## TABLE OF CONTENTS

### Volume 1

### KEYNOTES

- The Challenges Of The Advance Control in a Modern Foundry Fab
  
  C.P. Lee

- The Opportunity and Challenge of ENG-CIM Technology for Semiconductor Manufacturing
  
  J. Mou

- Next Generation Factory for Agile Manufacturing
  
  M. Homma

### ABSTRACTS

- Airborne Molecular Contamination Monitoring in the Substrate Carrier (FOUP) for 300mm Fab by Ion Mobility Spectrometry with Adixen POD Control Station (APCS)
  
  H. Kambara

- Model-Based Control for Improved Uniformity in Low-Pressure Chemical Vapor Deposition
  
  T-Y. Chen, L-C. Lin, J-C. Jeng, A-J. Su, H-P. Huang, C-C. Yu

- Cross-Wafer and Cross-Die CD Control in a High-Mix Environment
  
  T. Hoogenboom, M. Pieters, J. van Schoot

- APC Solution Library for Fast Solution Delivery to Advanced Technology
  
  C. Song, M.Y. Hung, B.C. Chen, J. Mou

- Tool Quality Assurance through Multivariable FDC Application
  
  J.Y.C. Chang

- An Artificial Neural Network Virtual Metrology Application with Local-Scope-Based Clustering in Photolithography Process
  
  P.F. Tsai, P.T. Chen, S. Liu, R.Y. Lin, N. Kuo

- Defect Reduction for Copper Chemical Mechanical Planarization (CMP) Process by Run-to-Run (R2R) Automated Process Control (APC) in 300mm High Volume High Mixed Production
  
  S.K. Wang, J. Tristan, V. Govindarajulu, M. Ryskoski, W.M. Chan, S. Kumar, C.P. Lim

- Effective Monitor and Prevention for Contact Etch Stop Using Health Index System
  
  D. Lin, J. Wei, A.C. Wei, G. Lee, N.T. Lian, T.H. Yang, K.C. Chen, J. Kue

- UPCS: A Solution Towards Fab-Wide Advanced Process Control
  
  J. Lin, C. Peng

- Sensor-Aided Statistical Process Control on HDP Process by Using Optical Emission Spectrometer
  

- Real-Time Analysis of Ultraviolet-Induced Damage for HDP-CVD Process by APC Control
  

- The Construction and Application of a Statistical Model in Virtual Metrology
  
  S-C. Wang, S.R. Wang, C.C. Chen, H-J. Luo

- Data Compression Techniques for APC/AEC Application
  
  Cheng-Jer Yang, Shu-Ching Yang, Hung-Wen Chiu, Tings Wang

- PHM (Prognostic Health Management) System – The Future APC/FDC
  
  C. Sun, K. Nguyen

- EES Data Framework for High Quality and Mass Volume Realtime Data in Semiconductor Manufacturing
  
  J-R. Lee F. Kim, S-O Kim
Process Monitoring and Diagnosis using TOOL.web Solutions
S. Tseng, K. Zou, C-P. Huang, K.C. Lin, S. Diamant, U. LevAmi

Chiller System Optimization with Limited Control Variable in the Producing Semiconductor Plant
W-Y. Chang, T-C. Wang

CD Bias Prediction for Polysilicon Etching Using Real-Time Tool Data
C-W. Lai, M-W. Lee, A. Wei, C.E. Hsu, C. Peng

Electrical Gate Performance Improvement with Feed-Forward And Feedback Control
P. P. Lau, C. K. Wong, R. Shankar, S. Y. Ling, and C. P. Lim

Factory-Wide Applications and Deployment Real-Time Load Balancing in EDA
S. Kumar

Dynamic Neural ControllerTM as an E-diagnostic Tool
W. Chan, A. Carlson, J. Card, W. Martin, C. Beal, G. Boone, A. Wong, D. Kelly

e-Diagnostics: A Practical Approach to Failure Prevention
P. Gaudet, J. Arruda, C. Harris, A. Garland-Brooks

Real-Time Monitor of Wafer Positioning in Semiconductor Processes
S. Tso, R-J. Tung, S-C. Yang, H-W. Chiou, T. Wang

Advanced FDC Monitoring/Prediction System Via DMLD Approach
C.Y. Kuo, T.Z. Lin, Y.Z. Tian, S.H. Gau, C.C. Chen

Wafer-to-Wafer Virtual Metrology Applied on Critical Deep Trench Process
Y-J. Chang, C-T. Chang, C-Y. Kuo, T-C. Lin, C-C. Chen

Implementing Interface A Operational Performance Monitoring
F. Kaplan, P. Hallesy

The Effect of Laser Fluences and Substrate Temperature on Excimer Laser Deposition of AlN Thin Film on Si(100)
M. C. Shih, C. W. Liang, S.C. Wang, and W. H. Lan

Fab-wide Virtual Metrology and Feedback Control
Aftab Khan, James Moyne, and Dawn Tilbury

On Characterizing Device Electrical Property in the Advanced Semiconductor Manufacturing Processes
H-W. Chiou, T. Wang

Small Lot Manufacturing Logistics and the Impact on Tool Throughput
P. van der Meulen

Membranes Technology Integrated Application at Ultra-Pure Water (UPW) System
A. Wang

Application of Integrated Process Metrology System on PVD Processes for Real-time Fault Detection
S-W. Li, F. Tsao, T. Wang, J-Y. Chang

Recipe and Parameter Management - Learnings, Barriers, and Next Steps
L. Rist

Applying Interface A-Enabled Equipment for Virtual Metrology
G. Crispieri, R. Willmann

Advancing Factory-Wide Data Quality for APC Applications
H. Wohlwend, G. Crispieri

A Novel FDC Method Based on a Subclass of Bayesian Networks with a Case Study on Reactive Ion Etching
J. Wong, N. Abe, S. Merugu

Photoresist Stripping by Atmospheric Pressure Plasma Process
C-F. Chang, C-F. Huang, T-Y. Liu, C-C. Chang, C-H. Lin, J-R. Chen
Practical Implementation of Multivariate Fault Classification Methods on Implanter Tools in a HVM Environment .......................................................... 128
C. Fleming, P. Holland, J. Mao, M. Trombley, R. Ong

Performance Analysis the Effects of Metrology Delay to Run-To-Run Control .................................................. 130
M-F. Wu, C-H. Lin, D. Wong, S-S. Jang, S-t. Tseng

A. Weber, P. McGuire

The Advanced Process Control Applications in Front-End Etch ............................................................. 136
C-W. Hsu, J-H. Lai, Y.J. Cheng

Monitoring PVD Plasma Metallization for Wafer-Damaging Faults ...................................................... 137

PRESENTATIONS

Airborne Molecular Contamination Monitoring in the Substrate Carrier for 300mm Fab by Ion Mobility Spectrometry with Adixen Pod Control Station .......................................................... 139
H. Kambara

Model-Based Control for Improved Uniformity in Low-Pressure Chemical Vapor Deposition ............ 196
L-C. Chiang

Cross-Wafer and Cross-Die CD Control in a High-Mix Environment .................................................. 227
T. Hoogenboom, M. Pieters, J. van Schoot

APC Solution Library for Fast Solution Delivery to Advanced Technology ........................................... 253
C. Song, M.Y. Hung, B.C. Chen, J. Mou

Tool Quality Assurance through Multivariable FDC Application ...................................................... 268
J. Chang, J. Mou, W.Y. Cheng, T.H. Wang

An Artificial Neural Network Virtual Metrology Application with Local-Scope-Based Clustering in Photolithography Process .............................................................. 286
P. Tsai, S. Liu, C. Lee, S.C. Yang, R.Y. Lin

A Solution Towards Fab-Wide Advanced Process Control ............................................................. 322
C. Peng, J. Lin

Sensor-Aided Statistical Process Control on HDP Process by Using Optical Emission Spectrometer .......................................................... 337

The Construction and Application of a Statistical Model in Virtual Metrology .................................... 359
S-C. Wang, S.R. Wang, C.C. Chen, H-J. Luo

Data Compression Techniques for APC/AEC Application ............................................................. 384
C-J. Yang, S-C. Yang, H-W. Chiu, T. Wang

Prognostic/Diagnostic Health Management (PHM) System - The Future APC/FDC .......................... 406
C. Sun

EES Data Framework for High Quality and Mass Volume Realtime Data in Semiconductor Manufacturing .................................................. 447
J. Lee, F. Kim, S. Kim

Process Monitoring and Diagnosis using TOOLweb Solutions ............................................................. 471
S. Tzeng

Real-Time Load Balancing in EDA ...................................................................................... 502
S. Kumar

Volume 2

Dynamic Neural Controller™ as an E-diagnostic Tool .......................................................... 525
W. Chan, A. Carlson, J. Card, W. Martin, C. Beal, G. Boone, A. Wong, D. Kelly
