Third International Workshop on Predictor Models in Software Engineering

(PROMISE 2007)

Minneapolis, Minnesota, USA
20 - 26 May 2007
Table of Contents

Third International Workshop on Predictor Models in Software Engineering (PROMISE 2007)

Workshop Organization

Models

Adequate and Precise Evaluation of Quality Models in Software Engineering Studies ...........................................1
Yan Ma and Bojan Cukic

Project Data Incorporating Qualitative Factors for Improved Software Defect Prediction ..............................................................10
Norman Fenton, Martin Neil, William Marsh, Peter Hearty, Łukasz Radliński, and Paul Krause

Global Sensitivity Analysis of Predictor Models in Software Engineering .................................................................20
Stefan Wagner

Make the Most of Your Time: How Should the Analyst Work with Automated Traceability Tools? .............................28
Alex Dekhtyar, Jane Huffman Hayes, and Jody Larsen

Effort

Assessing the Reliability of a Human Estimator ...........................................................................................................37
Gary D. Boetticher and Nazim Lokhandwala
Decision Support Analysis for Software Effort Estimation by Analogy .................................................................45
   Jingzhou Li and Guenther Ruhe

Column Pruning Beats Stratification in Effort Estimation .........................................................................................55
   Omid Jalali, Tim Menzies, Dan Baker, and Jairus Hihn

**Prediction**

Using Developer Information as a Factor for Fault Prediction .................................................................................64
   Elaine J. Weyuker, Thomas J. Ostrand, and Robert M. Bell

Predicting Defects for Eclipse .................................................................................................................................71
   Thomas Zimmermann, Rahul Premraj, and Andreas Zeller

Modeling the Effect of Size on Defect Proneness for Open-Source Software .........................................................78
   A. Günes Koru, Dongsong Zhang, and Hongfang Liu

**Software Analysis**

Complexity Measures for Secure Service-Oriented Software Architectures ..........................................................88
   Yanguo Liu and Issa Traore

Experiments on Design Pattern Discovery ..............................................................................................................98
   Jing Dong and Yajing Zhao

Author Index
