sung Wook Yun, Nam Woong Kong, Gyumin Lee and PooGyeon Park

TP08-5 Temperature Monitoring System for Inductive Heater Oven ..................................... 1462
Won Chul Jung, Jongwoo You and Sangchul Won

TP09: OS002 MACHINE CISION APPLICATIONS

TP09-1 Vision-Based Autonomous Navigation Based on Motion Estimation ........................ 1466
Jungho Kim and In So Kweon

TP09-2 The Most Attentive Person Selection Using HMM with Multiple Sources .................. 1472
Prasertsak Tiawongsombat, Mun-Ho Jeong and Bum-Jae You

TP09-3 Method to Improve the Performance of Adaptive Boosting Algorithm by Using Probabilistic Classifier Model .................................. 1477
JeongHyun Kim, DongJoong Kang and JongHyun Park

TP09-4 Retrieval of Contextual Information on Korean Road Sign ..................................... 1481
Jong-Eun Ha, Jin-Bum Shim and Keun-Ho Choi

TP09-5 Product Search Framework with Categorization and Identification ........................ 1485
Chaehoon Park and In So Kweon

TP10: OS004 MODELING IN BIOLOGICAL SYSTEMS

TP10-1 Simulation of Human Locomotion Using a Musculoskeletal Model .......................... 1489
Sungho Jo and Taesoo Kim

TP10-2 Turning Mechanism of a Smooth Body by Amplitude and Period Control in Curvature ................................................................. 1493
Daeyeon Kim, Hyejin Hwang, Sungsu Park and Jennifer H. Shin

TP10-3 Biomechanical Characterization with Inverse FE Model Parameter Estimation: Macro and Micro Applications .................................. 1497
Bummo Ahn, Youngjin Kim and Jung Kim

TP10-4 Ornithopter Modeling for Flight Simulation .......................................................... 1501
Jae-Hung Han, Jin-Young Lee and Dae-Kwan Kim
TE01: CONTROL APPLICATIONS TO COMMUNICATION SYSTEMS (II)

TE01-1 CPW-Fed Slot Antenna with Inset U-Strip Tuning Stub for Wideband
Noppin Anantrasirichai, Boonchana Purahong, Pornthep Jearapradikul, Tuanjai Archevapanich and Ornlarp Sangaroong...1509

TE01-2 Inset Dual U-Strip Slot Antenna Fed by Microstrip Line for WLAN Applications
Noppin Anantrasirichai, Tuanjai Archevapanich, Jintana Nakasuwan, Boonchana Purahong and Ornlarp Sangaroong...1513

TE01-3 Communication of System Based on CAN for Acoustic Emission Diagnostic
Yong-Jae Eum and Min Cheol Lee...1517

TE01-4 Performance Analysis of Channel Effective for Wireless LAN and Wireless Ad-Hoc Network
auttapon pomsathit and Jintana Nakasuwan...1521

TE01-5 Performance Analysis of Space Diversity for OFDM Transmission
auttapon pomsathit and Aekkarat Lorphichian...1525

TE02: SENSORS AND INSTRUMENTATION (II)

TE02-1 A Novel RF Symmetric Double Sided Two Way Range Finder Based on Vernier Effect
Sang-il Ko, Jun-ya Takayama and Shinji Ohyama...1530

TE02-2 Analysis Of Coupling Effect In Holey Fiber
Faizullah Mahar, Abdul Basit and Basit Hassan Qureshi Makhdoom...N/A

TE02-3 Simple Square-Root Extractor Using Op Amps
Thawatchai Kamsri, Prasit Julsereewong and Vanchai Riewruja...1536

TE02-4 An Accurate CCII-Based Voltage Controlled Current Source
Anucha Kaewponsuk, Apinai Rerkratn, Thawatchai Kamsri and Vanchai Riewruja...1540

TE02-5 Electronically Tunable Gain Instrumentation Amplifier Using OTAs
Amphawan Julsereewong, Vanchai Riewruja and Nuttawat Tananchai...1544

TE02-6 An Optical Flow Sensor Realized by Retinal Resistive Network
Teruo Yamaguchi...1548

TE03: HAPTICS AND VR APPLICATION

TE03-1 Remote Control of Excavator with Designed Haptic Device
Dongnam Kim, KyeongWon Oh, Daehie Hong, Jong-Hyup Park and Suk-Hie Hong...1554

TE03-2 An Injecting Method of Physical Damping to Haptic Interfaces Based on FPGA
Beibei Han and Jee-Hwan Ryu...1559

TE03-3 Interactively Instructing a Guide Robot through a Network
Yosuke Hoshi, Yoshinori Kobayashi, Tomoki Kasuya, Masato Fueki and Yoshinori Kuno...1565
TE03-4 Collaborative Virtual Reality Game-Based Learning for Packaging Design
Ratchadawan Nimnual and Surachai Suksakulchai

TE04: LINEAR MATRIX INEQUALITY/PID

TE04-1 An LMI Approach to Exponential Stabilization of Uncertain Time-Delay Systems
Hyoun-Chul Choi, Hyungbo Shim and Jin Heon Seo

TE04-2 Stabilization of Linear Time-Varying Descriptor Systems: A Linear Matrix Differential Inequality Approach
Masaki Inoue, Teruyo Wada, Masao Ikeda and Eiho Uezato

TE04-3 On Position Control Using GMS-Model-Based Friction Compensation and Velocity Reduced-Order Observer for Servo-Systems - LMI Approach
Karim Khayati

TE04-4 Design of Discrete-Time Multivariable PID Controllers via LMI Approach
Jae Sik Lim and Young Il Lee

TE04-5 Design PID Controller for the Modified Quadruple-Tank Process Using Root Locus
Arjin Numsomran

TE05: VISUAL RECOGNITION OF HUMAN

TE05-1 Human Detection via Unsupervised Learning on Metric Space
Dhi Aurrahman and Chil-woo Lee

TE05-2 3D Face Recognition Based on Feature Detection Using Active Shape Models
Sang Jun Park and Dong won Shin

TE05-3 Identification of a Human Using Accorded Blobs on the Varied Region from Image Sequences by Multiple Cameras
Hyun Uk Chae, Suk-Ju Kang and Kang-Hyun Jo

TE05-4 Real-Time Face Detection Using AdaBoot Algorithm
Cheolhun Han and Kwee-Bo Sim

TE05-5 Human Activity Recognition: Various Paradigms
Md. Atiqur Rahman Ahad, J.K. Tan, H.S. Kim and S. Ishikawa

TE06: PROCESS AUTOMATION

TE06-1 Prediction of Porosity from Petrographic Data Using Soft Computing Method in Persian Gulf Gas Field
Amin Fakhri, Mohammadhassan Behroozi, Fatemeh Alimadadi and Hossein Sadati

TE06-2 Application of GD3 in Value Engineering for Plastic-Part Design
Sawai Pongswatd, Surachet Sirilappanich and Prapart Ukakimaparn

TE06-3 Wind Turbine Nacelle Movement Estimation Using FEM Model
Yoon-Su Nam and Tai-jun Yoon

TE06-4 Development of PSO-Based PID Tuning Method
Akihiro Oi, Tetsuro Matsui, Chikashi Nakazawa, Fujiwara Hiroe, Kouji Matsumoto, Hideyuki Nishida, Jun Ando and Masato Kawaura
TE06-5 Improving the Performance of Industrial Boiler Using Artificial Neural Network Modeling and Advanced Combustion Control ................................................................. 1626
  Abdullah Nur Aziz

TE07: OS015 BIOMECHATRONICS SYSTEMS AND ITS APPLICATION

TE07-1 Roles of Metal Layers and Polymer Matrix for Inducing IPMC Bending ................................................ 1632
  Hirohisa Tamagawa, Yusuke Onouchi and Minoru Sasaki

TE07-2 Feasibility of Low-Cost Microarray Printing with Inkjet Printer .......................................................... 1637
  Kyung-Tae Kim and Young-Woo Park

TE07-3 Fractional Order Impedance Control by Particle Swarm Optimization ..................................................... 1641
  Sehoon Oh and Yoichi Hori

TE07-4 Control of an Artificial-Hip-Joint Simulator to Evaluate Dislocation ...................................................... 1647
  Kazuo Kiguchi, Akira Yamashita, Makoto Sasaki, Masaru Ueno, Tsuneyuki Kobayashi, Masaaki Mawatari and Takao Hotokebuchi

TE07-5 Embedded Design of Position Based Impedance Force Control for Implementing Interaction between a Human and a ROBOKER ......................................................... 1651
  Hyo-Won Jeon, Jung-Seob Kim and Seul Jung

TE08: OS009 STEELMAKING PROCESS: INSTRUMENTATION, CONTROL, AND SYSTEMS (II)

TE08-1 Development of Standard Middleware for Software of Process Control System ................................. 1656
  Hwawon Hwang and Keeyoung Shin

TE08-2 Inner Defect Detection for a Thin Steel Strip ............................................................................................... 1662
  GooHwa Kim, Sang-Woo Choi, Jinsu Bae and Jung-Hwan Kim

TE08-3 AROMS: A Real-time Open Middleware System for Controlling Industrial Plant Systems ..................... 1666
  Kee-Young Shin and Hwa-Won Hwang

TE08-4 The Potential for Material Processing by Microwave Energy .................................................................. 1671
  Yeongseob Kueon

TE08-5 Ultrasonic Plate Wave Properties in Thin Steel Plates .............................................................................. 1677
  Sang-Woo Choi, GooHwa Kim, Jinsu Bae and Kwan-Tae Kim

TE09: OS007 MACHINE VISION

TE09-1 Morphological Segmentation of Markings for Inspection of IC Packages Under Complex Backgrounds ............................................................................................................. 1681
  Taek Guen Jeong, Hyonam Joo and Keun-Ho Rew

TE09-2 A Real-Time Eye Tracking System Using Fast Feature Matching Algorithm ........................................ 1686
  Young Shin Lim, Joon Seek Kim and Hyonam Joo

TE09-3 De-Blurring Algorithm for Fish Eye Image on CCTV with Nonlinear Equation .................................... 1691
  In Jeong Lee
OS023 ASSISTIVE ROBOTICS

TE10-1 Vision Based Pointing Device with Slight Body Movement ..............................................................1695
Motoki Hara, Yoshitaka Morito, Motohiro Tanaka, Shunji Moromugi, Takakazu Ishimatsu and Kazuya Miyamori

TE10-2 Design of Seat Mechanism for Multi-Posture-Controllable Wheelchair ........................................1699
Ju-hwan Bae and Inhyuk Moon

TE10-3 Computer Controlled Training System for Standing Up Motion ......................................................1703
Yoji Nishi, Tadasuke Matsumoto, Shunji Moromugi, Takakazu Ishimatsu, Taicho Sakamoto and Takanori Nagano

TE10-4 Smart Suit: Soft Power Suit with Semi-Active Assist Mechanism ..................................................1707
Takayuki Tanaka, Yuta Satoh, Shun’ichi Kaneko, Yoshihito Suzuki, Naohisa Sakamoto and Shuji Seki

TE10-5 Grip Force Modeling of a Tendon-Driven Prosthetic Hand ..............................................................1711
Sung-yoon Jung and Inhyuk Moon

TE10-6 Treatment Apparatus Employing Air-Bag Actuation for Sleep Apnea Syndrome ..........................1715
Daichi Sakamoto, Yusuke Tomimatsu, Shunji Moromugi, Takakazu Ishimatsu and Takao Ayuse

TEP: POSTER SESSION (III)

TEP-1 Speech Emotion Recognition Separately from Voiced and Unvoiced Sound for Emotional Interaction Robot ..............................................................1719
Eun Ho Kim, Kyung Hak Hyun, Soo Hyun Kim and Yoon Keun Kwak

TEP-2 Multi-Dimensional Emotional Engine with Personality Using Intelligent Service Robot for Children ..............................................................1725
Ho Seok Ahn, Young Min Baek, Jin Hee Na and Jin Young Choi

TEP-3 Mechanism and Control of Biped Walking Robot with 3 DOF Waist ..................................................1731
Kensuke Tajima and Hun-ok Lim

TEP-4 Development of Collision Force Suppression Mechanism ...............................................................1737
Masahiko Sunagawa and Hun-ok Lim

TEP-5 Implementation of Dialogue System for Intelligent Service Robots ..................................................1743
Changyoon Lee, You-Sung Cha and Tae-Yong Kuc

TEP-6 An Application System of Probabilistic Sound Source Localization .................................................1748
Seung Seob Yeom, Yoon Seob Lim, Hong Sick Kim, Jae Moon Lee, Jong Suk Choi and Mignon Park

TEP-7 Evaluation of Force Delays on the Operation of Haptic Sense ..........................................................1754
Manabu Ishihara

TEP-8 Generation of Space Grid Map by 3D Detection of Obstacle Distribution .........................................1759
Myoung-Jong Yoon, Gi-Young Jeong and Kee-Ho Yu

TEP-9 A New Robot Motion Authoring Method Using HTM .................................................................1763
Kwang-ho Seok and Yoon sang Kim

TEP-10 Development of Robot Mechanism for Inspection of Live-line Suspension Insulator String in 345kV Power Lines .........................................................1767
Joon-Young Park, Byung-Hak Cho and Jae-Kyung Lee

TEP-11 Establishment of Field Robot System for Observation of Power Plant Facilities .............................1771
JaeKyung Lee, JoonYoung Park, Byung-Hak Cho and ChangKi Jeong
TEP-12 Development of Omni-Directional Mobile Robots with Mecanum Wheels Assisting the Disabled in a Factory Environment ......................................................... 1775
Jung Won Kang, Bong Sung Kim and Myung Jin Chung

TEP-13 Increasing Localization Accuracies by Hybrid Maps and Scan Matching ........................................ 1781
Suhyeon Gim, Hyungrae Gim and Tae-Kyu Yang

TEP-14 Mobile Robot Navigation Using Circular Path Planning Algorithm ........................................ 1787
Sung Min Han and Kang Woong Lee

TEP-15 Development of Omnidirectional Electric Wheelchair with Zabuton Sensor ................................ 1792
Kenichi Iida, Hisao Yoshikawa, Taichi Mori and Tosho Hira

TEP-16 Force Reflecting Remote Robotic Mopping System ................................................................. 1796
Kiho Kim

TEP-17 A Robot Platform for Children and Its Action Control .............................................................. 1800
Sangseung Kang

TEP-18 CCP : Container for Concurrency Processing of Robotics Component ......................................... 1804
Sunhee Choe and Hong Seong Park

TEP-19 Design of Dual Arm Robot Manipulator Using Modular Actuators with CAN Communication Networks ........................................................................ 1808
Chanhun Park, Dong IL Park, Jin-Ho Kyung, Kyoungtaik Park and Doohyung Kim

TEP-20 Robot Application for Assembly Process of Engine Part ............................................................ 1812
KyoungTaik Park

TEP-21 Coarse-to-Fine Vision-Based Localization for Mobile Robots Using an Object and Spatial Layout-Based Hybrid Map ...................................................... 1816
Soonyong Park, Soohwan Kim and Sung-Kee Park

TEP-22 Complete Coverage Path Planning for Multi-Robots Employing Flow Networks ...................... 1822
Sang Hyun Nam, Iksang Shin, Soon-Geul Lee and Jae-Jun Kim

TEP-23 Fusion of Multiple Gait Features for Human Identification ....................................................... 1826
Sungjun Hong, Heesung Lee, Sung Je An and Euntai Kim

TEP-24 Efficient Classification Scheme Based on Hybrid Global and Local Properties of Feature ......................................................... 1831
Heesung Lee, Sungjun Hong, Euntai Kim and Sungje An

TEP-25 Intelligent Hybrid Hierarchical Architecture for Robust Object Recognition ......................... 1835
Jaehee Lim and Taeyong Kuc

TEP-26 Vision-Based Object Detection for Passenger's Safety in Railway Platform ......................... 1839
Sehchan Oh, Gildong Kim, Wootea Jeong and Youngtae Park

TEP-27 Bayesian Shape Recognition Using Principle Component Analysis and Modified Chain Codes ........................................................................... 1843
Chi Min Oh and Chi-Woo Lee

TEP-28 Reliable Feature Point Detection and Object Pose Estimation Using Photometric Quasi-Invariant SIFT ........................................................................ 1847
Jae-Han Park, Kyung-Wook Park, Seung-Ho Baeg and Moon-Hong Baeg

TEP-29 A Study on Wavelet-Based Edge Detection for Improved Stereo Matching .............................. 1853
Ji-Hye Jeon, Yoon-Gi Yang, Joong-Ki Paik and Chang-Su Lee

TEP-30 Face Detection Using Multi-Modal Features .............................................................................. 1857
Hyobin Lee, Sangyoun Lee, Seongwan Kim and Sooyeon Kim
TEP-31 Pointing Gesture-Based Unknown Object Extraction for Learning Objects with Robot
Hyung O Kim, Soohwan Kim and Sung Kee Park

TEP-32 Camera Calibration Method Under Poor Lighting Condition in Factories
JeongHyun Kim, DongJoong Kang and DaeGwang Kim

TEP-33 Detection of Local Plane Areas Based on Stereo Range Data for Safe Driving of Mobile Robot
Dong-Joong Kang, Sung-Jo Lim and In Mo Ahn

TEP-34 Modified Component-Labeling Algorithms Applied to Grayscale Images
Seung-Youn Lee, Dong-Min Kwak, Gi-Yeul Sung and Do-Jong Kim

TEP-35 Visual Servoing of 8-DOF Arm for Mobile Robot Platform
Kwang Hee Lee, Do-Eun Kim, Sang-Hwa Lee, Young-Ho Lee and Tae-Yong Kuc

TEP-36 Distance and Velocity Measurement of Moving Object Using Stereo Vision System
Min-Jeong Kang, Choong-Ho Lee, Jin-Hwan Kim and Uy-Youl Huh

TEP-37 Active Oxygen Detection Using Quartz Crystal Microbalance Method Under Inductively Coupled Oxygen Plasma
Hiroyuki Matsumoto

TEP-38 Recovering Device Drivers in Thread Context
Sangwoo Han and Sangeun Han

TEP-39 Simulation Design Method with Operator's Working Time
Jung-Ik Yoon, In-Sup Um and Hong-Chul Lee

TEP-40 Title: A Novel Scheduling Model for Pharmaceutical Industries Using Heuristic Techniques
Jiyong Kim, Hyerim Kim and Il Moon

TEP-41 Sloshing Analysis Using Ground Experimental Apparatus
Choong-Seok Oh, Byung-Chan Sun, Yong-Kyu Park and Woong-Rae Roh

TEP-42 Location-DB Construction of Access Points for Wireless Location
Seong Yun Cho, Byung Doo Kim and Young Su Cho

TEP-43 Acquisition and Tracking Schemes for a GPS L5 Receiver
Seong-Hyun Choi

TEP-44 Multiple Data Association and Tracking Using Millimeter Wave Radar
Seong Keun Park, Euntai Kim, Heejin Lee and Hogi Jung

VOLUME 4

TEP-45 Automation of the Flight Dynamics Operations for Low Earth Orbit Satellite Mission Control
Byoung-Sun Lee, Yoola Hwang and Hae-Yeon Kim

TEP-46 A Study on Position Detection of Rolling Stock
Young Jae Han, Chan-Su Park and Sang-Soo Kim

FA01: MANUFACTURING CONTROL & AUTOMATION

FA01-1 High-Rise Building Intelligent Elevator Based on Image Compression via VQ Analysis with Hall Call Destination and Fuzzy Ladder Control System
Songkran Kantawong and Tanasak Phanprasit
FA01-2 Deflection-Limiting Commands to Slew Flexible Systems with Velocity Limits
Yoon-Gyung Sung and William E. Singhose
1925

FA01-3 Prediction of Blast Furnace Operation Using On-line Bayesian Learning
Norio Kaneko, Shigetaka Sakamoto, Kenko Uchida, Harutoshi Ogai, Masahiro Ito and Shinroku Matsuzaki
1931

FA01-4 A Concept for Isles of Automation: Ubiquitous Robot Cell for Flexible Manufacturing
Mikko Sallinen, Tapio Heikkilä, Timo Salmi, Sauli Kivikunnas and Topi Pulkkinen
1937

FA01-5 Recessive Trait Crossover Genetic Algorithm Flight Control System Design
Amr Madkour
N/A

FA01-6 A New Type of Bolting Robot for Construction of Steel-Structures
Seokwon Lee, Hyundo Nam, Yongkwon Lee and Jonghyeon Park
1942

FA02: SIGNAL PROCESSING AND SENSOR FUSION (I)

FA02-1 Model Predictive Sensor Scheduling
Eriko Iwasa and Kenko Uchida
1947

FA02-2 The Application of Finite Element to Analyze the Accuracy for Radar System
Sawai Pongs watt and Nareerat Boonsung
1953

FA02-3 Biquad-Parametric Technique for Digital Filter Design Using Bilinear Pascal Matrix Operation
Sorawat Chivapreecha
1957

FA02-4 An IIR Digital Video Equalizer Design with the Bernstein Polynomial and the Generalized Bilinear Transformation for Gain Chrominance Distortion
Vanvisa Chutchavong, Ornlarp Sangaroon, Virote Pirajnanchai and Kanok Janchitrapongvej
1961

FA02-5 A Characteristic Analysis of the Laser Range Finder with Various Modulation Frequencies
Heesun Yoon, Jinpyo Hong, Huisung Kim and Kyihwan Park
1967

FA02-6 Fusion Predictors for Continuous-Time Linear Systems with Different Types of Observations
Haryong Song, Kyung min Lee and Vladimir Shin
1971

FA03: CONTEXT AND SPEECH RECOGNITION

FA03-1 Text-Independent Speaker Identification Using Hybrid Vector Quantization / Gaussian Mixture Models Pattern Classifier
Loh Mun Yee and Abdul Manan Ahmad
N/A

FA03-2 A Computer Base Tutor for the Deaf Students' Auditory and Speech Training System
Setthachai Chaisanit
N/A

FA03-3 Data Clustering Using Multi-Objective Hybrid Evolutionary Algorithm
Jin-Myung Won, Fakhreddine Karray and Sami Ullah
1977

FA03-4 Advanced Persian/Arabic Anti-SMS-Spam System by Using CAPTCHA
Mohammad Shirali-Shahreza
1983
FA03-5 Development of Context Aware System Based on Bayesian Network driven Context Reasoning Method and Ontology Context Modeling .................................1983
Kwang Eun Ko and Kwee-Bo Sim

FA04: NONLINEAR CONTOL (I) DISCRETE SYSTEMS/ CHAOS

FA04-1 Numerical Exact Discrete-Time-Model of Linear Time-Varying Systems .................................................................1988
Hiroaki Shiobara and Noriyuki Hori

FA04-2 Discrete Modeling of Patellar-Tendon-Reflexes As Logistic Phenomena .................................................................1993
Takashi nozawa, Noriyuki Hori and Naotaka Mamizuka

FA04-3 Simple Model Matching Control of Nonlinear Discrete Time Systems .................................................................1999
Yoshihiro Yamamoto

FA04-4 Generalized Synchronization of Non-Identical Chaotic Systems with Minimum Control Effort .................................................................2004
Mohammad Haeri and Esmaeil Alibeiki

FA04-5 Practical Control of Non-Friction Mechanism for Precision Positioning .................................................................2008
Chong Shin Horng and Sato Kajji

FA05: MOBILE ROBOT TECHNOLOGY

FA05-1 Floor-Types Identification Method for Wheel Robot Using Impedance Variation .................................................................2014
Eung Chang Lee, Hyun Do Choi, Soo Hyun Kim and Yoon Keun Kwak

FA05-2 Control and Coordination of a Group of Intelligent Service Mobile Robots in Indoor Assignments: Motivation and Preliminary Results .................................................................N/A
Hyo-Sung Ahn and Amit Ailon

FA05-3 Realization of Expressive Body Motion Using Leg-Wheel Hybrid Mobile Robot: KaMERo .................................................................2018
Nam Su Yuk and Dong-Soo Kwon

FA05-4 Autonomous Stair Climbing Algorithm for a Small Four-Tracked Robot .................................................................2024
Quy-Hung Vu, Byeong-Sang Kim and Jae-Bok Song

FA05-5 Module Robot Structure Design by FDNet 2361 .................................................................2029
Kenichi Tokuda and Koichi Osuka

FA05-6 Development of Mine Detection System for Mobile Robot System .................................................................2033
Seokhwan Kim, Seoung Park, Jeongyoeb Lee, Byunghak Han and Changhwan Choi

FA07:OS031 ROBOTICS AND APPLICATIONS (I)

FA07-1 Development of a New 6-DOF Parallel-Kinematic Motion Simulator .................................................................2038
Sung Hyun Han, Pham Van Bach Ngoc and Han Sung Kim

FA07-2 Development of OLP Based Automation Program For Cutting Process Improve of Shape .................................................................2042
Sung Hyun Han and Se Han Lee

FA07-3 A Study on Visual Feedback Control of Robot Arm .................................................................2047
Sung Hyun Han and Nguyen Huu Cong
FA07-4 A Study on Obstacle Avoidance of Mobile Robot
Sung Hyun Han and Van-Quyet Nguyen

FA07-5 A Study on Design of Three-Finger Hand System
Sung Hyun Han and Van-Quyet Nguyen

FA08: OS021 RT (ROBOT TECHNOLOGY) SYSTEM INTEGRATION

FA08-1 Distributed Actuation Module for Ubiquitous Robot
Kazutaka Takaki, Tetsuo Tomizawa, Tamio Tanikawa, Kohtaro Ohba and Makoto Mizukawa

FA08-2 Using GPS Outdoor Autonomous Driving System for Robot Development
Yutaka Erikawa, Yoshinobu Ando and Makoto Mizukawa

FA08-3 Sound Source Localization Experiment in Variety Real Environment for Intelligent Service Robots
Beom-Chul Park, Jae-Yeon Lee and Dae-Hwan Hwang

FA08-4 Face Image Registration Methods Using Normalized Cross Correlation
KyuDae Ban, Jaeyeon Lee, Dae Hwan Hwang and Yun-Koo Chung

FA08-5 Development of Mechatronics Educational Material Applying "Wiki"
Yuwa Eguchi, Yasuhide Kurokawa, Takaaki Ohta, Yoshinobu Ando and Makoto Mizukawa

FP01: CONTROL APPLICATIONS TO POWER SYSTEMS (I)

FP01-1 Modeling and State Feedback Controller for Current Source Inverter Based STATCOM
Ali Ajami

FP01-2 New Controller Design for Power System Stability Enhancement
Amin Khodabakhshian, Rahmatollah Hooshmand and Mohammad Esmaili

FP01-3 Simple Linear Models for Plasma Control in Tokamak Reactors
Aitor J. Garrido, Izaskun Garrido, Oscar Barambones, Patxi Alkorta and F. Javier Maseda

FP01-4 Implementation of a dSPACE DSP-Based State Feedback with State Observer Using Matlab/Simulink for a Speed Control of DC Motor System
Satean Tunyasrirut, Uthai Manwong and Sitchai Boonpiyathud

FP01-5 A Simple and Low Cost Control Strategy for Multilevel Shunt Active Filters
Ali Ajami and Majid Ghandchi

FP01-6 New Optimal Design of D-STATCOM Compensation to Improve Power Quality Indices in Distribution System
Amin Khodabakhshian and Rahmatollah Hooshmand

FP02: SIGNAL PROCESSING AND SENSOR FUSION (II)

FP02-1 Electromyogram Signal Processing by Using M-Transform
Hiroshi Harada, Hiroshi Kashiwagi, Hikaru Nishimura, Yoshihumi Ohbuchi and Teruo Yamaguchi

FP02-2 A Novel Algorithm for Adaptive IIR Notch Filter Based on Lattice Form Structure
Chawalit Benjangkaprasert, Tippakon Somkur and Kanok Janchitrapiangvej

FP02-3 Hybrid Algorithm for Adaptive IIR Notch Filter
Sarinporn Jorphochaudom, Chawalit Benjangkaprasert, Ornlarp Sangaroon and Kanok Janchitrapiangvej
FP02-4 Subspace-Based Semi-Blind Channel Estimation for SIMO-OFDM Systems by Using Antenna Diversity .................................................................2118
  Jin Goog Kim and Jong-Tae Lim

FP02-5 Window Length Selection in Linear Receding Horizon Filtering .................................................................2122
  Ju-hong Yoon, Du Yong Kim and Vladimir Shin

FP02-6 Image Processing by Median Filtering Algorithm in Holographic Data Storage System .................................................................N/A
  Jang Hyun Kim, Jin Bae Park and HyunSeok Yang

FP03: HUMAN ROBOT INTERACTION (I)

FP03-1 A Preliminary Research into Joint Angle Prediction of the Upper Limb Using Surface Electromyogram for a Cooperative Machine .................................................................2127
  Suncheol Kwon and Jung Kim

FP03-2 ERS and ERD Analysis During The Imaginary Movement of Arms .................................................................2131
  Hong Gi Yeom and Kwee-bo Sim

FP03-3 Study of Visual Assist Effect to Horizontal and Vertical Plane Hand Movement .................................................................2136
  Shahriman Abu Bakar

FP03-4 Construction of Integrated Simulator for Developing Head/Eye Tracking System .................................................................2140
  Jungho Kim, Daewoo Lee, Changook Park, Hyochoong Bang, Kyeum-rae Cho, Jonghun Kim, Sunyoung Cho, Younggil Kim and Kwangyul Baek

FP03-5 Estimation of Isometric Joint Torque from Muscle Activation and Length in Intrinsic Hand Muscle .................................................................2144
  Wonil Park, Haedong Lee and Jung Kim

FP04: NONLINEAR CONTROL (III)

FP04-1 Active Noise Control of a Volterra System with a Linear Acoustic Feedback Path .................................................................2149
  Sang-Won Nam and Jung-jae Lee

FP04-2 On Linearization of Riccati Differential Equations through Variable Transformations .................................................................2153
  Tsubasa Kittaka and Noriyuki Hori

FP04-3 Hybrid Controller for Swinging up and Stabilizing the Inverted Pendulum on Cart .................................................................2159
  Ekachai Asa, Taworn Benjanarasuth, Jongkol Ngamwiwit and Noriyuki Komine

FP04-4 Passivity-Based Structured Model Predictive Control with Guaranteed Stability .................................................................N/A
  Ghazal Montaseri, Mohammad Javad Yazdanpanah and Ali Khaki-Sedigh

FP04-5 Eigenvector Assignment Based Vibration Suppression Control for a Two Link Flexible Joint Robot Arm .................................................................2163
  HeeYoung Park and Sang-Hun Lee

FP04-6 Design of Piecewise Linear LQ Control for Linear Systems with Actuator Rate Saturations Using LMIs Optimization .................................................................2167
  Noriyuki Akasaka
FP05: REAL TIME IMAGING

FP05-1 Measurement of Optical Flow in Real-Time
Jun Hirai, Teruo Yamaguchi and Hiroshi Harada
2173

FP05-2 Hardware Design of Vector Code Correlation Method for High-Speed Template Matching
Masaki Yoshimura, Hideki Kawai, Taketoshi Iyota and Yongwoon Choi
2179

FP05-3 Biomimetic Robot-eye System Using the Winding type SMA Actuator
Jong-Moon Choi, Hyung-Min Son and Yun-Jung Lee
2183

FP05-4 Estimation of Rotation and Divergence from Optical Flow Constraint
Tomoya Kawakami, Teruo Yamaguchi and Hiroshi Harada
2188

FP05-5 Velocity Estimation of Multiple Objects Using Oculomotor System
Hideaki Takahashi, Teruo Yamaguchi and Hiroshi Harada
2193

FP06: OS025 SOFT COMPUTING TECHNIQUES AND THEIR INTELLIGENT UTILIZATION

FP06-1 Prediction of Golden Cross and Dead Cross by Artificial Neural Networks Could Contribute a Lot for Constructing an Intelligent Decision Support System for Dealing Stocks
Norio Baba and Kou Nin
2197

FP06-2 An Age Estimation System on the AIBO
Yuuki Nishie, Kohki Abiko, Hironobu Fukai, Yasue Mitsukura, Minoru Fukumi and Masahiro Tanaka
2201

FP06-3 The EEG Analysis Method for Obtaining the Feeling
Yohei Tomita, Shin-ichi Ito and Yasue Mitsukura
2205

FP06-4 The Music Analysis Method Based on Melody Analysis
Tsukasa Endo, Shin-ichi Ito, Yasue Mitsukura and Minoru Fukumi
2209

FP06-5 Identification of the Part of Soccer Court from Video Signal by Neural Networks
Masahiro Tanaka and Kenji Ishida
2213

FP07: OS032 ROBOTICS AND APPLICATIONS (II)

FP07-1 Adaptive Neural Fuzzy Control for SCARA Robot Friction Compensator
Sung Hyun Han, Hung Vu Minh and Uhn Joo Na
2219

FP07-2 Remote Control System of a 6 DOF Underwater Robot
Sung Hyun Han, Hung Vu Minh and Uhn Joo Na
2225

FP07-3 A Study on Robust Walking Technology of Humanoid Robots
Sung Hyun Han and Nguyen Huu Cong
2231

FP07-4 Real-Time Robust Control of Mobile Robot Using Ultrasonic Sensor
Sung Hyun Han and Van-Quyet Nguyen
2235

FP07-5 Real Time Adaptive Control of Robot Manipulator Based on Neural Network Compensator
Sung Hyun Han and Nguyen Huu Cong
2240
FP08:OS003 RECENT ADVANCES IN PROCESS SYSTEMS ENGINEERING (I)

FP08-1 Recovery of Lactic Acid by Reactive Dividing Wall Column .................................................................2246
Youngmin Cho, Bokyung Kim, Dongpil Kim and Myoungwan Han

FP08-2 Existing System Remodeling for a Fully Thermally Coupled Distillation Column ...............................2250
Young Han Kim and Moon Yong Lee

FP08-3 A Systematic Process Optimization Method for Advanced Environmental Process .................................2254
MinHan Kim and ChangKyoo Yoo

FP08-4 Real-time Multivariate Monitoring and Diagnosis of Air Pollutants in a Subway Station ..................................................2260
YoungSoo Kim, In-Won Kim, JoChun Kim and ChangKyoo Yoo

FP08-5 The Calibration Protocol for Parameter Estimation of Activated Sludge .................................................2266
WonYoung Lee, MinHan Kim and ChangKyoo Yoo

FP 09: OS024 FLUID POWER CONTROL

FP09-1 A Study on Force Control of Electric-Hydraulic Load Simulator Using an Online Tuning Quantitative Feedback Theory .....................................................................................................2272
Truong Dinh Quang, Ahn Kyoung Kwan and Yoon Jong Il

FP09-2 Hysteresis Modeling of Magneto-Rheological (MR) Fluid Damper by Online Self Tuning Fuzzy Control ....................................................................................................................2278
Ahn Kyoung Kwang, Mohammad Islam and Truong Dinh Quang

FP09-3 A Study on the Position Control of Hydraulic Cylinder Driven by Hydraulic Transformer Using Disturbance Observer ......................................................................................................2284
Ho Triet Hung and Ahn Kyoung Kwan

FP09-4 New Approach to Design MR Brake Using a Small Steel Roller as a Large Size Magnetic Particle ..........................................................................................................................2290
Tran Hai Nam and Ahn Kyoung Kwan

FP10-1 Motion Transfer Between Digital Creatures for Computer Animation .......................................................2295
Il-Kwon Jeong and Byoung Tae Choi

FP10-2 Distributed Incremental EM Algorithm for Density Estimation in Peer-to-Peer Networks ................................................................. N/A
Behrooz Safarinejadian, Mohammad Bagher Menhaj and Mehdi Karrari

FP10: MULTIMEDIA SYSTEMS

FP10-3 The Design and Implementation of Multiple Buffer Cache in PostgreSQL ..............................................2299
Yusuke Noguchi

FP10-4 Implementation and Improvement of TPM for PostgreSQL in Linux .....................................................2303
Liu Shenkun

FP10-5 Improvement of Parallel Processing Performance by Using Two Kinds of Huge Page .................................................................2307
Takafumi Fukunaga and Toshinori Sueyoshi
FE01: CONTROL APPLICATIONS TO POWER SYSTEMS (II)

FE01-1 Electrical Plug and Outlet for the DC Distribution System in Buildings..............................................2312
   Kittiphan Techakittiroj

FE01-2 Torque and Rotational Speed Estimation with Parameter Identification of Line-start Induction Motor for Motor Operated Valve..............................................................2316
   Akiko Takahashi and Ryuichi Oguro

FE01-3 Power Quality Enhancement in Power System with Electric Arc Furnaces by Shunt Active Power Filter Optimum Design ........................................................................2320
   Amin Khodabakhshian and Rahmatolah Hooshmand

FE01-4 A Particle-Swarm-Based Approach for Optimum Design of BELBIC Controller in AVR System..................................................................................................................2320
   Sima Valizadeh, Mohammad-Reza Jamali and Caro Lucas

FE01-5 Maximum Torque per Ampere Sensorless Control of Induction Motor Drive with DC Offset and Parameter Compensation.................................................................2326
   Masood Hajian, Jafar Soltani and G.R. Arab

FE01-6 Load Frequency Control of a Synchronous Generator Using a dSPACE DSP-Based State Feedback Controller..........................................................2332
   Yuttana Kumsuwan, Sitchai Boonpiyathud and Satean Tunyasrirut

FE02: INDUSTRIAL AUTOMATION

FE02-1 Design Method by Use of Control Similarity Principle applied for a Load Simulator of Electric-Motor Driven Injection Molding .................................................................2332
   Noriyuki Akasaka

FE02-2 Design and Implementation of a Linear Predictive Controller System.........................................................2339
   Maryam Amirabadi Farahani, Naser Asadi and Mahsa Alaei

FE02-3 Transformation Petri Nets Model to PLC Instruction List.........................................................................2345
   Viriya Krongratana, Suphun Gulpanich and Prapas Roengruen

FE02-4 Holonomic Automated Guided Vehicle Control Based on Adaptive Inverse ........................................2351
   Koichi Hidaka

FE02-5 IEC 61400-25 MMS Applications for Remote Supervisory Control at Wind Power Plant .................................................................2349
   Junghoon Lee, Minjae Seo, Gwansu Kim and Honghee Lee

FE02-6 Coordination Method in Design of Forming Operations of Hierarchical Solid Objects .................2354
   Kantstantsin Miatliuk, Andrzej Lukaszewicz and Franciszek Siemieniako

FE03: HUMAN ROBOT INTERACTION (II)

FE03-1 Three-Layered Hybrid Architecture for Emotional Reactive System ..................................................2358
   Jun-Young Jung, Dong-Wook Lee, Hyun-Sub Park and Ho-Gil Lee

FE03-2 Design of a Sound System to Increase Emotional Expression Impact in Human-Robot Interaction .................2362
   Berenger Bramas, Young-Min Kim and Dong-Soo Kwon
FE03-3 Intelligent and Active System for Human-Robot Interaction Based on Sound Source Localization
Jae Moon Lee, Jong Suk Choi, Yoon Seob Lim, Hong Sik Kim and Mignon Park

FE03-4 Development of a Portable Motor Vehicle for Personal Transportation
Hiroyuki Tamai and Hun-ok Lim

FE04: OS016 RECENT PROGRESS IN SENSORPHOTONICS

FE04-1 Recent Progress in Sensor Materials for Fluorescence Thermometry
Toru Katsumata

FE04-2 Optrode Sensor for Chemical and Physical Measurement
Hiroaki Aizawa, Hiroaki Ishizawa and Eiji Toba

FE04-3 Evaluation of Air Quality with Simple and Easy Chemical Sensors: Development of Porous Glass-Based Elements
Katsuyuki Izumi, Masahiro Utiyama and Yasuko Maruo

FE04-4 Sensing System for Inner Temperature of Combustion Gas by Using Infrared CT
Tadashi Ito, Kinnosuke Masuda and Takeshi Nakazawa

FE04-5 Non-Contact Water Content Measurement of Soil Based on Thermal Imaging
Chieko Nakayama

FE04-6 A Hybrid-Type Surface Temperature Sensor and its Application to the Development of Emissivity Compensated Radiation Thermometry
Atsushi Gogami and Tohru Iuchi

FE05: IMAGE RESTORATION

FE05-1 Supervised Training Database by Using SVD-Based Method for Building Recognition
Hoang-Hon Trinh, Dae-Nyeon Kim and Kang-Hyun Jo

FE05-2 A Method for Extraction of Arbitrary Figure Using One-Dimensional Histogram
Shota Nakashima, Makoto Miyauchi and Seiichi Serikawa

FE05-3 A Simple Technique for Coplanar Camera Calibration
Kaset Sirisantisamrid, Kitti Tirsesth and Takenobu Matsuura

FE05-4 Recursive HDR Image Generation from Differently Exposed Images Based on Local Image Properties
Andrey Vavilin and Kang-Hyun Jo

FE05-5 An Influential Principal Point on Camera Parameters
Kaset Sirisantisamrid, Kitti Tirusesth, Takenobu Matsuura and Teerawat Thepmanee

FE05-6 3D Shape Recovery from Single Image by Using Texture Information
Yutthana Lila, Chidchanok Lursinsap, Rajalida Lipikorn and Shin’chi Satoh

FE06:OS020 HUMAN ADAPTIVE MECHATRONICS WITH COGNITIVE SCIENCE

FE06-1 Use of Visual Working Memory in a Manipulative Task
Harumi Kobayashi, Tetsuya Yasuda and Shintaro Shinozaki
FE06-2 Subliminal Calibration for Machine Operation Systems
Hiroshi Igarashi

FE06-3 Strategy Changes and Activation of the Prefrontal Cortex
Tetsuya Yasuda and Harumi Kobayashi

FE06-4 Analysis of Machine Operation Skills Using Hand Discrete Movement
Satoshi Suzuki and Fumio Harashima

FE06-5 Learning Process of Bimanual Coordination
Yukihito Suzuki, Hiroki Takase, Yaodong Pan, Jun Ishikawa and Katsuhisa Furuta

FE07: OS010 MOTION & VIBRATION CONTROL

FE07-1 Second-Order Nonlinear Function Navigation Method for Fast
Dong Han Kim and Keun-Ho Rew

FE07-2 Navigation Method for Wheeled Mobile Robot Using Streamline of Complex
Potential Flow
Keun-Ho Rew and Donghan Kim

FE07-3 A Complete Solution to Asymmetric S-curve Motion Profile: Theory &
Experiments
Chang Wan Ha, Keun-Ho Rew and Kyung-Soo Kim

FE07-4 Contrained Generalized Predictive Control Of An Induction Motor
Bektache Abdeldjebar and Benmahammed Khier

FE07-5 Vibration Control of a Micro-Actuator for the Hard Disk Drive Using Self-Sensing
Actuation
Minoru Sasaki and Satoshi Ito

FE08: OS026 RECENT ADVANCES IN PROCESS SYSTEMS ENGINEERING (II)

FE08-1 [Invited Paper] IMC PID Approach : An Effective Way to Analytical Design of
Robust PID Controller
Moonyong Lee, M. Shamsuzzoha and Truong Vu

FE08-2 Designed PIDA Controller by CDM Using LabVIEW
Arjin Numsomran

FE08-3 Speed-up of the Auto-Titrator Operation
Jietae Lee, Tae Heon Lee, Seungjae Lee and Dae Ryook Yang

FE08-4 Temperature Control of Multizone Heated Rollers
Jietae Lee, Young A Han and Byung Cheol Ji

FE08-5 Pulse Relay Method for Identification of Ultimate Data from Noisy Responses
Jietae Lee and Su Whan Sung

FE09:OS011 HUMAN FACTORS IN VEHICLE OPERATION

FE09-1 Analysis and Synthesis of Driving Behavior Based on Mode Segmentation
Toshikazu Akita, Tatsuya Suzuki, Shinkichi Inagaki and Soichiro Hayakawa
FE09-2 Study on Forward Collision Warning System Adapted to Driver Characteristics and Road Environment ................................................................. 2506
Masumi Nakaoka, Pongsathorn Raksincharoensak and Masao Nagai

FE09-3 Proposal of the Longitudinal Driver Model in Coordination with Vehicle ........................................ 2512
Makoto Yamakado

FE09-4 Driver Behavior Modeling Based on Database of Personal Mobility Driving in Urban Area ................................................................. 2518
Kazunari Inata, Pongsathorn Raksincharoensak and Masao Nagai

FE09-5 Formulation of Braking Behaviors of Expert Driver toward Automatic Braking System ................................................................. 2524
Takahiro Wada, Shunichi Doi, Naohiko Tsuru, Kazuyoshi Isaji and Hiroshi Kaneko

FE09-6 Dynamic Angling Side-View Mirror for Supporting Recognition of a Vehicle in the Blind Spot ................................................................. 2529
Junpei Kuwana and Makoto Itoh

FE10: REAL-TIME AND EMBEDDED SYSTEMS

FE10-1 Design and Implementation of Content Based Page Sharing Method in Xen ........................................ 2535
Mikinori Eto

FE10-2 Syntax Error Repair with Dynamic Valid Length in LR-Based Parsers ........................................ 2539
Masato Kiyawa

FE10-3 Synchronization Scheduling Methods for Robot's Sensor and Actuator ........................................ 2543
Ik-Gyu Jang, Hong Seong Park and Soo Hee Han

FE10-4 Evaluation on Tracking Capability of MPPT for Running Solarcar ........................................ 2549
Haseo Yasuro and Fujisawa Toru

FE10-5 Applicability of ZigBee for Real-Time Networked Motor Control Systems ........................................ 2553
Uljugbek Umitrov, Seong-Hyun Jeong and Jung-II Park
