Mixed l2 l /H 8 8 - Estimation for Uncertain Discrete-Time Systems
C. Ma, H. Xia, W. Jiang, L. Wang

Application of Evolutionary Neural Networks in Integrated Navigation System
J. Liu

Cyclic Motion Generation of Multi-Link Planar Robot Performing Square End-Effector
Trajectory Analyzed via Gradient-Descent and Zhang et al’s Neural-Dynamic Methods
K. Chen, L. Zhang, Y. Zhang

Research on Algorithms for Association Rules Mining Based on FP-tree
Z. Zhou, B. Yang, Y. Zhao, W. Hou

Multi-robot Cooperative Pursuit Based on Combinatorial Auction Mechanism Under Dynamic Environment
Z. Cai, L. Sun, H. Gao, P. Zhou

Multi-airport Flight Route Choice Research Based on Decreasing Scheduled Flight
S. Xu, F. Dai

Identification of Nonlinear Load Power using Wavelet Neural Networks
M. Gao, F. Sun, Y. Shi, J. Liu, H. Liu

Mobility Performance Evaluation of Lunar Rover and Optimization of Rocker-bogie Suspension Parameters
S. Li, H. Gao, Z. Deng

An Omni-directional Rolling Spherical Robot with Telescopic Manipulator
Y. Zheng, H. Sun, Q. Jia, C. Shi, K. Zhao

Trajectory Planning of Space Robot System for Reorientation after Capturing Target
S. Hu, L. Xue, W. Xu, W. Qiang, B. Liang

The Application of Chaotic Encryption in Industrial Control Based on ZigBee Wireless Network
Q. He, Q. Qi, Y. Zhao, W. Huang, Q. Huang

Research on the Problems of Satellite Borne FPGA Based Finite State Machine
Y. Liu, Z. Sun, D. Zhao

The Embedded Flight Control System for UAVs
X. Yu, J. Zhou, F. Zhou

Design and Application of PID Controller Based Improved Artificial Immune Algorithm
Q. Wang, R. Wang, J. Chen

Altitude Control System of Autonomous Airship Based on Fuzzy Logic
J. Guo, J. Zhou

Finite-time Control for a Class of Discrete-time Systems with Time Delay
Y. Shen, H. Yu, J. Jian

Catastrophe of Submarine Near-surface Motion
X. Wang, Y. Sun, H. Mo

Adaptive Backstepping Neural Network Control of Electro-Hydraulic Position Servo System
Z. Xu, J. Min, J. Ruan

Research on Three-Axis Six-DOF Shaking Table Based on Rapid Prototyping of DSP Algorithms Using SIMULINK
G. Shen, D. Cong, J. He, J. Han

Researches on the FCE Based on Predictive Control with BP Neural Network
H. Liang, Q. S. Hai, Q. Wang, Q. Rui
Pre-impact Configuration Planning for Capture Object of Space Manipulator ......................................................... 186
P. Cong, Z. Sun

Centroid Registration Difference Algorithm for Detecting Spatial Moving Targets .............................................. 192
X. Liu, B. Hu, X. Liu, X. Duan, C. Wei

Texture Classification Using Wavelets with a Cluster-Based Feature Extraction ................................................... 197
G. Yu, S.V. Kamarthi

Minimum Variance Input Signal Design for Closed-Loop Identification ................................................................. 202
L. Dou, Q. Zong, L. Sun

An Edge Detection Method for Infrared Image Based on Grey Relational Analysis ...................................... 208
D. Feng, X. Wang, Y. Liu

Blind Separation for Blurred Images Based on the Adaptive Nonholonomic Natural Gradient Algorithm ........ 213
Y.L. Niu, J.C. Ma, Y. Wang

Gaussian Particle Filtering Based on Coarse and Fine-scale Sampling on Target Tracking Algorithm ............. 217
Y. Zhai, Z. Jing

Application of Wavelet Transform and Data Fusion Algorithm on Mixing and Supplying Glue System ........ 221
D. Liu, J. Cao

An Improved Kernel Method for Fault Diagnosis ................................................................................................. 226
J.F. Cui, G.S. Guo, M.X. Mao, S.X. Liu

Near Field Doppler Modeling and Simulation for Air Target .............................................................................. 230
X. Pan, Z. Cui, L. Xu

Study and Simulating of Adaptive Array Processing with Effect of Channel Uniformity .................................. 234
J. Xiang, L. Guo, H. Li

Study and Application of FLMS Recursive Algorithm Based on Space-time Adaptive Processing ................ 238
J. Xiang, L. Guo, L. Wang, J. Zhang

A New Algorithm Based on RLS for Voiced/Unvoiced Segmentation ................................................................. 242
W. Xie, Y. Wang, C. Cai

A Novel Region-based Image Retrieval Technique using Spacial Color Distribution Feature ..................... 246
Z.Y. Zeng, L.H. Zhou

Bit Allocation Algorithm in JPEG2000 Based on Wavelet Transform ............................................................... 250
X. Huang, G. Wang, Y. Yu, K. Gong, C. Liu

The Distortion Analysis of the Single Side Band Method for Parametric Loudspeaker Based on Orthogonal Envelope Detection ............................................................................................................. 253
M. Chen, X. Qin, L. Xu, Y. Du, L. Xu

Machine Performance Assessment Using Gaussian Mixture Model (GMM) ...................................................... 258
G. Yu, J. Sun, C. Li

Face Features Detection and Representation by Morphological Reconstruction and Linking .......................... 263
F. Yi, X. Feng, Z. Qu

Effect of Micro-Motion Dynamics on the Infrared Radiation of Space Objects .................................................. 269
F. Li, X. Xu

Simulation Analysis on the Influence of Laser Source on Output of IFOG
X. Li, C. Zhang, Z. He

Optimal Sliding Mode Variable Structure Control for Load Simulator
J. Fan, Z. Zheng, M. Lv

Logic-based Switching Control Strategy Design of a Spinning Missile with Blended Lateral Jets and Aerodynamic Fins
F. He, K. Ma, Y. Yao, J. Ma

Integral Sliding Mode Control for a Class of Nonlinear Mismatched Uncertain Systems
Q. Zong, Z. Zhao, L. Dou, L. Sun

Use Roll Actuator to Reduce Coupling of BTT Missile
Y. Yu, J. Zhang

Decoupling Control for Airspeed and Flight Path Angle Using an Improved Total Energy Control Algorithm
Q. Zhang, C. Guo, W. Ma, Z. Ren

A Polynomial Solution to the Kalman-Yakubovich Matrix Equation
J. Wang, W. Wu

Parameters Self-adjusting Fuzzy PID Control in Magnetic Levitation System
J. Ma, W. Fan, F. He

Identification of Terrain Mechanical Parameters for a Six-wheeled Lunar Rover
L. Yuan, T. Liu, Z. Zhao, W. Ge

Robust Control of the Inverted Pendulum
J. Zhang, L. Xu

Research on and Development of Embedded Module Network Numerical Control
B. Wang, J. Zhang, S. Xin, Z. Zhou

Fault Diagnosis of Power Circuits Based on SVM Ensemble with Quantum Particles Swarm Optimization
Z. Luo, B. Ye, L. Cai, W. Zhang

Multimodal Recognition Fusing Ear and Profile Face Based on KPCA
X. Xu, Y. Zhao, X. Pan

An Automatic ROI Coding Algorithm Based on Multi-resolution Target Detection
S. Ye, Y. Gu, Y. Zhang

SPIHT Coding Image Transmission Based on Resynchronization Structure
S. Wang, Y. Zhang

A Coarse-to-Refined Matching Method for Multisensor Remote Sensing Image Registration
Y. Guo, Y. Zhang, Y. Gu, W. Zhong

A New Learning Algorithm for RBF Neural Networks
C. Man, X. Yang, L. Zhang

Research on Coordinated Attack Strategy of Networked Smart Sub-munitions based on Ant Colony Algorithm
W. Li, W. Zhang

Application of Improved Artificial Immune Network Algorithm to Optimization
Y. Zhao, Y. Yin, D. Fu, Z. Zhou, P. Yin, J. Wang

Fatigue Life Prediction of Key Structural Parts in Aeronautics and Astronautics Based on Fuzzy Theory
X. Wang, N. Hong
Implicit Surface Reconstruction from 3D Scattered Points Based on Variational Level Set Method

H. Liu, X. Wang, W. Qiang

Research on Optimization Efficiency of Genetic Algorithms

S. Liu, G. Li, J. Song, T. Sun

Ratio-based Collaborative Filtering Algorithms

Y. Liu, Z. Wang, M. Li

Application of SVM to Engine Parameter Collector Fault Diagnosis

B. Qin, M. Chen, H. Zhang

Multi-Level Fault Diagnosis in Satellite Formations using Fuzzy Rule-Based Reasoning

A. Barua, K. Khorasani

The NEAR Optimal Two-Impulse Analytical Solution of On-Orbit-Servicing Spacecraft for Fly-Around Orbit Reconfiguration

F. Wang, X. Chen, J. Wang, X. Cao

J2 Perturbation Effect on the Deployment of Tether-Assisted Deorbit System

P. Zheng, X. Cao, S. Zhang

Design and Selection of Aluminum Foam for Impact Damper of Legged Lunar Lander

R. Liu, C. Luo, Z. Deng, C. Wang

Modeling and Fault Simulation of Propellant Filling System Based on Modelica/Dymola

M. Gao, N. Hu, G. Qin, L. Xia

Attitude Tracking Control of On-Orbit-Servicing Spacecraft Based on Eigenaxis Maneuver

F. Wang, X. Chen, X. Cao

Finite Frequency Positive Real Control of Singularly Perturbed Systems

P. Mei, C. Cai, Y. Zou

Override Control of Furnace Combustion System

W. Huang, Y. Zhao, Q. Qi, Q. Huang, Q. He, W. Xie

A Family of Spherical Mobile Robot: Driving Ahead Motion Control by Feedback Linearization

D. Liu, H. Sun, Q. Jia

Decoupling Control for Steam and Water System

W. Huang, Q. Huang, Q. He, Y. Zhao, Q. Qi, L. Dai

Nonlinear Autopilot Design for Endoatmospheric Interceptors with Dual Control Systems

C. Shao, D. Zhou

A Multi-server Video Monitor System Based on Stream-Media Communication Technology

Nonlinear Control of Vaporized Cooling Level

W. Huang, Q. He, Q. Huang, Q. Qi, Y. Zhao, W. Li

Identification on Dynamic Inverse Model for Sensor Based on Genetic Neural Network

D. Zhang, G. Hu

Optimization of Sliding Mode Controller for Double Inverted Pendulum Based on Genetic Algorithm

W. Huang, Q. Qi, Q. He, Q. Huang, Y. Zhao, L. Xiao

Index Approach Law Based Sliding Control for A Hypersonic Aircraft

H. Li, W. Sun, Z. Li
A Research on Configuration CNC System Based on Component Technology .............................................................. J. Bai, X.S. Qin, M. Li, M.J. Jiang

Robust H8 Filtering for Uncertain Systems Based on Sampled Measurement ........................................................... C. Ma, W. Xie, B. Xi, C. Wang

Model System Design for Small-size Unmanned Helicopter Based on Moment Theory, Blade Element Theory and FlightLab Software .............................................................. X. Wang, Y. Huang

Blended Control System Design for Agile Missile with Lateral Jets and Aerodynamic Surfaces ........................................... Y. Bi, Y. Yao, K. Ma

Reusable Launch Vehicle Lateral Control Design on Suborbital Reentry ........................................................................ L. Wu, Y. Huang, C. He

Modeling and Simulation of Enhanced Ground Proximity Warning System .............................................................. D. Song, W. Li, Y. Zhou

Probability Based Collision Monitoring Method Within Formation Flying .............................................................. J. Wang, J. Zhang, X. Cao

Design and Realization of Small Integrated Navigation System Based on MIMU/GPS/TAM ............................................. W. Jiang, G. Yi, Q. Zeng, L. Wang

A Design on Moving-Mass Actuated Reentry Vehicle with Predictive Guidance LaW ........................................................ R. Li, W. Jing, C. Gao

A Geomagnetic Positioning Method with Main Magnetic Field ........................................................................................ Y. Kou, W. Xie, R. Liu, C. Wang

Exact Solution to the Relative Orbital Motion in a Central Force Field ........................................................................ D. Condurache, V. Martinusi

Validation of A New Self-alignment Algorithm on A Rocking Base ............................................................................... L. Bai, Y. Qin, F. Wu

Autonomous Navigation for Deep Spacecraft Based on Celestial Objects ................................................................. M. Song, Y. Yuan

Data Fusion of Infrared and Radar for Target Tracking ............................................................................................... A. Zhu, Z. Jing, Y. Li, Z. Cao

Hardware-in-loop Simulation of Autonomous Relative Navigation for Noncooperative Spacecraft .................................... Y. Qiu, B. Guo, B. Liang, C. Li

Reentry Trajectory Planning Optimization Based on Sequential Quadratic Programming ................................................ Q. Zhang, C. Gao, F. Guo, R. Zhang
Research on Planning Algorithm for 2D Flight Pipeline Based on Density Constraint SAS
T. Sun, X. Xie, Y. Qiao ........................................ 842

Real-time Optimal Trajectory Planning with Terrain Avoidance Using MILP
S. Zhang, H. Pei .................................................. 846

Entry Guidance for Common Aero Vehicle
W. Zhou, H. Chen, D. Yang ..................................... 851

The Square Root Unscented Kalman Filter in Spacecrafts Autonomous Navigation
P. Li, S. Song, G.R. Duan ........................................... 857

Asynchronous Fusion Algorithm of Highly Maneuvering Targets
X. Fu, C. Jiang ......................................................... 861

Sliding Mode Control for a Satellite Attitude Tracking System
D. Guo, J. Ly .......................................................... 865

Local Observability of Nonlinear Systems Based on Linearization
X. Wang, P. Cui, H. Cui .............................................. 869

Enhanced LMI Representations for L2 - L8 Performance of Polytopic Uncertain Systems:
Continuous-time Case
J. Wang, W. Wu ....................................................... 873

Robust Reconfigurable Flight Control Based on Control Reallocation for a Tailless Aircraft
J. Ma, W. Li, Z. Zheng, D. Hu ..................................... 878

A Micro-satellite Attitude System Using Sliding Mode Observer and Sliding Mode Controller with Perturbation Estimation
Y. Cheng, B. Jiang, X. Zhang ......................................... 884

Research on Fault-tolerant Control for NCS with Data Packet Dropout
Z. Huo, Z. Zhang ................................................ 888

The Guaranteed Cost Control for Discrete-time Singularly Perturbed Systems
C. Cai, H. Wu, Y. Zou ................................................. 892

Quasi-sliding Mode Variable Structure Control for Trajectory Tracking of Six-wheeled Mobile Robot
L. Yuan, T. Liu .......................................................... 897

Satellite Attitude Tracking Control under Control Saturation
J. Lv, D. Gao, X. Cao ............................................... 902

Robust Adaptive Fuzzy Controller for a Class of Non-affine Nonlinear Systems
J. Wen, C. Jiang, L. Zhou, C. Qian ................................ 907

Remote Sensing Image Compression Based on Orientation-Adaptive Wavelet
T. Li, W. Wu ............................................................... 913

Research on Observation of Slight Debris in Space via Space-based Imaging Radar
G. Xu, X. Cao, S. Fulin ............................................. 916

Research on Wideband TEM Horn Antenna for Ultra-wide Spectrum Electromagnetic Pulse Radiation Field System
Y. Suo, J. Qiu, Y. Yuan ............................................. 921

Modeling of Micro-friction in a Multi-Layer Metal Plate Damper for a Rotor Support System
H. Ao, D. Hao, H. Jiang ........................................... 924

On-orbit Center of Mass Calibration of Satellite Based on Batch Estimation Theory
H. Liao, B. Wang, X. Lin ........................................... 928
Nonlinear Adaptive Control Using Recurrent Fuzzy Models with Stability Analysis .............................................. R. Qi, M.A. Brdys, B. Jiang ......................................................... 933

Adaptive Control System for Separation of Aircraft Motion on Roll and Sideslip .................................................... Y.A. Vershinin .............................................................. 939

Optimal Sliding Mode Control and PLPF Based Disturbance Rejection for High Pointing Servo System ............................................................ M. Li ................................................. 943

Fuzzy Logic Control Based on Genetic Algorithm to Integrated Flight Control for Hypersonic Vehicles .............................................................. H. Li, J. Wang ......................................................... 949

An Extended Kalman Particle Filter Algorithm For HRG-Based Snapdown Attitude System ........................................ B. Shen, G. Yi, Y. Chen, D. Wang, C. Wang ................................................. 954

5-axis Polynomial Spline Interpolation in an Open CNC System ..................................................................... Y. Liu, Y. Wang, Z. Han ......................................................... 959

Adaptive Fuzzy Sliding-Mode Control for Direct Drive Electro-Hydraulic Servo Rocket Rudder .............................................................. W. Su, J. Jiang ......................................................... 964

Design of Portable Testing System for UAV ......................................................................................... Z. Chen, H. Jiang, B. Zhang, J. Luo ......................................................... 969

Research of New Experimental System for Process Control ..................................................................... W. Zhong, X. Zeng, Z. Hu ......................................................... 973

A Novel Structured Mathematical Framework for Parallel Processing in Cooperative Satellite Swarms ............................................................................ A. Haddadi, A. Noroozi, C.J.M. Verhoeven, E.K.A. Gill ......................................................... 976

Approach Maneuver for Fly-around Spacecraft Based on Spiral Trajectory Control ........................................... G. Liu, Y. Liao, Y. Wen ......................................................... 982

Design and Development of an Integrated Test System for Avionics Ground Experiment System .............................................................................. S. Dong, L. Lin ......................................................... 989

Research on Millimeter-wave Radiometer Detection System ........................................................................ J. Qiu, N. Wang, W. Deng ......................................................... 994

A Connectionist Model Algorithm Based on Probabilistic Causal Network .......................................................... S. Dong, P. Lin ......................................................... 997

Mechanical Investigations on High Temperature Oxidation of ZrB2-SiC UHTCs ..................................................... Y. Wang, Z. Wang, Y. Liu, H. Lv ......................................................... 1000

Line-of-Sight Stabilization System Based on Fractional-Order Control ................................................................. L. Wang, M. Ling, D. Wang, Y. Chen, C. Wang ......................................................... 1003

Adaptive Output Feedback Attitude Control of Flexible Spacecraft from Quaternion Measurements ............................................................................. Y. Liu, W. Song, L. Zhu ......................................................... 1007

Finite-time H2 Performance Analysis Considering Target Maneuvers and Guidance Loop Dynamics ........................................................................ D. Ji, Y. Yao, F. He ......................................................... 1011

Autonomous Integrated Navigation Plan for Space Transfer Vehicle ........................................................................ W. Ma, Y. Xu, Y. Bao, B. Yang ......................................................... 1015
Research on Integrated optical Gyroscope .................................................................1020
W. Wang, J. Xia, Y. Xu

Equipping Variable-speed Pumping Source to Reduce Useless Power of Missile-loaded
Hydraulic Actuator ........................................................................................................1025
X. Song, X. Yao, Z. Li, J. Wang

QFT Robust Control of the Continuous Rotary Electro-Hydraulic Servo Motor ..........1030
X. Wang, J. Jiang, Y. Ma, S. Li

Constrained Control Allocation Based on Nonlinear Compensation with Application to
Flight Control ..................................................................................................................1035
J. Ma, W. Li, Z. Zheng, D. Hu

Maximum Crossrange for Hypersonic Boost-Glide Missile ........................................1041
Y. Li, N. Cui

Study on Reliability Growth Models of Repairable System ......................................1047
Q. Han, Y. Zhang, H. Lu

BIT Optimization Design of Airborne Electronic Equipment Based on Reliability ....1051
C. Ma, Y. Wang, W. Zhang, H. Shi

A New Algorithm for Satellite Autonomous Navigation Based on Information Fusion ..1055
Y. Miao, Z. Sun

Modified UKF for Integrated Orbit and Attitude Determination Based on Gyro and
Magnetometer .................................................................................................................1060
Y. Xing, X. Cao, S. Zhang

Propulsion System Sizing for Servicing Spacecrafts ..................................................1064
Y. Qi, Y. Xing, X. Cao

Control of Terminal Engagement Geometry Using Variable Structure Guidance Law with
Impact Angular Constraint ............................................................................................1068
L. Zhang, W. Sun, Z. Zheng

Guidance Law of Impacting Small Bodies Using Zero-Effort-Miss(ZEM) Steering ....1072
S. Zhu, P. Cui, W. Zhou

Research for the Effect of the Saturated Acceleration on the Guidance Precision in
Proportion Navigation ....................................................................................................1077
L. Wang, Z. Jing, A. Zhu, W. Chen

Experimental Investigation on Calibrating High Precision Accelerometer on Two-axis
Table .................................................................................................................................1082
X. Jiang, Y. Liu, B. Su, M. Liu

Periodic Disturbance Restraint Based on Adaptive Finite-dimensional Repetitive Control ..1087
Z. Lu, F. Xu, X. Dai

Adaptive Synchronization of Different Dimensional Chaotic Systems with Unknown
Parameters ......................................................................................................................1091
G. Sun, M. Wang, L. Huang

Study on FDD and FTC of Satellite Attitude Control System Based on the Effectiveness
Factor ...............................................................................................................................1096
Q. Hou, Y. Cheng, N. Lu, B. Jiang

Sensorless Control of Permanent-Magnet Synchronous Motor Based on High-Frequency
Signal Injection and Kalman Filter ...............................................................................1102
Attitude Tracking of a Near-Space Hypersonic Vehicle Using Robust Predictive Control
Y. Du, Q. Wu, C. Jiang, J. Wen

Attitude Control of Unmanned Hypersonic Test Vehicle
X. Wang, D. Feng, Y. Lin

Autonomous Robust Orbital and Attitude Coupling Control of Final Proximity in Rendezvous
W. Chen, W. Jing, X. Xia

Guaranteed Cost Control of the Water Level of Steam Generator Based on T-S Model
X. Zhuo, J. Wang, Z. Feng

A New PSO-PID Tuning Method for Time-delay Processes
B. Yang, W. Li, F. Yang

An Integrated Strategy for Packet Dropout in Internet-based Control System

Combined Attitude Control of Small Satellite using One Flywheel and Magnetic Torquers
M. Chen, S.J. Zhang, F.H. Liu, Y.C. Zhang

Study on the Influence of Rocket Booster to Radar Observation
X. Xia, W. Jing, W. Chen

Dynamic Error Mechanism Analysis of HRG
J. Qi, X. Chen, S. Ren, C. Wang

The Research of Hardware-In-The-Loop Simulation on the Double-module Altimeter of Unmanned Aerial Vehicle(UAV)
P. Bo, J. Feng, Q. Tao, W. Zuo, R. Wang

The Research of Manufacturing Execution System Modeling Based On Colored Petri Nets
J. Hua, H. Sun, T. Liang, Z. Lei

Adaptive Neural Network Backstepping Design for a Class of Nonlinear Output Feedback Systems
L. Long, C. Xie

Adaptive NN Stabilization of Uncertain Nonholonomic Mechanical Systems
J. Wang, M.S. Obeng, X. Wu

A New Robust DTC-SVM for High Performance Induction Machine Drives
Y. Wan, C. Hu, J. Zhao, S. Wan, Y. Wang

Sliding Mode Autopilot and Observer Design for a Supersonic Flight Vehicle
M. Bahrami, B. Ebrahimi, G.R. Ansarifar, J. Roshanian

System Identification of the Double Inverted Pendulum Based on Genetic Algorithm
Q. Qi, W. Huang, Y. Zhao, Q. He, Q. Huang, L. Xiao

Design Method of Algebraic Equivalent Observers for Several Typical Kinds of Controlled Processes
Z. Han, L. Dan

Observer-Based Gain-Scheduled H8 Control for LPV Systems with Time-Varying Delays
J. Wang, W. Yuan

A Low-Cost PC-Based Flight Simulator Development
S. Zhang, J. He, Q. Huang, J. Han

Optimizing RLV Ascent Trajectory Using PSO Algorithms
C. He, X. Chen, L. Wu
FPGA On-Board Computer Design based on Hierarchical Fault Tolerance ........................................1212
L. Xing, Z. Sun, G. Xu

Robust Dynamic Inversion Flight Control Law Design ........................................................................1217
H.B. Chen, S.G. Zhang

Inter-satellite Ranging System Design in Formation ..............................................................................1222
R. Sun, G. Xu, S. Lan

Quadratic EKF Algorithm Enhancements for Low Cost Tightly-coupled AHRS/GPS ..........................1227
L. Xia, J. Wang, Y. Liu

Study on Decoying Effect of Counting ARM by Using Moving Radiation Source ..............................1233
Z. Shi, J. Yang, P. Yue, C. Ji

An Effective Data Processing Method to Eliminate Environmental Disturbance for Strapdown North Finder ..................................................................................................................1238
Z. Deng, Q. Wang, M. Fu, X. Xiao, T. Liu

The Influences of Parameters on Performance of Hybrid Axial Magnetic Bearing ......................................1242
B. Han, B. Liu

Theoretical Study of Effects on Static Characteristics of Orifice Compensation Aerostatic Bearings with Different Structures of Pockets ........................................................................................1248
W. Long, G. Bao

Self-Tuning Control Based on RBF Neural Network Observer in Suppression of Imbalance Vibration of Magnetically Suspended Flywheels ..............................................................................1253
B. Liu, J. Fang, G. Liu

An Estimation Approach for Propellant Sloshing Effect on Spacecraft GNC ........................................1258
K. Dong, N.M. Qi, J.J. Guo, Y.Q. Li

Modal Analysis for Small Satellite System with Finite Element Method ...........................................1263
Z. Bai, Y. Zhao, W. Ma, H. Tian

A Novel Semi-circle Fractal Multi-band Antenna ......................................................................................1268
S. Lin, J. Qiu, H. Ren, C. Yang

Aeroengine Performance Monitoring and Fault Diagnosis Based on Transient Measurements ................1272
P. Zhang, J. Huang

Height Frequency Electro-Hydraulic Vibration Exciter with 2D Valve ..................................................1276
Z. Xu, J. Min, Y. Fang, J. Bai, J. Ruan

Digital Storage System for Newly Twice-Imaging Airborne Camera Device ........................................1280
L. Yan, T.T. Shen, X.H. Duan, Y.K. Wu, S.H. Zhao

Three-Axis Electronic Collision Sensor for Airborne Application ....................................................1284
J. Shiau, W. Luo, L. Lee

Study on Dynamic Decoupling Design by Using INA Method for Cruise Missile ...............................1290
J. Xu, N. Cui, J. Tian, H. Liu

Fuel and Time Optimal Transfer of Spacecrafts Rendezvous Using Lambert’s Theorem and Improved Genetic Algorithm ...........................................................................................................1295
D. Zhang, S. Song, G. Duan

Multidimensional Display System of ATC Radar Data Based on GIS ..............................................1301
Z. Li, X. Liu

In-Flight Route Re-planning for Endurance Reconnaissance Unmanned Aerial Vehicles ..................1306
Y. Zhang, J. Gao
The Integrated Application on Adaptive Control of Unmanned Combat Aerial Vehicles
F. Chen, B. Jiang, K. Zhang

Research on Modelling and Simulation for Aircraft Anti-skid Braking
Z. Ming, N. Hong, X. Wei, E. Zhou

Integrated Guidance and Control for Homing Missiles via Neural Network
B. Zhang, Z. Yu, S. Song

MCMC for Sequential Flight Object Attitude Estimation Based on Perfect Coupling Sampling
J. Zhang, Y. Zhai

Design of GMI Micro-Magnetic Sensor and Its Application for Geomagnetic Navigation
Y. Jiang, J. Fang, X. Huang, Y. Song

Simulation Design of Geomagnetic Aided Inertial Navigation System
H. Feng, Z. Yang, J. Fang

Research of Onboard Trajectory Generation Technology of Terminal Area Energy Management for RLVs
J. Zhang, Y. Huang, L. Wu
