# TABLE OF CONTENTS

## ACHI1: INTERFACE I

**Focusing Graphical User Interfaces in Model-Driven Software Development** ............................................. 1  
Stefan Link, Thomas Schuster, Philip Hoyer, Sebastian Abeck

**Studying Input Device Performance: An End-User Driven Experiment in wearIT@work** ................................................................. 7  
Hendrik Witt, Ernesto Morales Kluge

**A Convivial Interface for the Transfer of Medical Images** .................................................................................. 14  
Joséphine Kohlenberg, Anissa Abdejelil, Philippe Tagoum Fogang, Moustapha Kane, Steve Pone Nguemdjom, Ion Valentin Vlasceanu

**Intelligent Camera Interface (ICI): A Challenging HMI for Disabled People** .................................................... 19  
Malek Baklouti, Serge Couvet, Eric Monacelli

## ACHI2: INTERFACE II

**An Interactive and Immersive 3D Game Simulation Provided with Force Feedback** ........................... 24  
Lucio T. De Paolis, Marco Pulimeno, Giovanni Aloisio

**Evaluating the Significance of the Desktop Area in Everyday Computer Use** .............................................. 29  
Akrivi Katifori, George Lepouras, Alan Dix, Azrina Kamaruddin

**NALP: Navigating Assistant for Large Display Presentation Using Laser Pointer** ................................. 37  
Liang Zhang, Yuanchun Shi, Boliang Chen

**InfoCruise: Information Navigation Presenting a Focus Facet Based on Context** .................................. 43  
Izumi Kohno, Yoji Miyazaki, Masaki Hara, Teruya Ikegami

## ACHI3: INTERFACE III

**A MATLAB GUI for the Analysis and Exploration of Signal and Image Data of an Ultrasound Computer Tomograph** .................................................................................. 51  
T. Hopp, G. F. Schwarzenberg, M. Zapf, N. V. Ruitter

**The Development of Automatic Speech Recognition Software for Portable Devices** .................................................. 57  
Myoung-Wan Koo, Joon-Ki Choi, Young-Myoung Kim

**Multimodal Interaction - Improving Usability and Efficiency in a Mobile GIS Context** ............................................ 61  
Julie Doyle, Michela Bertolotto, David Wilson

**Spatial Auditory Interface for an Embedded Communication Device in a Car** ............................................. 67  
Jaka Sodnik, Saso Tomazic, Christina Dicke, Mark Billinghurst
ACHI4: INTERFACE IV

Texture and Shape Information Fusion for Facial Action Unit Recognition.................................. 75
Irene Kotsia, Stefanos Zafeiriou, Nikolaos Nikolaidis, Ioannis Pitas

Comprehension of Visualization Systems - Towards Quantitative Assessment......................... 81
Harkirat Padda, Suchdir Mudur, Ahmed Seffah, Yojana Joshi

Liberating the Desktop.................................................................................................................. 87
Tor-Magne Stien Hagen, Espen Skjelnes Johnsen, Daniel Stødle, John Markus Bjørndalen,
Otto Anshus

Specification and Design Aspects of the Academic Researcher’s Assistant (ARA)
Software for Mobile Devices........................................................................................................ 93
Muhanna Muhanna, Sergiu Dascalu, Frederick C. Harris, Sherif Elfass, Marcel Karam

ACHI5: INTERFACE V

Optimizing Regional Labour Market Policy with a User-Friendly Computer Interface................ 99
Andranik Tangian

Study of Cockpit’s Perspective on Human-Human Interactions to Guide
Collaborative Decision Making Design in Air Traffic Management........................................... 105
Matthias Groppe, Marc Bui

User-Centred Development of Mobile Interfaces to a Pervasive Computing Environment................ 112
Karin Leichtenstern, Elisabeth Andre

ACHI6: APPLICATIONS

Compact Anatomically Guided Ultrasound for Casualty Care.................................................. 118
Barnabas Takacs, Kirby G. Vosburgh

Enhancing E-Learning Engagement Using Design Patterns from Computer Games................ 122
Therese McGinnis, David W. Bustard, Michaela Black, Darryl Charles

JDoc: A Serious Game for Medical Learning ................................................................................. 129
Aidan Sliney, David Murphy

Face Authentication for Banking................................................................................................. 135
B. Hemery, J. Mahier, M. Pasquet, C. Rosenberger

From Visualization to Visual Mining: Application to Environmental Data................................. 141
Elaheh Mozzafari, Ahmed Seffah

ACHI7: EDUCATION

A Fast Pace Method for Involving Children in Edutainment-Technology Design....................... 147
Angeliki Antoniou, George Lepouras

Adaptive Self-Assessment Trying to Reduce Fear........................................................................ 156
Anastasios A. Economides, Christos N. Moridis
Towards Leveraging Inference Web to Support Intuitive Explanations in Recommender Systems for Automated Career Counseling

Tejaswini Narayanan, Deborah L. McGuinness

Turning Web 2.0 Social Software into Versatile Collaborative Learning Solutions

Denis Gillet, Sandy El Helou, Chiu Man Yu, Christophe Salzmann

Advancing the Multidisciplinary Nature of Human Computer Interaction in a Newly Developed Undergraduate Course

Cynthia Y. Lester

ACHI8: DESIGN & EVALUATION

A Platform for Mobile Text Entry Methods Evaluation

Franck Poirier, Hamed H. Sad

User Interface Design for a Mobile Multimedia Application: An Iterative Approach

Zahid Hussain, Martin Lechner, Harald Milchrahm, Sara Shahzad, Wolfgang Slany, Martin Umgeher, Thomas Vlk, Peter Wolkerstorfer

Development of an Academic Research Information Service through Repeated Usability Evaluations

Hanmin Jung, Mikyoung Lee, Seung-Woo Lee, Won-kyung Sung

ACHI9: HUMAN ROBOTS & AGENTS

Towards Deeper Understanding of Persuasion in Software and Information Systems

Harri Oinas-Kukkonen, Marja Harjumaa

A Dynamic Agent-Based Web Service Invocation Infrastructure

Hao Yang, Junliang Chen, Xiangwu Meng, Ying Zhang

AMANDA V3: Toward a Common Workspace between Air Traffic Controllers

David Annebicque, Serge Debernard, Thierry Poulain, Igor Crévits

Multimodal Metric Study for Human-Robot Collaboration

Scott A. Green, Scott M. Richardson, Randy J. Stiles, Mark Billinghurst, J. Geoffrey Chase

Synchronous vs. Asynchronous Video in Multi-robot Search

Prasanna Velagapudi, Jijun Wang, Huadong Wang, Paul Scerri, Michael Lewis, Katia Sycara

ACHI10: USER

UPOS: User Profile Ontology with Situation-Dependent Preferences Support

Michael Sutterer, Olaf Droegehorn, Klaus David

Nursing Training: 3D Game with Learning Objectives

Fatma Mili, Jonathan Barr, Meghan Harris, Laura Pittiglio

Specification for User Modeling with Self-Observing Systems

Mathias Funk, Piet van der Putten, Henk Corporaal

Examining Programmer’s Cognitive Skills Using Regular Language

Anthony Cox, Maryanne Fisher
A Dynamical Document Structure to Capture the Semantics of Mathematical Concepts ................................................................. 255
   Jackson Marques de Carvalho, Helmut Jürgensen

ACHI11: ACCESS

Usability Practice: The Appealing Way to HCI ................................................................. 263
   Cristian Rusu, Virginia Rusu, Silvana Roncagliolo

Mandos: A User Interaction Method in Embedded Applications for Mobile Telephony ................................................................. 269
   Mauro Teófilo, Lucas Cordeiro, Raimundo Barreto, José Raimundo Pereira, Ayres Mardem, Pedro Freitas

Training and Deployment as a Basis for Usability Engineering of Mobile Systems .......... 275
   Bente Skatter

ACHI12: SYSTEMS

Obstacle Avoidance Path Planning for Mobile Robot Based on Multi Colony Ant Algorithm ................................................................. 283
   Nguyen Hoang Viet, Ngo Anh Vien, SeungGwan Lee, TaeChoong Chung

Utilization of Fuzzy Theory in the Modeling of Users of Adaptive Hypermedia Systems ........................................................................ 288
   Valéria Farinazzo Martins Salvador, André Luiz Satoshi Kawamoto, João Soares de Oliveira Neto

Enhancing Multi-user Interaction with Multi-touch Tabletop Displays Using Hand Tracking ........................................................................ 295
   K.C. Dohse, Thomas Dohse, Jeremiah D. Still, Derrick J. Parkhurst

Tailoring Model-Based Techniques to Facial Expression Interpretation ................................. 301
   Mathias Wimmer, Christoph Mayer, Sylvia Pietzsch, Bernd Radig

Requirement Engineering Contributions to Voice User Interface ........................................ 307
   Valéria Farinazzo Martins Salvador, João Soares de Oliveira Neto, André Satoshi Kawamoto
