The Third International Conference on Systems and Networks Communications

(ICSNC 2008)

Sliema, Malta
26-31 October 2008
The Third International Conference on Systems and Networks Communications
ICSNC 2008 Table of Contents

ICSNC 2008 Preface
ICSNC 2008 Committees
I-CENTRIC 2008 Preface
I-CENTRIC 2008 Technical Program Committee

ICSNC 1: WINET I
Multi-user Frequency Pre-filtering Technique for MIMO SFBC MC-CDMA Systems ................................................................. 1
    Adao Silva, Elídio Silva, and Atílio Gameiro
Impacts of Transmission Range in Homogeneous Wireless Networks ....................................................... 6
    Mohamed Djoudi
Design, Simulation and Implementation of a Channel Equalizer for DVB-T On-channel Repeaters .......................................................... 11
    Mikel Mendicute, Iker Sobrón, Javier Del Ser, Pablo Prieto, and Ricardo Isasi
Fairness in a Static Wireless Network ........................................................................................................ 17
    Marc Gilg, Pascal Lorenz, and Abderrahim Makhlouf

ICSNC 2: WINET II
Intrusion Detection: A Survey .............................................................................................................. 23
    F. Sabahi and A. Movaghar
Analysis of User Experience of Access Selection in Multi-operator Environments ................................................ 27
    Petteri Pöyhönen, Jan Markendahl, and Ove Strandberg
Modeling and Design of a Novel Backward-Wave Scanning-Beam Antenna Based on Negative Refractive Index Material Structures .................................................................33
  Abdelaziz Hamdi, Ammar B. Kouki, and Abdelaziz Samet

Management Model for Wireless Broadband Networks .................................................................38
  Nuno Salvador, Vitor Filipe, Carlos Rabadao, and António Pereira

Employing of Clustering Algorithm CWN-PAM in Mobile Network Planning ..................................44
  Manal El Harby and Lamiaa Fattouh Ibrahim

ICSNC 3: HSNET I

Survivability Quantification of Real-Sized Networks Including End-to-End Delay Distributions ..........................................................50
  Poul E. Heegaard and Kishor S. Trivedi

Routing and Performance Analysis of Double-Buffered Omega Networks Supporting Multi-class Priority Traffic .........................................................56
  D. C. Vassiladiis, G. E. Rizos, C. Vassilakis, and E. Glavas

A Joint Coded Two-Step Interference Cancellation Technique for a Multiuser MIMO-SC-FDE System ........................................................................64
  A. Aljohani and J. Chambers

Traffic Demand Derivation in IP-Based Multi Service Class Environment ........................................69
  Lucian Ioan, Grazziela Niculescu, and Eugen Borcoci

ICSNC 4: HSNET II

Blind a Daptive Channel Shortening with a Generalized Lag-Hopping Algorithm Which Employs Squared Auto-Correlation Minimization [GLHSAM] ....................................................75
  K. Maatoug and J. A. Chambers

AURED – Autonomous Random Early Detection for TCP Congestion Control ........................................79
  Hsiu-Jy Ho and Wei-Ming Lin

The Design and Implementation of Profile Management Module Including Policy-Based Repository in the Customer Network Management System for Corporate-Level Network Service Clients ........................................................................85
  Eun-jin Ko, Il-gu Jung, and Gil-haeng Lee

A Minimization Cost Heuristic Approach for Traffic Grooming in IP-over-WDM Networks ..................................................................................................................90
  N. S. C. Correia, J. Coimbra, and M. C. R. Medeiros

ICSNC 5: HSNET III

Group Tone Spectrum Management Algorithm (GTSM) for VDSL2 Technology ....................................98
  Ioannis Karamitsos, Katerina Vagelatou, and Gianna Koliopanou

OFFH-CDMA Merged M-Sequence/Hyperbolic Code for Two Weights One Length WDM System ...............................................................103
  Ferchichi Moez, Najjar Monia, and Rezig Houria
Performance Modeling of Fault Tolerant Fully Adaptive Wormhole Switching
2-D Meshes in Presence of Virtual Channels .................................................................109
S. Nickmanesh, A. Movaghar, and F. Rookhosh
Performance Improvement of DSTBC Systems Using Decision Feedback
Approach ........................................................................................................................................115
Tetsuki Taniguchi, Yang Liu, and Yoshio Karasawa
A Simplified Deterministic Approach for Accurate Modeling of the Indoor
Power Line Channel ....................................................................................................................121
A. Rennane, C. Konaté, and M. Machmoum

ICSNC 6: SENET I
A Novel Prioritized Control Scheme Using Random Access Period Control
for Wide Area Ubiquitous Wireless Networks ...........................................................................127
Yoshitaka Shimizu, Fusao Nuno, and Kazuji Watanabe
An Algorithm for Selecting the Cluster Leader in a Partially Connected Sensor
Network ........................................................................................................................................133
Mohammad Mostafizur Rahman Mozumdar, Francesco Gregoretti,
Luciano Lavagno, and Laura Vanzago
Guodong Teng, Kougen Zheng, and Wei Dong
Differences in Robustness of Self-Organized Control and Centralized Control
in Sensor Networks Caused by Differences in Control Dependence ....................................145
Masashi Sugano, Yuichi Kiri, and Masayuki Murata

ICSNC 7: SENET II
Use of MPEG-21 for Security and Authentication in Biomedical Sensor
Networks .................................................................................................................................151
Wolfgang Leister, Truls Fretland, and Ilango Balasingham
Automated Testing of WSN Applications ..............................................................................157
Mohammad Al Saad, Elfriede Fehr, Nicolai Kamenzky, and Jochen Schiller
Gemiga: Service Discovery for Mobile Robotics .................................................................167
Philipp A. Baer, Thomas Weise, and Kurt Geihs
Protecting the DNS Infrastructure of a Top Level Domain: Dynamic Firewalling
with Network Sensors ..........................................................................................................173
Joao Afonso and Pedro Veiga

ICNSC 8: SESYS
HIP Tags Privacy Architecture .............................................................................................179
Pascal Urien, Dorice Nyami, Simon Elrharbi, Hervé Chabanne, Thomas Icart,
Cyrille Pépin, Mathieu Bouet, Daniel De O. Cunha, Vincent Guyot, Guy Pujolle,
E. Gressier-Soudan, and J.-F. Susini

</tbody>
</table>
Implementation of Traffic Engineering in NGNs Using Hybrid Genetic Algorithms ..............................................................262
Alex Vallejo, Agustín Zaballos, David Vernet, David Cutiller, and Jordi Dalmau

ICSNC 11: MHNET I
Modified DMAC Clustering Algorithm for VANETs ..................................................................................................................268
Grzegorz Wolny
PMIPv6 Route Optimization Mechanism Using the Routing Table of MAG ..........................................................274
Byung-Jin Han, Jae-Min Lee, Jong-Hyouk Lee, and Tai-Myoung Chung
Performance Analysis of Route Optimization on Proxy Mobile IPv6 ..............................................................................280
Jae-Min Lee, Jong-Hyouk Lee, and Tai-Myoung Chung
Network Coding for Detection and Defense of Sink Holes in Wireless Reconfigurable Networks ...........................................286
Rafaela Villalpando, Cesar Vargas, and David Munoz
An Analysis of the Nanosatellites Launches between 2004 and 2007 .................................................................................292
Maria-Mihaela Burlacu and Joséphine Kohlenberg
Space Imaging Infrastructure Development of PUBSAT and NERVA Orbital Vehicle ......................................................298
Radu D. Rugescu, Josephine Kohlenberg, and Mahendiran Prathaban

ICSNC 12: MHNET II
Ticket-Based Authentication Mechanism for Proxy Mobile IPv6 Environment ..................................................................................304
Joong-Hee Lee, Jong-Hyouk Lee, and Tai-Myoung Chung
Adaptive DSR Protocol with Cooperative Agents for Different Mobility and Traffic Patterns .............................................310
M. Rajabzadeh, F. Adibniya, and M. Ghasemzadeh
Testing Methodology Using SDL for an On-demand Routing Protocol in MANET ...........................................................................316
F. Rookhosh, A. Toroghi Haghighat, and S. Nickmanesh
Improvement of TCP Performance in Ad Hoc Networks Using Cross Layer Approach .................................................................322
Seyed Mohsen Mirhosseini and Fatemeh Torgheh
Wireless Routing Protocol Based on Trust Evaluation ........................................................................................................329
Anis Ben Arbia, Hedi Hamdi, and Habib Youssef

I-CENTRIC 1: Advanced Applications
A Fuzzy Logic Based Model for Representing and Evaluating Service Composition Properties ..................................................335
Heiko Pfeffer, Steffen Krüssel, and Stephan Steglich
Long Term Management of Private Digital Assets ..................................................................................................................343
Heinrich Jasper
Elder Care Architecture ........................................................................................................................................................349
Isabel Marcelino, Joao Barroso, José Bulas Cruz, and António Pereira
Remote Robot Training of Its Artificial Neural Network through GSM Communication

G. Venkat Ramu, R. Hariprakash, K. Visalakshi, S. Ananthi, and K. Padmanabhan

I-CENTRIC 2: Storage & Retrieval

Semantic Policies for Service Access in Mobile Supported Sensor Networks

Sarfraz Alam, Josef Noll, and Dumitru Roman

Capturing User Contexts: Dynamic Profiling for Information Seeking Tasks

Roman Y. Shtykh and Qun Jin

Supports for Identity Management in Ambient Environments - The Hydra Approach

Hasan Akram and Mario Hoffmann

Gradual Adaption Model for Estimation of User Information Access Behavior

Jian Chen, Roman Y. Shtykh, and Qun Jin

I-CENTRIC 3: Monitoring

Automatic Control of Students’ Attendance in Classrooms Using RFID

Francisco Silva, Víctor Filipe, and António Pereira

Gateways and Capacity in Ad Hoc Networks

Erlend Larsen, Vinh Pham, Paal Engelstad, and Oivind Kure

Some Problems & Methods for Remotely Controllable Automatic Home Security Systems

R. Hariprakash, G. Venkat Ramu, T. Rajakumari, S. Ananthi, and K. Padmanabhan

Author Index
