2007 2nd International Conference on Systems

(ICONS)

Sainte-Luce, Martinique, France
22-28 April 2007
# TABLE OF CONTENTS

## ICONS 1: SYSTEM THEORY I

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Formal Specs Reuse with Embedded Systems Design—Behavioral and Architectural Specifications in Real-Time Application Domains</td>
<td>1</td>
</tr>
<tr>
<td>Miroslav Sveda</td>
<td></td>
</tr>
<tr>
<td>DB2 Performance Enhancements Using Materialized Query Table for LUW</td>
<td>7</td>
</tr>
<tr>
<td>Satish K. Shanmugam, Mohan K. Saraswatipura, and Suma C. Shastry</td>
<td></td>
</tr>
<tr>
<td>Self-Balanced and Self-Adaptive Routes in Unstructured P2P Networks</td>
<td>10</td>
</tr>
<tr>
<td>Miguel Angel Rojas, Herwig Unger, and Hauke Coltzau</td>
<td></td>
</tr>
<tr>
<td>Pure Current-Mode Frequency Filter for Signal Processing in High-Speed Data Communication</td>
<td>18</td>
</tr>
<tr>
<td>Jaroslav Koton and Kamil Vrba</td>
<td></td>
</tr>
<tr>
<td>Active Filter with Current Operational Amplifiers for High-Speed Data Communications</td>
<td>22</td>
</tr>
<tr>
<td>David Kubanek and Kamil Vrba</td>
<td></td>
</tr>
</tbody>
</table>

## ICONS 2: SYSTEM THEORY II

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Design of High-Frequency Filters Working in the Pure Current Mode with CMI</td>
<td>26</td>
</tr>
<tr>
<td>Jan Jerabek and Kamil Vrba</td>
<td></td>
</tr>
<tr>
<td>Method for Designing Frequency Filters Using BOTA</td>
<td>30</td>
</tr>
<tr>
<td>Norbert Herencsar and Kamil Vrba</td>
<td></td>
</tr>
<tr>
<td>Gradient Coils Temperature Controller in a Gradient System for MR Tomography</td>
<td>36</td>
</tr>
<tr>
<td>Karel Bartusek, Zdenek Dokoupil, Eva Gescheidtova, and Zdenek Smekal</td>
<td></td>
</tr>
<tr>
<td>Research on Theoretical System and Technology Frame of New Generation Productivity Based on the Network Cooperation</td>
<td>40</td>
</tr>
<tr>
<td>Xinshen Ke and Yuan Li</td>
<td></td>
</tr>
<tr>
<td>State Space Multiple Leaves Representations of Complex Systems: The Basic Properties of System Theory</td>
<td>46</td>
</tr>
<tr>
<td>Stanislaw Tarasiewicz</td>
<td></td>
</tr>
</tbody>
</table>

## ICONS 3: SYSTEM THEORY III

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entity Driven Task Software Framework for EIS</td>
<td>54</td>
</tr>
<tr>
<td>Xi-Min Yang, Chang-Sheng Xie, and Jin Ni</td>
<td></td>
</tr>
<tr>
<td>Advanced Access Control System for Multi-Tier Server Applications</td>
<td>60</td>
</tr>
<tr>
<td>Lubomir Cvrk, Vit Vrba, and Karol Molnar</td>
<td></td>
</tr>
<tr>
<td>Distributed Information Measurement and Control System for Research and Education in Physics</td>
<td>66</td>
</tr>
<tr>
<td>(m,k) Firm Scheduling of Real-Time Transactions with Concurrency Control</td>
<td>72</td>
</tr>
<tr>
<td>Leila Baccouche and Sami Limam</td>
<td></td>
</tr>
</tbody>
</table>
An Efficient Classification System Based on Binary Search Trees for Data Streams Mining
Tao Wang, Zhoujun Li, Yuejin Yan, Huowang Chen, and Jinshan Yu

A 3D Notice Board Metaphor for Visualizing, Categorizing, and Sharing Learning Objects
Mahfujur Rahman and Abdulmotaleb El Saddik

ICONS 4: EMBEDDED I

Health Maintenance Embedded Systems in Home Care Applications
Vilem Srovnal and Marek Penhaker

Space-Time Trade-Offs in SW Evaluation of Boolean Functions
Václav Dvorák

Programmable Hardware and the New Analog Capacity
T. Giuma and A. Ebenal

Scheduling of Transactions under Resource Constraint Based on Extended Preemptive Time Petri Nets for SoC System-Level Test-Case Generation
Jin Shan Yu, Tun Li, and Qing Ping Tan

ICONS 5: EMBEDDED II

Control System for Precise Power Laser Measurement
Jaroslav Kadlec and Radimír Vrba

Study on the Simulation Method for Universal Serial Bus 2.0 Hard Design Based on SmartModel
Xiaoping Bai, Guican Chen, and Yuanfeng Wei

New Micropotentiostat for Measurement Responses from Thick-Film Sensors
P. Steffan and R. Vrba

ICONS 6: ENGINEERING/VALIDATION/INSTRUMENTATION I

Validation of In-Vehicle-Protocol Network Topologies
Wolfhard Lawrenz, and David Bollati

An Integrated Framework and a Dynamic Model of Customer Relationship System
Li Yuhui, Li Bo, and Duan Wancun

Effect of Flat Fading in 802.11 MAC for Cross Layer Evaluation Using Channel Emulator
Adriano Almeida Goes, Omar Carvalho Branquinho, Norma Reggiani, and Douglas Zambianco

Automatic Test Generation Applied to a Vocal Service
Elisangela Rodrigues Vieira and Ana Cavalli

A P2P Sensor Framework for Collaborative Robots Manipulation
Abdur Rahman, Suruz Miah, Wail Gueaieb, and Abdulmotaleb El Saddik

A Novel Band-Pass Sigma-Delta Modulator for Capacitive Pressure Sensing
J. Haze, R. Vrba, L. Fujcik, J. Forejtek, P. Zavoral, M. Pavlik, and L. Michaeli
MCL I

ZigBee-to-Internet Interconnection Architectures .......................................................... 159
Miroslav Sveda and Roman Trchalik

A Context-Aware and Adaptive Learning Schedule Framework for Supporting Learners’
Daily Routines ............................................................................................................... 165
Jane Yau and Mike Joy

Accessibility and Mobile Learning Standardization—Introducing Some Ideas About the
Device Profile (DP) ....................................................................................................... 171
Fernando Mikic, Luis Anido, Enrique Valero, and Juan Picos

Supporting Social Awareness with 3D Collaborative Virtual Environments and Mobile
Devices: VirasMobile .................................................................................................... 177
Ekaterina Prasolova-Førland, Monica Divitini, and Anders Einar Lindås

MCL II

Logistics Management in a Mobile Environment: A Decision Support System Based on
Trajectory Mining ....................................................................................................... 183
Gianni Costa, Giuseppe Manco, Riccardo Ortale, Domenico Saccà, Alessandro D’Atri, and Stefano Za

A System to Aid Blind People in the Mobility: A Usability Test and its Results ............... 189
Edoardo D’Atri, Carlo Maria Medaglia, Alexandru Serbanati, Ugo Biader Ceipidor, Emanuele Panizzi, and Alessandro D’Atri

Demand-Driven Prioritization for ACERT .................................................................... 195
Richard Lau, Heechang Kim, Bruce Siegell, and Stephanie Demers

SAFESYS I

Software Development for Safety-Related Systems .................................................... 201
Josef Börcsök and Sebastian Schaefer

Probability of Undetected Error on a Binary Symmetric Channel Without Memory via
Bayesian Inference ..................................................................................................... 207
H.D. Wacker and J. Börcsök

Determination of Bit Error and Residual Error Rates for Safety Critical Communication .... 213
J. Börcsök and H.-T. Hannen

SAFESYS II

How Safe is My System?—Calculation of PFD-Values for a Safety Related System .......... 219
J. Börcsök, P. Holub, and M.H. Schwarz

Estimation and Evaluation of Common Cause Failures ................................................. 225
J. Börcsök, S. Schaefer, and E. Ugljesa

Reliability Engineering & Data Collection to Improve Plant Safety & Availability ............. 231
Michel Houtermans, Mufeed Al-Ghumham, and Tino Vande Capelle
APSYS I

Microcontroller Based Pest Management System ................................................................. 240
Anshul Mittal and Aseem Singh

Building Information System with Wireless Connected Mobile Device—Testing Phase of PDPT Framework ................................................................. 244
Ondrej Krejcar

Industrial Measurement Application Development Using Case-Based Reasoning ................. 248
Miroslav Sveda

APSYS II

The B2C Adoption in Retail Firms in India ................................................................................ 253
Akshay Anand and Snigdha Kulshreshtha

Nesting System with Quantization and Knowledge Base Applied ........................................... 259
Leszek Koszalka and Grzegorz Chmaj

Intelligent 3D Car-Body Deformation Modeling ................................................................... 265
Annamária R. Várkonyi-Kóczy, András Rövid, and Péter Várkonyi

Wireless and Wired Temperature Data System ..................................................................... 271
Radek Kuchta and Radimir Vrba

ADSYS I

Optics in Computer Architectures: Basis of WDM, Technologies and Potentials .................... 275

Exploring Grid and e-Business Solutions in Discovering Web Service Software Applications .............................................................................................................. 281
Serena Pastore

Dealing with Execution-Overruns to Improve the Temporal Robustness of Real-Time Systems Scheduled FP and EDF ......................................................................................... 287
Lamine Bougueroua, Laurent George, and Serge Midonnet

A Rule Based Static Configuration Validation Technique in an Autonomous Distributed Environment ................................................................................................................................. 295
Rajesh Kalyanaraman

Agent-Based Information Logistics in Planning Processes ......................................................... 299
Freimut Bodendorf, Stefan Winkler, Roland Zimmermann, and Bernd Vögele

Author Index
