International Workshop on Systems Development in SOA Environments (SDSOA 2007)

Workshop Organization

Workshop Introduction

The Landscape of Service-Oriented Systems: A Research Perspective ..............................................................1
  Kostas Kontogiannis, Grace A. Lewis, Dennis B. Smith, Marin Litoiu, Hausi Müller, Stefan Schuster, and Eleni Stroulia

Engineering Issues

Information as a Service: Modeling and Realization ..........................................................................................7
  Asit Dan, Robert Johnson, and Ali Arsanjani

Quality Attributes for Service-Oriented Architectures .....................................................................................13
  Liam O’Brien, Paulo Merson, and Len Bass

Architectural Mismatch in Service-Oriented Architectures ........................................................................20
  Kevin Bierhoff, Mark Grechanik, and Edy S. Liongosari

Contracts and Middleware for Safe SOA Applications ..................................................................................26
  Beata Sarna-Starosta, R. E. K. Stirewalt, and Laura K. Dillon

Supporting Change Impact Analysis for Service Oriented Business Applications .......................................32
  Hua Xiao, Jin Guo, and Ying Zou
Business and Operations Issues

A Framework for Roles for Development, Evolution and Maintenance of SOA-Based Systems ................................................................. 38
  Mira Kajko-Mattsson, Grace A. Lewis, and Dennis B. Smith

Issues in the Design of Flexible and Dynamic Service-Oriented Systems .............................................................................. 44
  Gerald C. Gannod, Janet E. Burge, and Susan D. Urban

Cross Cutting Concerns

Challenges in Creating Environments for SOA Learning ................................................................. 50
  Nicolás López, Rubby Casallas, and Jorge Villalobos

Mined-Knowledge and Decision Support Services in Electronic Health ...................................................... 55
  Kamran Sartipi, Mohammad H. Yarmand, and Douglas G. Down
