Proceedings

30-31 October 2007 • Herzlia, Israel

Sponsored by
IEEE Computer Society—Israeli Chapter
ILTAM—Israeli Users’ Association of Advanced Technologies
for Design and Manufacturing in the Electronics Industry

Los Alamitos, California
Washington • Tokyo
Table of Contents

Message from the Chairs
About the Israeli Chapter of the IEEE Computer Society
About ILTAM
Committees and Chairs
Reviewers

Session 1.1: Modeling and Testing
Moderator: Vered Gafni, Israel Aircraft Industries, Israel

AMDA: Matching the Model-Driven-Architecture’s Goals Using Extended Automata as a Common Model for Design and Execution ................................................................. 1
   D. Dayan, R. Kaplinsky, A. Wiesen, and S. Bloch

An Approach to ERP Testing Using Services ............................................................... 14
   Sagi Schliesser

Computation Independent Modeling within the MDA ................................................... 22
   Janis Osis, Erika Asnina, and Andrejs Grave

Session 1.2: Aspect- and Object-Oriented Development
Moderator: Shmuel Katz, Technion, Israel

Refactoring Aspects into Java Code ............................................................................. 35
   M. Kleyman, S. Tyszberowicz, and A. Yehudai

Assessing the Object-Level Behavioral Complexity in Object Relational Databases ............................................................... 48
   S. Justus and K. Iyakutti
AspectJTamer: The Controlled Weaving of Independently Developed Aspects .......................................................... 57
Constantin Serban and Shmuel Tyszberowicz

**Session 1.3: Software Implementation**
*Moderator: Yishai Feldman, The Interdisciplinary Center, Israel*

Storing a Persistent Transactional Object Heap on Flash Memory ........................................................................ 66
Nir Shasha and Sivan Toledo

Execution Platform for the Graphic Real-Time Design Tool of Arts’Codes ................................................................. 77
Aryeh Teitelbaum

**Session 2.1: Software Projects Management**
*Moderator: Daniel Galin, Ropin College, Israel*

Success of Open Source Projects: Patterns of Downloads and Releases with Time ...................................................... 87
Ayelet Israeli and Dror G. Feitelson

The Software Engineering Timeline: A Time Management Perspective ................................................................. 95
Orit Hazzan and Yael Dubinsky

Estimating the Required Code Inspection Team Size ......................................................................................... 104
E. Kantorowitz, T. Kuflik, and A. Raginsky

**Session 2.2: Requirements in Practice**
*Moderator: Pnina Soffer, Haifa University, Israel*

Derived Requirements Generation: The DRAS Methodology ..................................................................................... 116
David Bar-On and Shmuel Tyszberowicz

Context Aware Communication Services in “Active Museums” .............................................................................. 127
Sadek Jbara, Tsvi Kuflik, Pnina Soffer, and Oliviero Stock

**Session 2.3: Web Applications**
*Moderator: Yael Dubinsky, University of Rome “La Sapienza,” Italy*

ScanObjects: Adding Steering Wheels to Search Engines ..................................................................................... 136
Iaakov Exman and Alex Shnayder

SOA for Services or UML for Objects: Reconciliation of the Battle of Giants with Object-Process Methodology ......................................................... 147
Dov Dori

**Author Index** ......................................................................................................................................................... 157
