ELECTRICAL CONTACTS—2008

Proceedings of

THE FIFTY-FOURTH IEEE HOLM CONFERENCE ON ELECTRICAL CONTACTS

Sponsored by the
Components, Packaging, and Manufacturing Technology Society of the Institute of Electrical and Electronics Engineers, Inc.

IEEE Catalog Number: CFP08HLM-PRT
## TABLE OF CONTENTS

Foreward ......................................................................................................................... xv

Ragnar Holm Scientific Achievement Award ................................................................. xvi

Morton Antler Lecture ................................................................................................ xvi

Erle Shobert Prize Paper .............................................................................................. xix

The Armington Recognition Award ................................................................................ xxi

Holm Award Paper ....................................................................................................... xxii

**High Current AC Break Arc Contact Erosion**
John J. Shea, Eaton Corporation, USA

### Arc Interruption

Chair:  X. Zhou  
Co-Chair:  H. Czajkowski

1.1  **The Transition from to the Metallic Phase Arc After the Rupture of the Molten Metal Bridge for Contacts Opening in Air and Vacuum** .............................................. 1  
Paul G. Slade, Consultant, USA

1.2  **An Electrical Arc Erosion Model Valid for High Current: Vaporization and Splash Erosion** ...... 9  
Frederic Pons, Georgia Institute of Technology, Atlanta, USA  
Mohammed Cherkaoui, Georgia Institute of Technology, Atlanta, USA

1.3  **Melting Phenomena and Arc Ignition of Breaking Relay Contacts** .............................................. 15  
Noboru Wakatsuki, Ishinomaki Senshu University, Japan  
Hiroshi Honma, Ishinomaki Senshu University, Japan

1.4  **Characteristics of Break Arcs Driven by External Magnetic Field in a DC42V Resistive Circuit** .............................................................................................................. 21  
Junya Sekikawa, Faculty of Engineering, Shizuoka University, Japan  
Takayoshi Kubono, Faculty of Engineering, Shizuoka University, Japan

1.5  **A Finite Volume Scheme for Modeling Arc Discharges in Low Voltage Circuit Breaking Devices** ............................................................................................................... 27  
Bernhard Kubicek, Arsenal Research, Austria  
Karl A. Berger, Arsenal Research, Austria

### High Speed

Chair:  R. Timsit  
Co-Chair:  ZK Chen

2.1  **High Temperature Resistant Gold Alloys for Switching Signal Relay Contacts** ....................... 35  
Werner Johler, Tyco Electronics Logistics AG, Switzerland

2.2  **Effects of Electrical Contact Failure on High Speed Digital Signal Transmission** ......................... 41  
Jin Chun Gao, Beijing University of Posts & Telecommunications, China  
Jian Zhun, Beijing University of Posts & Telecommunications, China
2.3 Effect of Nanosecond Electrical Discontinuities in High-Speed Digital Applications................. 47
Stephen B. Smith, FCI USA, Inc., USA
Vittal Balasubramanian, FCI USA, Inc., USA.
Dan Nardone, FCI USA, Inc., USA
Sedig S. Agili, Pennsylvania State University, USA

Connectors I
Chair: B. Malucci
Co-Chair: G. Drew

3.1 Numerical Prediction of Socket Solder Joint Reliability during Shock................................. 53
Yupeng Li, Intel Corporation, USA
Robert Atkinson, Intel Corporation, USA
Hong Xie, Intel Corporation, USA
Shijiang He, Intel Corporation, USA

3.2 Innovative, Multifunctional Contact-Spring Design............................................................. 59
Stefan Jörgens, Lumberg Connect GmbH, Germany
Henning Taschke, Lumberg Connect GmbH, Germany
Peter Nevertmann, Lumberg Connect GmbH, Germany
Thomas Benke, Lumberg Connect GmbH, Germany

3.3 Extension and Experimental Verification of a New 'First Contact' Method to Model Performance of Multilayer Contact Interfaces......................................................... 66
Marjorie Myers, Tyco Electronics, USA
Michael Leidner, Tyco Electronics, Germany
Helge Schmidt, Tyco Electronics, Germany
Helmut Schlaak, Darmstadt University of Technology, Germany

3.4 Investigation of Relaxation Behavior for Terminals of CPU Socket Connectors .................... 74
K.-C. Liao, National Taiwan University, Taiwan
Wei-Chong Chiu, Lotes Corporation, Taiwan

3.5 Investigating Mechanical Behavior of LGA Sockets for Design by FEA Modeling................ 78
Mehdi Imaninejad, Intel Corporation, USA
Tieyu Zheng, Intel Corporation, USA
Hong Xie, Intel Corporation, USA

Sliding Contacts
Chair: S. Cole
Co-Chair: E. Smith

4.1 Commutation Arc Characteristics of a Fuel Pump Motor in Ethanol....................................... 84
Koichiro Sawa, Keio University, Japan
Koichi Koibuchi, Keio University, Japan
Tsunashi Hara, Keio University, Japan

4.2 Nanoindentation Studies of Contact Materials Used for Sliding Electrical Contacts............. 90
Christian Holzapfel, Schleifring und Apparatebau GmbH, Germany
4.3 Comparison of Brush Sliding Contact Characteristics between Structure Steel Ring & Stainless Steel Ring for Large AC Motors ................................................. 98
Noboru Morita, Nippon Institute of Technology, Japan
Masami Mori, Nippon Institute of Technology, Japan
Takahiro Ueno, Nippon Institute of Technology, Japan
Yoshihiro Ishikawa, Toshiba Mitsubishi-Electric Industrial System Corporation, Japan

4.4 Brush Sliding Contact Voltage Deviation Analysis Based on the Evaluation of Displacement Excited Vibration caused by Collector Ring Profile Distortion -for Turbine Generators & Traction Motors-............................................................... 103
Makoto Takanezawa, Nippon Institute of Technology, Japan
Hiroyuki Yanagisawa, Nippon Institute of Technology, Japan
Takahiro Ueno, Nippon Institute of Technology, Japan
Noboru Morita, Nippon Institute of Technology, Japan
Toru Otaka, Toshiba Corporation
Daisuke Hiramatsu, Toshiba Corporation

4.5 Low Speed Sliding Characteristics of Cu-Fe-W-Based Composite Material Contacts Containing WS2 .............................................................................................. 110
Yoshitada Watanabe, Kogakuin University, Japan
Masaomi Arai, Kogakuin University, Japan
Koichiro Sawa, Keio University, Japan

Contactor/Relay Design
Chair:  J. McBride
Co-Chair:  C. Leung

5.1 Contact Bounce Elimination by Means of a Sensorless Closed-Loop Current Controller in DC Core Contactors ............................................................... 117
Antonio Garcia Espinosa, Universitat Politècnica de Catalunya, Spain
Jordi R. Riba, Universitat Politècnica de Catalunya, Spain
Jordi Cusidó, Universitat Politècnica de Catalunya, Spain
Juan A. Ortega, Universitat Politècnica de Catalunya, Spain
Luis Romeral Martinez, Universitat Politècnica de Catalunya, Spain

5.2 Research on the Starting Points of the Combined Subsection Permanent Magnet ..................... 125
Huimin Liang, Harbin Institute of Technology, Harbin Engineering University, China
Jun Xu, Harbin Institute of Technology, China
Rongling Zhang, Harbin Institute of Technology, China
Guofu Zhai, Harbin Institute of Technology, China
Yanling Hao, Harbin Engineering University, China

5.3 Design of Shading Coils for Minimizing the Contact Bouncing of AC Contactors ...................... 130
Jordi R. Riba, Universitat Politècnica de Catalunya, Spain
Antonio Garcia Espinosa, Universitat Politècnica de Catalunya, Spain
Jordi Cusidó, Universitat Politècnica de Catalunya, Spain
Juan A Ortega, Universitat Politècnica de Catalunya, Spain
Luis Romeral Martinez, Universitat Politècnica de Catalunya, Spain
Low Current Switching/MEMS
Chair: K. Sawa
Co-Chair: R. Martens

6.1 A Nanoindenter Based Method for Studying MEMS Contact Switch Microcontacts .......... 137
Kevin W. Gilbert, Air Force Institute of Technology, USA
Shankar Mall, Air Force Institute of Technology, USA
Kevin D. Leedy, Air Force Research Laboratory, USA
Bryan Crawford, Agilent Technologies, USA

6.2 Electrical Contact Reliability in a Magnetic MEMS Switch ............................................. 145
Maxime Vincent, Schneider Electric Industries, France
Laurent Chiesi, Schneider Electric Industries, France
Jean-Christophe Fourrier, Schneider Electric Industries, France
Amalia Garnier, Schneider Electric Industries, France
Benoit Grappe, Schneider Electric Industries, France
Christophe Lapiere, Schneider Electric Industries, France
Caroline Coutier, Schneider Electric Industries, France
Alfredo Samperio, Schneider Electric Industries, France
Sylvain Paineau, Schneider Electric Industries, France
Frédéric Houzé, Laboratoire de Génie Électrique de Paris, France
Sophie Noël, Laboratoire de Génie Électrique de Paris, France

6.3 Research on Arc Burning and Contact Bounce of DC Relays by High Speed Photograph Method ........................................................................................................ 151
Chunyan Zang, Huazhong University of Science and Technology, China
Junjia He, Huazhong University of Science and Technology, China
Bin Huang, Huazhong University of Science and Technology, China
Yi Tao, Huazhong University of Science and Technology, China
Hanming Zhang, Huazhong University of Science and Technology, China
Chengyan Liu, G&A Technologies Co., Ltd, China
Lizhong Wang, G&A Technologies Co., Ltd, China
Fubiao Luo, G&A Technologies Co., Ltd, China
Li Cui, G&A Technologies Co., Ltd, China

6.4 Influence of Characteristic Parameters on Contact Bounce in Reed Systems of Relays .......... 156
Jun Xiong, Huazhong University of Science and Technology, P.R.China
Junjia He, Huazhong University of Science and Technology, P.R.China
Chunyan Zang, Huazhong University of Science and Technology, P.R.China
Chengyan Liu, G&A Technologies Co., Ltd, P.R. China
Lizhong Wang, G&A Technologies Co., Ltd, P.R.China

Connectors II
Chair: G. Flowers
Co-Chair: B. Rickett

7.1 Contact Properties of Tubular Crimp Connections: Elementary Considerations ............... 161
Roland S. Timsit, Timron Scientific Consulting Inc., Canada
7.2 A Multi-Physics Finite Element Model of an Electrical Connector Considering Rough Surface Contact............................................................................................ 168
Santosh V. Angadi, Auburn University, USA
W. Everett Wilson, Auburn University, USA
Robert L. Jackson, Auburn University, USA
George T. Flowers, Auburn University, USA
Bretton I. Rickett, Molex Inc., USA

7.3 3-Dimensional Numerical Simulation of Open-Barrel Crimping Process ............................................. 178
Dmitry V. Zhmurkin, Tyco Electronics, USA
Ned E. Corman, Tyco Electronics, USA
Charles D. Copper, Tyco Electronics, USA
Robert D. Hilty, Tyco Electronics, USA

7.4 The Electrical Contact Resistance of Two Rough Surfaces with Varying Phase Conductivity ............................................................ 185
Daniel J. Dickrell III, University of Florida, USA
W.G. Sawyer, University of Florida, USA

7.5 Electrical Contact Resistance Considering Multi-Scale Roughness .................................................. 190
W. Everett Wilson, Auburn University, USA
Santosh V. Angadi, Auburn University, USA
Robert L. Jackson, Auburn University, USA

8.1 Methods of Early Short-Circuit Detection for Low-Voltage Systems .................................................. 198
Timo Mützel, TU Ilmenau, Germany
Frank Berger, TU Ilmenau, Germany
Michael Anheuser, Siemens AG, Germany

8.2 Thermal Model of Electrical Contacts Based on Experimental Data ........................................... 205
Bella H. Chudnovsky, Schneider Electric/Square D, USA
Albert Livshitz, Schneider Electric/Square D, USA
Boris A. Chudnovsky, Xavier University, USA

8.3 Glowing Connection Experiments with Alternating Currents below 1 Arms ...................................... 212
Joe Urbas, University of North Carolina at Charlotte, USA

8.4 Comparing 240 Vrms to 120 Vrms Series Arcing Faults in Residential Wire ................................... 218
John J. Shea, Eaton Corporation, USA

9.1 A Method for Power Rating Contacts using Voltage Drop .......................................................... 225
Robert D. Malucci, RD Malucci Consulting, USA
Frank R. Ruffino, Molex Inc, USA
Chad L. Rodekohr, Auburn University/CAVE, USA
George T. Flowers, Auburn University/CAVE, USA
Jeffery C. Suhling, Auburn University/CAVE, USA
Michael J. Bozack, Auburn University/CAVE, USA

9.3 Wear Patterns and Lifetime of Electric Contacts ........................................................................................................ 238
Jian Song, University of Applied Sciences, Germany
Christian Koch, University of Applied Sciences, Germany

9.4 Influence of Substrate Surface Roughness on Tin Whisker Growth ................................................................. 245
Chad L. Rodekohr, Auburn University/CAVE, USA
George T. Flowers, Auburn University/CAVE, USA
Jeffery C. Suhling, Auburn University/CAVE, USA
Michael J. Bozack, Auburn University/CAVE, USA

9.5 Influence of Grafting Properties of Organic Thin Films for Low Level Electrical Contacts Protection ................................................................. 249
Sophie Noël, LGEP/Supelec, France
David Alamarguy, LGEP/Supelec, France
Alessandro Benedetto, CEA, France
Pascal Viel, CEA, France
Mirela Balog, CIMMA/CNRS, France

Power Connectors
Chair: P. Slade
Co-Chair: B. Chudnovsky

10.1 Aluminum Foam Transition Washer for Power Connections ................................................................. 258
Milenko Braunovic, MB Interface, Canada
Daniel Gagnon, Hydro Quebec IREQ, Canada

10.2 Visualisation of the Contact Area for Different Contact Forces using X-Ray Computer Tomography ................................................................. 263
Antonios V. Lalechos, University of Southampton, United Kingdom
Jonathan Swingler, University of Southampton, United Kingdom
Jolyon Crane, PG Drives Technology, United Kingdom

10.3 Nanoindentation Study of Intermetallic Phases in Al-Cu Bimetallic System ................................................................. 270
Milenko Braunovic, MB Interface, Canada
Lisa Rodrigue, Hydro Quebec IREQ, Canada
Daniel Gagnon, Hydro Quebec IREQ, Canada
Fretting
Chair: E. Smith
Co-Chair: D. Gagnon

11.1 Modeling and Analysis of a Blade/Receptacle Pair for the Prediction of Vibration-Induced Fretting Degradation
Chen Chen, Auburn University, USA
George Flowers, Auburn University, USA
Michael Bozack, Auburn University, USA
Jeffrey Suhling, Auburn University, USA
Bretton Rickett, Molex, Inc., USA
Robert Malucci, Molex, Inc., USA
Charlie Manlapaz, Molex, Inc., USA

11.2 Degradation Phenomenon of Electrical Contacts by 3-D Oscillating Mechanism: 3-D Oscillating Mechanism for Trial
Shin-ichi Wada, TMC System Co., Ltd., Japan
Koichiro Sawa, Keio University, Japan

11.3 Microscopy Study of Fretting Corrosion Caused by the Tin Plating Thickness
Tetsuya Ito, AutoNetworks Technologies, Ltd., Japan
Shigeru Sawada, AutoNetworks Technologies, Ltd., Japan
Yasuhiro Hattori, AutoNetworks Technologies, Ltd., Japan
Yasushi Saitoh, Mie University, Japan
Terutaka Tamai, Mie University, Japan
Kazuo Iida, Mie University, Japan

Contact Materials
Chair: J. Witter
Co-Chair: P. Wingert

12.1 Arc Affected Surface Composition Changes in Silver Tin Oxide Contacts
Eric Streicher, AMI Doduco, USA
Chi Leung, AMI Doduco, USA
Dennis Fitzgerald, AMI Doduco, USA

12.2 Inlay Clad Metal for High Temperature Connector Applications
Lichun Leigh Chen, Technical Materials, Inc., USA
Barry Njoes, Technical Materials, Inc., USA
David W. M. Williams, Technical Materials, Inc., USA

12.3 Investigation of Material Transfer by 3D Precision Alignment of Topographical Data of Electrical Contact Surfaces
Martin Reichart, AC²T research GmbH, Austria
Clemens Schrank, AC²T research GmbH, Austria
Georg Vorlaufer, AC²T research GmbH, Austria

12.4 Quenching Characteristics of YBCO Bulk Contacts
Koichiro Sawa, Keio University, Japan
Katsuya Fukuda, Keio University, Japan
Kuniyasu Ogawa, Keio University, Japan
Masaru Tomita, Railway Technical Research Institute, Japan
Masato Murakami, Shibaura Institute of Technology, Japan
Naomichi Sakai, Superconductivity Research Laboratory, Japan
Izumi Hirabayashi, Superconductivity Research Laboratory, Japan
An Experimental Investigation of the Contact Area Between a Glass Plane and Both Metallic and Carbon-Nano-Tube Electrical Contacts .................................................. 325
John McBride, University of Southampton, UK
Kevin Cross, TaiCaan Technologies Ltd., UK

Fundamentals
Chair: M. Braunovic
Co-Chair: J. Shea

13.1 Constriction Resistance of Thin-Film Contacts ................................................................. 332
Roland Timsit, Timron Scientific Consulting Inc., Canada

13.2 Peculiarities in Characteristics Between Contact Trace and Contact Resistance of Tin Plated Contacts ............................................................................................ 337
Terutaka Tamai, Mie University, Japan
Yasushi Saitoh, Mie University, Japan
Shigeru Sawada, AutoNetworks Technologies, Ltd, Japan
Yasuhiro Hattori, AutoNetworks Technologies, Ltd, Japan

13.3 Analysis of Contact Resistance Data with Weibull Distribution Function ...................... 344
Makoto Hasegawa, Chitose Institute of Science & Technology, Japan
Yuta Yanagitani, Chitose Institute of Science & Technology, Japan

Author Index .................................................................................................................................................. follows page 349
