2007 International Workshop on Modeling in Software Engineering

(MISE 2007)

Minneapolis, Minnesota
20 – 26 May 2007
Workshop Organization

Model Composition

Model or Mould? A Challenge for Better Traceability.................................................................01
  S. J. Morris and O. C. Z. Gotel

A Relationship-Driven Framework for Model Merging.................................................................07
  Mehrdad Sabetsadeh, Shiva Nejati, Steve Easterbrook, and Marsha Chechik

A Case Study on Semantic Unit Composition..............................................................................13
  Kai Chen, Janos Sztipanovits, and Sandeep Neema

Abstraction

Putting the “Engineering” into Software Engineering with Models...........................................19
  Brian Berenbach and Sascha Konrad

Incorporating Time in the Modeling of Hardware and Software Systems:
  Concepts, Paradigms, and Paradoxes ..........................................................................................25
  Martin Ouimet and Kristina Lundqvist
Model Quality

Evaluating Quality in Model-Driven Engineering ..........................................................31
Parastoo Mohagheghi and Jan Aagedal

A Framework for Empirical Evaluation of Model Comprehensibility ................................37
Jorge Aranda, Neil Ernst, Jennifer Horkoff, and Steve Easterbrook

On the Pitfalls of UML 2 Activity Modeling ...............................................................43
Tim Schattkowsky and Alexander Förster

Modeling Special Concerns

Engineering Trust Management into Software Models ................................................49
Mark Reith, Jianwei Niu, and William H. Winsborough

Towards Re-engineering Legacy Systems for Assured Dynamic Adaptation ..............55
Ji Zhang and Betty H. C. Cheng

Modeling the Environment in Software-Intensive Systems .......................................61
Carlo A. Furia, Matteo Rossi, and Dino Mandrioli

Model Management

A Reflective Aspect-Oriented Model Editor Based on Metamodel Extension ..............66
Naoyasu Ubayashi, Shinji Sano, and Genya Otsubo
