2007 Fourth IEEE International Conference on Autonomic Computing

(ICAC 2007)

Jacksonville, Florida
11-15 June 2007
TABLE OF CONTENTS

SESSION 1: SERVICE-LEVEL AGREEMENTS AND POLICIES

Policy Verification and Validation Framework Based on Model Checking Approach .............................................. 1
Shinji Kikuchi, Satoshi Tsuchiya, Motomitsu Adachi, and Tsuneo Katsuyama

Policy-Centric Integration and Dynamic Composition of Autonomic Computing Techniques ........................................................................................................................................... 10
Richard John Anthony

SLA Decomposition: Translating Service Level Objectives to System Level Thresholds ........................................... 22
Yuan Chen, Subu Iyer, Xue Liu, Dejan Milojicic, and Akhil Sahai

SESSION 2: POWER AND ENERGY MANAGEMENT

Server-Level Power Control ........................................................................................................................................ 32
Charles Lefurgy, Xiaorui Wang, and Malcolm Ware

Exploiting Platform Heterogeneity for Power Efficient Data Centers ........................................................................... 42
Ripal Nathuji, Canturk Isci, and Eugene Gorbatov

Energy-Aware Mobile Service Overlays: Cooperative Dynamic Power Management in Distributed Mobile Systems .............................................................................................................................. 52
Balasubramanian Seshasayee, Ripal Nathuji, and Karsten Schwan

SESSION 3: POSTER PRESENTATIONS

Using the Right Amount of Monitoring in Adaptive Load Sharing ........................................................................... 62
David Breitgand, Rami Cohen, Amir Nahir, and Danny Raz

An Autonomic Service Discovery Mechanism to Support Pervasive Device Accessing Semantic Grid ...................................................................................................................................................... 64
Tao Guan, Ed Zaluska, and David De Roure

Model-Driven Autonomic Architecture ......................................................................................................................... 66
Radu Calinescu

Forecasting Software Aging of Service-Oriented Application Server Based on Wavelet Network with Adaptive Genetic .......................................................................................................................... 68
Haining Meng, Yong Qi, Ji Hou, Ying Chen

Prato: Databases on Demand ........................................................................................................................................ 70
Soila Pertet, Priya Narasimhan, John Wilkes, and Jay J. Wylie

Application Resource Demand Phase Analysis and Prediction in Support of Dynamic Resource Provisioning ...................................................................................................................................................... 72
Jian Zhang, Mazin Yousif, Robert Carpenter, and Renato J. Figueiredo

Identifying Performance-Critical Components in Transaction-Oriented Distributed Systems ...................................... 74
Rui Zhang
Adaptive Multi-Levels Dictionaries and Singular Value Decomposition Techniques for Autonomic Problem Determination
Hoi Chan and Thomas Kwok ..........................77

Autonomous Return on Investment Analysis of Additional Processing Resources
Jonathan Wildstrom, Peter Stone, and Emmett Witchel ............79

Designing Self-Adaptive Service-Oriented Applications
Giovanni Denaro, Mauro Pezzé, and Davide Tosi .....................81

A Tiny and Light-Weight Autonomic Element for Wireless Sensor Networks
Thais Braga, Fabricio Silva, José Marcos Nogueira, Antonio Loureiro, and Linnyer Beatrys Ruiz 83

Self-Optimization of Clustered Message-Oriented Middleware
Christophe Taton, Noel DePalma, Jeremy Philippe, and Sara Bouchenak 85

Fault-Tolerant Reliable Delivery of Messages in Distributed Publish/Subscribe Systems
Shrideep Pallickara, Hasan Bulut, and Geoffrey Fox .................87

Evaluation of Optimization Methods for Network Bottleneck Diagnosis
Alina Beygelzimer, Jeff Kephart, and Irina Rish .............91

Fault-Adaptive Control for Robust Performance Management of Computing Systems
Sherif Abdelwahed and Nagarajan Kandasamy ...........................93

Online Monitoring of Database Structural Deterioration
Takashi Hoshino, Kazuo Goda, and Masaru Kitsuregawa ..........96

Approximation Modeling for the Online Performance Management of Distributed Computing Systems
Dara Kusic, Nagarajan Kandasamy, and Guofei Jiang ..............98

SESSION 4: MODELING AND LEARNING

Coordinating Multiple Autonomic Managers to Achieve Specified Power-Performance Tradeoffs
Jeffrey O. Kephart, Hoi Chan, Rajarshi Das, David W Levine, Gerald Tesauro, Freeman Rawson, and Charles Lefurgy 100

On the Use of Fuzzy Modeling in Virtualized Data Center Management
Jing Xu, Ming Zhao, José Fortes, Robert Carpenter, and Mazin Yousif 110

Adaptive Learning of Metric Correlations for Temperature-Aware Database Provisioning
Saeed Ghanbari, Gokul Soundararajan, Jin Chen, and Cristiana Amza 120

SESSION 5: PROVISIONING AND SCHEDULING

A Regression-Based Analytic Model for Dynamic Resource Provisioning of Multi-Tier Applications
Qi Zhang, Ludmila Cherkasova, and Evgenia Smirni ..........................132

Time-Sharing Parallel Applications with Performance Isolation and Control
Bin Lin, Ananth I. Sundararajan, and Peter A. Dinda ....................142

Appliance-Based Autonomic Provisioning Framework for Virtualized Outsourcing Data Center
XiaoYing Wang, DonJun Lan, Gang Wang, Xiang Fang, Meng Ye, Ying Chen, and QingBo Wang 152
SESSION 6: SYSTEM PROTECTION AND REPAIR

Autonomic Reactive Systems via Online Learning ................................................................. 162
  Sanjit A. Seshia

Towards Autonomic Fault Recovery in System-S ................................................................. 172
  Gabriela Jacques-Silva, Jim Challenger, Lou Degenaro, James Giles, and Rohit Wagle

Strider Search Ranger: Towards an Autonomic Anti-Spam Search Engine ....................... 182
  Yi-Min Wang and Ming Ma
