2008 11th International IEEE Conference on Intelligent Transportation Systems

(ITSC 2008)

Beijing, China
12-15 October 2008

Pages 1-609
# TABLE OF CONTENTS

**Phase Transition of Urban Freeway Traffic Flow**

Wei Guan, Shuyan He .................................................. 1

**Data Mining Based Research on Urban Tide Traffic Problem**

Xiaoyan Gong, Yu Lu .................................................... 8

**A Dynamic Model for Acceleration Behaviour Description in Congested Traffic**

Hilmi Berk Celikoglu, Mauro Dell’Orco ....................... 14

**Vehicle Classification Algorithm Based on Binary Proximity Magnetic Sensors and Neural Network**

Wei Zhang, Guozhen Tan, Nan Ding, Yao Shang, Mingwen Lin .................................................. 20

**Analysis of Evolutionary Game about the Route Choice of Individual Travel Mode Based on Bounded Rationality**

Jianmei LIU, Shoufeng Ma ............................................ 26

**Environmental Traffic Capacity and Traffic Structure Optimization on Urban Road**

Zhigao Zhu, Tiezhu Li .................................................. 31

**3D Traffic Sign Tracking Using a Particle Filter**

Mirko Meuter, Anton Kummert, Stefan Muller-Schneiders .................................................. 36

**The Use of Telematics to Monitor Traffic in Urban Areas: Theory and Applications**

Nikolas Geroliminis, Masao Kuwahara .................. 42

**Vision-Based Real-Time Lane Marking Detection and Tracking**

Wei Liu, Hongliang Zhang, Bobo Duan, Huai Yuan, Hong Zhao .................................................. 48

**Characteristics of Mixed Traffic with Different Acceleration Vehicles on Single-Lane**

Fa Zhang, Qiao-xia Zhao, Jinling Li .......................... 54

**The Markov-Gap CA Model for Entering Gaps and Departure Headways at Signalized Intersections**

Fa Wang, Yan Ji, Li Li, Jianming HU .......................... 60

**Automatic Daytime Road Traffic Control and Monitoring System**

Pablo Fernandez Alcantarilla, Miguel Angel Sotelo, Luis M. Bergasa .................................................. 66

**A Novel Method for Background Suppression in Millimeter-Wave Traffic Radar Sensor**

Hao Zhang, Wen Yu, Xiaowei Sun .......................... 72

**Stability of String of Adaptive Cruise Control Vehicles with Parasitic Delays and Lags**

Lingyun Xiao, Swaroop Darbha, Feng Gao .......................... 78

**A New Approach for In-Vehicle Camera Obstacle Detection by Ground Movement Compensation**

Changhui Yang, Hitoshi Hongo, S. Tanimoto .......................... 84

**Traffic Estimation and Prediction Based on Real Time Floating Car Data**

Corrado de Fabritiis, Roberto Ragone, Gaetano Valenti .................................................. 90

**Detection, Tracking and Recognition of Traffic Signs from Video Input**

Andrzej Ruta, Yongmin Li, Xiaohui Liu .................................................. 97

**Hierarchical Software Architectures and Vehicular Path Prediction for Cooperative Driving Applications**

Derek Caveney .................................................. 103
Analysis of Vehicle Lane Changes for Determining Fastest Paths in the V2V2I ITS Architecture ................................................................. 109
Jeffrey Miller

The Mobile Spatial DBMS for the Partial Map Air Update in the Navigation ................................................................. 115
Min Kyong Wook, An Kyong Hwan, Kim Ju Wan, Jin Sung Il

Closed Form Expressions of Optimal Buffer Times between Scheduled Trains at Railway Bottlenecks ................................................................. 121
Jianxin Yuan, Ingo A. Hansen

Development of an Embedded Vision Based Vehicle Detection System Using an ARM Video Processor ................................................................. 127
Sergio Toral, Federico Barrero, Manuel Vargas

An Enhanced Background Estimation Algorithm for Vehicle Detection in Urban Traffic Video ................................................................. 133
Manuel Vargas, Sergio Toral, Federico Barrero, Jose Manuel Milla

An Asymmetric Intelligent Model for Public Transportation Networks ................................................................. 140
abbas ehsanfar, Sina Farzinfard, M. Isaai

Automatic Mining of Vehicle Behaviors with an Unknown Number of Categories ................................................................. 146
Ying LIU, Hao Zhang, Huadong Meng, Xiaqin Wang

Analysing Driver's Attention Level Using Computer Vision ................................................................. 152
Luis M. Bergasa, Jose Miguel Buenaposada, Jesus Nuevo, Pedro Jimenez, Luis Baumela

On Integration of Features and Classifiers for Robust Vehicle Detection ................................................................. 158
Luciano Oliveira, Urbano Nunes

Development of Satellite Based Positioning and Navigation Facilities for Precise ITS Applications ................................................................. 164
Xiaolin Meng, Lei Yang, Jose Aponte, Chris Hill, Terry Moore, Alan Dodson

Real Urban Traffic Flow Chaotic Phase Space Study ................................................................. 170
Lidong Zhang, Yinglong Wang, Zhanquan Sun, Jing Shan Pan

AFT2: An Automated Maintenance and Calibration Tool for Traffic Management & Control Systems ................................................................. 175
Elias Kosmatopoulos, Markos Papageorgiou, Yibing Wang

Traffic Flow Characteristic Based on a Phase Plane Approach ................................................................. 183
Chih-Ming Hsu, Feng-Li Lian

A CA Model for Intrusion Conflicts Simulation in Vehicles-Bicycles Laminar Traffic Flow ................................................................. 189
Sihan Cheng, Danya Yao, Yi Zhang, Yuelong Su, Wenda Xu

Analysis and Optimization of Statistical Data in Beijing for Traffic Information Services ................................................................. 195
Man Li, Wenjia Wang

Speed and acceleration distributions at a traffic signal analyzed from microscopic real and simulated data ................................................................. 201
Francesco Viti, Serge Hoogendoorn, H.J. Van Zuylen, Isabel Wilmink, Bart van Arem

Pedestrian Detection Using Boosted HOG Features ................................................................. 207
Zhen-rui Wang, Yulan Jia, Hua Huang, Shuming Tang

An Innovation-Based Approach to Timely and Robust Automatic Highway Incident Detection ................................................................. 213
Martin Schober, Herbert Wehlan, J. Meier

Video Based Traffic Congestion Prediction on an Embedded System ................................................................. 219
Holger Glasl, David Schreiber, Nikolaus Vierl, Stephan Veigl, Gustavo Fernandez Dominguez
The Concept of an Open Platform for Traffic and Traveler Information Services ................................................225
Yanying Li, Mariana Andrade, Vincent Blervaque

Decision Making Strategies for Intelligent Control System of Train Speed & Train Dispatch in Iran Railway .................................................................231
Jandaghian Maryam, Saeid Setayeshi, Mahmoud-Reza Keymanesh, Hosein Arabalibeik

Neural Network Committee to Predict Travel Times: Comparison of Bayesian Evidence Approach to the Use of a Validation Set ................................................237
Chris Philip IJsbrand van Hinsbergen, Hans van Lint, H.J. Van Zuylen

A 2DLDA Based Algorithm for Real Time Vehicle Type Recognition .................................................................243
Hua Huang, Qian Zhao, Yulan Jia, Shuming Tang

Sensor Fusion on an Embedded System for Traffic Data Analysis - ETRADA-V System ..........................................................249
Martin Litzenberger, Holger Glasl, Bernhard Kohn, Bernhard Schalko, Gustavo Fernandez Dominguez

A Novel Approach to Forecast Weakly Regular Traffic Status .................................................................255
Yang Zhang, Yuncai Liu

Design a Support Vector Machine-Based Intelligent System for Vehicle Driving Safety Warning .................................................................260
Che-Chung Lin, Chi-Wei Lin, Dau-Chen Huang, Yung-Hsin Chen

Localization of Objects in Automotive Scenes with Spatial and Temporal Information .................................................................266
Capucine Legrand, Vincent Fremont, Frederic Large

Evaluation of Road Marking Feature Extraction ....................................................................................272
Thomas Veit, Jean-Philippe Tarel, Philippe Nicolle, Pierre Charbonnier

Application of Real-Time Precise Point Positioning and GIS for Rail Track Deformation Monitoring of the Qinghai-Tibet Railway .................................................................280
Rui Gao, Xiaolin Meng, Jianghui Geng, Hai-sui Yu, Lihua Xu

Stereovision-Based 3D Lane Detection System: A Model Driven Approach .................................................................286
Nabil Benmansour, Raphael Labayrade, Didier Aubert, S. Glaser

Short-Term Traffic Flow Forecasting Using Macroscopic Urban Traffic Network Model .................................................................293
Shu Lin, Yugeng Xi, Yanfei Yang

Integrating Spline Curves in Road Constraint Object Tracking ........................................................................298
Carsten Hasberg, Stefan Hensel

A GPS/GIS Integrated System for Urban Traffic Flow Analysis ........................................................................304
Wenhuan Shi, Qing-Jie Kong, Yuncai Liu

Infomobility Provision through MBMS/UMTS in Realistic Scenarios ........................................................................310
Aleksandro Bazzi, Barbara Mavi Masini, Andrea Conti, Oreste Andrisano

Understanding Metro Station Usage Using Closed Circuit TeleVision Cameras Analysis .................................................................316
Cyril Carincotte, Michel Hick, Xavier Naturel, Jian Yao, Jean-Marc Odobez, Arnaud Bastide, Bruno Corbucci

Improving Safety through Online Driver Workload Assessment ........................................................................324
Karine Younsi, Jean-Marc Girard, Jean-Christophe Popieul, Pierre Loslever, Philippe Simon

Multi-Agent Platform for Solving the Dynamic Vehicle Routing Problem .................................................................330
Dariusz Barbucha, Piotr Jedrzejowicz

A Generic Temporal Integration Approach for Enhancing Feature-Based Road-Detection Systems .................................................................336
Thomas Michalke, Robert Kastner, Jannik Fritsch, Christian Goerick

SPECIALIST: A Dynamic Speed Limit Control Algorithm Based on Shock Wave Theory ........................................557
Andreas Hegyi, Serge Hoogendoorn, Marco Schreuder, Henk Stoelhorst, Francesco Viti

Denial of Service Attacks on Inter-Vehicle Communication Networks ............................................................563
Jeremy Blum, Andrew Neiswender, Azim Eskandarian

Monitoring an Intersection Using a Network of Laser Scanners .................................................................569
Huijing Zhao, Jinshi Cui, Hongbin Zha, Kyoichiro Katabira, Xiaowei Shao, Ryosuke Shibasaki

Experimental Research of Real-Time Floating Car System in Beijing .........................................................575
Liyun Zhu, Jianping Sun, Huimin Wen, Feng Chen, Yong Gao

A BRT Network Route Design Model ........................................................................................................579
Jian An

System Optimization Model for Traffic Network with ATIS ........................................................................587
Bingfeng Si

Gradient Projection Algorithm Using Curry’s Steplength for Traffic Assignment ........................................593
Zichuan Li, Gang-Len Chang, Suhasini Natarajan

Safety Impacts of Variable Speed Limits - A Simulation Study ................................................................599
Jinan Piao, Mike McDonald

Application of RF Tags in Highway Reference Markers .............................................................................604
Yu Cai, Richard C. Liu

A Novel Loglinear Model for Freeway Travel Time Prediction .....................................................................610
Lili Huang, Matthew Barth

Traffic Impact Assessment of Incident Management Strategies ..................................................................616
Hussein Dia, William Gondwe, Sakda Panwai

Driver-Independent Assessment of Arousal States from Video Sequences Based on the Classification of Eyeblink Patterns ........................................................................................................622
Roongroj Nopsuwanchai, Yoshihiro Noguchi, Mieko Ohsuga, Yoshiyuki Kamakura, Yumiko Inoue

Model-Based Estimation of Driver Intentions Using Particle Filtering ..........................................................630
K. Lidstrom, T. Larsson

Low Cost Sensors Ego Localization with IMM Approach for Unusual Maneuvers .....................................636
Alexandre Ndjeng Ndjeng, Dominique Grayer, Sebastien Glaser

Driving Force Control Method to Perform Slip Control in Cooperation with the Front and Rear Wheels for Front-And-Rear Wheel-Independent-Drive-Type EVs (FRID EVs) ........................................642
Nobuyoshi Mutoh, Saitoh Tadahito, Sasaki Yusuke

Implementation of the ERI Standard and Evaluation of Applications with Several Low-Cost Technologies .................................................................................................................................648
Segura Garcia Jaume, Juan Aldasoro, J. Miguel A., Soriano Francisco R.

MCMC Particle Filter for Real-Time Visual Tracking of Vehicles ...............................................................653
Francois Bardet, chateau Chateau Thierry

Real-Time Road Traffic Classification Using On-Board Bus Video Camera .................................................659
Christophe Parisot, Jerome Meessen, Cyril Carincotte, Xavier Desurmont

Cooperative Path Prediction in Vehicular Environments ...............................................................................667
Panagiotis Lytrivis, Georgios Thomaidis, Angelos Amditis

Continuous Driver Intention Recognition with Hidden Markov Models .....................................................673
H. Berndt, J. Emmert, K. Dietmater

Comparison of EKF and PEKF in a SLAM Context ......................................................................................679
Francois CHANIER, Paul Checchin, Christophe BLANC, Laurent Trassoudaine
Making an Enhanced Map for Lane Location Based Services ................................................................. 685
David Betaille, Rafael Toledo-Moreo, Lannseurit Jean

Hybridized GPS/DR Positioning System with Unknown Initial Heading for Land Vehicles .................. 691
Alexandru Dumitrache, Miguel A. Zamora-Ezquierdo, Rafael Toledo-Moreo, Antonio, F. Gomez- 
Skarmeta

Linking Freeway and Arterial Data - Data Archiving Testing in Supporting Coordinated 
Freeway and Arterial Operations ................................................................. 697
Qingyan Yang, Heng Wei, Jiuchun Gu

A Practical Intelligent Navigation System Based on Travel Speed Prediction ...................................... 703
Yang Wang, Patrick Beullens, Honghai Liu, David Brown, Tim Thornton, Richard Proud

A Fast Integer Ambiguity Repair Method for the Land Vehicle Attitude Determination 
Using GPS ........................................................................................................ 709
Bo Wang, Lingjuan Miao, Shunting Wang, Jun Shen

Nonlinear Analysis of Individual Vehicle Behavior in Car Following .................................................. 715
Lanjun Wang, Hao Zhang, Huadong Meng, Xi Qin Wang

SMART-SIGNAL: Systematic Monitoring of Arterial Road Traffic Signals ...................................... 719
Henry X. Liu, Wenteng Ma, Heng Hu, Xinkai Wu, Guizhen Yu

Estimation of Vehicle Usage Rate Based on Capture-Recapture Model with License Plate 
Recognition Data ............................................................................................. 725
Xi Quan Chen, Xin Miaoy Yang, Qin Xin Shi

Quantitative Measures for GPS Based Road User Charging ................................................................. 731
Shaobin Feng, Washington Ochieng, Robin North

Agent-Based Coordination Model for Designing Transportation Applications .................................. 737
Fabien Badeig, Flavien Balbo, G. Scemama, Mahdi Zargayouna

A Precise Road Network Modeling and Map Matching for Vehicle Navigation .............................. 743
Chen Hua Wang, Zhencheng Hu, Keichi Uchimura

Multi-Sensor Fusion Method Using Bayesian Network for Precise Multi-Vehicle 
Localization ....................................................................................................... 749
Cherif Smaili, Maan E. El Najjar, François Charpillet

Pedestrian Behavior Prediction Based on Motion Patterns for Vehicle-To-Pedestrian 
Collision Avoidance ......................................................................................... 755
Zhao Chen, Chi Kit Ngai, Nelson H. C. Yang

Spatio-Temporal RANSAC for Robust Estimation of Ground Plane in Video Range 
Images for Automotive Applications ........................................................................ 761
Faisal Mufti, Robert Mahony, Jochen Heinzmann

Influence of In-Vehicle Real-Time Traffic Safety Warning Information on Driving 
Stability at Limited Signal Visibility Approaches: Use of an Ordered Probit Model .......................... 768
Wonchul Kim, Junyi Zhang, Akimasu Fujwara, Makoto Chikaraishi

Coordinated Control of Mutiple Ramp Metering Based on DHP (D955; ) Controller .................... 774
Xuerui Bai, dongbin zhao, jianjiang Yi, Jing Xue

Low-Power Vehicle Speed Estimation Model and Algorithm Based on WSN .............................. 780
Nan Ding, Guozhen Tan, Mingwen Lin, Yao Shang, Honglian Ma

Software Architecture Design on Large-Scale Network Traffic Signal Controllers System ................ 786
Zhaoge Qi, Wei Shi, Zhaoohui Wu

An Effective and Robust Pedestrians Detecting Algorithm .......................................................... 792
Zhi-peng Li, Yun Sun, Fuqiang Liu, Wenhuan Shi
Novel Index for Objective Evaluation of Road Detection Algorithms .......................................................... 797
J.M. Alvarez, A. Lopez

Comparative Synthesis of the 3 Main European Projects Dealing with Cooperative Systems (CVIS, SAFESPOT and COOPERS) and Description of COOPERS Demonstration Site 4 .................................................................................. 803
G. Toulminet, J. Boussuge, C. Laurgeau

Research on Fuzzy Adaptive H&8734; Robust Filter for Integrated Navigation System .................. 809
Jiang Liu, Jian Wang, Bogen Cai

An Estimation-Based Automatic Vehicle Location System for Public Transport Vehicles ............. 814
Tino Morenz, R. Meier

EVAQ: A New Analytical Model for Voluntary and Mandatory Evacuation Strategies on Time-Varying Networks .................................................................................................................................................. 821
Adam Pel, Michiel Bliemer, Serge Hoogendoorn

Using 3D Road Geometry to Optimize Heavy Truck Fuel Efficiency ............................................. 827
Wei Huang, David Bevly, Steve Schnick, Xiaopeng Li

Contrast-invariant Obstacle Detection System using Color Stereo Vision ........................................... 833
Iyadh Cabani, G. Toulminet, Abdelaziz Bensrhair

Mobility Index-Based Navigation for Mandatory Re-Routing Scenarios ........................................ 839
Weihua Zhu, Kanok Boriboonsomsin, Matthew Barth

Vehicle Tracking by Non-Drifting Mean-Shift Using Projective Kalman Filter ................................ 845
Philippe Loic Marie Boutetfroy, Abdessalam Bouzderoum, Aceddine Beghdadi, Son Lam Phung

Content-Based Auto Exposure Control for On-Board CMOS Camera .................................................. 851
Shengdong Pan, Xiangjing An

Accident Risk Analysis and Model Applications of Railway Level Crossings ..................................... 857
Shou-Ren Hu, Kai-Han Wu

Scheduling Aircraft Landing Based on Clonal Selection Algorithm and Receding Horizon Control .................................................................................................................................................. 863
XiaoLan Jia, XianBin Cao, YuanPing Guo, Hong Qiao, Jun Zhang

A Multiple SVR Approach with Time Lags for Traffic Flow Prediction ........................................... 869
Tianshu Wu, Kuanqing Xie, Guoyie Song, Cheng Hu

A Reliable Hybrid Prediction Model for Real-Time Travel Time Prediction with Widely Spaced Detectors .................................................................................................................................................. 875
Nan Zou, Jianwei Wang, Gang-Len Chang

A Voronoi-Based Hierarchical Graph Model of Road Network for Route Planning ........................... 881
Qingquan Li, Zhe Zeng

Driver's Head Detection Model in Color Image for Driver's Status Monitoring ................................ 887
Woong Jae Won, Joonwoo Son

Real-Time Implementation of Simulation-Based Dynamic Traffic Assignment Model .................. 893
Ta-Yin Hu, Li-Wen Chen

Vehicle Detection Based on the Stereo Concept of (axis, Width, Disparity) Symmetry Map ................ 899
Yaqian Li, G. Toulminet, Abdelaziz Bensrhair

Airborne Moving Vehicle Detection for Urban Traffic Surveillance ................................................... 905
RenJun Lin, XianBin Cao, Yanwu Xu, ChuangXian Wei, Hong Qiao

Fuzzy Logic Based Cyclists' Path Planning Behavioral Model in Mixed Traffic Flow ........................ 910

Pedestrian Detection for a Near Infrared Imaging System ................................................................. 1148
   Mineki Soga, Shigeyoshi Hiratsuka, Hideo Fukamachi, Yoshiki Ninomiya

Kernel and Feature Selection for Visible and Infrared Based Obstacle Recognition ...................... 1154
   Anca Ioana Apatean, Alexandrina Rogozan, Abdelaziz BENSRAIR

Dynamic Management of Intelligent Urban Vehicles ........................................................................... 1160
   Asma Melki

Flatness Based Control of Traffic Flow for Coordination of Ramp Metering and Variable
   Speed Limits ................................................................................................................................. 1166
   Boumediene Kamel, Amar Benasser, Daniel Jolly

Towards Reservation-Based Intersection Coordination: An Economic Approach ....................... 1172
   Matteo Vastrani, Sascha Ossowski

   Juergen Dunkel, Alberto Fernandez, R. Ortiz, Sascha Ossowski

Synthesis of Emergency Evacuation Communication System for Disaster Detection and
   Information Dissemination ............................................................................................................ 1185
   Qing-An Zeng, Heng Wei

A Hierarchical Bus Rapid Transit System Based on Wireless Sensor Networks .......................... 1191
   Wu-Ling Huang, Shuming Tang, zhenjiang li, jenghua zhu, Yunfeng Ai

   Tao Li, dongbin zhao, jianqiang Yi

Towards an Artificial Traffic Control System ..................................................................................... 1202
   Rosaldo Rossetti, Paulo Ferreira, Rodrigo Braga, E. Oliveira

An Investigation on ATS from the Perspective of Complex Systems ............................................ 1208
   Jinyuan Li, Shuming Tang, Fei-Yue Wang

Test Results and Validation of the FeedMAP Framework with ADAS Applications .................... 1213
   Jan Loewenau, Sinisa Durekovic, Maxime Flament, Yanying Li
