# NPC 2007

## TABLE OF CONTENTS

### VOLUME 1

Message from the NPC 2007 Workshop Organizers
Conference Organization
Additional Reviewers

**INTERNATIONAL WORKSHOP ON FRONTIER OF DATA-DRIVEN ENGINEERING (FDDE 2007)**

The Info-plosion Project (INVITED PAPER) ................................................................. 1
  Masaru Kitsuregawa

Keyword Search on Relational Databases (INVITED PAPER) ................................. 5
  Wei Wang, Xuemin Lin, Yi Luo

Efficient Algorithms for On-line Analysis Processing on Compressed Data
Warehouses (INVITED PAPER) ............................................................................ 9
  Jianzhong Li, Hong Gao

Innovating Database Technology for Advanced Applications (INVITED PAPER) ....... 11
  Ge Yu, Guoren Wang, Xiaochun Yang, Derong Shen, Daling Wang

Stream Data Management Based on Integration of a Stream Processing Engine
and Databases (INVITED PAPER) .................................................................... 16
  Hiroyuki Kitagawa, Yousuke Watanabe

Querying Graph-Structured Data (INVITED PAPER) .......................................... 21
  Jiefeng Cheng, Jeffrey Xu Yu

Content-Based Search using Term Aggregation and Classification over Hybrid
Peer-to-Peer Systems (INVITED PAPER) ............................................................. 26
  Aoying Zhou, Rong Zhang, Quang Hieu Vu, Weining Qian

Web and Mobile Data Management (INVITED PAPER) ...................................... 34
  Xiaofeng Meng, Wei Liu

Collaborative Legal Information Sharing on P2P Network (INVITED PAPER) ........ 39
  Yanchun Zhang, Hao Shi, Xin Wang, Jingyuan Zhang

Data Quality—The Key Success Factor for Data Driven Engineering (INVITED
PAPER) ............................................................................................................. 46
  Shazia Sadiq, Xiaofang Zhou, Maria Orlowska

**INTERNATIONAL WORKSHOP ON NETWORK AND SYSTEM SECURITY (NSS 2007)**

A Reliable SLA-Based Admission Controller for MPLS Networks ..................... 52
  Jian Pu, Kin F. Li, Mostofa Akbar, Gholamali C. Shoja, Eric Manning
A Conceptual Framework for a SIM-Based Electronic Transaction Authentication System

Manzur Ashraf, Syed Mahfuzul Aziz, M. Lutful Kabir, Biswajit K. Dey

Further Cryptanalysis of a CRT-RSA Algorithm at CCS 2003

Ming Li, Baodong Qin, Fanyu Kong, Daxing Li

A Conceptual Incentive Mechanism of P2P File Sharing Systems Based on Game Theory

Kai-ping Xue, Qi Wang, Pei-lin Hong, Han-cheng Lu, Ming-xiu Hu

A Request-Driven Role Mapping for Secure Interoperation in Multi-domain Environment

Zhuo Tang, Ruixuan Li, Zhengding Lu

A New Intrusion Detection Method Based on Artificial Immune System

Baoyi Wang, Shaomin Zhang

A User-centric Federated Single Sign-on System

Suriadi Suriadi, Ernest Foo, Audun Jøsang

A Secure Ring Signcryption Scheme for Private and Anonymous Communication

Lingling Wang, Guoyin Zhang, Chungen Ma

Constructing Role-Based Access Control and Delegation Based on Hierarchical IBS

Jin Wang, Daxing Li, Qiang Li, Bai Xi

DoS Evading Mechanism upon Service Hopping

Leyi Shi, Chunfu Jia, Shuwang Lu

An Identity-Based Encryption Scheme for Broadcasting

Geng Yang, Jiangtao Wang, Hongbing Cheng, Chunming Rong

Anomaly Intrusion Detection Methods for Peer-to-Peer System

Daxin Tian, Yanheng Liu, Bin Li

An Efficient Elliptic Curves Scalar Multiplication for Wireless Network

Banggu Wang, Huanguo Zhang, Yuhua Wang

Pitch Modification Based on Syllable Units for Voice Morphing System

Yinqiu Gao, Zhen Yang

A Cross-Authentication Model for Heterogeneous Domains in Active Networks

Qiong Chen, Zhongwen Li, Shui Yu

Security Enhancement of a Remote User Authentication Scheme Using Bilinear Pairings and ECC

Duc-Liem Vo, Kwangjo Kim

Bus-Based Anonymous Multicast in Peer-to-Peer Overlay

Jian Wang, Changyong Niu, Ruimin Shen

Integrated Site Security for Grid; An Initiative to Cover Security Beyond the Grid

Bruno Hoeft, Ursula Epting

Using Mobile Agents to Detect and Recover from Node Compromise in Path-Based DOS Attacks in Wireless Sensor Networks

Bai Li, Lynn Batten

Key Feature and Rule-Based Intrusion Detection for Wireless Sensor Networks

Haiguang Chen, Huafeng Wu, Xi Zhou, Chuanshan Gao
Inference of One-Way Queuing Delay Distribution Using Packet-Pair Probes
without Clock Synchronization .............................................................. 164
Wei-Xuan Gu, Shun-Zheng Yu

An Innovative Analyser for Email Classification Based on Grey List Analysis .......... 171
M. Rafiqul Islam, Wanlei Zhou

On the Effectiveness of Flexible Deterministic Packet Marking for DDoS Defense ........ 178
Yang Xiang, Wanlei Zhou, Zhongwen Li, Qun Zeng

An Efficient Contributory Group Rekeying Scheme Based on Hash Functions for
MANETs ............................................................................................... 186
Depeng Li, Srinivas Sampalli

Collaborative Computational Chemical Grid Based on CGSP ................................ 194
Ying Zhao, Xuelin Shi

Password-Based Dynamic Group Key Agreement ................................................. 198
Chunbo Ma, Jun Ao, Jianhua Li

A Novel Gray Hole Attack Detection Scheme for Mobile Ad Hoc Networks ........... 204
Xiaopeng Gao, Wei Chen

Issue of Event Sequence in Time of Distributed Intrusion Detection System ........... 210
Guoyuan Lin, Hao Huang, Tianjie Cao

An Identity-Based Security Architecture for Wireless Mesh Networks ................. 218
Guangsong Li

An Efficient and Universal Security Architecture of Implementing IPSec in
Broadband Router .................................................................................. 222
Xiaozhuo Gu, Jianzu Yang, Jing Yu, Julong Lan

A Reliable Approach of Establishing Trust for Wireless Sensor Networks ............. 227
Guangjie Han, Deokjai Choi, Wontaek Lim

Research on Usage Control Model with Delegation Characteristics Based on OM-
AM Methodology .................................................................................. 233
Zhiyong Zhang, Lin Yang, Qingqi Pei, Jianfeng Ma

Specification and Runtime Enforcement of Security Policies ............................... 239
Ying Jin, Jing Zhang, Xiaojun Zheng

Intrusion Detection System by Integrating PCNN and Online Robust SVM ............ 245
Hengjie Li, Jiankun Wang

A Semiring Privacy Protect Model ................................................................... 250
Mingwu Zhang, Bo Yang, Wenzheng Zhang

INTERNATIONAL WORKSHOP ON INFORMATION AND STORAGE
MANAGEMENT FOR UBIQUITOUS COMPUTING (ISMUC 2007)

An Energy Efficient Design of Multi-resolution Storage for Ubiquitous Data
Management ......................................................................................... 255
Bo Chen, Jianhua Yang, Yabo Liu, Zhaohui Wu

PushFS: A Smart Push File Service Model for Ubiquitous Storage ..................... 261
Meijun Tao, Jianhua Yang, Zhaohui Wu

Semantic and Context-Based Information Management in SCUDWare Middleware
for Ubiquitous Computing ....................................................................... 267
Qing Wu, Jianhua Yang, Ying Li
A Context Quality Model for Ubiquitous Applications ................................................................. 274  
Siliang Tang, Jianhua Yang, Zhaohui Wu

Sharing Software Resources with Floating License in Grid Environment ..................................... 280  
Wei Fu, Nong Xiao, Xicheng Lu

Anti-phishing by Smart Mobile Device ............................................................................................. 287  
Weili Han, Yi Wang, Ye Cao, Jiping Zhou, Lixing Wang

INTERNATIONAL WORKSHOP ON ADVANCED TOPICS IN NETWORK COMPUTING, TECHNOLOGY, AND APPLICATIONS (ATNCTA 2007)

A New Chaos Encryption Algorithm Based on Parameter Randomly Changing .............................. 293  
Xiao-jun Tong, Ming-gen Cui

Wavelength Assignment of Matrix Multiplication Communication Pattern on a Class of Regular Optical WDM Networks .................................................................................. 298  
Fang-ai Liu, Lei Xia

A Novel Approach of Available Bandwidth Estimation for Heterogeneous Networks ................. 304  
Yuhua Liu, Hao Huang, Kailhua Xu

Parallel Analysis for Lightweight Network Incident Detection Using Nonlinear Adaptive Systems ................................................................. 309  
Ruo Ando, Yoshiyasu Takefuji

A Highly Reliable Access Control Model for Ad Hoc Networks ...................................................... 316  
Insoo Cho, Man Ju Lee, Tea Sang Yun, Jung Ah Kim, Pho Duc Giang, Sunyoung Lee

Research and Design of an Attribute-Managed Storage-Cluster Based on TCP/IP Network ........ 322  
QinQi Wei, ChangSheng Xie, Xu Li, Qiang Cao

Real-Time Performance Analysis for Wireless Sensor Networks .................................................... 327  
Qiang Zhou, Huagang Xiong, Hengqing Lin

Topology Control for Wireless Sensor Networks ........................................................................... 333  
Tao Zhao, Wandong Cai, Gang Liu

Middleware for Wireless Sensor Networks: A Comparative Analysis ........................................... 339  
Wassim Masri, Zoubir Mammeri

An Adaptive Key Selection Scheme in Wireless Sensor Networks ............................................... 347  
Guorui Li, Jingsha He, Yingfang Fu

An Access Control Scheme in Wireless Sensor Networks ........................................................... 352  
Yu-long Shen, Jian-feng Ma, Qing-qie Pei

Key Management Scheme for Sensor Networks with Proactive Key Revocation and Sleep State Consideration ......................................................................................... 358  

An Efficient Sensor Observation Data Registration Based on Asynchronous Service Middleware ........................................................................................................... 364  
Nengcheng Chen, Zhong Zheng, Ziqiang Chen

A GA Retransmission Model for Energy-Efficient Reliable Delivery in Wireless Sensor Networks ............................................................................................................. 370  
Xi-yuan Zhang, Hai Zhao, Pei-gang Sun, Jian Zhu, Dawei Cheng, Siyuan Zhu
An Analytical Model for Link Evaluation of Wireless Sensor Networks .............................................. 376
  Jiu-qiang Xu, Pei-gang Sun, Hai Zhao, Xi-yuan Zhang, Jian Zhu, Da-wei Cheng

A Link Evaluation Model Based on Gauss Distribution for Wireless Sensor Networks ........................................ 382
  Pei-gang Sun, Jiu-qiang Xu, Hai Zhao, Xi-yuan Zhang, Jian Zhu, Si-yuan Zhu

Fair Energy Consumption Protocol with Two Base Stations for Wireless Sensor Networks ........................................... 388
  Bao Nguyen Nguyen, Deokjai Choi

Ecologically Inspired Distributed Search in Unstructured Peer-to-Peer Networks ........................................... 394
  Li Sa, Yongsheng Ding

Preliminary Research on Grid-Based Remote Sensing Image Distributed Processing ........................................... 398
  Jiakui Tang, Aijun Zhang, Shengyang Li

Characterizing PPStream across Internet ............................................................................................................. 403
  Jinkang Jia, Chunxi Li, Changjia Chen

A Differentiated Service Based Incentive Mechanism in P2P File-Sharing Systems ........................................... 409
  Qiubo Huang, Shaoyin Huang, Chuanshan Gao

Parallel Cache Model Based on Grid Memory ...................................................................................................... 415
  Qingkui Chen, Lichun Na

Dynamic Power Management Based on Wavelet Neural Network in Wireless Sensor Networks ...................................... 421
  Yan Shen, Bing Guo

Connection Pattern-Based P2P Application Identification Characteristic ........................................................................ 427
  JinSong Wang, Yan Zhang, Qing Wu, GongYi Wu

High Bandwidth Anomalies in Cluster and Grid Data Transfer ............................................................................. 432
  Carlos Barrios-Hernández, Yves Denneulin, Michel Riveill

Processing Optimization for Injection Plastic Molding on Mold Design Grid ..................................................... 439
  Zhendong Cui, Xicheng Wang, Zhijie Li

Research on Traffic Information Service Grid Based on GT4 ................................................................................ 445
  Cuihua Tian, Guiran Chang, Xiaoxing Gao, Chuan Zhu, Cuihua Tian, Lijun Liu, Hongsheng Wang, Wei Jia, Xiaoxing Gao, Wei Yang, Zhenhua Tan

Research on Grid Resource Discovery Mechanism Based on Mobile Agent ....................................................... 451
  Miao Tian, Bo Jiang

Design of a Grid-Based Geo-computation Data Infrastructure ................................................................................. 455
  ZhenChun Huang, GuoQing Li, Yi Zeng

Research of the Apriority Policy-Based Multi-hop BFS Search Algorithm in P2P Network ........................................ 461
  Zhe Chen, Shize Guo, Yixian Yang, Kangfeng Zheng

On the Line Card Collection Model for Bandwidth Utilization and Latency Measurement in High-Speed IP Networks .......................................................... 467
  Yi Zhang, Hong Tang, Jianru Yin

Detecting and Blocking Malicious Traffic Caused by IRC Protocol Based Botnets .............................................. 475
  Zhenhua Chi, Zixiang Zhao

A Non-repudiable Protocol for Secure Messaging ................................................................................................ 480
  Hao Wang, Yuyi Ou, Jie Ling, Xiaotao He, Lu Liang, Xiang Xu
Research on Information Retrieval Based on Keywords Relationship and Past Retrieval Records in P2P Networks ................................................................. 485
Xianfu Meng, Yue Gong

Study on the E-learning Grid Construction for Higher Special Education ................................................. 492
Chun-lian Li, Yu Sun, Shu-fan Zhuang

A Resource Trade Model Based on Trust Evaluation for Grid Computing .............................................. 496
Lulai Yuan, Zongjian He, Guosun Zeng

Network Traffic Prediction Algorithm and Its Practical Application In Real Network ......................................................... 502
Jun Lv, Tong Li, Xing Li

VOLUME 2

Analysis on Routing Convergence in Optical Network ........................................................................... 508
Ning Zhang, Hong Bao, Aibo Liu

A Delay Critical Value in TCP Fluid Control ......................................................................................... 514
Hong-yong Yang, Qun-san Xu

Collision Avoidance Multiple Access in Wireless Sensor Networks .............................................. 519
Jianwei Wang, Yuping Zhao, Dong Wang, Timo Korhonen

A Novel Algorithm of Channel Resource Allocation in IEEE 802.11 WLAN ........................................ 525
Yanbing Liu, Congcong Zhai, Shixin Sun

INTERNATIONAL WORKSHOP ON PERFORMANCE ANALYSIS, MODELLING
AND ARCHITECTURE (PAMA 2007)

Modeling and Performance Analysis of Self-Similar Traffic Based on FBM ........................................ 530
Xianhai Tan, Yuanhui Huang, Weidong Jin

Modeling and Performance Analysis of LFSN ...................................................................................... 536
Xianhai Tan, Ying Hu, Weidong Jin

The Architecture of Mobile Virtual Environment ................................................................................... 542
Peng Lv, Yuebin Bai, Jihong Ma, Yanwen Ju, Depei Qian

Performance Study of Cryptographic Storage Area Network ...................................................... 548
Tao Cai, Shiguang Ju, Junjie Zhao, Wei Zhong

Design and Implementation of a Manageable IPv6 Wireless Multicast Platform .................................... 553
Zhi-teng Huang, Zh-ji Li, Xiao-we Zhou

Design and Evaluation of Large Scale Loosely Coupled Cluster-Based Distributed Systems ......................... 559
Kenji Sakamoto, Makoto Yoshida

Two Methods to Enhance the Master Thread’s Performance in SMT Chip ........................................... 565
Pengyong Ma, Shuming Chen, Xiao Hu

A Service Selection Model with Multiple QoS Constraints on the MMKP ......................................... 571
Hefeng Cao, Xingzhi Feng, Yang Sun, Zhiwei Zhang, Quanyuan Wu

Research and Implementation on Event Notification Service of ForCES Routers ................................ 577
Wengping Zhang, Weiming Wang, Ligang Dong
Jdib: Java Applications Interface to Unshackle the Communication Capabilities of InfiniBand Networks ................................................................................................................... 583
  Wan Huang, Hongwei Zhang, Jin He, Jizhong Han, Lisheng Zhang

A Performance Study of Java Communication Stacks over InfiniBand and Gigabit Ethernet ................................................................. 589
  Hongwei Zhang, Wan Huang, Jizhong Han, Jin He, Lisheng Zhang

Network Traffic Emulation for IDS Evaluation ................................................................. 595
  Wang Yang, Jian Gong, Wei Ding, Xiong Wu

Modeling and Verification of Web Services Composition Based on CPN .................. 600
  Hui Kang, Xiuli Yang, Sinmiao Yuan

The Research of a New Web Server Cluster Architecture Supporting QoS ............ 605
  Wu Yang, ShuangQing Li, DaiJie Cheng

Modeling and Performance Evaluation of Hybrid Storage I/O in Data Grid .............. 611
  Zhaobin Liu, Haitao Li

An Immune Algorithm Based Node Scheduling Scheme of Minimum Power Consumption and No Collision for Wireless Sensor Networks ......................................................... 617
  Weilian Xue, Zhongxian Chi

IIPS-ICC: An Intelligent IP-Surveillance Platform Using Interactive Camera-Handoff Control ...............................................................................................................................623
  Chung-Ming Huang, Chia-Ching Yang, Chung-Wei Lin

Implementing Atomic Section by Using Hybrid Concurrent Control ...................... 629
  Lei Zhao, Yu Zhang

A New Approach for Multi-device User Interface Design ............................................. 635
  Xudong Lu, Jiancheng Wan, Lei Lu

INTERNATIONAL WORKSHOP ON FRONTIER OF PARALLEL AND DISTRIBUTED SYSTEM (FPDS 2007)

MSF: A Session-Oriented Adaptive Load Balancing Algorithm........................................... 641
  Yijiao Chen, Xicheng Lu, Zhigang Sun

Scheduling the Asynchronous Fixed-Priority tasks with Preemption Threshold .......... 648
  XiaoChuan He, Yan Jia

Optimizing Power-Aware Routing Using Zone Routing Protocol in MANET ............. 654
  Kyoung-Ja Kim, Hyun-Woo Koo

OSPF Traffic Routing Protocol in Hybrid Network ..................................................... 660
  Ahmed Mahmoud Abo Ghazala, Ayman El-Sayed

QoS Multicast Routing Algorithm Based on QGA ...................................................... 667
  Niansheng Chen, Layuan Li, Zongwu Ke

Decision Tree Algorithm based on Sampling ................................................................. 673
  Xudong Song, Xiaolan Cheng

Adaptive Packet Dropping: An Algorithm for Fair Bandwidth Sharing .................. 679
  Changqing An, Shijin Kong, Jiahai Yang

A Web Page Segmentation Algorithm Based on Iterated Dividing and Shrinking ....... 685
  Jiuxin Cao, Bo Mao, Junzhou Luo
On Some Results of Regular Digraphs as Coset Graphs and Their Applications
Wenjun Xiao, Mingxin He, Wenhong Wei, Weidong Chen

A Rapid Algorithm to Find Replacement Services for K-Shortest Path Problem with QoS Constraints
Jianqiang Hu, Xingzhi Feng, Zhiwei Zhang, Quanyuan Wu

Similarity Measurement of Web Sessions by Sequence Alignment
Chaofeng Li, Yansheng Lu

Handheld Device Oriented Adaptation Disposal for Web Access
Baolin Liu, Shuai Xin, Liang Aimin, Tieshuai Li

TLDNS: A Distributed File System Based on the Layered Structure
Lei Wang, Chen Yang

MBF: A Real Matrix Bloom Filter Representation Method on Dynamic Set
Jiacong Wang, Mingzhong Xiao, Yafei Dai

Management Location Service - to Auto-Configure Network Nodes with Domain Managers
Nan Guo, Tianhan Gao

A Constrained Maximum Frequent Itemsets Incremental Mining Algorithm
Han Wang, Lingfu Kong

Allocating Tasks in Multi-core Processor Based Parallel Systems
Yi Liu, Xin Zhang, He Li, Depei Qian

Distributed Collaborating System Design via Electronic Institutional Calculus
Guoyong Cai, Ji Gao, Junyan Qian, Lingzhong Zhao

Gingko: Correlating Causal Paths in Distributed Systems
Zhihong Zhang, Dan Meng, Jianfeng Zhan, Lei Wang, Yi Jin, Yu Wen, Hui Wang

QoS of Timeout-Based Self-Tuned Failure Detectors in iSCSI
Guang Yang, JinLi Zhou, Gang Liu

Design and Realization of CGI in Embedded Dynamic Web Technology
Tian-huang Chen, Jia-xi Huang

Research on Window-Constrained Constant Bandwidth Server to Support Adaptive QoS
Xiangbin Zhu

Building IPsec VPN in IPv6 Based on Openswan
Lian Liu, Wen-mei Gao

Opinion Mining in E-learning System
Dan Song, Hongfei Lin, Zhihao Yang

Exception Handling Policies for Composite Web Services and Their Formal Description
Qin Lu, Weishi Zhang, Bo Su, Xiuguo Zhang

Research of Cluster Parallel Computing Model Based on Mobile Agent
Meijing Liu, Bo Jiang

Improved Algorithm and Simulation of the Provision Refrigerating Unit
Zhi-bin He, Jun-dong Zhang, Yu-qing Sun, Hong Zeng, Hui-bing Gan

Cryanalysis on a Nonrepudiable Threshold Proxy Signature Scheme with Known Signers
Hongguang Xiao, Zuowen Tan, Jian Wang
Experimental Views on Neighbor Selection in BitTorrent .......................... Yinchun Lei, Litang Yang, Qi Jiang, Chanle Wu

Bandwidth Allocation Mechanism of ForCES Transport Mapping Layer Based on TCP/IP .................................................. Jianjun Chen, Weiming Wang, Bin Zhuge

Distributed Scheduling Strategies for Processing Multiple Divisible Loads with Unknown Network Resources .................................. He Li, Guangzhong Sun, Yinlong Xu

An Optimal Algorithm to Fetch DHT Routable ........................................... Yong-xiang Zhao, Chang-jia Chen

An Abstract Owner Resource Management Model Based on Auction Mechanism ........................................... Yanbing Liu, Yi Jian, Hong Tang

A Log Analysis Audit Model Based on Optimized Clustering Algorithm ........... Hui Yu, Xingjian Shi

INTERNATIONAL WORKSHOP ON INTELLIGENT COMPUTING AND IMAGE PROCESSING (ICIP 2007)

An Agent-Based Policy Aware Framework for Web Services Security .................. Jian-Xin Li, Bin Li, Liang Li, Tong-Sheng Che

An Efficient Fine-Grained Parallel Genetic Algorithm Based on GPU-Accelerated ........ Jian-Ming Li, Xiao-Jing Wang, Rong-Sheng He, Zhong-Xian Chi

A Self-Evolutionary Method for Service Emergence in Pervasive Computing Environments .............................................. Hongbin Sun, Yongsheng Ding

A New Video Compression Method for Surveillance Network .......................... Xianping Fu, Dequn Liang

A Digital Signature Schemes without Using One-Way Hash and Message Redundancy and Its Application on Key Agreement .......................... Hua Zhang, Zheng Yuan, Qiao-yan Wen

Adaptation Method for Level of Detail (LOD) of 3D Contents ........................... Hakran Kim, Yongik Yoon, Hwajin Park

Feature-Based Self-Synchronous Audio Watermarking Technology .................. Xiaoming Zhang, Xiong Yin

Security Model Based on Mobile Agent System ........................................... Shuhong Ren, Bo Jiang

Immune-Inspired Collaborative Filtering Technology for Rating-Based Recommendation System ........................................ Xun Yue, Quan-zhong Li

Applying IoC and AOP to the Architecture of Reflective Middleware .................. Ju Ke, Bo Jiang

Transmission Theory of the Risk Neural Network ....................................... Cunbin Li, Kecheng Wang

A QoS Model of Next Generation Network Based on MPLS ............................ Na Lin, Hongman Qi
An Improved Kademlia Protocol in a VoIP System
Xiao Wu, Cuiyun Fu, Huiyou Chang

INTERNATIONAL WORKSHOP ON DATA MANAGEMENT AND INFORMATION SYSTEM (DMIS 2007)

A Flexible Schema Method to Model the Web Data
Zhiqiang Zhang, Qi Guo

An Algorithm of Similarity Mining in Time Series Data on the Basis of Grey Markov Scgm(1,1) Model
Guoqiang Xiong, Qingjing Gao

The Task Distribution and Scheduling of the Parallel Delivery System for Massive Databases
Gong Yue, Wang Yuzhuo, Xu Zhanbo, Ge Shan, Zhao Xin, Fu Huixia

Dynamic Variable Ordering Based Concurrent Search for Distributed CSPs
Chunhui Liu, Jigui Sun, Jian Gao

Information Extraction Incorporating Paragraph Feature and Hidden Markov Model
Na Liu, Mingyu Lu, Huanling Tang

Ontology Based Sharing and Services in E-learning Repository
Xin-juan Zhu, Xian-Feng Li, Wei Guo

RISC3202: A Software Configuration Dual-Issue/Dual-Core Microprocessor
Yingbiao Yao, Bin Wang, Jianwu Zhang, Qingdong Yao

Research on Software Component Adaptation Based on Semantic Specification
Xiong Xie, Weishi Zhang

A Correctness Criterion for Transaction Management in Loosely Coupled System
Yubin Guo, Jianqing Xi, Deyou Tang, Ximing Li

A Modeling of Software Architecture Reliability
Jun Wang, Weiru Chen, Jun Liu

A CCS Based Model for Describing and Verifying the Behavior of Web Service
Zhiying Cao, Li Bao, Weishi Zhang

The Research on the Usage of Business Process Mining in the Implementation of BPR
Yi-wu Xie, Xiao-wan Li, Yan Chen

Research on Store XML Data in Relational Database Based on XML Schema
Yi-wu Xie, Chen-yang Wang, Zhi-ying Cao, Yan Chen

Ontology-Based Web Data Integration Architecture Modeling and Implementation
Guan-yu Li, Wei-li Zhang, Huan-zhong Geng

Ontology-Based Query System Design and Implementation
Guan-yu Li, Sui-ming Yu, Sha-sha Dai

Research and Realization of Personalized Search Engine Based on Ontology
Yong Li, Guan-yu Li

A Co-training Approach Based TEF-WA Technique
Huanling Tang, Mingyu Lu, Na Liu
The XML-Based Information Extraction on Data-Intensive Page

Yanheng Li
