TABLE OF CONTENTS

KEYNOTES

Web Services: Software-as-a-Service (SaaS), Communication, and Beyond ......................................................... 1
Wu Chou

Net-Enabled Applications for Commercial Aviation ................................................................. 2
Susan X. Ying

Mobile Services Business and Technology Trends ........................................................................ 4
Cesar Gonzales

Services Computing: A New Thinking Style of Education and Engineering .............................. 5
Liang-Jie Zhang

PANELS

Cloud Computing and IT as a Service: Opportunities and Challenges ........................................ 6
Geng Lin, Glenn Dasmalchi, Jinzy Zhu

Smarter SOA ........................................................................................................................................ 8
Tony Shan, Ephraim Feig, Thomas Bui, Jia Zhang

How Can Web Services Help Civil Aviation? ......................................................................... 10
Casey Fung

TUTORIALS

Common Business Components and Services toward More Agile and Flexible Industry
Solutions and Assets ..................................................................................................................... 11
Min Luo

Practical SOA: Service Modeling, Enterprise Service Bus and Governance ................................ 13
Min Luo, Liang-Jie Zhang

Make the Consumable Services via REST .............................................................................. 15
Ning Yan

Web Service-Based Business Process Development, Threat Modeling and Security
Assessment Tool ..................................................................................................................... 16
Jianxin Li, Teodor Sommestad, Patrick C. K. Hung, Xiang Li

EMERGING SERVICES TECHNOLOGY TRACK

Software as a Service: Configuration and Customization Perspectives ........................................ 18
Wei Sun, Xin Zhang, Chang Jie Guo, Pei Sun, Hui Su

Towards Unconditional Anonymity: Privacy Enforcement Model in Web Services ........................ 25
Yong Yang, Jian Yang
P2P SCCM: Service-Oriented Community Coordinated Multimedia over P2P ...........................................33
Jiehan Zhou, Zhonghong Ou, Mika Rautiainen, Mika Ylianttila

SOA SOLUTIONING TRACK

Towards Data Management of Web-Based Spatial Decision Support: The Case of Facility Network Transformation Analysis Services .................................................................40
Wenjun Yin, Yuhui Fu, Xinxin Bai, Jin Dong

A Practical Monitoring Framework for ESB-Based Services .................................................................48
Hao Yuan, Si Won Choi, Soo Dong Kim

Web Services Operation and Parameter Matchmaking Based on Free-Form User Queries ..................56
Chaitali Gupta, Rajdeep Bhoomik, Madhusudhan Govindaraju

A Model Driven Service Identification Approach for Process Centric Systems .....................................64
Vishal Dwivedi, Naveen Kulkarni

A Service Oriented Architecture for Biomedical Question Answering System ....................................72
Rosaline Makar, Mohamed Kouta, Amr Badr

Mobile Plug-and-Play Architecture for Collaborative Hybrid Peer-to-Peer Applications ..................80
Mika Ylianttila, Erkki Harjula, Timo Koskela, Otso Kassinen, Jukka Riekki

Metamodelling for Community Coordinated Multimedia and Experience on Metamodel-Driven Content Annotation Service Prototype ......................................................87
Jiehan Zhou, Mika Rautiainen, Mika Ylianttila

Service-Oriented Approach for Implementing an Extensible Content Management System ...............95
Trieu C. Chieu, Liangzhao Zeng

WORKSHOP ON SOFTWARE ENGINEERING FOR ADAPTIVE SOFTWARE SYSTEMS (SEASS 2008)

Towards Systematic Engineering of Service-Oriented Access Control in Federated Environments .................................................................103
T. Höllrigl, F. Schell, S. Suelmann, H. Hartenstein

Regression Testing of Composite Service: An XBFG-Based Approach .............................................111
Di Wang, Bixin Li, Ju Cai

A Formal Approach to Adaptable-Resources Specification .................................................................119
Yacine Sam, Omar Boucelma

Actor Eco-systems: Modeling and Configuring Virtual Enterprises ..................................................124
Aditya Ghose, George Koliadis

WORKSHOP ON SERVICE INTELLIGENCE AND COMPUTING (SIC 2008)

Ontology Based Cross-Domain Enterprises Integration and Interoperability ..................................132
Yue Ni, Yushun Fan

A Framework for Distributed Market Place Based on Intelligent Software Agents and Semantic Web Services .................................................................140
Ali Khalili, Ali Habibi Badrabadi, Farid Khoshalhan
