Proceedings

Second IEEE International Conference on Digital Game and Intelligent Toy Enhanced Learning

*DIGITEL 2008*

17-19 November 2008
Banff, Canada

*Sponsored by*
IEEE Technical Committee on Learning Technology
IEEE Computer Society
Athabasca University

*Hosted by*
Athabasca University

*Supported by*
The Northern Alberta Institute of Technology
TABLE OF CONTENTS

Social Support for Creativity and Learning Online ................................................................. 1
Amy Bruckman

The Joy of Making .................................................................................................................. 6
Dale Dougherty

A Mobile Phone Based Virtual Pet to Teach Social Norms and Behaviour to Children .......... 11
Hanno Hildmann, Anika Uhlemann, Daniel Livingstone

A New 3-Dimensional Comic Chat Environment for On-line Game Avatars .......................... 14
Soo-Hyun Park, Seung-Hyun Ji, Dong-Sung Ryu, Hwan-Gue Cho

A Preliminary Study of Student’s Self-Efficacy on Problem Solving in Educational Game Context ............................................................................................................................... 19
Yu-Ling Lu, I-Ing Lee, Chi-Jui Lien

Adaptive Educational Games: Providing Non-invasive Personalised Learning Experiences .......... 24
Neil Peirce, Owen Conlan, Vincent Wade

Design and Evaluation of a Physical Interactive Learning Environment for English Learning ............................................................................................................................... 32
Jie Chi Yang, Yi Lung Lin, Jia Jia Wu, Kun Huang Chien

Development of Educational Videogames in m-Learning Contexts ........................................ 40
Pablo Lavín-Mera, Pablo Moreno-Ger, Baltasar Fernández-Manjón

Effect of a 360 Degrees Panoramic Image System (360 PIS) on the Environment Recognition of Students with Moderate and Severe Mental Retardation in Special Education School ...................................................................................................................... 48
I-chen Cheng, Hwa-pey Wang

Effects of Collaborative Activities on Group Identity in Second Life ....................................... 53
Sumin Seo, Xiangze Cui, Bokjin Shin

Effects of Object Building Activities in Second Life on Players’ Spatial Reasoning ................ 58
Jihyun Hwang, Hyungsung Park, Jiseon Cha, Bokjin Shin

Evaluation the Efficacy of Computer - Based Training Using Tangible User Interface for Low-Function Children with Autism ............................................................................................................................... 66
Karanya Sitdhisanguan, Nopporn Chotikakamthorn, Ajchara Dechaboon, Patcharaporn Out

Exploring Learner’s Variables Affecting Gaming Achievement in Digital Game-Based Learning ............................................................................................................................... 71
Jiseon Cha, Youngkyun Baek, Yan Xu

From Traditional to Digital: Factors to Integrate Traditional Game-Based Learning into Digital Game-Based Learning Environment ................................................................. 79
Sheng-Hui Hsu, Po-Han Wu, Tien-Chi Huang, Yu-Lin Jeng, Yueh-Min Huang

Games as Skins for Online Tests ............................................................................................. 86
Srinivasan Ramani, Venkatagiri Sirigiri, Nila Lokita Panigrahi, Shikha Sabharwal

GEOWORLDS: Utilizing Second Life to Develop Advanced Geosciences Knowledge ............... 89
Donna Russell, Molly Davies, Iris Totten

Intergenerational Learning through World of Warcraft ............................................................ 94
Sri H. Kurniawan
Investigating the Use of a Robot with Tabla Education
Prakash Persad, Jorrel Bisnath, Ruel Ellis

"It is so like Disco" - Dancing on the iTiles
Stine Liv Johansen, Helle Skovbjerg Karoff

Language Learning in the Palm of Your Hand
Mercedes Rico, J. Enrique Agudo, Héctor Sánchez, Alejandro Curado

Learning about Complexity with Modular Robots
Eric Schweikardt, Mark D. Gross

Learning by Substitutive Competition: Nurturing My-Pet for Game Competition Based on Open Learner Model
Zhi-Hong Chen, Tak-Wai Chan

Massively Multi-user Online Games: The Emergence of Effective Collaborative Activities for Learning
Iro Voulgari, Vassilis Komis

Micro Adaptive, Non-invasive Knowledge Assessment in Educational Games
Michael D. Kickmeier-Rust, Cord Hockemeyer, Dietrich Albert, Thomas Augustin

My-Mini-Pet: The Design of Pet-Nurturing Handheld Game
Calvin C. Y. Liao, Zhi-Hong Chen, Tak-Wai Chan

On the Benefits of Tangible Interfaces for Educational Games
Janneke Verhaegh, Willem Fontijn, Aljosja Jacobs

Online Videogames in an Online History Class
Vance S. Martin

RoboMusicKids – Music Education with Robotic Building Blocks
Jacob Nielsen, Niels K. Berendsen, Carsten Jessen

The Effects of Digital Games on Undergraduate Players Flow Experiences and Affect
Yu-Tzu Chiang, Chao-yang Cheng, Sunny S. J. Lin

The Learning Environment for Stars and Constellations in the Real World with Finger Pointing
Masato Soga, Masafumi Miwa, Koji Matsu, Kazuki Takaseki, Kohei Tokoi, Hirokazu Taki

The Scope of Adaptive Digital Games for Education
Rikki Prince, Hugh C. Davis

The Use of Videogames to Mediate Curricular Learning
Begoña Gros, José M. Garrido

ToddlePuff: An Interactive Tangible and Spatial Interface
Ilan Schifter

Using Posting Templates for Enhancing Students' Argumentative Elaborations in Learning Villages

Video Games in the English as a Foreign Language Classroom
Tom A. F. Anderson, Barry Lee Reynolds, Xiao-Ping Yeh, Guan-Zhen Huang

What Will Happen to Virtual Field Trips? Beyond Classroom
Hyungsung Park, Bokjin Shin, Xiangzhe Cui, Jihyun Hwang

ROBOKID: Let Children Construct Their Own Emotional Kids - Learning by Construction
Gwo-Dong Chen, Mu-Chun Su, Eric Hsiao-kuang Wu, Wu-Yuin Hwang, Tzu-Chien Liu, Eric Zhi-Feng Liu, Siew-Rong Wu
Using Humanoid Robots as Instructional Media in Elementary Language Education ...................................... 194
Gwo-Dong Chen, Chih-Wei Chang

Application of a Learning-Companion Robot in Learning Environments .......................................................... 196
Mu-Chun Su, De-Yuan Huang, Shih-Chieh Lin, Yi-Zeng Hsieh, Gwo-Dong Chen

A Context Aware Interactive Robot Educational Platform .................................................................................. 198
Eric Hsiao-Kuang Wu, Hubert Chi-Yu Wu, Yi-Kai Chiang, Yu-Che Hsieh, Jih-Cheng Chiu, Kuan-Ru Peng

The Effect of MSN Robot on Learning Community and Achievement ............................................................ 200
Wu-Yuin Hwang, Sheng-Yi Wu, Hung-Cheng Chen

Human-Robot Interaction Research Issues of Educational Robots ................................................................. 202
Tzu-Chien Liu, Maiga Chang

Robotics Instruction Using Multimedia Instructional Material ............................................................................ 204
Eric Zhi Feng Liu, Chan Hsin Kou, Ting Yin Cheng, Chun Hung Lin, Shan Shan Cheng

Humor and Empathy: Developing Students’ Empathy through Teaching Robots to Tell English Jokes .......... 206
Siew-Rong Wu

Pedagogy Play: Virtual Instructors for Wearable Augmented Reality during Hands-On Learning and Play ........ 208
Jayfus T. Doswell
