Society of Petroleum Engineers

International Thermal Operations
and Heavy Oil Symposium

ITOHOS 2008

“Heavy Oil: Integrating the Pieces”

October 20-23, 2008
Calgary, Alberta, Canada

Volume 1 of 2

Printed from e-media with permission by:

Curran Associates, Inc.
57 Morehouse Lane
Red Hook, NY 12571
www.proceedings.com

ISBN: 978-1-60560-676-7

Some format issues inherent in the e-media version may also appear in this print version.
# TABLE OF CONTENTS

## Volume 1

**Successful Field Application of Novel, Non-Silicone Antifoam Chemistries for High Foaming Heavy Oil Storage Tanks in Northern Alberta** ................................................................. 1  
J.J. Wylde

**A Case History of Heavy Oil Separation in Northern Alberta: A Singular Challenge of Demulsifier Optimization and Application** ................................................................. 11  
J.J. Wylde, S. Coscio, V. Barbu

**Successful Field Application in Continuous DTS Monitoring Under Harsh Environment of SAGD Wells Using Improved Optical Fiber Technology** ........................................... 19  
J. Kaura, J. Sierra

**Design and Implementation of a Caustic Flooding EOR Pilot at Court Bakken Heavy Oil Reservoir** .................................................................................................................. 30  
J. Xie, B. Chung, L. Leung

M. Ahmadi

**Thermal Efficiency and Acceleration Benefits of Cross SAGD (XSAGD)** ................................................................................................................................. 58  
J.L. Stalder

**Reservoir Characterization and Monitoring of Cold and Thermal Heavy Oil Production Using Multi-Transient EM** ....................................................................................... 68  
F. Engelmark

**Case Study in Venezuela: Performance of Multiphase Meter in Extra Heavy Oil** ................. 76  
A. Marin, O. Bornia, B. Pinguet

**A New Flooding Scheme by Horizontal Well in Thin Heavy Oil Reservoirs** .............................. 89  

**Numerical Simulation in Steam Injection Process by a Mechanistic Approach** ................. 95  
J.C. de Souza Jr., W. Campos, D. Lopes, L.S.S. Moura

**Effect of Ultrasonic Intensity and Frequency on Oil/Heavy-Oil Recovery from Different Wettability Rocks** ............................................................................................. 106  
K. Naderi, T. Babadagli

**Injection of Multi-Azimuth Permeable Planes in Weakly Cemented Formations for Enhanced Heavy Oil-Recovery** ................................................................................. 121  
G. Hocking, T. Cavender, R.L. Schultz

**Increasing Oil Recovery from Heavy Oil Waterfloods** ............................................................. 133  
B.W. Brice, G. Renouf

**Utilizing Natural Gas Huff and Puff to Enhance Production in Heavy Oil Reservoir** ............. 146  

**Ultra High-Temperature Solids-Free Insulating Packer Fluid for Oil and Gas Production, Steam Injection and Geothermal Wells** ................................................................. 156  
R.G. Ezell, D.J. Harrison

**Investigating the Effect of Steam, CO₂, and Surfactant on the Recovery of Heavy Oil Reservoirs** .................................................................................................................. 162  
S. Tian, S. He, L. Qu
The Progressing Cavity Pump Operating Envelope: You Cannot Expand What You Don't Understand .................................................................................................................... 398
S.G. Noonan

Reduction of Light Oil Usage as Power Fluid for Jet Pumping in Deep Heavy Oil Reservoirs .................................................................................................................... 405
S. Chen, H. Li, D. Yang, Q. Zhang, J. He

Examination of Oil Sands Projects: Gasification, CO₂ Emissions and Supply Costs ................................................................................................................................. 416
K. Elliott

Practical Considerations of Reservoir Heterogeneities on SAGD Projects ................................................................................................................................. 435
R. Baker, C. Fong, T. Li, C. Bowes, M. Toews

Asphaltene Precipitation and Its Effects on the Vapour Extraction (VAPEX) Heavy Oil Recovery Process ........................................................................................................ 452
P. Luo, X. Wang, Y. Gu, H. Zhang, S. Moghadam

Enhancing Oil Rate in Solvent Vapour Extraction Processes Through Tee-Well Pattern ......................................................................................................................... 461
F. Zeng, K.D. Knorr, R.R. Wilton

The Slender Bubble Model for Very Slow Degassing in Porous Media and Cold Production ............................................................................................................................ 477
M. Chraibi, S. Zaleski, F. Franco

The Influence of Diffusion and Dispersion on Heavy Oil Recovery by VAPEX ................................................................................................................................. 486
A. Alkindi, A. Muggeridge, Y. Al-Wahaibi

A New Water Treatment Scheme for Thermal Development: The SIBE Process ................................................................................................................................. 498
P. Pedenaud

Methodology of Calibration for Nucleonic Multiphase Meter Technology for SAGD Extra Heavy Oil ........................................................................................................... 506
B. Pinguet, P. Pechard, E. Guerra, V. Arendo, M. Shaffer, J. Contreras

Pre-electrocoalescer Unit Adapted to the Extra-heavy Oil Characteristics ................................................................................................................................. 529
C. Noik, C. Dalmazzone, P. Glenat

Expanding Solvent SAGD in Heavy Oil Reservoirs ................................................................................................................................. 541
P.A. Govind, S. Das, S. Srinivasan, T.J. Wheeler

Volume 2

Combined Reservoir Simulation and Seismic Technology, A New Approach for Modeling CHOPS ........................................................................................................... 555
H. Aghabarati, C. Dumitrescu, L. Lines, A. Settari

Conventional OTSG Development for Heavy Liquid Fuel Firing in Thermal Applications ......................................................................................................................... 569

Successful Field Implementation of Novel Cementing Solution for ISC Wells: Case Histories ................................................................................................................................. 581
R.K. Meher, K.M. Suyan, D. Dasgupta, S. Deodhar, V. Sharma, V.K. Jain

Mitigating In Situ Oil Sands Carbon Costs ................................................................................................................................. 590
D.J. Theriault, J. Peterson, H. Heinrichs
