# TABLE OF CONTENTS

## NEURAL AND FUZZY SYSTEMS

### Study on Evolutionary Neural Network Based on Ant Colony Optimization

Gao Wei

---

### Fault Tolerant Control of a Class of Unknown Multivariable Nonlinear Systems Using Fuzzy Approximation

Shaocheng Tong, Shuo Tong

---

### $H_\infty$ Fuzzy Decentralized Control of Nonlinear Time-Delay Interconnected Systems

Tao Wang, Shaocheng Tong

---

### An Improved Fuzzy Clustering Method to Detect Moving Objects

Yu Lu, Hao Zhu, Qin Zhang Wu

---

### Self-Optimum Fuzzy Controller Based on Minesweeping Strategy

Hu Jing Song, Wang Jia Bing, Yang Chuang Xin

---

### Fuzzy Partition Based Curvelets and Wavelets Denoise Algorithm

Naizhang Feng, Liyong Ma, Yi Shen

---

### Variable Universe Multiple-Fuzzifications Control

Tian Li, Hong Hu, Liang Zheng

---

### Study on Fuzzy Self-Tuning PID Internal Model Control Algorithm and Its Application

Zhang Ming guang, Wang Peng, Wang Zhao gang

---

### Solving Fuzzy QoS Constraint Satisfaction Technique for Web Service Selection

Liu Zhuang, Huang Yuan Fei, Jian Wei Guang, Zhou Jiang Bo, Guo He Qing

---

### Embedded Ethernet Communication Server and Its Application in Family and School Communication

Tan Hai, Zhou Xinqin

---

### Study on Revising Configure Parameter in Embedded System and Its Application

Tan Hai, Zhou Xinqin

---

### O2 Concentration Measurement of Furnace

Yihu Huang

---

### A Method about Load Distribution of Fishing Mills Based on RBF Neural Network

Yan Wang, Dongdong Liu, Quan Yang, Yikang Sun

---

### Application of Neural Networks in Wireless Sensor Network Routing Algorithm

Wen Hui Zhao, Daxin Liu, Yu Jiang

---

### Radial Basis Function Neural Network Based on Ant Colony Optimization

Man Chun tao, Li Xiao xia, Zhang Li yong

---

### Robust Designs for Templates of Directional Extraction Cellular Neural Network with Application

Jin zhu Liu, Le quan Min

## INTELLIGENT SYSTEMS

### Models for Predicting the Value of E-Commerce Trade in China

Min Liu, Shudong Sun
A Hybrid EA Approach with Cooperation between Individuals to Substructure Discovery in Graphical Databases ................................................................. 69
Xingong Chang, Minqiang Li, Jisong Kou

Searching Quasi-bicliques in Proteomic Data .......................................................... 73
Hongbiao Liu, Juan Liu, Longhui Wang

A Novel Attribute Reduction Algorithm Based on Rough Set and Information Entropy Theory ........................................................................................................... 77
Baoyi Wang, Shaomin Zhang

Knowledge Elicitation and Acquisition for Simulation Validation .................................................. 81
Jun-Tao Wang, Fei-Yan Min

Improving the Non-dominant Sorting Genetic Algorithm for Multi-objective Optimization ........ 85
V. Seydi Ghomsheh, M. Ahmadieh Khanehsar, M. Teshnehlab

Clonal Selection Algorithm with Adaptive Mutation and Roulette Wheel Selection ................ 89
Yi He, Chuanbao Jian

Security Operation Center Based on Immune System .......................................................... 93
Yi Niu, Quanjue Zhang, QiLun Zheng, Hong Peng

Asymptotic Analysis of Nonlinear SEIS Differential-Integral Equation Model ......................... 100
Xu Wenxiong, Zhang Tailei, Xu Zongben

Approximation Algorithm for Pseudoknotted RNA Structure Prediction ................................ 104
Hengwu Li

A New Algorithm for the Longest Common Subsequence Problem ........................................... 108
Xuyu Xiang, Dafang Zhang, Jiaohua Qin

Extending Ontology Language for Semantic Web ...................................................................... 112
Qing Yu, Jinlin Wang

Arithmetic Model Research of IDS Alarm Controlling .......................................................... 116
Qu Zhaoyang, Guo Liang, Wu Yan

Using Relational Database to Build OWL Ontology from XML Data Sources ......................... 120
Jiuyun Xu, Weichong Li

Research and Realization of the Computer-Assisted Colorimetry for Baked Porcelain Tooth .......................................................... 124
Jihong Liu, Fangfan Han

The Research of ASW Helicopter ACGF Construction Based on CXBR ................................ 128
Zhengtao Hu, Jian Liu

On Spam Detection Based on Cognitive Pattern Recognition ............................................... 132
Tiancai Liang, Youguo Pi

A New Algorithm for Predicting Future Actions in Plan Recognition ..................................... 136
Jianwei Zhang, Zengyu Cai, Yong Gan, Baowei Zhang, Lei He

The Expert System of Product Design Based on CBR and GA ............................................. 140
Lai Chaoan

An Efficient Algorithm for Scheduling Problem with Batching and Common Due Window ........ 144
Honglun Zhao, Guojun Li, Jiqiang Wang, Guoyong Han

Chinese Keyword Extraction Based on N-Gram and Word Co-occurrence ............................ 148
Hui Jiao, Qian Liu, Hui-bo Jia
Knowledge Mining for Web Business Intelligence Platform and Its Sequence Knowledge Model

Jie Shen, Liu-hua Wei, Kun He, Fa-yan Xu, Lei Bi, Rong-shuang Sun

INTELLIGENT COMPUTATION

Multi-objective Evaluation Strategy for Evolvable Analog Circuit

Xue-wen Xia, Yuan-xiang Li

Application of Genetic Algorithms to Computing Unit Hydrograph

Li Hongyan, Zhang Yonggen, Bao Xinhua

A Novel Assembly Evolutionary Algorithm for n-Queens Problem

Congwen Zeng, Tianlong Gu

A Three-Dimensional Encoding Genetic Algorithm for Job Shop Scheduling

Hongli Yin, Yongming Wang, Nanfeng Xiao, Enliang Hu, Yanrong Jiang

Cooperative Algorithm for Multi-agent Foraging Task Based on Modified Hawk-Dove Game

Yuehai Wang, Jie Liu, Wei Meng

Automatic Test Data Generation Tool Based on Genetic Simulated Annealing Algorithm

Li Bin, Li Zhi-Shu, Chen Yan-Hong, Li Bao-Lin

An Efficient Evolutionary Algorithm for a Kind of Nondifferentiable Nonlinear Bilevel Programming

Dalian Liu, Dong Chen

A New Multi-objective Fully-Informed Particle Swarm Algorithm for Flexible Job-Shop Scheduling Problems

Zhao-hong Jia, Hua-ping Chen, Jun Tang

Fuzzy-Dominance and Its Application in Evolutionary Many Objective Optimization

Gaoping Wang, Huawei Jiang

A New Particle Swarm Optimization Algorithm with Random Inertia Weight and Evolution Strategy

Gao Yue-lin, Duan Yu-hong

A Particle Swarm Optimizer with Chaotic Self-Feedback for Global Optimization of Multimodal Functions

Zhang Huidang, He Yayao

Quantum-Inspired Swarm Evolution Algorithm

Huang Yourui, Tang Chaoli, Wang Shuang

CMAC Neural Network Model Based on Compose Particle Swarm Optimization

Man Chun-tao, Wang Su-ju, Zhang Li-yang

A Novel Method for Solving Fuzzy Programming Based on Hybrid Particle Swarm Optimization

Zhenkui Pei, Shengfeng Tian, Houkuan Huang

Using Expert’s Knowledge to Build Bayesian Networks

Hu Xiaoxuan, Wang Hui, Wang Shuo

Cooperative Q Learning Based on Blackboard Architecture

Yongming Yang, Yantao Tian, Hao Mei

TD(Λ) Optimization of Imperfect Information Game’s Evaluation Function

Xuan Wang, Zhaoyang Xu
Parallel Kriging Interpolation for Modeling of Stratified Stratum ................................................................. Peng Chen, Cheng Wang, Bo Ren

A Robust Formulation for Support Vector Regression ............................................................................. Ping Zhong

A Parallel Ant Colony Optimization for Multi-depot Vehicle Routing Problem ........................................ Jinbao Yao, Baozhen Yao

Mathematical Analysis of Swarm Robots Foraging Based on Division Strategy .................................... Yongming Yang, Yantao Tian, Xiyue Qi, Xu Zhao

A Phylogenetic Tree Constructing Algorithm Based on Ant Colony Optimization ................................ Ling Chen, Ling Qin, Lingjun Zou

Stable Neighborhood Preserving Embedding ............................................................................................... Jing Wang

IMAGE PROCESSING AND PATTERN RECOGNITION

A Shot Clustering Based Algorithm for Scene Segmentation ........................................................................ Xuejun Wang, Shigang Wang, Hexin Chen, Moncef Gabbouj

Visual Mouse: SIFT Detection and PCA Recognition ................................................................................. Hailing Zhou, Lijun Xie, Xiuliang Fang

An Efficient Visual Tracking Method for Multiple Moving Targets .......................................................... Xiaohui Chen, David R. Bull, Lyudmila Mihaylova, Nishan Canagarajah

Blind Non-independent Image Separation Based on Independent Component Analysis .......................... Wu Guo, Peng Zhang, Runsheng Wang

An Algorithm for Removing Facial Makeup Disturbances Based on Clifford Algebras ......................... Wenming Cao, Tiancheng He

Super Resolution of 3D Surface Texture ....................................................................................................... Junyu Dong, Zuozhen Liu, Jing Ren

Models of Vehicle Speeds Measurement with a Single Camera ............................................................... He Zhiwei, Liu Yuanyuan, Ye Xueyi

A Relevance Feedback Algorithm Based on SVM Model’s Dynamic Adjusting for Image Retrieval .................................................................................................................... Yihua Zhou, Weimin Shi, Lijuan Duan, Cuiying Niu

Application of Image Texture for Discrimination of Tea Categories Using Multi-spectral Imaging Technique and Support Vector Machine ....................................................................... Di Wu, Xiaojing Chen, Yong He

Binary Trademark Image Retrieval Using Region Orientation Information Entropy ................................. Cai-kou Chen, Qiang-qiang Sun, Jing-yu Yang

Discussion about Similarity Measures in Pattern Recognition of Fuzzy Information .................................. Zhang-lin Guo, Jing Tian

Reconstruction of Partially Occluded Face by Fast Recursive PCA ......................................................... Zhi-Ming Wang, Jian-Hua Tao

An Improved PCA Face Recognition Algorithm Based on the Discrete Wavelet Transform and the Support Vector Machines ................................................................. Hong Wang, Su Yang, Wei Liao
DT-CWT Feature Based Face Recognition Using Supervised Kernel ONPP .......................... 299
Yuehui Sun

Automatic Fire Smoke Detection Based on Image Visual Features .................................................. 303
Zhengguang Xu, Jialin Xu

A Novel 3D Model Retrieval Method Based on the Object Outline of Image ........................................... 307
Tianyang Lv, Qian Song, Shaobin Huang, Zhengxuan Wang

A Robust Algorithm for Iris Localization Based on Radial Symmetry ................................................... 311
Wencong Zhang, Bin Li, Xueyi Ye, Zhenquan Zhuang

Using Nonlinear Features in Automatic English Lexical Stress Detection .............................................. 315
Nan Chen, Qianhua He

DISTRIBUTED AND MULTI-AGENT SYSTEMS

Dissymmetrical P2P Topology and Resource Locating Algorithm ............................................................. 319
Yang Jing, He Liang

A Multi-constraint QoS Routing Protocol with Route-Request Selection Based on Mobile Predicting in MANET .......................................................... 326
Jin Lian, Layuan Li, Xiaoyan Zhu

Research on the Instrument on Network (ION) and Its Key Technologies .................................................. 330
Huang Fei, Ming Dexiang

Stability Analysis for Grid Services Dynamic Scheduling System .............................................................. 334
Yang Yang, Weidong Hao, Ming Zeng

Routing Algorithm of Network Coding on Multicast .............................................................................. 338
Shaoguo Tao, Wenbo Qiao, Zongkai Yang, Wenqing Cheng

A Parallel Data Processing Middleware Based on Clusters .................................................................. 342
Nianbin Wang, Xiangzhong Jiao, Hui Cheng

Competitive Stock Replenishment Problem in a Two-Echelon Supply Chain with Competing Retailers .......................................................... 346
Qing Liu, Dao Huang, He Liu, Yu Tian

Research on the Problem of Contact Characteristic Finite Strip and Its Characteristic Agent .......................................................... 350
Guo-chang Li, De-bin Zhang, Chun-e Zhang, Cai Liu

Emotional Agent Based on Rough Set .................................................................................................. 354
Jun Hu, Yu-hai Chen, Chun Guan

Constructing Adaptive Individual Learning Environment Based on Multi-agent System ...................................... 358
Peng Chen, Anbo Meng, Chunhua Zhao

Agent-Based Distributed Conceptual Design of Virtual Prototyping for Complex Products .................. 362
Chen Xi

Research on Multi-agents Systems Model for E-Commerce under Distributed and Heterogeneous Environments .................................................................................. 366
Meng Hao, Gu Lichuan
DATA MINING

Association Rules Mining of Traditional Chinese Medical Syndrome Differentiation Oriented
Shen Xiaoyan, Qian Xiaotang .......................................................... 370

Research on Multi-mode Fusion Tracking of OTHR Based on Auction Algorithm .......... 374
Kong Min, Wang Guohong

An Improved Information Fusion Algorithm Based on SVM ..................................... 378
Jun Ma, Jianpei Zhang, Jing Yang, Nan Zhang

Forecasting Method on Pear Scab Based on Fusion Reasoning .................................. 382
Gu Lichuan, Ni Zhiwei, Li Shaowen, Zhang Youhua

Association Rules Mining Using Multi-objective Coevolutionary Algorithm .................. 386
Jian Hu, Xiang Yang-Li

A Cache-Based Attribute Granular Computing System .............................................. 390
Xiaoxia Huang, Lun Cheng

Research and Realization of Text Mining Algorithm on Web ...................................... 394
Shiqun Yin, Yihui Qiu, Jike Ge

An Active Data Integration Model Based on P2P Routing Service .............................. 398
Wuling Ren, Ping Han, Pan Zhou

Towards Improving Ant-Based Clustering - An Chaotic Ant Clustering Algorithm .......... 402
Xiaofang Huang, Yixian Yang, Xinxin Niu

An Effective Algorithm for Mining Weighted Association Rules in Telecommunication Networks .................................................................................................................. 406
Tongyan Li, Xingming Li, Hailin Xiao

The Correlation between the Wavelet Base Properties and Image Compression ............ 410
Li Ke, Qiang Du, Zhe Su

Probabilistic Document Correlation Model ................................................................. 414
Xiping Jia, Hong Peng

An Improved Clustering Algorithm Based on Ant Colony Approach ............................. 418
Zhang Tao, Li Xiaodong, Zhang Zaixu

An Automatic Kernel of Graph Clustering Method in Conforming Clustering Number .......... 422
Hua-Fu Ding, Yong-Peng Zhang

An Algorithm for Classifying Incomplete Data with Selective Bayes Classifiers .......... 426
Jingnian Chen, Xiaoping Xue, Fengzhan Tian, Houkuan Huang

SYSTEM SECURITY AND MANAGEMENT

Synchronization of Uncertain Lorenz Chaotic Systems Based on a Novel Active Pining Control .......................................................... 430
Qu Shao-cheng, Gong Mei-jing

The Implementation Architecture of Content Protection in P2P Network ....................... 434
Cheng Yang, Jianbo Liu, Yichun Zhang, Aina Sui

Transductive Support Vector Machine for Personal Inboxes Spam Categorization ........ 438
Chao Xu, Yiming Zhou
Random Jump Index: A Trustworthy Index for Random Insertion .......................................................... 443
He Huang, Fengchen Liu, Qingwen Liu

Study of Lyapunov Exponent Spectra for Axial-Flow Compression System ............................................. 447
Jiangming Yu, Jiang Zhang, Wei Ding, Youli Wu

Specification of Access Control Policies for Web Services .......................................................................... 451
Miao Liu, Wei Zhang, Huai-Liang Liu

RBTN: A Role-Based Trust Negotiation Model ........................................................................................... 455
Yizhu Zhao, Hongwei Lu

UCLinux Security Enhancement Technology Based on MAC ........................................................................ 459
Gaozu Wang, Weihua, Li, Yangling Xu, Jianfeng Yan

UCGS: A Usage Control Approach for Grid Services ..................................................................................... 465
Yiduo Mei, Xiaoshe Dong, Weiguo Wu, Shangyuan Guan, Jing Xu

Trusted Computing Enabled Access Control for Virtual Organizations ................................................ 469
Jing Zhan, Huanguo Zhang

A Protecting Protocol of Mobile Agent Integrity ............................................................................................... 473
Huanmei Guan, Huanguo Zhang, Ping Chen, Yajie Zhou

The Semantic Model Based on BSCM for the Information Security .......................................................... 476
Liu Zhong

A Proactive Defense Scheme Based on the Cooperation of Intrusion Deception and Traceback .................. 481
Junfeng Tian, Ning Li, Zhiqiang Wang

A New Information Measurement Scheme Based on TPM for Trusted Network Access ........................ 485
Lu Chen, Huanguo Zhang, Lijiang Zhang, Liang Cai

An Improved Trust Negotiation Protocol with Hidden Credentials ............................................................ 489
Guoming Cai, Yadi Wang, Zhiqiang Zhu, Kaiyong Xu

An Improvement on Precision in DDoS Source-End Detection with Multi-stream Combined HMM ........ 493
Jian Kang, Qiang Li, Yuan Zhang, Zhuo Li

A High-Efficiency Intrusion Prediction Technology Based on Markov Chain ........................................ 497
Cao Lai-Cheng

Ad Hoc Networks Security Mechanism Based on CPK .............................................................................. 501
Lei Feng-Yu, Cui Guo-Hua, Liao Xiao-Ding

Group Oriented Secure Routing Protocol of Mobile Agents ...................................................................... 505
Weidong Qiu, Haihui Guan, Xinghao Jiang, Zheng Huang

Improvement of Temporal-Replication Mechanism in Mobile Agent System Fault-Tolerant Model .......... 509
Wang-Xiao Yun, Ye-Jian Nan, Huang-Guo Jin, Yu-Mei He

Anonymous Agent with Anonymous Itinerary ............................................................................................. 513
Fatemeh Raji, Behrouz Tork Ladant, Mehdi Brenjkoub

Characteristic Analysis of Virus Spreading in Ad Hoc Networks .......................................................... 517
Peng Li, Zeming Wang, Xuezhi Tan

Secure Vault: An Intrusion Prevention Model for Ender-Users .................................................................. 521
Lijun Dong, Min Du, Shengsheng Yu, Rongtao Liao
Towards Survivable Sensor Networks Using Self-Regenerative Rejuvenation and Reconfiguration ............................ 525
Sazia Parvin, Dong Seong Kim, Jong Sou Park

The Communication Protocol for Wireless Sensor Network about LEACH ......................................................... 529
Yiming Fan, Jianjun Yu

PSMR: Publish/Subscribe Multi-cast Routing for Wireless Ad Hoc Networks ......................................................... 533
Lidong Zhai, Xiaolei Ma, Jinchun Gao, Yuan’an Liu

A Formulation for Ideal Signature Functionality and Its Realization ................................................................. 537
Haojun Zhang, Huibin Wang, Li Chen

A Method on Detecting Unpredictability of Chaotic Signal .................................................................................. 541
Jianxiu Jin, Shuisheng Qiu, Liying Xie, Mingku Feng

AAA Architecture for Unified Configuration Management in Large-Scale Network ........................................... 545

Multi-agents Artificial Immune System (MAAIS) Inspired by Danger Theory for Anomaly Detection ................. 549
Haidong Fu, Xiguo Yuan, Na Wang

A New Mechanism for Trusted Code Remote Execution ...................................................................................... 553
Liqiang Zhang, Huanguo Zhang, Xiantao Zhang, Lu Chen

SECURITY APPLICATIONS

AOP-Based J2EE Source Code Protection .............................................................................................................. 557
Xiufeng Zhang, Quoyan Wen

Fair E-Cash System without Trustees for Multiple Banks ....................................................................................... 561
Jingliang Zhang, Lizhen Ma, Yumin Wang

Security in E-Commerce and the Economics of Immediate Satisfaction ............................................................ 564
Min Zhang, Renguo Jiang, Haiqing Hu

A Modified GJR-GARCH Model with Information Disseminating Speed ......................................................... 568
Guo Qing Zhao, Jun Wei

A Dynamic Pricing Model for Postponement Supply Chain: The Bi-level Programming Approach .................. 572
Gui Shouping, Niu Banzhuang

The Test and Calculation of the Underwriting Cycle in Property-Liability Insurance of China .......................... 576
Manying Bai, Rui Zhao

A Fast Algorithm Based on Tabled SAE Reuse ......................................................................................................... 580
Hong-jun Wang, Hua Li, Yan-pei Li, Hui He, Shan Fan, Li-li Wang

A Novel Conditional Access Architecture for TV Service Protection ................................................................. 584
Jianbo Liu, Cheng Yang, Jiayin Tian

Trust-Contexts Modeling, Organization and Trust Estimation on the Web ......................................................... 588
Changli Zhang, Jian Wu, Zhengguo Hu

Detecting Malicious Witness Reports in Multi-agent Systems ............................................................................. 592
Maolin Xing, Bin Li, Xingshen Wu

Trust Management and Service Selection in Pervasive Computing Environments ............................................ 596
Shangyuan Guan, Xiaoshe Dong, Weiguo Wu, Yiduo Mei, Shihua Liao
Searching for the Classification Concept in WCO ............................................................... 600
Zhu Hongning, Hu Xianwei, Wang Yu, Zhang Bin

A Research on the Steganography Capacity of the Reed-Solomon Codes ......................... 604
Cui-Qing Liu, Xi-Jian Ping, Yan-He Wang

Text Information Hiding Based on Part of Speech Grammar .............................................. 608
Dai Zaxu, Hong Fan, Yang Mustiang, Cui Guohua

Reversible Image Authentication Based on Combination of Reversible and LSB Algorithm .... 612
Tiegang Gao, Qiaolun Gu

Watermarking 3D Meshes Based on Fixed Spectral Basis .................................................... 616
Tao Xie, Yanning Zhang, Jinqiu Sun, Zenggang Lin

Perceptual Steganography Based on Adaptive Quantization-Embedder ............................... 620
Guangjie Liu, Yuewei Dai, Zhiqun Wang, Shiguo Lian

DCT-Based Video Watermarking Transcoding Technique ................................................. 624
Yao-gang Du, Yan-Shuo Zhang, Wang Li-Feng

Passphrase with Semantic Noises and a Proof on Its Higher Information Rate ................. 628
Kok-Wah Lee, Hong-Tat Ewe

Forward-Secure Public-Key Encryption Scheme with Tamper Evidence .......................... 632
Jiang Han, Xu QiuLiang, Hou MengBo

Content Dependent Image Watermarking Using Chaos and Robust Hash ......................... 636
Wei Lu, Hongtao Lu

A Novel Watermark Algorithm for Blind Extraction ......................................................... 640
Li Yu, Fen Chen

A Robust Dual Digital-Image Watermarking Technique .................................................... 644
Kai-xing Wu, Wei-wei Yan, Jing Du

Steganalysis Based on Lifting Wavelet Transform for Palette Images ............................... 648
Jiaohua Qin, Xingming Sun, Xuyu Xiang

A Joint Biometrics and Watermarking Based Framework for Fingerprinting, Copyright
Protection, Proof of Ownership, and Security Applications .............................................. 652
Shiraz Ahmad, Zhe-Ming Lu

An Image Steganographic Method with Noise Visibility Function and Dynamic
Programming Strategy on Partitioned Pixels ........................................................................ 656
Ying-hua Lu, Jun Kong, Si-hui Li, Jing Qin

CRYPTOGRAPHY AND SECURITY TECHNIQUES

Selection on Wavelet Base for the Detection of Ship Pitching Movement Disturbances ........ 660
Sun Li-hong, Shen Ji-hong

Moving Targets Detection and Tracking Based on Nonlinear Adaptive Filtering .............. 664
Wang Ying-li, Dai Jing-min

The Detection Arithmetic of Soft Decision Based on Non-ideal Channel in Distributed
Detection ................................................................................................................................. 668
Ying-kun Liu, Xin-xi Feng

A New Blind Signature and Threshold Blind Signature Scheme from Pairings .................. 672
Wei Cui, Yang Xin, Yixian Yang, Xinxin Niu
Audio Digital Watermarking Algorithm Based on Wavelet Analysis .............................................................. 676
  Jie-Chang Wen

Double Secret Keys and Double Random Numbers Authentication Scheme .................................................. 681
  Tian-Junfeng, Jiao-Hongqiang, Li Ning, Liu Tao

Efficient Identity Authentication Protocol and Its Formal Analysis ............................................................... 685
  Li Chen, Guixiang Zhang, Xiangdong Li

Improving the C-Scheme by Allocating Unique Secret Parameters for Different Users ................................ 690
  Jin Jiang, Zhihong Huang, Lei Li

A TPM Authentication Scheme for Mobile IP ................................................................................................. 694
  Liu Jing-sen, Dai Guan-zhong, Li Yu

ID-Based Authenticated Blind Signature Scheme from Bilinear Pairings .................................................... 698
  Zema Zhao

Cryptanalysis and Improvement on an Threshold Key Issuing Protocol ....................................................... 702
  Zhang Bo, Xu QiuLiang, Liu Xin

A Schema of Automated Design Security Protocols .................................................................................... 706
  Haijing Xue, Huanguo Zhang, Sihan Qing

An Efficient Group Key Agreement Protocol from Bilinear Pairings .......................................................... 710
  Chengyu Hu, Pengtiao Liu, Daxing Li

Security Analysis on a Blind Signature Scheme Based on Elgamal Signature Equation ................................ 714
  Yu Baozheng, Xu Congwei

An Improvement of Authentication Test for Security Protocol Analysis ......................................................... 718
  Xiangdong Li, Qingxian Wang

A Verifiable Multi-secret Sharing Scheme (VMSS) ......................................................................................... 722
  Pang Liaoqin, Li Huixian, Jiao Licheng, Wang Yumin

Unambiguous Measurements Based Quantum Cryptography ................................................................. 726
  Wei Yang, Liusheng Huang, Yonglong Luo

SPUC: Security Protocol for Ubiquitous Computing ..................................................................................... 730
  Fan Yang, Qingcong Lv, Qijing Cao

A Proxy Blind Signature Scheme with Proxy Revocation ............................................................................ 734
  Ji-Hye Park, Young-Seol Kim, Jik Hyun Chang

A New Simple Matrix Representation Method of the BM Algorithm Using in Flowing Cipher Field .......... 738
  Qian Yin, Ping Guo, Zukan Wei, Zhiyong He

Logical Mistakes in NTRU Compensation Algorithm and Improvement of Encryption Verification Algorithm .................................................................................................................. 742
  Yining Quan, Xinshe Li, Yupu Hu

Block Sampling Algorithm of Image Encryption Based on Chaotic Scrambling ........................................ 746
  Ren Hong-e, Zhang Jian, Wang Xing-jian, Shang Zhen-wei

New Algebraic Structure Based on Cyclic Geometric Progressions over Polynomial Ring Apied for Cryptography .................................................................................................................... 750
  Dang Hoai Bac, Nguyen Binh, Nguyen Xuan Quynh

Cryptanalysis of Liao et al.’s Blind Signature Scheme from CIS’05 ........................................................... 754
  Yongjian Liao, Qihang Wang

Cryptanalysis of MAJE4 ................................................................................................................................. 756
  Mohammad Ali Orumiehchi ha, Elham Shakour
Efficient Secure Group Signature Scheme with Revocation .......................... 760
Rongbo Zhu, Xiaozhu Liu

One-Way Hash Function Construction Based on Iterating a Chaotic Map .......... 764
Yong Wang, Maokang Du, Degang Yang, Huaqian Yang

Normalization towards Instruction Substitution Metamorphism Based on Standard Instruction Set .......................................................... 768
Ran Jin, Qiang Wei, Pei Yang, Qingxian Wang

Design Principles for Public Key Cryptography System Protected with Power Analysis .................. 772
Xu Rui, Jianguang Huiping, Bao Sheng

Cryptanalysis and Improvement of a Constant-Size Identity Based Ring Signature Scheme .......... 776
Huaqun Wang, Xianjiu Guo

An Efficient Group Signature Scheme without Random Oracles .......................... 780
Wang Shaohui, Wang Meiqin

A Novel Hybrid Encryption Scheme against Adaptive Chosen Ciphertext Attack .......... 784
Zhifeng Qi, Sihan Qing, Yixian Yang, Guanghui Cheng

Multi-secret Sharing Threshold Visual Cryptography Scheme ...................... 788
Bin Yu, Xiaohui Xu, Liguo Fang

Restricted-Verifier Precise Bounded-Concurrent Zero-Knowledge .................. 792
Ning Ding, Dawu Gu

OTHER APPLICATIONS

An Improved Quick Algorithm for Aligning DNA/RNA Sequences .......................... 796
Quan Zou, Maozu Guo, Yang Liu, Taotao Zhang

Traffic Forecasting Based on Chaos Analysis in GSM Communication Network ......... 800
Xianhua Hu, Jie Wu

Platform Technology of Web Services-Oriented DCS Data Exchanging .................. 805
Qibing Jin, Weilong Shao

Deployment and Application of ERP Service on Grid ......................................... 809
Gao Zhongwen, Duan Ruizhen

Model-Based Fault Diagnosis for the Spacecraft Power System .......................... 813
Shao Jiye, Wang Rixin, Xu Mingqiang, Gao Jingbo

A Method of Radar Signal Separation .......................................................... 817
Feng Youqian, Zhang Shanwen, Li Zhengchao

Grey SVM with Simulated Annealing Algorithms in Patent Application Filings Forecasting .......................................................... 821
Sheng Xu, Huifang Zhao, Yang Xie

A Novel RED Scheme with Preferential Dynamic Threshold Deployment .................. 825
Lijun Sun, Lihong Wang

New Temporal Error Concealment Method for H.264 Based on Motion Strength ................. 829
Congdao Han, Jilin Liu

Suppliers' Innovative Capabilities and Their Relationship with Customers: An Evidence from Packaging Machinery Industry in China .................................................. 833
He Mao
Application of Three-Dimensional Visualization in Landscape Planning .................................909
   Chen Shenghao

Network Forensic Computing Based on ANN-PCA.................................................................913
   Youdong Zhang, Yongjun Ren, Jiangdong Wang, Liming Fang

Time Bounding Event Reasoning in Computer Forensic .........................................................917
   Liu Zhi Jun, Zhang Huan Guo
