2008 Joint International Conference on Power System Technology (POWERCON) and IEEE Power India Conference

New Delhi, India
12 – 15 October 2008

Pages 1-714
TABLE OF CONTENTS

SESSION – IA:
POWER SYSTEM ANALYSIS, COMPUTING AND ECONOMICS – I

Load Flow Analysis with Voltage-Sensitive Loads .......................... 1
C. S. Indulkar, K. Ramalingam

Determination of Steady State Voltage Stability limit using PQ curves ........................................ 7
K. Ramalingam, C. S. Indulkar

An Adaptive Particle Swarm Optimization Based Method for Normal and Low Voltage Multiple Load Flow Solutions .......................................................... 12
P. Acharjee, S. K. Goswami

Distributed OPF of Larges Scale Interaction Power Systems ......................................................... 18
Shaowei Huang, Ying Chen, Chen Shen

Chuong Ho V. N.

R. Balasubramanian, Bhavik Suthar

SESSION – IB: POWER SYSTEM MODELS AND DYNAMIC PERFORMANCE – I

Series Capacitor Made Less - or Not at All Sensitive to Increasing Short Circuit Levels .................. 38
Fred Landfors, Gunnar Ingeström, Göran Strömberg, Somnath Chakraborty

Study on Simulation Mathematical Model of Supercritical Boiler-Turbine-Generator Unit ................ 43
Zhong-xu Han, Jian Feng, Hui Wan, Chuan-xin Zhou, Zhi-qiang Kao

Distributed Rayleigh Quotient Iterative Method for Eigen-Analysis of Power Systems .................. 48
Jing Li, Chen Shen, Ying Chen

Stability Assessment of Power System Models For Higher Wind Penetration .......................... 52
V. Jayashankar, T. Geetha

Design of Genetic Algorithm Based Fuzzy Logic Power System Stabilizers in Multimachine Power System .......................................................... 57
Manisha Dubey

PMU-Based Wide Area Damping Control of Power Systems ......................................................... 63
H. Wu, Q. Wang, X. Li

Power System Blackout Model via OPF and its Self-organized Criticality ........................................ 67
Shengwei Mei, Gang Wang

SESSION – IC: FACTS AND HVDC – I

Challenges with Multi-Terminal UHVDC Transmissions .......................................................... 75
V. F. Lescale, A. Kumar, L. E. Juhlin, H. Björklund, K. Nyberg

FACTS Controllers to Improve Voltage Profile and Enhancement of Line Loadability in EHV Long Transmission Lines .......................................................... 82
C. B. Shankaralingappa, Suresh H. Jangamashetti
A 44 Pulse AC DC Converter Based on Hybrid of Multi phase and Phase Shifting Techniques
Bhim Singh, Sanjay Gairola

Case Study of a Multi-Infeed HVDC System
Paulo Fischer de Toledo, Jiuping Pan, Kailash Srivastava, WeiGuo Wang, Chao Hong

Recent Developments of UHV DC Transmission Research in China
Daochun Huang, Jiangjun Ruan

Comparison of Power Flow Control TCSC Versus UPFC
Samina E. Mubeen, R. K. Nema, Gayatri Agnihotri

SESSION – ID: CHALLENGES IN RESTRUCTURED ENERGY SYSTEMS – I

Security Constrained Economic Dispatch with Secure Bilateral Transactions in Hybrid Electricity Markets
Ashwani Kumar, Saurabh Chanana

Multi-Area Available Transfer Capability Determination in the Restructured Electricity Market
B. V. Manikandan, S. Charles Raja, P. Venkatesh

Monitoring and Measuring Market Power in the New Zealand Electricity Market
Douglas G. Goodwin, Bhujanga Chakrabarti

Concept and Requirements of Asset Management System for Competitive Electric Utility under Deregulation
T. Minakawa, Y. Tada, G. Wu

SESSION – IIA:
POWER SYSTEM ANALYSIS, COMPUTING AND ECONOMICS – II

The Study of Distributed Multi-Area State Estimation Algorithm
Hong-shan Zhao, Jin-lian Guo, Xiao-dan Fan

A Method of Distributed State Estimation Based on Improved Innovation Graph
Jian Wang, Ying Chen, Chen Shen

Distributed Fast Decoupled Load Flow Analysis
Kalyan Dasgupta, K. S. Swarup

A Binary Differential Evolution Algorithm For Transmission And Voltage Constrained Unit Commitment
S. Patra, B. Goswami

Dynamic Available Transfer Capability (DATC) Computation using Intelligent Techniques
D. M. Vinod Kumar, Ch. Venkataiah

Evolutionary Programming Incorporating Neural Network for Transient Stability Constrained Optimal Power Flow
Kritsana Tangpatiphan, Akihiko Yokoyama

SESSION – IIB:
POWER SYSTEM MODELS AND DYNAMIC PERFORMANCE – II

Influence of a Low Power Parallel DC Link on the Enhancement of Generator Stability
G. G. Raju, R. Premathilaka
Power System Security Improvement by Using Differential Evolution Algorithm Based FACTS Allocation

Craziness based and Velocity Relaxed Swarm Optimized Intelligent PID Controlled AVR System
V. Mukherjee, S. P. Ghoshal

Identification of Operating States of Power System Using Transient Stability Analysis
Manoj Kumar Maharana, K. Shanti Swarup

A New Coherency-based Dynamic Equivalence Algorithm with Complex Network Theory
Xiang-ping Ni, Sheng-wei Mei

A New Approach to Compute Transient Behavior of Grounding Electrodes
S. M. Shahrtash, N. Ramezani

Application of Artificial Neural Networks in Determining Critical Clearing Time in Transient Stability Studies
D. Rama Krishna, K. V. S. Ramachandra Murthy, G. Govinda Rao

A Novel Controller for STATCOM to Enhance Power System Dynamic Behaviour
D. Padma Subramanian, R. P. Kumudini Devi

Effect of UPFC on Voltage Stability Margin
J. Raju, P. S. Venkataramu

Power System Stabilization Improvement by Using PSO-based UPFC

Enhancing Power Transfer Capacity of Transmission System by a Reduced Magnetics Based 48-Pulse STATCOM Controller
Bhim Singh, R. Saha

Researches on the Noise Models of Valves and DC PLC Filters in UHVDC Transmission Project
Jun Wen, Chao Xu, Min-Xiao Han, Jin Zheng, Wei-Yang Yin, Zhong-Ming Sun

Modelling and Control of an Inverter for VSC-HVDC Transmission System with Passive Load
Yongsheng Alan Wang, John T. Boys, Aiguo Patrick Hu

SESSION – IIC: FACTS AND HVDC – II

SESSION – IID: CHALLENGES IN RESTRUCTURED ENERGY SYSTEMS – II
Probabilistic Evaluation Method of Available Transfer Capability Considering Reliability Margins in Transmission Network ................................................................. 284
K. Sekita, A. Yokoyama, S. C. Verma, Y. Nakachi

Impact of the Competitive Environment on the Generating Units Maintenance ................................................................. 290
I. Kuzle, H. Pandzic, S. Tesnjak

Ranking of Prospective New Generation Location for a Power Network in a Deregulated System ................................................................. 294
D. Thukaram, C. Vyjayanthi

Rehabilitation of Coal Power plant in Kosovo ................................................................. 302
N. Z. Avdiu

SESSION – IIIA:
POWER SYSTEM ANALYSIS, COMPUTING AND ECONOMICS – III

Optimal ATC Allocation in Power Systems .................................................................................................................................................. 308
A. Rajabi-Ghahnavieh, M. Fotuhi-Firuzabad

A Practical double-Parameter Steady Voltage Stability Boundary Tracing Method .......................................................................................... 314
Jinquan Zhao, Boming Zhang

Economic Dispatch with Multiple Fuel Types by Enhanced Augmented Lagrange Hopfield Network .................................................................................................................................................. 320
V. N. Dieu, W. Ongsakul

Adaptive Particle Swarm Optimization Approach for Optimal Reactive Power Planning .......................................................................................... 328
P. Rajkumar, D. Devaraj

Comparison Between Hilbert Space Based Power Theory and Traditional Power Theory .......................................................................................... 335
Fei Wang, Zengqiang Mi, Qixun Yang

Power Systems Voltage Stability Using Artificial Neural Network .................................................................................................................................................. 340
M. R. Khaldi

SESSION – IIIB:
POWER SYSTEM MODELS AND DYNAMIC PERFORMANCE – III

Effect of Sudden Increase of Dynamic Loads on Voltage Stability .................................................................................................................................................. 346
Shengyu Wu, Xueming Zhang, Shengwei Mei

A Modified Heffron-Phillip’s Model for the Design of Power System Stabilizers .......................................................................................... 354
G. Gurunath, Indranee Sen

Study on Method of Digital-Analog Hybrid Simulation for the Ultra-High Voltage Grid .......................................................................................... 360
Hu Tao, Yin Yong-hua, Jiang Wei-ping, Zhu Yi-yong, Zhang Jin-hua

Study on Electromagnetic Environment of Multi-circuit Transmission Lines on Same Tower .................................................................................................................................................. 365
Guihong Feng, Yanxin Wang, Bingyi Zhang

SESSION – IIIC: FACTS AND HVDC – III

Development of Intelligent Controllers for STATCOM .................................................................................................................................................. 370
S. Arockia Edwin Xavier, P. Venkatesh, M. Saravanan

Stability Analysis of Yunnan Power Grid including ±800kV UHVDC Transmission based on Full Dynamic Simulation .................................................................................................................................................. 377
Shu Hongchun, Liu Kezhen, Sun Shiyun, Zhang Jiabei, Chen Yong
SESSION – IVB: POWER SYSTEM COMMUNICATION AND SCADA – I

Intelligent Metering System in Integrated Power Generation & Distribution System of a Steel Complex .................................................................474

Arvind Kumar, S. Srivarsha

Innovation in the Design of RTU and Migration to IED .................................................................482

V. K. Chandna, Parmod Kumar, Mini S. Thomas

Substation Communication Networks Architecture ........................................................................488

Iqbal Ali, Mini S. Thomas

Real Time GPS Data Processing for ‘Sag Measurement’ on a Transmission Line .........................496

Uma Maheshwar Singareddy, Satish Mahajan

A Review of Power System Dynamic State Estimation Techniques ........................................502

N. R. Shivakumar, Amit Jain

SESSION – IVC: FACTS AND HVDC – IV

Control of Reduced Rating Dynamic Voltage Restorer with Battery Energy Storage System ........................................................................508

P. Jayaprakash, Bhim Singh, D. P. Kothari

Power System Stability Improvement with Flexible A. C. Transmission System (FACTs) Controller ........................................................................516

Vasundhara Mahajan

Upgrade Study of High Power Electronics Laboratory for ±800kV UHVDC Valves .........................523

Zha Kunpeng

SESSION – IVD: CHALLENGES IN RESTRUCTURED ENERGY SYSTEMS – IV

Power Sector Reforms in India: A Case Study ........................................................................529

O. P. Rahi, Harish Kumar Thakur, A. K. Chandel

Optimal Generation Scheduling under ABT .............................................................................533

Surekha R Deshmukh, D J Doke, Y P Nerkar

SESSION – VA: POWER SYSTEM ANALYSIS, COMPUTING AND ECONOMICS – V

Development of an Intelligent System for Short-Term Electrical Power Load Forecasting in Maharashtra State ..................................................539

Sanjay M. Kelo, Ram Meghe, Sanjay V. Dudul

A Comprehensive Two Level Heuristic Approach to Transmission Expansion Planning ..............547

Pradeep Yemula, V. S. K. Murthy B, S. A. Khaparde

SESSION – VB: POWER SYSTEM CONTROL AND OPERATION – I

Position Identification of Switched Capacitor Using Wavelet- and Kohonen-based Network ........................................................................553

Ying-Yi Hong, Bo-Yuan Chen, Lun Hui Lee, Ching-Shen Chiu

Pros and Cons of Existing Frequency Regulation Mechanism in Indian Power Industry ................559

Lightning Thunderstorms Day Maps for Saudi Arabia ................................................................565

M. H. Shwehdi
Optimization Design on Boiler-turbine Coordinated Control System with Automatic Generation Control
Han Zhong-xu, Huang Huan-pao, Zhang Zhi, Sun Ying

Applications of Transforms in Impulse High Voltage Measurements
V. N. Chuong Ho, D. A. Khoi Pham

Design and Development of Power Grid Restoration Scheme for Maharashtra State with Generating Plant Islanding
Jayesh Joglekar, Yogesh P. Nerkar

SESSION – VC: POWER SYSTEM RELAYING AND PROTECTION – I

A Framework For Special Protection System Modeling For Dynamic Security Assessment of Power Systems
Lei Wang, Fred Howell, Kip Morison

Tuned Fuzzy Controller Based Over Current Protection Scheme
V. K. Chandna, P. Kumar, Mini S. Thomas, Rajveer Singh

Initial Experiences with a New FPGA Based Travelling Wave Fault Recorder Installed on a MV Distribution Network
David Coggins, David Thomas, Barrie Hayes-Gill, Yiqun Zhu, Elisete T. Pereira, Sergio H. L. Cabral

Circuit Breaker Transient Recovery Voltage in Presence of Source Side Shunt Capacitor Bank
Murali Kandakatla, B Kondala Rao, Gopal Gajjar

New Method for Discrimination of Transformers Internal Faults from Magnetizing Inrush Currents Using Wavelet Transform
A. Rahmati, M. Sanaye-Pasand

The Nonuniform Discrete Short Time Fourier Transform - A New Tool for Electrical Power Components’ Monitoring
Arghya Sarkar, S. Sengupta

Minimizing the Impact of Transients of Capacitive Voltage Transformers on Distance Relay
F. Badrkhani Ajaei, M. Sanaye-Pasand

SESSION – VD: APPLICATIONS OF POWER ELECTRONICS AND POWER QUALITY – I

Digital Voltage-mode Control Of Higher Order Boost Converter
M Veerachary, Malyala Saresh

Digital PID Compensator Design for the Coupled Inductor Boost Converter
M Veerachary, Meduri Pramoda

A Zero Voltage switched PWM Isolated Boost Converter with Voltage Mode Control
S. L. Patil, A. K. Agarwala

Mitigation of Voltage Sags by Grid-Connected Distributed Generation System in Series and Shunt Configurations
Songcen Wang

Voltage Sag Assessment in a Large Chemical Industry
A. K. Goswami, C. P. Gupta, G. K. Singh

A Novel Power Quality Event Classification using Slantlet Transform and Fuzzy Logic
Saroj K Meher
SESSION – VIA: POWER SYSTEM ANALYSIS, COMPUTING AND ECONOMICS - VI

Adequacy Evaluation of Bulk Power Systems via Combination of Monte Carlo Simulation and Artificial Immune Recognition System .................................................................666
Lingfeng Wang, Chanan Singh

Differential Evolution based OPF with Conventional and Non-Conventional Cost Characteristics ..................................................................................................................672
K. Vaisakh, L. R. Srinivas

SESSION – VIB: POWER SYSTEM CONTROL AND OPERATION – II

Load Forecasting using Fuzzy Methods ..................................................................................................................681
S. Sachdeva, C. M. Verma

Load Frequency Control of Multi-Area Restructured Power System ..........................................................685
E. Rakshani, J. Sadeh

Enhancement of Power System Performance ..................................................................................................692
K. Shanmukha Sundar, H. M. Ravikumar

Voltage Contingency Ranking of a Practical Power Network Using Hybrid Neuro-Fuzzy System ..........699

Optimal Voltage Restoration in Electric Power System Using Genetic Algorithms ..................................704
A. Ulumha, M. A. S. Masoum, S. M. Islam

Power System Frequency Estimation Using Neural Network and Genetic Algorithm ..........................710
Monika Gupta, Smriti Srivastava, J. R. P. Gupta

Experiments on Ferro-resonance at Various Line Conditions and Its Damping ...............................................715
M. Roy, C. K. Roy

SESSION – VIC: POWER SYSTEM RELAYING AND PROTECTION – II

Research on Extension Method and Detection of Fault-Line Selection in Resonant Grounded Systems ..........723
Bin Li, Hongchun Shu

A New Method of Single-Phase-to-Earth Fault Location of Rural MV Power Networks .........................727
Feng Yan, Ting-li Ge, Hong-shan Zhao

Distance Relay Co-ordination Using Support Vector Machines in Power Transmission System ........732
Ravikumar B., Thukaram D., H. P. Khincha

Coordination of Distance Protection Relays on Multiple Parallel Line Corridors ........................................738
K. Trunk, J. Jäger, M. Ramold

An Integrated Relay for Differential Protection of Transmission Lines .....................................................743
Y. L. Ren, Z. Q. Bo, J. H. He, A. Klimek

A Real Time Digital Simulation System for Testing of Integrated Protection Schemes ..........................748
Y. L. Ren, Z. Q. Bo, J. H. He, A. Klimek

Measured Impedance by Distance Relay in Presence of Resistive Fault Current Limiter ..........................753
S. Jamali, H. Shateri
SESSION – VID:
APPLICATIONS OF POWER ELECTRONICS AND POWER QUALITY – II

The Implementation and Analysis of Over-modulation Technique of Three-phase Current Source Rectifier Based on FPGA ................................................................. 759
Zhang C., Li Y., Wang Q., Li C.

New Alternating current De-excitation for Large Hydraulic Generators ............................................. 766
Chen Xianming, Wang Wei, Lu Hongshui, Liu Guohua, Zhu Xiaodong

Comparative Performance of Isolated Forward and Flyback AC-DC Converters for Low Power Applications ...................................................................................................................... 773
Bhim Singh, Ganesh Dutt Chaturvedi

Modeling, Design and Analysis of Different Controllers for DSTATCOM ............................................... 779
Bhim Singh, Alka Adya, A. P. Mittal, J. R. P. Gupta

Voltage Flicker Mitigation Using STATCOM and ESS ........................................................................... 787
V. B. Virulkar, M. V. Aware

ANN Based SVC Switching at Distribution Level for Minimal Injected Harmonics .................................. 794
D. B. Kulkarni, G. R. Udupi

SESSION – VIIA:
DISTRIBUTED GENERATION AND RENEWABLE ENERGY SOURCES – I

Monte Carlo Planning Technique for Renewable Energy Sources .......................................................... 800
C. S. Indulkar

Capacitor Excited Asynchronous Generator for an Isolated Wind Energy Conversion System .................. 807
Bhim Singh, Gaurav Kansal, Ambrish Chandra, Kamal El-Haddad

Study of Impacts of Two Types’ Distributed Generation on Distribution Network Voltage Sags .................. 813
Xuehao HU, Yan ZHAO

Wind Turbines Grounding System, Boundary Element Approach .......................................................... 818
H. Kazemi Karegar, A. Mousavi

Optimisation of Imbalance Cost for Wind Power Markertility using Hydrogen Storage ......................... 822
Tilak Thakur, Sunita Goyal

Utilization of Solar Power through PEM Fuel cells ................................................................................. 827
Tilak Thakur, Sunita Goyal

FPGA Controller Based Z - Source Inverter for Wind Turbine Driven Permanent Magnet Generator ........... 833
R.Bharanikumar, S. Palanichamy, H. Mohideen Mandri

SESSION – VIIB: POWER SYSTEM CONTROL AND OPERATION – III

Evolutionary Computation Based Comparative Study of TCPS and CES Control Applied to Automatic Generation Control ........................................................................ 838
S. P. Ghoshal, Ranjit Roy

Novel HV Circuit Breaker Reliability Testing Measure Based on Image Processing ............................... 844
Guiyan Cui, Shutao Zhao, Chenguang Zhao, Baoshu Li

The Use of Special Tools for Emergency Control in the Russian Far East Power Grid ....................... 848
E. Kosterina, A. Arestova, M. Balabin, A. Grobovoy, R. Cherkaoui, A. J. Germond
Intelligent System for Detecting Failures in the Switching of Isolators in Power Substations

Germano Lambert-Torres, André C. Carrasco, Luiz Eduardo Borges da Silva, Maurilio P. Coutinho,
Demôstenes E. Santo Junior

A Novel Web based Expert System Architecture for On-line and Off-line Fault Diagnosis and Control (FDC) of Power System Equipment

M. Babita Jain, M. B. Srinivas, Amit Jain

J. Kuffel, Z. Li, B. Freimark, T. Rao

Reactive Power and Voltage Control in Kerala Grid and Optimization of Control Variables Using Genetic Algorithm

P. Sreejaya, R. Rejitha

SESSION – VIIC: POWER SYSTEM RELAYING AND PROTECTION – III

Robustness of Distance Relay Applied for Distribution Feeders with Quadrilateral Characteristic against Fault Resistance

H. Shateri, S. Jamali

Effects of SMES Equipped UPFC on Distance Relay Tripping Characteristic

S. Jamali, A. Kazemi, H. Shateri

On Line Fault Detection and an Adaptive Algorithm to Fast Distance Relaying

S.G. Srivani, K.P Vittal

Accurate Overcurrent Relay Algorithm using Fundamental Component

V. Jhanwar, A. K. Pradhan

Superiority of PSO Relay Coordination Algorithm over Non-Linear Programming - A Comparison, Review and Verification

D. Vijayakumar, R.K. Nema

Modeling and Testing of Protection Relay IED

Mini S. Thomas, Anupama Prakash, Nizamuddin

Dynamic Economic Dispatch Solution using an Enhanced Real-Quantum Evolutionary Algorithm

G. S. Sailesh Babu, D.Bhagwan Das, C. Patvardhan

SESSION – VIID: APPLICATIONS OF POWER ELECTRONICS AND POWER QUALITY – III

G-Parameter Based Stability Analysis of DC-DC Power Electronic System

M. Veerachary, Anmol Ratna Saxena

A Three Phase Active Filter based on Three Level Diode Clamp Inverter

M. Postan, A. R. Beig

An ANN based Digital Controller for a Three-phase Active Power Filter

M. R. Sindhu, Manjula G. Nair, T. N. P Nambiar

Particle Swarm Optimization Based Energy Optimized Dynamic Voltage Restorer

P. Ajay-D-Vimal Raj, M. Sudhakaran, S. Senthil Kumar, J. Raja, T. G. Palanivelu

Study on Polyphase Rectifying System with Phase-Shifting Reactor

Fengxiang Wang, Haoran Bai, Tao Zhang
Bifurcation Analysis of DC-DC Converters using Discrete Time Model .......................................................... 948
A. Kavitha, G. Uma

SESSION – VIIIA: ELECTRICAL MACHINES AND DRIVES – I

Significant Error Propagation in the Finite Difference Solution of Linear and Non-linear Two Dimensional Magnetostatic Problems Utilizing Boundary Condition of the Third Kind .......................................................... 955
E Afjei, H Moradi, A Kokabi

Transient Voltages in Ladder-Network Representations of Transformer Winding and Transmission Line .......................................................... 959
C. S. Indulkar, K. Ramalingam

A New modified bifilar Drive Circuit for Switched Reluctance Motor .......................................................... 965
E Afjei, M Asgar, S Ataei

Torque Ripple Minimization in Direct Torque Control based IM Drive Part-I - Single-rate Control Strategy .......................................................................................... 969
Saurabh N. Pandya, J. K. Chatterjee

Torque Ripple Minimization in Direct Torque Control based IM Drive Part-II - Multirate Control Strategy .......................................................................................... 977
Saurabh N. Pandya, J. K. Chatterjee

Robust Control of Permanent Magnet Synchronous Motor - Nevanlinna-Pick Approach .......................................................... 985
B. Aruna Rajan, R. Devanathan

SESSION – VIIIB: POWER SYSTEM CONTROL AND OPERATION – IV

Environmental Constrained Economic Dispatch using Bacteria Foraging Optimization .......................................................... 989
J. Hazra, A. K. Sinha

Optimum Reactive Power Dispatch Using Differential Evolution for Improvement of Voltage Stability .......................................................................................... 995
K. Vaisakh, P. Kanta Rao

SESSION – VIIIC: POWER SYSTEM RELAYING AND PROTECTION – IV

A Review of Compensating Type Custom Power Devices for Power Quality Improvement .......................................................... 1004
Yash Pal, A. Swarup, Bhim Singh

Classification of Power Signal Disturbances Using Wavelet Based Neural Network.......................................................... 1012
M. Sushama, A. Jaya Lakshmi, G. Tulasi Ram Das, Ch. Prasanth Babu

Novel Sensitive Current Differential Protection of Transmission Line .......................................................................................... 1017
Sanjay Dambhare, S. A. Soman, M. C. Chandorkar

SESSION – VIIID:
APPLICATIONS OF POWER ELECTRONICS AND POWER QUALITY – IV

Stability Analysis of Thyristor Controlled Inter Phase Power Controller in Deregulated Power System .......................................................... 1023
S. Chitra Selvi, R. P. Kumudini Devi

Modeling, Analysis and Control of a Chain Cell Converter .......................................................................................... 1029
A Kiran Kumar, K R Padiyar
Harmonic Analysis of Electromagnetic Transients in 500 kV Single Circuit Transmission System Using Discrete Wavelet Transform ................................................................. 1037
  C. Jaipradidtham, S. Pasomkusolsil

A Novel Linear Feedback Control Strategy for Compensation of Voltage Flicker using Statcom ............................................................................................................. 1041
  A. Ghodousi, A. Jalilian

SESSION – IXA:
DISTRIBUTED GENERATION AND RENEWABLE ENERGY SOURCES – II

Modeling of Fuel Cell Based Power Supply System for Grid Interface ........................................ 1046
  Shailendra Jain, Jin Jiang, Xinhong Huang, Srdjan Stevandic

Implementation of a New Protection Scheme on a Real Distribution System in Presence of DG .......................................................... 1054
  Seyed Ali Mohammad Javadian, Mahmood-Reza HaghiFam

Energy Storage to Stabilize the Weak Wind Generating Grid ....................................................... 1061
  Sharad W. Mohod, Mohan V. Aware

Variable Frequency Transformers for Increased Wind Penetration ........................................... 1066
  V. Jayashankar, T. Geetha

Impedance Source Inverter for Wind Turbine Driven Permanent Magnet Generator ..................... 1074
  R. Bharanikumar, R. Senthilkumar, A. Nirmal Kumar

Distributed Generation by Solid Oxide Fuel Cell - A Review ...................................................... 1081
  A. Kirubakaran, R. K. Nema, Shailendra Kumar Jain

An Overview of the Distributed Generation _DG_ Connected to the GRID .................................. 1088
  Debabrata (Debu) Kundu

Convert Low Frequency Energy from Wave Power Plant to High Frequency Energy in Linear Electrical Generator with Gas Springs ............................................. 1096
  Ravindra B. Ummaneni, Jon Eirik Brennvall, Robert Nilssen

SESSION – IXB: ELECTRICAL MACHINES AND DRIVES – II

Eddy Current Analysis of Induction Machine by 3D Finite Element Method ................................ 1101
  Manpreet Singh Manna, Sanjay Marwaha, Anupma Marwaha

A New Linearisation Technique for Permanent Magnet Synchronous Motor Model .................. 1105
  A. K. Parvathy, V. Kamaraj, R. Devanathan

Influence of Soft Magnetic Composite Material on the Electromagnetic Torque Characteristics of Switched Reluctance Motor ......................................................... 1110
  K. Vijayakumar, R. Karthikeyan, R. Arumugam

Transient Performance of Three-Phase Four-Wire Stand Alone Supply System with Static Converter Employed for Industrial Loads ............................................. 1116
  Yogesh K. Chauhan, Sanjay K. Jain, Bhim Singh

Speed Optimization of Servo Motor in Optical Disc Systems Using Particle Swarm Optimization ........................................................................................................... 1124
  Millie Pant, Radha Thangaraj, V. P. Singh

Simulation of a Single-Phase Induction Motor with Dynamic Capacitor for Maximum Torque Operation ......................................................................................... 1128
  Vishal Verma, Peeyush Pant, Bhim Singh
SESSION – IXC: FACTS AND HVDC – V

Supplementary Control for SVC to Improve the Converter Commutation Performance of HVDC ................................................................. 1134
Xiaojiang Guo, Guangquan Bu, Yong Tang, Shiying Ma

Study and Simulation of SSSC and TCSC Transient Control Performance ........................................... 1139
Qing Liu, Zhenhua Zheng, Zengping Wang

SESSION – IXD:
APPLICATIONS OF POWER ELECTRONICS AND POWER QUALITY – V

Flyback Power Supply EMI Signature and Suppression Techniques .......................................................... 1145
Himanshu K. Patel

Switch Mode Active Power Filter to Minimize the Effect of Harmonics Through Current Detection ................................................................. 1151
P. Thirumoorthi, N. Yadaviah

SESSION – XA:
DISTRIBUTED GENERATION AND RENEWABLE ENERGY SOURCES – III

Power System Stability and Load Sharing in Distributed Generation .......................................................... 1158
Ritwik Majumder, Arindam Ghosh, Gerard Ledwich, Firuz Zare

Performance Analysis of a Self Excited Induction Generator with Digitally Controlled Electronic Load Controller for Micro Hydel Power Generation .......................................................... 1164
S. S. Murthy, G. Bhuvaneswari, Sarsing Gao, M. Sree Lalitha Gayathri

Performance Evaluation of New Series Connected Grid-Side Converter of Doubly-Fed Induction Generator ................................................................. 1170
Bharat Singh, V. Emmoji, S. N. Singh, I. Erlich

Fostering The Use of Low Impact Renewable Energy Technologies with Integrated Operation Is The Key for Sustainable Energy System ................................................................. 1178
Pradeep K Katti, Mohan K Khedkar

Evaluation of Rotor Speed Stability Margin of a Constant Speed Wind Turbine Generator .................. 1186
Mital G. Kanabar, S. A. Khaparde

SESSION – XB: ELECTRICAL MACHINES AND DRIVES – III

Improvement of Adjustable Speed Drives (ASD’s) Performance During Sag Conditions Using Ultra-capacitors ................................................................. 1192
S. Dahiya, D. K. Jain, Ashok Kumar, R. Dahiya, S. S. Deswal

Inductance Calculation of 8 by 6 Switched Reluctance Motor ................................................................. 1196
P. Naresh Kumar, T. B. Isha

Choice of Pole-Slot Number Combination for PM Generator Direct-Driven by Wind Turbine .................. 1201
Fengxiang Wang, Yue Zhang

Losses and Thermal Analysis of High Speed PM Machine ................................................................. 1205
Jiqiang Wang, Fengxiang Wang, Xiaoguang Kong

A Novel Scheme of an Unified Flux and Torque Control Method for Direct Torque Control Algorithm Based Induction Motor ................................................................. 1210
K. Ramani, A. Krishnan
Design and Analysis of Annular Linear Induction Pump (ALIP) ................................................................. 121
    N Shamsuddeen, Ankit Ashok, J Rajendrakumar, V Krishna, V Jayashankar

SESSION – XC: UTILIZATION OF ELECTRICAL ENERGY – I

Development of a PLC Based Elevator System with Colour Sensing Capabilities for
Material Handling in Industrial Plant ................................................................. 1220
    Darshil, Sagar, Rajiv, Satyajit, V. K. Sharma

Effect of Different De-ion Plate Surface Finishes on Arc Mobility ......................................................... 1227
    Virender Singh Bura, Satbir Singh, Rayomand Medhora, Aditya Legha

Induction Machines - A Novel, Model based Non-invasive Fault Detection and Diagnosis
Technique .................................................................................................................. 1232
    Padmakumar S., Kallol Roy, Vivek Agarwal

Design and Implementation of a High Accuracy Sampling Wattmeter under Non-
sinusoidal and Time Varying Environments .......................................................... 1237
    Arghya Sarkar, S. Sengupta

Classification of Impulse Fault Patterns in Transformers Using Wavelet Network ................................. 1244
    P. Rajamani, D. Dey, B. Chatterjee, S. Chakravorti

Research and Design of a New Kind of Optical Current Transducer ...................................................... 1250
    Li Yansong, Wang Qian, Ma Daqian, Liu Jun, Zhou Hao

SESSION – XD:
APPLICATIONS OF POWER ELECTRONICS AND POWER QUALITY – VI

No Papers Available From This Session

SESSION – XIA:
DISTRIBUTED GENERATION AND RENEWABLE ENERGY SOURCES – IV

Novel Maximum Power Point Tracking Controller for Wind Turbine Driven Permanent
Magnet Synchronous Generator .................................................................................. 1254
    R. Bharanikumar, S. Palanichamy

Battery Energy Storage System Based Power Conditioner for Improved Performance of
Hybrid Power Generation ......................................................................................... 1260
    Ravinder Singh Bhatia, Bhim Singh, Dinesh Kumar Jain, S. P. Jain

SESSION – XIB: ELECTRICAL MACHINES AND DRIVES – IV

FPGA-based Ultra-Low Latency HIL Fault Testing of a Permanent Magnet Motor Drive
using RT-LAB-XSG ................................................................................................. 1266
    Christian Dufour, Jean Bélanger, Vincent Lapointe

Studies in Design of High Torque Three-Phase Squirrel-Cage AC Traction Motor with
Aluminium Alloy Rotor Bars and Parameter Optimization using Artificial Neural
Networks .................................................................................................................... 1273
    R. N. Paul, L. D.Arya, H. K. Verma

Retrofit with Hybrid Insulation System of a Failed Power Transformer .................................................. 1281
    Thomas Lim
SESSION – XIC: UTILIZATION OF ELECTRICAL ENERGY – II

Design, Simulation and Comparison of Synthetic Test Circuits for High Voltage Circuit Breakers ................................................................. 1285
J. G. Jamnani, S. A. Kanitkar

Electric Field and Potential Calculation in 10, 15 and 20 kV Water Infested Power Cables .................................. 1290
K. Rajagopala, M. P. Ravindran, P. Durai Kannu

Embedded Energy Meter- A New Concept To Measure The Energy Consumed By A Consumer And To Pay The Bill ........................................ 1297
Subhashis Maitra

Displacement Control of Piezoelectric Actuator using the PID Controller and System Identification Method .................................................. 1305
Baek-Ju Sung, Eun-Woong Lee, In-Su Kim

Study on Novel Hybrid Type Power Amplifier for Magnetic Bearing ........................................................................... 1312
Zong Ming, Ba Li, Wang Fengxiang

SESSION – XID:
ENERGY MANAGEMENT SYSTEM AND DISTRIBUTION AUTOMATION – I

Fuzzy Logic Based Optimal Capacitor Placement on Radial Distribution Feeders ...................................................... 1316
S M Kannan, A Rathina Grace Monica, S Mary Raja Slochanol

Application of Electronic Transformers in Digital Substation .................................................................................. 1322
Hongxing Wang, Guoqing Zhang, Zhizhong Guo, Jiaying Wang, Xingguo Cai

Improved Fuzzy Based Capacitor Placement Method for Radial Distribution System ......................................... 1327
S. K. Bhattacharya, S. K. Goswami

Performance Investigation of New Combinational Load Shedding Schemes ................................................................. 1332
Alireza Saffarian, Majid Sanaye-Pasand, Hamed Asadi

Ad Hoc Based Secure Architecture for Survivable and Reliable Substation Automation System ..................................................... N/A
Shabana Mehfuz, Iqbal Ali, Mini S. Thomas

Analysis Of Three Phase Unbalanced Radial Distribution Networks With Interval Arithmetic ......................................................... 1339
M. S. Giridhar, S. Sivanagaraju

Comparisons between the Load Models with Considering Distribution Network Directly or Indirectly .................................................................................. 1345

SESSION – XIIB:
DISTRIBUTED GENERATION AND RENEWABLE ENERGY SOURCES – V

Design and Realization of Controller in Wind Solar Hybrid Generating System ......................................................... 1350
Fengge Zhang, Yuxin Wang, Quanfu Shi, Erxin Shang

Unit Commitment under Wind Power and Demand Uncertainties ........................................................................... 1356
V. S. Pappala, I. Erlich, S. N. Singh

SESSION – XIIB:
ELECTRICAL MACHINES AND DRIVES – V

Direct Torque Control of Symmetrical and Asymmetrical Single Phase Induction Motor .......................... 1362
V. Fatina, S. V. Jadhav, R. T. Ugale, B. N. Chaudhari
Behavior of Line Start Permanent Magnet Synchronous Motor Under Short Power Interruptions
R. T. Ugale, Y. Balkrishna, B. N. Chaudhari, N. R. Bhasme

Artificial Neural Network based Controller and Speed Estimation of Permanent Magnet Synchronous Motor
Prerna Gaur, A. P. Mittal, Bhim Singh

Study on a New Type of Permanent Magnet Claw Pole Motor with Outer Rotor
Fengge Zhang, Yue Zhang

SESSION – XIIC: UTILIZATION OF ELECTRICAL ENERGY – III

Design and Simulation of Optimum Triggering Scheme for a Series Switch in RF Heating
H. K. Patel, Atman Shah, Deep Shah

Calculations of Electromagnetic Field and Thermal Problem in an Isolated Phase Bus by Using FE Model
Y. Li, N. Wang, J. Guo, S. L. Ho

Numerical Analysis of Eddy Current Field in the Ascending Flange for the Bushings and Tank Wall of a Large Transformer
Y. Li, N. Wang, R. Y. Tang, S. L. Ho

Fast Bus Transfer Systems - A System Solution Approach
Amit Raje, Anil Raje, Arvind Chaudhary

SESSION – XIID: ENERGY MANAGEMENT SYSTEM AND DISTRIBUTION AUTOMATION – II

Distribution System Load Flow Using Primal Dual Interior Point Method
Ravindra Singh, Bikash C. Pal, Rabih A. Jabr, Peter D. Lang

Distribution Maintenance Time scheduling Using a Genetic Algorithm
Huang Xianchao, Zhang Lizi, Shu Jun, Zhang Jingwei

Voltage Source Converter Based Multi Terminal DC Subtransmission System for City Infeed
Vishal Verma, Lovely Goyal, Bhim Singh

IEC61850 based Substation Automation System
Keiichi Kaneda, Setsuo Tamura, Nobuhisa Fujiyama, Yoshikazu Arata, Hachidai Ito
