The Working IEEE/IFIP Conference on Software Architecture

(WICSA 2007)

Mumbai, India
6 – 9 January 2007
Message from the Chairs
Organizers and Committees

Main Conference

Architecture Evaluation

Risk Themes Discovered Through Architecture Evaluations ......................................................... 1
L. Bass, R. Nord, W. Wood and D. Zubrow

Assessing the Architectonics of Large, Software-Intensive Systems Using a Knowledge-Based Approach................................................................. 11
C. Del Rosso and A. Macari

Inside Architecture Evaluation: Analysis and Representation of Optimization Potential. 20
B. Florentz

Architecture Design I

Tool Support for Architectural Decisions......................................................................................... 30
A. Jansen, J. van der Ven, P. Avgeriou and D.K. Hammer

Do Architecture Design Methods Meet Architects’ Needs? ....................................................... 40
D. Falessi, G. Cantone and P. Kruchten

A Framework for the Assessment and Selection of Software Components and Connectors in COTS-Based Architectures.............................................. 50
J. Bhuta, C. A. Mattmann, N. Medvidovic and B. Boehm

Architecture Design II

A Model-Driven Approach to Extract Views from an Architecture Description Language........................................................................................................... 60
C. Oliveira and M. Wermelinger

Architecture Assessment Model for System Evolution............................................................... 70
S. Bhattacharya and D. E. Perry

An Architectural Style for Ajax........................................................................................................ 80
A. Mesbah and A. van Deursen
Architecture Compliance

Assessing a Multi-Site Development Organization for Architectural Compliance .......... 90
  V. Clerc, P. Lago and H. van Vliet

Constructing a Reading Guide for Software Product Audits ........................................ 100
  R. C. de Boer and H. van Vliet

A Comparison of Static Architecture Compliance Checking Approaches .................. 110
  J. Knodel and D. Popescu

Development and Deployment

An Integrated QoS-Aware Service Development and Management Framework .......... 120
  J. Zhou, E. Niemela and P. Savolainen

Flexible Software Development: From Software Architecture to Process ................... 130
  D. Balasubramaniam, R. Morrison, R. M. Greenwood and B. Warboys

Adaptation and Distribution of Pipeline-Based Context-Aware Web Architectures ...... 140
  M. Hinz, S. Pietschmann, M. Umbach and K. Meißner

Case Studies

The Impact of Requirements Knowledge and Experience on Software Architecting: An
  Empirical Study ............................................................................................................. 150
  R. Ferrari and N. H. Madhavji

Architectural Misalignment: An Experience Report ................................................... 160
  M. Bass, V. Mikulovic, L. Bass, J. Herbsleb and M. Cataldo

Working Sessions and Tutorials
An Architect’s Competencies and Duties

Setting up Architect Team .......................................................................................... 169
  P. Sarang

Training Initiative for New Software/Enterprise Architects: An Ontological Approach .. 173
  A. Fraga and J. Llorens

The Duties, Skills, and Knowledge of Software Architects ........................................ 177
  P. Clements, R. Kazman, M. Klein, D. Devesh, S. Reddy and P. Verma

Architecture Modeling and Requirements

Middleware-Induced Architectural Style Modelling for Architecture Exploration .......... 181
  S. Giesecke, J. Bornhold and W. Hasselbring
Decision-Oriented Modeling of Product Line Architectures ........................................ 185
D. Dhungana, R. Rabiser and P. Grunbacher

Requirements and Scenarios: Running Aspect-Oriented Software Architectures ........ 189
E. Navarro, P. Letelier and I. Ramos

The Architecture-Requirements Interaction .............................................................. 194
J. A. Miller and N. H. Madhavji

Non-Functional Modeling and Validation in Model-Driven Architecture ................. 198
V. Cortellessa, A. Di Marco and P. Inverardi

Emerging Architecture Challenges and Techniques

Architecting Pervasive Computing Systems for Privacy: A Survey ....................... 202
R. S. Cardoso and V. Issarny

Working Session: Software Architecture Competence ........................................... 206
P. Clements, R. Kazman and M. Klein

Tackling Offshore Communication Challenges with Agile Architecture-Centric
Development ............................................................................................................... 209
A. Kornstadt and J. Sauer

What Makes Software Architecture-Based Testing Distinguishable ...................... 213
H. Muccini

Designing Domain-Specific Software Architecture (DSSA): Towards a New
Approach ................................................................................................................... 217
E. S. de Almeida, A. Alvaro, V. C. Garcia, L. Nascimento, S. L. Meira and D. Lucredio

Tutorials

Architecture Knowledge Management: Concepts, Technologies, Challenges ....... 221
I. G. Ali Babar

Integrating Architecture-Centric Methods into Object-Oriented Analysis and Design... 222
R. Sangwan and Z. El Houda

Producing Software Architecture Documentation to Suit Your Needs .................. 223
J. Stafford and P. Clements

An Introduction to Effectively Evaluating Software Architectures ....................... 224
L. Bass and R. L. Nord

Architecture Design for Globally Distributed Projects .......................................... 225
M. Bass, R. Sangwan and M. Smith
