Self-Healing in Distributed Network Environments .......................................................... 73
Andreas Rott

On the Miscollaboration of Congestion Control Mechanisms at the Transport and the
Network Layers .................................................................................................................. 79
Ageliki Tsioliaridou, Christos V. Samaras, and Vassilis Tsaoussidis

Detecting Stepping-Stone with Chaff Perturbation .......................................................... 85
Han-Ching Wu and Shou-Hsuan Stephen Huang

SESSION 5: GRID, CLUSTERING AND P2P COMPUTING

Ontology Based Grid Information Interoperation .......................................................... 91
Sheng Di, Hai Jin, Shengli Li, Ling Chen, Li Qi, and Chengwei Wang

A Coverage and Connectivity Method to Cluster Topology in Wireless Sensor Networks .......... 97
Ying-Hong Wang, Chin-Yung Yu, and Ping-Fang Fu

An Update Propagation Strategy for Delay Reduction and Node Failure Tolerance in Peer-
to-Peer Networks .............................................................................................................. 103
Toshiki Watanabe, Takahiro Hara, Yuki Kido, and Shojiro Nishio

SESSION 6: NETWORK SECURITY

Efficient Mediated Certificateless Public-Key Encryption Scheme without Pairings .................. 109
Chen Yang, Furong Wang, and Xinmei Wang

BER Analysis of a GMSK System Using Decision Feedback ............................................. 113
Xiandeng He, Changxing Pei, Changhua Zhu, and Jiandong Li

An Improved Approach to Secure Authentication and Signing ............................................. 119
David Argles, Alex Pease, and Robert John Walters

SESSION 7: ROUTING AND MULTICASTING

The Pursuit Automaton Approach for Estimating All-Pairs Shortest Paths in Dynamically
Changing Networks .......................................................................................................... 124
Sudip Misra and B. John Oommen

Cross Layer Routing for Reliable Connections in IP over WDM Networks .......................... 130
I-Hsuan Peng, Kuo-Wei Peng, and Yen-Wen Chen

Chao Peng, Yasuo Tan, and Laurence T. Yang

A Scalable and Efficient Client Emulation Method for IP Multicast Performance
Evaluation ............................................................................................................................. 142
Masafumi Watari, Atsushi Tagami, Teruyuki Hasegawa, and Shigehiro Ano

SESSION 8: NETWORK APPLICATIONS AND VIDEO STREAMING

Implementation and Field Experiments of a Remote Medical-Care Supporting System ............. 148
Akio Koyama, Junpei Arai, Satoshi Sasaki, Takuya Numajiri, and Leonard Barolli
Performance Evaluation of a New Teleconference System by High Definition Omni-Directional Video Transmission
Yosuke Sato, Yuuya Maita, Koji Hashimoto, and Yoshitaka Shibata

Adaptive Video Streaming Over P2P Multi-Hop Path
Jinfeng Zhang, Jianwei Niu, Rui He, and Jian Ma

Common-Cause Failure Analysis for Dynamic Hierarchical Computer Systems
Akhilesh Shrestha and Liudong Xing

SESSION 9: NETWORK TRAFFIC ANALYSIS

Quasi-Orthogonal Time Division Multiplexing and its Applications Under Rayleigh Fading Channels
Enchang Sun, Yongchao Wang, Bin Tian, and Kechu Yi

Assessment of Code Quality Through Classification of Unit Tests in VeriNeC
Dominik Jungo, David Buchmann, and Ulrich Ultes-Nitsche

Specification Synthesis for Monitoring and Analysis of MANET Protocols
Natalia Stakhanova, Samik Basu, Wensheng Zhang, Xia Wang, and Johnny Wong

SESSION 10: DETECTION AND PRESENCE CONTROL

A Traffic Classification Algorithm for Intrusion Detection
Tarek Abbes, Adel Bouhoula, and Michaël Rusinovitch

A New Approach to Early Detection of an Unknown Worm
Yuuki Yamada, Takashi Katoh, Bhed Bahadur Bista, and Toyoo Takata

Online and Offline Presence Information Integrated with RFID and Instant Messaging Agent
Hiroaki Kikuchi and Yuichi Nakamura

Conditional Random Fields for Intrusion Detection
Kapil Kumar Gupta, Baikunth Nath, and Kotagiri Ramamohanarao

SESSION 11: PROTOCOLS

WiMP-SCTP: Multi-Path Transmission Using Stream Control Transmission Protocol (SCTP) in Wireless Networks
Chung-Ming Huang and Ching-Hsien Tsai

Sizing Router Buffers for Large-Scale TCP/IP Networks
Hiroayuki Hisamatsu, Go Hasegawa, and Masayuki Murata

Recovery Protocols for Replicated Databases—A Survey
Luis H. Garcia-Munoz, J. Enrique Armendáriz-Iñigo, Hendrik Decker, and Francesc D. Munoz-Escot

Self-Similar Property for TCP Traffic under the Bottleneck Restrainment
Takuo Nakashima and Toshinori Sueyoshi
SESSION 12: NETWORK ARCHITECTURES AND ALGORITHMS

Sharing Software Components Using a Service-Oriented, Distributed and Secure Infrastructure ............................................................................................................................... 234
João Paulo F. de Oliveira, Michael Schuenck, and Gléison Elias

Enhancing IR with User-Centric Integrated Approach of Interest Change Driven Layered Profiling and User Contributions ............................................................................................................................... 240
Roman Y. Shyk and Qun Jin

A New Mutable Nonlinear Transformation Algorithm for S-box ............................................................................................................................................................................................... 246
Atsushi Watanabe, Hiroshi Haruki, Shun Shimotomai, Takeshi Saito, Tomoyuki Nagase, Yoshio Yoshikoka, and Yoshiei Hasegawa

A Computational Approach to TSP Performance Prediction Using Data Mining ............................................................................................................................................................................................... 252
Paula Cecilia Fritzsche, Dolores Rexachs, and Emilio Luque

DMIR 2007 SYMPOSIUM ON DATA MINING AND INFORMATION RETRIEVAL

SESSION 1: INFORMATION RETRIEVAL I

Evaluation of Open-Domain Question Answering Systems within a Time Constraint ............................................................................................................................................................................................... 260
Elisa Noguera, Fernando Llopis, Antonio Ferrández, and Alberto Escapa

Towards Answering How do I Questions Using Classification ............................................................................................................................................................................................... 266
Kelvin Wu, Lei Yu, and Michal Cutler

Arabic Sign Language Recognition n Image-Based Approach ............................................................................................................................................................................................... 272
M. Mohandes, S.I. Quadri, and M. Deriche

SESSION 2: INFORMATION RETRIEVAL II

Morphological Zerotree Compression Coding Based on Integer Wavelet Transform for Iris Image ............................................................................................................................................................................................... 277
Yuanning Liu, Xiaodong Zhu, Lingge Sui, and Zhen Liu

Examining the Feasibility of Metasearch Based on Results of Human Judgements on Thai Queries ............................................................................................................................................................................................... 283
Shisanu Tongchim, Virach Sornlertlamvanich, and Hitoshi Isahara

WaveQ: Combining Wavelet Analysis and Clustering for Effective Image Retrieval ............................................................................................................................................................................................... 289
Dany Gebara and Reda Alhajj

SESSION 3: INFORMATION RETRIEVAL II

Using Two-Stage Concept-Based Singular Value Decomposition Technique as a Query Expansion Strategy ............................................................................................................................................................................................... 295
Xuheng Xu, Xiaodan Zhang, and Xiaohua Hu

A New Method of Cluster-Based Topic Language Model for Genomic IR ............................................................................................................................................................................................... 301
Jian Wen, Zhoujun Li, Lijuan Zhang, Xiaohua Hu, and Huowang Chen

Mining Visual Knowledge for Multi-Lingual Image Retrieval ............................................................................................................................................................................................... 307
Masashi Inoue
Proactive Documents—A New Paradigm to Access Document Information from Various Contexts

Karlheinz E.S. Toni

SESSION 4: DATA MINING I

Filtering Spam Using Kolmogorov Complexity Estimates
L.M. Spracklin and L.V. Saxton

A Semi-Automatic Framework for Mining ERP Patterns
Jiawei Rong, Dejing Dou, Gwen Frishkoff, Robert Frank, Allen Malony, and Don Tucker

Effectiveness of Multi-Perspective Representation Scheme on Support Vector Machine
Jia Zeng and Reda Alhajj

An Investigation of Chip-Level Hardware Support for Web Mining
Kin Fun Li and Darshika Perera

SESSION 5: INFORMATION EXTRACTION

Learning Relations and Information Extraction Rules for Protein Annotation
Jee-Hyub Kim and Melanie Hilario

ClusTex: Information Extraction from HTML Pages
Fatima Ashraf and Reda Alhajj

Extracting Significant Phrases from Text
Yuan J. Lui, Richard Brent, and Ani Calinescu

SESSION 6: DATA MINING II

Hybrid Clustering of Large Text Data
Jacob Kogan

Reduction in Dimensions and Clustering Using Risk and Return Model
Sayed W. Qaiyumi and Daniel Stamate

Using Web Directories for Similarity Measurement in Personal Name Disambiguation
Quang Minh Vu, Tomonari Masada, Atsuhiro Takeu, and Jun Adachi

Privacy-Preserving Two-Party K-Means Clustering Via Secure Approximation
Chunhua Su, Feng Bao, Jianying Zhou, Tsuyoshi Takagi, and Kouichi Sanku

A Parallel Mining Algorithm for Closed Sequential Patterns
Tian Zhu and Sixue Bai

SSNDS 2007 SYMPOSIUM ON SECURITY IN NETWORKS AND DISTRIBUTED SYSTEMS

SESSION 1: CRYPTOGRAPHIC ALGORITHMS

Fast and Efficient Implementation of AES Via Instruction Set Extensions
A.J. Elbirt
Reducing the Complexity in the Distributed Multiplication Protocol of Two Polynomially Shared Values ................................................................. 404
Peter Lory

Efficient Conjunctive Keyword-Searchable Encryption ................................................................................................................................. 409
Eun-Kyung Ryu and Tsuyoshi Takagi

SESSION 2: DISTRIBUTED ACCESS CONTROL AND FIREWALLS

Advanced Packet Filter Placement Strategies for Carrier-Grade IP-Networks ................................................................. 415
Birger Tödtmann and Erwin P. Rathgeb

Obligations for Role Based Access Control ................................................................................................................................. 424
Gansen Zhao, David Chadwick, and Sassa Otenko

Effective Storage Security in Incompletely Trusted Environment .................................................................................................................. 432
Chunming Rong and Won-Chol Kim

SESSION 3: WIRELESS AD HOC AND SENSOR NETWORK SECURITY

An Efficient Scheme for User Authentication in Wireless Sensor Networks ................................................................. 438
Canming Jiang, Bao Li, and Haixia Xu

Using Social Network Theory Towards Development of Wireless Ad Hoc Network Trust ............................................................................................................. 443
Sameer Pai, Tanya Roosta, Stephen Wicker, and Shankar Sastry

Detecting Anomaly Node Behavior in Wireless Sensor Networks .................................................................................................................. 451
Qinghua Wang and Tingting Zhang

Mobile Jamming Attack and its Countermeasure in Wireless Sensor Networks ................................................................. 457
Hung-Min Sun, Shih-Fu Hsu, and Chien-Ming Chen

SESSION 4: NETWORK SECURITY ISSUES AND PROTOCOLS

Random Oracle Instantiation in Distributed Protocols Using Trusted Platform Modules ................................................................. 463
Vandana Gunupudi and Stephen R. Tate

Information Security Threats and Access Control Practices in Norwegian Businesses ................................................................. 470
Janne Merete Hagen, Tormod Kalberg Sivertsen, and Chunming Rong

Context-Aware Security Policy for the Service Discovery ................................................................................................................................. 477
Slim Trabelsi, Laurent Gomez, and Yves Roudier

Adapting the UCONABC Usage Control Policies on CORBASec Infrastructure ................................................................. 483
Lau Cheuk Lung, Marcelo Shinji Higashiyama, Rafael R. Obelheiro, and Joni da Silva Fraga

SESSION 5: AUTHORIZATION SCHEMES

Enforcing Fine-Grained Authorization Policies for Java Mobile Agents ................................................................................................. 489
Giovanni Russello, Changyu Dong, and Naranker Dulay

A Decentralized Authorization Architecture ................................................................................................................................. 497
Feike W. Dillema, Simone Lupetti, and Tage Stabell-Kulo
SESSION 6: AUTHENTICATION AND ACCESS CONTROL

Authenticated Broadcast Encryption Scheme ................................................................. 512
Chik How Tan, Joseph Chee Ming Teo, and Jens-Are Amundsen

Leveraging Identity-Based Cryptography for Node ID Assignment in Structured P2P Systems ................................................................. 519
Sunam Ryu, Kevin Butler, Patrick Traynor, and Patrick McDaniel

A Certified Email Protocol Using Key Chains ............................................................... 525
J. Cederquist, M. Torabi Dashti, and S. Mauw

SESSION 7: KEY MANAGEMENT

Heuristics for Improving Cryptographic Key Assignment in a Hierarchy ......................... 531
Anne V.D.M. Kayem, Patrick Martin, and Selim G. Akl

An Identity-Based Key Management Framework for Personal Networks ......................... 537
Khaled Masmoudi and Hosssam Affifi

Identity-Based and Inter-Domain Password Authenticated Key Exchange for Lightweight Clients ................................................................. 544
Ford Long Wong and Hoon Wei Lim

A New and Efficient Key Management Scheme for Content Access Control within Tree Hierarchies ................................................................. 551
H. Ragab Hassen, A. Bouabdallah, and H. Bettahar

SESSION 8: DISTRIBUTED INTRUSION DETECTION AND PROTECTION SYSTEMS

Detecting Coordinated Distributed Multiple Attacks ..................................................... 557
S. Mukkamala, K. Yendrapalli, R.B. Basnet, and A.H. Sung

Neil C. Rowe

Intrusion Detection for Encrypted Web Accesses ......................................................... 569
Akira Yamada, Yutaka Miyake, Keisuke Takemori, Ahren Studer, and Adrian Perrig

Relative Entropy-Based Filtering of Internet Worms by Inspecting TCP SYN Retry Packets ................................................................. 577
Byungseung Kim and Saewoong Bahk

SESSION 9: SOFTWARE SECURITY

Kernel and Application Integrity Assurance: Ensuring Freedom from Rootkits and Malware in a Computer System ................................................. 583
Lifu Wang and Partha Dasgupta
HTTPS Hacking Protection ............................................................................................................................ 590
Thawatchai Chomsiri

Towards an Aspect Oriented Approach for the Security Hardening of Code ........................................... 595
Azzam Mourad, Marc-André Laverdière, and Mourad Debbabi

SESSION 10: PKI AND DIGITAL SIGNATURES

An Online/Offline Signature Scheme Based on the Strong RSA Assumption ........................................... 601
Ping Yu and Stephen R. Tate

Authenticating Feedback in Multicast Applications Using a Novel Multisignature Scheme Based on Cubic LFSR Sequences ................................................................................................................... 607
Saikat Chakrabarti, Santosh Chandrasekhar, Mukesh Singhal, and Kenneth L. Calvert

A Robust and Efficient Mechanism to Distribute Certificate Revocation Information Using the Grid Monitoring Architecture .......................................................................................... 614
Daniel Kouril, Ludek Matyska, and Michal Procházka

SESSION 11: PRIVACY AND TRUST

Privacy Rights Management for Privacy Compliance Systems ................................................................. 620
Ronggong Song, Larry Korba, and George Yee

The All-Or-Nothing Anti-Theft Policy—Theft Protection for Pervasive Computing .................................. 626
Jakob Illeborg Pedtger and Michael Østergaard Pedersen

On the Contribution of Preamble to Information Hiding in Mimicry Attacks ........................................ 632
H. Günes Kayacik and A. Nur Zincir-Heywood

BLSC 2007 SYMPOSIUM ON BIOINFOMATICS AND LIFE SCIENCE COMPUTING

SESSION 1: BIOINFOMATICS AND LIFE SCIENCE COMPUTING I

Detecting Protein-Domains DNA-Motifs Association in Saccharomyces cerevisiae Regulatory Networks ................................................................................................................................. 639
Nawar Malhis, Kelvin Xi Zhang, and Francis Ouellette

A Spatial Indexing Approach for Protein Structure Modeling ..................................................................... 645
Wendy Osborn

Dealing with Some Conceptual Data Model Requirements for Biological Domains ................................... 651
José Antônio Fernandes de Macêdo, Fabio Porto, Ségrio Lifschütz, and Philippe Picouet

SESSION 2: BIOINFOMATICS AND LIFE SCIENCE COMPUTING II

A Greedy Correlation-incorporated SVM-Based Algorithm for Gene Selection ........................................ 657
Mingjun Song and Sanguthevar Rajasekaran

Investigation of Relationships among Excavate Taxa Using a New Quartet-Based Phylogenetic Analysis Method ......................................................................................................................... 662
Monther Tarawneh, Bing Bing Zhou, Penghao Wang, and Albert Zomaya
Markov Models to Classify M. tuberculosis Spoligotypes ............................................................668
Georges Valétudie, Jacky Desachy, and Christophe Sola

SESSION 3: BIOINFORMATICS AND LIFE SCIENCE COMPUTING III

A Graph Based Approach to Discover Conserved Regions in DNA and Protein Sequences ..........672
Santan Challa and Parimala Thulasiraman
Attractive Feature Reduction Approach for Colon Data Classification......................................678
Mohammad Al-Shalalfah and Reda Alhajj
Biological Sequence Clustering and Classification with a Hybrid Method and Dynamic Programming ........................................................684
Wei-Bang Chen, Chengcui Zhang, and Xin Chen
Biological Systems Analysis Using Inductive Logic Programming ..............................................690
Andrei Doncescu, Yoshitaka Yamamoto, and Katsumi Inoue

SESSION 4: BIOINFORMATICS AND LIFE SCIENCE COMPUTING IV

Database-Driven Grid Computing with GridBASE ........................................................................696
Hans De Sterck, Chen Zhang, and Aleks Papo
Parallel Contour Matching and 3D Partial Retrieval in Bio-Image Database ............................702
Yong Li, Xiujuan Chen, Saeid Belkasim, and Yi Pan
Computational Methods for Analysis of Cryptic Recombination in the Performance of Genomi Recombination Detection Software .................................................................707
Jamal Alhiyafi, Cavitha Sebesan, Shiyong Lu, Melphine Harriott, Deborah Jurczyszyn, Raquel Ritchie, Felicitas S. Gonzales, and Jeffrey L. Ram
A Grid System for the Ingestion of Biological Data into a Relational DBMS .............................713
Maria Mirto, Massimo Cafaro, Sandro Fiore, and Giovanni Aloisio

SESSION 5: BIOINFORMATICS AND LIFE SCIENCE COMPUTING V

A Circular Hamming Distance, Circular Gumbel Distribution, RNA Relics and Primitive Genome ..............................................................................................................................719
Jacques Demongeot and Andrés Moreira
Kinetic Analysis of Ligand-Receptor Complex Formation with the Aid of Computer Simulation ........................................................727
Hiroshi Kobayashi, Ryuze Azuma, and Akihiko Konagaya
Application of Double Clustering to Gene Expression Data for Class Prediction ..................733
Mohammed Al-Shalalfah and Reda Alhajj
Efficiency of Hybrid Normalization of Microarray Gene Expression: A Simulation Study .......739
Mehdi Pirooznia and Youping Deng
Crick’s Hypothesis Revisited: The Existence of a Universal Coding Frame .........................745
Jean-Louis Lassez, Ryan A. Rossi, and Axel E. Bernal
# SESSION 1: SOFTWARE ENVIRONMENTS AND SIMULATIONS

Sim-PowerCMP: A Detailed Simulator for Energy Consumption Analysis in Future Embedded CMP Architectures ................................. 752  
Antonio Flores, Juan L. Aragon, and Manuel E. Acacio

An Inter-Core Communication Enabled Multi-Core Simulator Based on SimpleScalar ................................................................. 758  
Rongrong Zhong, Yongxin Zhu, Weiwei Chen, Mingliang Lin, and Weng Fai Wong

Synthetic Trace-Driven Simulation of Cache Memory ............................................. 764  
Rahman Hassan, Antony Harris, Nigel Topham, and Aris Efthymiou

# SESSION 2: SCHEDULING ALGORITHMS

A Real-Time Scheduling Algorithm with Buffer Optimization for Embedded Signal Processing Systems .................................................. 772  
Nan Guan, Mingsong Lv, Qingyu Deng, and Ge Yu

Reliability-Driven Scheduling of Periodic Tasks in Heterogeneous Real-Time Systems ................................................................. 778  
Wei Luo, Xiao Qin, and Kiranmai Bellam

A Flexible Scheduling Framework for Deeply Embedded Systems ................................................................. 784  
Karsten Walther and Jörg Nolte

# SESSION 3: ARCHITECTURE DESIGN AND SYNTHESIS

Exploring Functional Unit Design Space of VLIW Processors for Optimizing Both Performance and Energy Consumption .................................................. 792  
Abhishek Pillai, Wei Zhang, and Laurence T. Yang

An Area-Efficient Approach to Improving Register File Reliability Against Transient Errors ................................................................. 798  
Malik Kandala, Wei Zhang, and Laurence T. Yang

Hardware-Software Cosynthesis of Multiprocessor Embedded Architectures ................................................................. 804  
Gul N. Khan and Usman Ahmed

Detecting VLIW Hard Errors Cost-Effectively Through a Software-Based Approach ................................................................. 811  
Abhishek Pillai, Wei Zhang, and Dimitrios Kagaris

# SESSION 4: EMBEDDED APPLICATIONS

Embedded Intelligent Intrusion Detection: A Behavior-Based Approach ............................................................................................ 816  
Adrian P. Lauf, Richard A. Peters, and William H. Robinson

High-Flexibility Rekeying Processor for Key Management in Secure Multicast ................................................................................ 822  
Abdulhadi Shoufan, Ralf Laue, and Sorin A. Huss

A Soft Core for Pattern Recognition ............................................................................. 830  
C. Gonzalez Concejero, V. Rodellar, A. Alvarez Marquina, E. Martinez De Icaya, and P. Gómez-Vilda

Fault Tolerance in Small World Cellular Neural Networks for Image Processing ................................................................. 835  
Katsuyoshi Matsumoto, Hideki Mori, and Minoru Uehara
An Improved RAIM Scheme for Processing Multiple Outliers in GNSS .................................................. 840
Junjie Ni, Yongxin Zhu, and Wei Guo

TENAS 2007 WORKSHOP ON TELECOMMUNICATION NETWORKING, APPLICATIONS AND SYSTEMS

SESSION 1: NETWORK TECHNOLOGIES

Coordinate Magnetic Routing for Mobile Sinks Wireless Sensor Networks ............................................. 846
Shih-Hao Chang, M. Merabti, and H. M. Mokhtar

Conflict Free Address Allocation Mechanism for Mobile Ad Hoc Networks ........................................ 852
Sudath Indrasisinge, Rubem Pereira, and John Haggerty

Scalable Automaton Matching for High-Speed Deep Content Inspection ........................................... 858
Ying-Dar Lin, Kuo-Kun Tseng, Chen-Chou Hung, and Yuan-Cheng Lai

SESSION 2: NETWORK TECHNOLOGIES

Mobile Event Monitoring Protocol for Wireless Sensor Networks ....................................................... 864
F. Bouhaijs, M. Merabti, and H. M. Mokhtar

MAC Address Translation for Enabling Scalable Virtual Private LAN Services .................................... 870
Pi-Chung Wang, Chia-Tai Chan, and Po-Yen Lin

Real Time Scheduling for Audio and Video Streams .............................................................................. 876
Rubem Pereira and Ella Pereira

SESSION 3: NETWORK TECHNOLOGIES

A New Low Cost Sessions-Based Misbehaviour Detection Protocol (SMDP) in MANET ........................ 882
Tarag Fahad, Djamel Djennouri, Robert Askwith, and Madjed Merabti

A Toolkit for Virtual Large-Scale Storage in a Learning Environment .................................................... 888
Minoru Uehara

A Fuzzy-Based and Simulated IP Network Traffic Engineering Promoting Multi-Service Performance .......... 894

Multi-Purpose Models for QoS Monitoring ......................................................................................... 900
Stefan Wallin and Viktor Leijon

Low-Complexity Parallel Systolic Architectures for Computing Multiplication and Squaring over GF(2^n) ................................................................................................................................. 906
Chiou-Ying Lee and Yung-Hui Chen

SESSION 4: NETWORK APPLICATIONS

Buffer Management for Multimedia QoS Control over HSDPA Downlink ............................................. 912
Suleiman Y. Yerima and Khalid Al-Begain
SOCNE 2007 WORKSHOP ON SERVICE ORIENTED ARCHITECTURES IN CONVERGING NETWORKED ENVIRONMENTS

SESSION 1: SERVICE-ORIENTED ARCHITECTURES IN EMBEDDED SYSTEMS

Making Embedded Software Development More Efficient with SOA ................................................................. 941  
Daniel Barisic, Martin Krogmann, Guido Stromberg, and Peter Schramm

Service-Oriented Device Communications using the Devices Profile for Web Services ........................................ 947  
François Jammes, Antoine Mensch, and Harm Smit

Service-Oriented Architectures for Embedded Systems Using Devices Profile for Web Services .......................... 956  
Elmar Zeeb, Andreas Bobek, Hendrik Bohn, and Frank Golatowski

Bilateral Service Mapping Approaches Between Different Service Oriented Architectures Using Web Services and UPnP .................................................................................................................. 964  
Markus Zajac, Brigitte Oesterdiekhoff, Chris Loeser, and Hendrik Bohn

SESSION 2: KEY SERVICES IN SERVICE-ORIENTED ARCHITECTURES

Fuzzy Logic Based Admission Control for Multimedia Streams in the UPnP QoS Architecture ................................ 970  
Michael Ditze and Matthias Grawinkel

Architecture and Models for Self-Adaptability of Transport Protocols ................................................................. 977  
Nicolas Van Wambeke, François Armando, Christophe Chassot, and Ernesto Expósito

Convergent Online Charging for Context-Aware Mobile Services ........................................................................ 983  
Frank Bormann, Stephan Flake, and Jürgen Tacken

Comparative Evaluation of Converged Service-Oriented Architectures .................................................................. 989  
Davy Preuveneers, Julien Pauty, Dimitri Van Landuyt, Yolande Berbers, and Wouter Joosen

SESSION 3: SERVICE MANAGEMENT & SERVICE MEDIATION

Conceptual Framework for a Comprehensive Service Management Middleware .................................................... 995  
Farhana Zulkernine and Patrick Martin
An Analysis of Web Services Mediation Architecture and Pattern in Synapse ................................................. 1001
Chen Wu and Elizabeth Chang

An User-Driven Slight Ontology Framework Based on Meta-Ontology for Change Management ................................................................. 1007
Lina Fang, Shengqun Tang, Yan Yang, Ruliang Xiao, Ling Li, Xinguo Deng, Yang Xu, and Youwei Xu

PCAC 2007 SYMPOSIUM ON PERVASIVE COMPUTING AND AD HOC COMMUNICATIONS

SESSION 1: PERVASIVE SYSTEMS, COMPUTING AND COMMUNICATIONS I

Resource Discovery in Ubiquitous Health Care ........................................................................................................ 1014
Gautham Pallapa and Sajal Das

Managing Privacy in LBAC Systems .................................................................................................................. 1020
Claudio Agostino Ardagna, Marco Cremonini, Ernesto Damiani, Sabrina De Capitani di Vimercati, and Pierangela Samarati

Pervasive Computing with Frugal Objects ........................................................................................................... 1026
Benoît Garbinato, Rachid Guerraoui, Jarle Hulaas, Maxime Monod, and Jesper H. Spring

SESSION 2: WIRELESS AD HOC, SENSOR AND MESH NETWORKING I

A Secure MANET Routing Protocol with Resilience Against Byzantine Behaviours of Malicious or Selfish Nodes .................................................................................................................. 1032
Claude Crépeau, Carlton R. Davis, and Muthucumaru Maheswaran

Trust Enhanced Secure Mobile Ad-Hoc Network Routing .................................................................................. 1040
Venkat Balakrishnan, Vijay Varadharajan, Phillip Lucs, and Uday Kiran Tupakula

A Protocol for Macro Mobility and Multihoming Notification in Wireless Mesh Networks .................. 1047
Rainder Baumann, Olga Bondareva, Simon Heimdicher, and Martin May

SESSION 3: PERVASIVE SYSTEMS, COMPUTING AND COMMUNICATIONS II

VOICE: A Framework for Speech-Based Mobile Systems .................................................................................. 1051
Adam Sharp and Stan Kurkovsky

A Context-Based Delegation Access Control Model for Pervasive Computing ............................................. 1057
Ramiro Liscano and Kaining Wang

The Community Stack: Concept and Prototype ............................................................................................... 1065
Tuan Nguyen, Seng W. Loke, and Torab Torabi

A Ubiquitous Fashionable Computer with an i-Throw Device ........................................................................ 1072
Jupyung Lee, Seung-Ho Lim, Jong-Woon Yoo, Ki-Woong Park, Hyun-Jin Choi, and Kyu Ho Park

SESSION 4: WIRELESS AD HOC, SENSOR AND MESH NETWORKING II

Self-Organizing Spatial Regions for Sensor Network Infrastructures ................................................................. 1079
Nicola Bicocchi, Marco Mamei, and Franco Zambonelli
Multi-channel Busy-tone Multiple Access for Scalable Wireless Mesh Network
Hairong Zhou, Chihsiang Yeh, Hussein Mouftah

Secure Real-Time Traffic in Hybrid Mobile Ad Hoc Networks
Ilkka Uusitalo, Teemu Väisänen, and Juhani Latvakoski

RODMRP: Resilient On-Demand Multicast Routing Protocol
Dhammika Pathirana and Minseok Kwon

SESSION 5: PERVASIVE SYSTEMS, COMPUTING AND COMMUNICATIONS III

Building Pervasive Services Using Flock Sensor Network and Flock Container Middleware
Arne Munch-Ellingsen, Bjørn Thorstensen, Dan Peder Eriksen, and Anders Andersen

A Password-Based Authentication and Key Establishment Scheme for Mobile Environment
Jun Liu, Jianxin Liao, and Xiaomin Zhu

pKASSO: Towards Seamless Authentication Providing Non-Repudiation
Ki-Woong Park, Hyunchul Seok, and Kyu-Ho Park

SESSION 6: WIRELESS AD HOC, SENSOR AND MESH NETWORKING III

Saad Ahmed Munir, Biao Ren, Weiwei Jiao, Bin Wang, Dongliang Xie, and Jian Ma

Minimum Energy Range Assignment in Heterogeneous Ad-Hoc Networks
Miriam Di Ianni and Gianluca Rossi

A Group-Based Dynamic Key Management Scheme in Wireless Sensor Networks
Guorui Li, Jingsha He, and Yingfang Fu

SESSION 7: PERVASIVE SYSTEMS, COMPUTING AND COMMUNICATIONS IV

An Agent-Based Architecture for Context-Aware Communication
Romelia Plesa and Luigi Logrippo

Towards Device-Blending: Model and Challenges
Harinder Seera, Seng Wai Loke, and Torab Torabi

A Modular Architecture for Context Sensing
Julián Grigera, Andrés Fortier, Gustavo Rossi, and Silvia Gordillo

Performance Evaluation of RFID Anti-Collision Algorithm with FPGA Implementation
Huansheng Ning, Yu Cong, Z.-Q. Xu, T. Hong, J.-C. Zhao, and Yan Zhang

SESSION 8: WIRELESS AD HOC, SENSOR AND MESH NETWORKING IV

Simulation Study of AODV Performance over IEEE 802.15.4 MAC in WSN with Mobile Sinks
Canfeng Chen and Jian Ma

Cross Layer Routing for Multihop Cellular Networks
G Kannan, S.N. Merchant, and U.B. Desai
An Efficient Online/Offline Signcryption Scheme for MANET
Zhong Xu, Guanzhong Dai, and Deming Yang

An Optimal Node Selection Scheme in Multi-Hop Wireless Network
Jian Jiang and Jian Ma

SESSION 9: PERVASIVE SYSTEMS, COMPUTING AND COMMUNICATIONS V

A Robust Lightweight Security Solution for RFID Security
Anahita Vyas, Sheikh I. Ahamed, Munirul M. Haque, and Madhavi V.S. Jayanthi

Profile-Based Sustained Service Lookup in Areas of Sudden Dense Population
Sherif G. Aly and Amal A. El-Nahas

P2P-Leveraged Mobile Live Streaming
Jinfeng Zhang, Jianwei Niu, Rui He, Jianping Hu, and Limin Sun

SESSION 10: WIRELESS AD HOC, SENSOR AND MESH NETWORKING V

PEAN: A Probabilistic Energy Aware Neighbor Monitoring Protocol for Mobile Ad Hoc Networks
Hung-Yuan Hsu and Ali R. Hurson

An Adaptable Crash Faults Detector for Mobile Ad-Hoc Networks
Mourad Elhadef and Fahim Abdun-Nur

A Parallel Multi-Path Routing Algorithm for Flexible Transmission in Wireless Sensor Networks
Zhendong Wu and Shanping Li

SESSION 11: PERVASIVE SYSTEMS AND WIRELESS NETWORKS I

Design and Implementation of EPARK Wireless Parking Payment System Using Pervasive Computing
Darrel A. Mazzari, Patrick Seraphine, Sheikh I. Ahamed, and Sreekanth G. Balasubramanian

Friend Pointer Registration Strategy and its Scheme for Mobile Location Management
Daqing Xu and Hisao Kameda

Analytic Model of IEEE 802.15.4 with Download Traffic
Tae Ok Kim, Jin Soo Park, and Bong Dae Choi

TMBT: An Efficient Index Allocation Method for Multi-Channel Data Broadcast
Shuoi Wang and Hsing-Lung Chen

SESSION 12: PERVASIVE SYSTEMS AND WIRELESS NETWORKS II

Dynamic Bandwidth Management for Handoffs with RSVP in 802.16/WLAN Environment
Yen-Wen Chen, I-Hsuan Peng, and Shiu-Tsuen Guan

Simulation-Based Performance Evaluation of Mobile Ad Hoc Routing Protocols in a Swarm of Unmanned Aerial Vehicles
M.T, Hyland, B.E. Mullins, R.O. Baldwin, and M.A. Temple
UCI 2007 SYMPOSIUM ON UBIQUITOUS COMPUTING AND INTELLIGENCE

SESSION 1: ADAPTIVE AND LEARNING SYSTEMS

Mining Concept Drifts from Data Streams Based on Multi-Classifiers ................................................................. 1270
Yue Sun, Guojun Mao, Xu Liu, and Chunnian Liu

Interface Adaptation Based on User Expectation ........................................................................................................ 1277
Xiaoyan Peng and Daniel L. Silver

A Comparative Analysis of Personalization Techniques for a Mobile Application ............................................................ 1283
Petteri Nurmi, Marja Hassinen, and Kun Chang Lee

SESSION 2: CONTEXT-AWARE COMPUTING

Context-Aware Elevator Scheduling ...................................................................................................................................... 1289
Thomas Strang and Christian Bauer

A Location-Aware Mobile Call Handling Assistant ........................................................................................................ 1295
Ibrahim Bokharouss, Wayne Wobcke, Yu-Wa Chan, Andrew Limaru, and Anna Wong

Context Inferring in the Smart Home: An SWRL Approach ............................................................................................ 1303
Vincent Ricquebourg, David Durand, David Menga, Bruno Marhic, Laurent Delahoche, Christophe Logé, and Anne-Marie Jolly-Desodt

SESSION 3: MOBILE COMPUTING

Fuzzy Logic-Based Event Notification in Sparse MANETs .................................................................................................. 1309
Anna Lekova, Katrine Skjelsvik, Thomas Plagemann, and Vera Goebel

Performance Analysis of Location Estimation Algorithm in ZigBee Networks Using Received Signal Strength .......................................................... 1315
Hyunggi Cho, Myungsok Kang, Jonghyuk Park, Byungsung Park, and Hagbae Kim

Service Discovery Reliability and Network Neighbor Knowledge in Pervasive Computing Environments ............................................................................ 1320
Michael S. Thompson and Scott F. Midkiff

Cost-Function-Based Network Selection Strategy in Integrated Wireless and Mobile Networks ............................................................................ 1327
Wei Shen and Qing-An Zeng

SESSION 4: UBIQUITOUS AND PERVASIVE COMPUTING I

Informing the Design of User Studies on Conceptual Interference Frameworks ........................................................ 1333
Ricardo Morla and Nigel Davies

Domain Modelling for Ubiquitous Computing Applications .......................................................................................... 1339
Anthony Harrington and Vinny Cahill

A Novel Adaptive Scheme to Improve the Performance of IEEE 802.11n WLANs ......................................................... 1347
Sangheetha Salai Parthasarathy and Qing-An Zeng
A Dynamic Retargettable Multi-Protocol RFID Reader/Writer .............................................................. 1353
Shinsuke Kobayashi, Ken Sakamura, and Tatsushi Morokuma

SESSION 5: NOVEL APPLICATIONS AND SYSTEMS

Speaker Tracking and Identifying Based on Indoor Localization System and Microphone Array ............................................................... 1360
Xiaojie Chen, Yuanchun Shi, and Wenfeng Jiang

Java (J2ME) Front-End for Distributed Speech Recognition ............................................................... 1366
Dmitry Zaykovskiy and Alexander Schmitt

Design of a Digital Baseband Processor for UWB Transceiver on RFID Tag ............................................................... 1371
Yuechao Niu, Majid Baghiae Nejad, Hannu Tenhunen, and Li-Rong Zheng

SESSION 6: INTELLIGENT ENVIRONMENTS

Service Configuration Management for Ambient Intelligence: The COMANCHE Approach ............................................................... 1375
Sara Grilli, Effie Makri, Konrad Steblovnik, Sofoklis Efremidis, Nikos Mouratidis, Petri Mähönen, and Elena Meshkova

Phygital Map: Accessing Digital Multimedia from Physical Map ............................................................... 1381
Jin Nakazawa and Hideyuki Tokuda

Using Mobile Agent-Based Middleware to Support Distributed Coordination for Vehicle Telematics ............................................................... 1387
Jinhua Guo and Guangming Xing

SESSION 7: SENSOR NETWORKS

On the Problem of Energy Efficiency of Multi-Hop vs One-Hop Routing in Wireless Sensor Networks ............................................................... 1393
Szymon Fedor and Martin Collier

A Robust Error Concealment Algorithm in Wireless Networks ............................................................... 1399
Jianwei Niu, Congying Wei, Rui He, and Jian Ma

Role Assignment for Data Aggregation in Wireless Sensor Networks ............................................................... 1403
Maulin Patel, S. Venkatesan, and Doug Weiner

Networks of Sensors in Public Spaces: Combining Technology with Art ............................................................... 1409
Sameer Pai, Philip Kuryloski, Henry Yip, Srikant Yennamandra, Stephen Wicker, Kirsten Boehner, and Geri Gay

SESSION 8: UBIQUITOUS AND PERVASIVE COMPUTING II

Verifying Identifier-Authenticity in Ubiquitous Computing Environment ............................................................... 1416
Tetsuo Kamina, Toshinori Aoki, Yoshiteru Eto, Noboru Koshizuka, Jun Yamada, and Ken Sakamura

A Routing Metric for Load-Balancing in Wireless Mesh Networks ............................................................... 1422
Liang Ma and Mieso K. Denko
Design and Optimization of Wireless Sensor Network with Mobile Gateway
Mukesh Shakya, Jianhua Zhang, Ping Zhang, and Mattias Lampe

UBISAFE 2007 SYMPOSIUM ON UBISAFE COMPUTING

mCoupons: An Application for Near Field Communication (NFC)
Sandra Dominikus and Manfred Aigner

A Distributed Efficient Architecture for Wireless Sensor Networks
Chuan Lin, Yan-Xiang He, Chao Peng, and Laurence T. Yang

Functional Safety Problems in the Ubiquitous Environment
Lei Jing and Zixue Cheng

A Verifiable Lightweight Escape Analysis Supporting Creational Design Patterns
Gilles Grimaud, Yann Hodique, and Isabelle Simplot-Ryl

Password-Based Access Control Scheme with Remote User Authentication Using Smart Cards
Chen Yang, Wenping Ma, Benxiong Huang, and Xinmei Wang

Flexible and Manageable Delegation of Authority in RBAC
Tuan-Anh Nguyen, Linying Su, George Inman, and David Chadwick

The Dual Ownership Model: Using Organizational Relationships for Access Control in Safety Supply Chains
Alexander Ilic, Florian Michahelles, and Elgar Fleisch

S3PAS: A Scalable Shoulder-Surfing Resistant Textual-Graphical Password Authentication System
Huanyu Zhao and Xiaolin Li

Graph Matching Based Authorization Model for Efficient Secure XML Querying
Seunghan Chang, Artem Chebotko, Shiyong Lu, and Farshad Fotouhi

SESSION 3: TRUSTED AND DEPENDABLE COMPUTING

Certificate Chain Discovery in Web of Trust for Ad Hoc Networks
Hisashi Mohri, Ikuya Yasuda, Yoshiaki Takata, and Hiroyuki Seki

Mobile Agents and the Deus Ex Machina
Shane Balfe and Eimear Gallery

Presumptive Selection of Trust Evidences: A Non Invasive, Application-Contained Solution
Pierpaolo Dondio and Stephen Barrett

Integrating Fault Recovery and Quality of Security in Real-time Systems
Kiranmai Bellam, Ziliang Zong, Mohammed I. Alghamdi, Mais Nijim, and Xiao Qin

SESSION 4: GRID, WORKFLOW, AND WEB SERVICES

Itinerary-Based Access Control for Mobile Tasks in Scientific Workflows
Zijiang Yang, Shiyong Lu, and Ping Yang

Pattern Templates for Automating Business Choreography on Web Services
Incheon Paik and Hiroto Suzuki
Advanced OSGi Security Layer
Chi-Chih Huang, Pang-Chieh Wang, and Ting-Wei Hou

QoS-LI: QoS Loss Inference in Disadvantaged Networks
Vidyaraman Sankaranarayanan, Shambhu Upadhyaya, and Kevin Kwiat

SESSION 5: INTELLIGENCE AND DATA MINING

U&I Aware: A Framework Using Data Mining and Collision Detection to Increase Awareness for Intersection Users
Flora Dilys Salim, Seng Wai Loke, Andry Rakotonirainy, and Shonali Krishnaswamy

Interaction Analysis of Heterogeneous Monitoring Data for Autonomic Problem Determination
Mohammad A. Munawar, Kevin Quan, and Paul A.S. Ward

Integration of Data Compression and Cryptography: Another Way to Increase the Information Security
Chuanfeng Lv and Qiangfu Zhao

SESSION 6: AUTONOMIC AND AGENT SYSTEMS

Determining Configuration Probabilities of Safety-Critical Adaptive Systems
Rasmus Adler, Marc Förster, and Mario Trapp

A Utility-Based Adaptivity Model for Mobile Applications
Mourad Alia, Viktor S. Wold Eide, Nearchos Paspallis, Frank Eliassen, Svein Olav Hallsteinsen, George A. Papadopoulos

AEGIS: A Proactive Methodology to Shield Against Zero-Day Exploits
Madhusudhanan Chandrasekaran, Mukarram Baig, and Shambhu Upadhyaya

WAMIS 2007 WORKSHOP ON WEB AND MOBILE INFORMATION SERVICES

SESSION 1: SERVICE MODELLING AND COORDINATION

A Versioning Model for Enterprise Services
Rainer Weinreich, Thomas Ziebermayr, and Dirk Draheim

Formalizing Web Service Choreography Interface
Yu Huang, Chunxiang Xu, Hanpin Wang, Yunni Xia, Jiaqi Zhu, and Cheng Zhu

Research Issues of Privacy Access Control Model for Mobile Ad Hoc Healthcare Applications with XACML
Patrick C. K. Hung, Jude Andrade, Yongming Chen, Ranny Huang, Miguel Vargas Martin, and Yi Zheng

Using Argumentative Agents to Manage Communities of Web Services
Jamal Bentahar, Zakaria Maamar, Djamel Benslimane, and Philippe Thiran

SESSION 2: ADVANCED TECHNIQUES FOR SERVICE PROVISIONING

QoS-Broker for Transactional Workloads
Celso Rafael Santos, João Costa, and Pedro Furtado
Building Web-Base SIP Analyzer with Ajax Approach ................................................................. 1613
Quincy Wu and Yan-Hsiang Wang

Performance Evaluation of Agent Network Topologies Based on the AOCD Architecture .............. 1618
Hao Lan Zhang, Clement H.C. Leung, and Gitesh K. Raikundalia

Learning Business Strategies for Competitive Electronic Marketplaces ....................................... 1624
Isabel Praça, Maria João Viamonte, Carlos Ramos, and Zita Vale

SESSION 3: MOBILE SERVICES

Mobile Phone as an Inspections Tool – Experiences with a Service for Field Force ..................... 1630
Teemu Jalava and Jukka K. Nurminen

Mobile Devices for Personal Smart Spaces ....................................................................................... 1636
Iván Marsá-Maestre, Miguel A. López-Carmona, Juan R. Velasco, and Álvaro Paricio

On the Integration of Mobility in a Fault-Tolerant e-Health Web Information System .................. 1642
Florence Balbastro, Alfredo Capozucca, and Nicolas Guielfi

HWISE 2007 WORKSHOP ON HETEROGENEOUS WIRELESS NETWORKS

SESSION 1: ARCHITECTURE OF HETEROGENEOUS WIRELESS NETWORKS

Multi-Agent System for Directed Diffusion in Wireless Sensor Networks ........................................ 1648
Haroon Malik, Elhadi Shakshuki, Travis Dewolf, and Mieso K. Denko

On Slave-Slave Bridging with Non-Acknowledged GTS Access in 802.15.4 Beacon Enabled Networks ................................................................. 1654
Jelena Mitić

A Novel Model for User Mobility in Wireless Sensor Networks ..................................................... 1660
Sang-Sik Kim and Ae-Soon Park

SESSION 2: DESIGN OF HETEROGENEOUS WIRELESS NETWORKS

A Novel Distributed Topology Control Algorithm for Ad Hoc Networks ...................................... 1666
Peng He, Jiantong Li, and Wei Dong

Efficient Hybrid Channel Access for Data Intensive Sensor Networks .......................................... 1672
Chih-Kuang Lin, Vladimir Zadorozhny, and Prashant Krishnamurthy

E-ITRC Protocol with Long & Adjustable Range on Underwater Acoustic Sensor Network ........... 1678
Donghoon Kim, Yong-Man Cho, Changhwa Kim, Sangkyung Kim, Soo-Hyun Park, and Tae-Wong Kang

SESSION 3: NETWORKING ON HETEROGENEOUS NETWORKS

Dynamic Route Selection Policy Protocol in MANET ................................................................. 1686
Fang Jing, R.S. Bhuvaneswaran, Yoshiaki Katayama, and Naohisa Takahashi

Comparative Study of Reactive and Proactive Routing Protocols Performance in Mobile Ad Hoc Networks ......................................................................................... 1692
C. Mbarushimana and A. Shahrabi
A Geo-Routing Algorithm in Planar Graph for Ad Hoc Wireless Networks ................................................. 1698 
Rashid Bin Muhammad

Hierarchical Communications for Battlefields ........................................................................................... 1703 
Mimoza Durresi, Arjan Durresi, and Leonard Barolli

SESSION 4: ENERGY-AWARE PROTOCOLS I

Energy Efficient Query Processing in Wireless Sensor Network ................................................................. 1709 
Ashiqur Rahman and Sajid Hussain

A Routing Method by Reactive Energy Decisive in Wireless Sensor Networks ............................................. 1714 
Ying-Hong Wang, Chih-Peng Hsu, Yi-Chien Lin, Chien-Shan Kuo, and Hsin-Yi Ho

Power-Efficient and Path-Stable Broadcasting Scheme for Wireless Ad Hoc Networks .......................... 1720 
Yeim-Kuan Chang, Yi-Wei Ting, and Shang-Chun Wu

Kiyohiro Morita, Keiji Ozaki, Naohiro Hayashibara, Tomoya Enokido, and Makoto Takizawa

SESSION 5: ENERGY –AWARE PROTOCOLS II

Energy Efficient Spatial Query Processing in Wireless Sensor Networks ..................................................... 1732 
Kyungseo Park, Byoungyong Lee, and Ramez Elmasri

DSSP: A Dynamic Sleep Scheduling Protocol for Prolonging the Lifetime of Wireless 
Sensor Networks ............................................................................................................................................. 1738 
Eyuphan Bulut and Ibrahim Korpeoglu

A Testbed with a Practical Smart Antenna for Directional MAC Protocols in Ad hoc 
Networks ..................................................................................................................................................... 1744 
Hikaru Mitsuhashi, Masahiro Watanabe, Sadao Obana, Masaki Bandai, and Takashi Watanabe

SESSION 6: APPLICATIONS OF HETEROGENEOUS WIRELESS NETWORKS

Secure Mobile Ad Hoc Routing ..................................................................................................................... 1750 
Xu Li, Amiya Nayak, Isabelle Ryl, David Simplot, and Ivan Stoimenovic

A Data Dissemination Method for Information Sharing Based on Inter-Vehicle 
Communication ............................................................................................................................................... 1756 
Hiroyuki Sago, Masako Shinohara, Takahiro Hara, and Shojiro Nishio

A Scheme for Low Path Loss in Object Monitoring in Grid Sensor Network ........................................... 1762 
Thanh Hai Trinh, Ji Hoon Kim, and Hee Yong Youn

SMARTEL 2007 WORKSHOP ON SMART HOMES FOR TELE-HEALTH

SESSION 1: TELE-HEALTH TECHNOLOGIES 1

Smart Carpet: A Footstep Tracking Interface ................................................................................................ 1767 
Domnic Savio and Thomas Ludwig

Prediction Models for a Smart Home Based Health Care System ............................................................... 1774 
Vikramaditya Jakkula, Diane J. Cook, and Gaurav Jain
Wearable System-on-a-Chip Pulse Radar Sensors for the Health Care: System Overview

Domenico Zito, Domenico Pepe, Bruno Neri, Danilo De Rossi, and Antonio Lanatà

SESSION 2: MONITORING AND SERVICES 1

Services Driven Cross-Layer Routing Protocol for Mobile Ad Hoc Networks

Jun Ren, Xiaolin Zhang, and Yunhui Liu

Towards Integrated Services for Health Monitoring

Chuming Rong, Hein Meling, and Dagfinn Waage

Multi-Stage Real Time Health Monitoring via ZigBee in Smart Homes

S. Dagtas, G. Pekhteryev, and Z. Sahinoglu

SESSION 3: INTELLIGENT AND CONTEXT AWARE SERVICES 1

Location Learning for Smart Homes

Eric D. Manley and Jitender S. Deogun

Bayesian Filtering and Anonymous Sensors for Localization in a Smart Home

Yousef Rahal, Philippe Mabilleau, and Hélène Pigot

Addressing Context Awareness Techniques in Body Sensor Networks

Barbara T. Korel and Simon G.M. Koo

Engineering Tele-Health Solutions in the Ambient Assisted Living Lab

Eric Ras, Martin Becker, and Jan Koch

Wireless Sensor Network Applications in Urban Telehealth

Patricia A. Morreale

SESSION 4: TELE-HEALTH TECHNOLOGIES 2

Multimodal Home Monitoring of Elderly People—First Results from the LASS Study

Michael Marschollek, Wolfram Ludwig, Ines Schapievks, Elin Schriever, Rainer Schubert, Hartmut Dybowski, Hubertus Meyer zu Schwabedissen, Juergen Howe, and Reinhold Haux

Integration of Smart Home Technologies in a Health Monitoring System for the Elderly

Amaya Arcelus, Megan Howell Jones, Rafik Goubran, and Frank Knoefel

Low Cost HIV Testing System for Tele-Health Applications

Ali El Kateeb and Lubna Al Azzawi

Wireless Sensor Networks for Home Health Care

SESSION 5: INTELLIGENT AND CONTEXT AWARE SERVICES 2

An Ontology-Based Context Model for Home Health Monitoring and Alerting in Chronic Patient Care Networks

F. Paganelli and D. Giuliani

SESSION 3: TRAFFIC CONTROL AND PROTOCOL

Coverage Based Intercluster Communication for Load Balancing in Wireless Sensor Networks ............................................................................................................................... 1935
Nauman Israr and Irfan Awan

Profiling Delay and Throughput Characteristics of Interactive Multimedia Traffic over WLANs Using OPNET ............................................................................................................................... 1941
Subaimi Bin Abd Latif, M.A. Rashid, and F. Alam

A New Adaptive Congestion Control Mechanism for the Internet Based on RED ............................................................................................................................... 1946
F. AL-Raddady and Mike Woodward

The Effect of TRS/TCS Handshake on TCP ............................................................................................................................... 1952
Stylianos Papanastasiou, Mohamed Ould-Khaoua, and Vassilis Charissis

INVITE 2007 WORKSHOP ON NETWORK-BASED VIRTUAL REALITY AND TELE-EXISTENCE

SESSION 1: TELE-IMMERSION

Distance Learning in Tele-Immersion Environment ............................................................................................................................... 1959
Tetsuro Ogi and Hiroaki Sakon

Tele-Immersive Collaboration Using High-Resolution Video in Tiled Displays Environment ............................................................................................................................... 1965
Yasuo Ebara, Nobuyuki Kukimoto, Jason Leigh, and Koji Koyamada

VR Interaction in Real-time between Avatar with Voice and Gesture Recognition System ............................................................................................................................... 1971
Shunji Uchino, Norihiro Abe, Kazuaki Tanaka, Tetsuya Yagi, Hirokazu Taki, and Shoujie He

Design and Construction of Virtual Spaces for Communications ............................................................................................................................... 1977
Yuki Sogabe

SESSION 2: VIRTUAL REALITY

An Implementation and Experimentation of a Composite Video Streaming ............................................................................................................................... 1983
Kaoru Sugita and Masao Yokota

Asynchronous CVE Support System by Continuous VR Space Archiver ............................................................................................................................... 1989
Hiroki Ogasawara and Yoshitaka Shibata

Collaborative Virtual Environments Using Traditional Japanese Crafting Objects over the Ultra High-Speed Network ....................................................................................................................................... 1993
Tomoyuki Ishida, Go Chiba, Akihiro Miyakawa, and Yoshitaka Shibata

A Theoretical Consideration on Artificial Imitation of Human Action Based on Mental Image Directed Semantic Theory ............................................................................................................................... 1999
Masao Yokota

SESSION 3: SERVICE-ORIENTED APPROACH

Resource-Oriented Computing: Towards a Universal Virtual Workspace ............................................................................................................................... 2005
Jing-Ying Chen
Middleware for Ubiquitous Service-Oriented Spaces on the Web

Geert Vanderhulst, Kris Luyten, and Karin Coninx

Providing More Customized Services for Online Games Using Service Oriented Architecture and Three-Tier Views: A Case Study “Mankind”

Alan Y. S. Chiang, Dickson K.W. Chiu, Patrick C. K. Hung, and Yi Zheng

Decentralized Information Retrieval Systems Based on Contents Information for Ubiquitous Services

Takeshi Tsuchiya, Hirokazu Yoshinaga, and Keiichi Koyanagi

SESSION 4: E-LEARNING

An Implementation of Understanding Information Management System for Real-time Interactive Distance Education Environment

Aiguo He

Enhanced Semantic Question Answering System for e-Learning Environment

Ying-Hong Wang, Wen-Nan Wang, and Chu-Chi Huang

A Prediction Mechanism of Adaptive Learning Content in the Scalable E-Learning Environment

Chih-Ping Chu and Yi-Chun Chang

Functional Safety Problems in the Ubiquitous Environment

Lei Jing and Zixue Cheng

Author Index
